grounds for optimism

For the depressed patient, optimism about the chances of recovery begins with the first visit to the physician who shows an interest in his case. This optimism can be built upon with the aid of modern antidepressant drugs, enabling the physician to help his patient to a more speedy recovery.

In this respect, 'Concordin' often brings an initial elevation of mood within a week—the patient soon has grounds for greater optimism.

'Concordin' is available as tablets in two strengths:

'Concordin'-10 as white, film-coated tablets (marked 'C10') containing 10 mg protriptyline hydrochloride, in bottles of 100 and 500;
'Concordin'-5 as salmon-red, film-coated tablets (marked 'C5') containing 5 mg protriptyline hydrochloride, in bottles of 100 and 500.

'Concordin' offers many advantages for depressed patients these advantages:

- speed of action—improvement often starts within a week
- virtual freedom from sedative activity—the patient on 'Concordin' can continue with normal activities since drowsiness is rare
- no dietary restrictions—'Concordin' is not a MAOI and so the patient can enjoy full freedom in choice of food

diagnosis
comes to a point**

You make your decision — it's not always easy — whether to advise, refer or prescribe. If it's a simple infection, otitis media or tonsillitis for example, you look for a treatment that is reliable, effective and acceptable to the patient.

Very often, it all points to Broxil.

Broxil works. In practice, patients do seem to get better quicker with Broxil. Broxil has an excellent safety record. All you ever need do is take the normal penicillin precautions.

For ENT, upper respiratory tract, skin and soft tissue infections, Broxil has an outstanding record for effectiveness over ten years of practice.

invasion by virus

BY CHARLES GRAVES

15,000,000 people fell victim to the virus between 1918-1919, which proved five times more deadly than all the trench warfare of World War 1.

Charles Graves asks the question: can it happen again? The answer is yes.

In the past two centuries these pandemics have occurred every generation.

Fortunately, the alarm in 1968-1969 was, as the author shows, both historically and medically unnecessary.

REDUCE TRANSFUSION HAZARDS

"Virus hepatitis is now the most important complication of the transfusion of blood and blood products" *Epatologia*, 1966, 12, 527.

VIRUS HEPATITIS CAN NOW BE AVOIDED BY USING PLASMA PROTEIN SOLUTION (P.P.S.) (SEROLOGICAL PRODUCTS) FOR TRANSFUSION.

PLASMA PROTEIN SOLUTION (P.P.S.) (Serological Products) is a solution containing the albumin and stable globulins of human blood. It has been treated by heat to inactivate the agent of serum hepatitis.

INDICATIONS:— Any condition in which reconstituted dried plasma, serum, or synthetic plasma expanders would be used.

ADVANTAGES:—

- 1** _____ PLASMA PROTEIN SOLUTION (P.P.S.) is free from the agent of serum hepatitis. It has been shown to be free from the Australia (AU⁽¹⁾) antigen.
- 2** _____ PLASMA PROTEIN SOLUTION (P.P.S.) is stable at room temperature for five years, and can be kept in any suitable location for emergency use.
- 3** _____ PLASMA PROTEIN SOLUTION (P.P.S.) is in solution ready for *immediate* transfusion.
- 4** _____ PLASMA PROTEIN SOLUTION (P.P.S.) does not interfere with blood serology and can be transfused in emergency *before* blood is taken for grouping and cross-matching.
- 5** _____ PLASMA PROTEIN SOLUTION (P.P.S.) is free from isoagglutinins and can be used regardless of the recipients blood group.

"... plasma protein solution is a very acceptable substitute for reconstituted dried plasma. It possesses the great advantage that transfusion carries no risk of serum hepatitis."

when teen-agers want to know about menstruation one picture may be worth a thousand words

Never are youngsters more aware of their own anatomy than when they begin to notice the changes of adolescence. And never are they more susceptible to misinformation from friends and schoolmates.

To negate half-truths, give teen-agers the facts—using illustrations from charts like the one pictured above. They'll help answer teen-agers' questions about anatomy and physiology. These 8½" x 11" coloured charts of the female reproductive system were prepared by R. L. Dickinson, M.D. and are supplied free by Tampax Limited. Laminated in plastic for permanence, they are suitable for grease pencil marking. And to answer their social questions on menstruation, we also offer 2 booklets; "Let's talk about you", for very young girls, which answers questions that have actually been asked of our Educational Staff, and "Accent on You", which explains menstruation and its part in womanhood for the older girl.

Tampax tampons are a convenient—and hygienic—answer to the problem of menstrual protection.

They're convenient to carry, to insert, to wear, and to dispose of. By preventing menstrual discharge from exposure to air, Tampax tampons prevent the embarrassment due to menstrual odour. Worn internally, they cause none of the irritation and chafing associated with perineal pads.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion enclosed in each package.

Simply write to the address below for your free set of charts and sample booklets. These booklets may then be reordered in any quantity you need for your patients' personal use.

Dorbanex

avoids the
problems
of
conventional
laxative
treatment

With a faecal softener to prepare the way, and just a small dose of peristaltic stimulant completing evacuation, *Dorbanex* avoids the problems of conventional laxative treatment. What difference does the faecal softener make to treatment?

A soft but formed stool; the restoration of faecal bulk to normal; non-oily lubrication of the gut contents. By this comprehensive approach, *Dorbanex* provides easier and more predictable evacuation than conventional laxatives, reduces the need for enemas and suppositories, minimises the risk of straining at stool or faecal impaction, lessens apprehension about answering the call to stool, helps to break the laxative habit, gently restores neuromuscular sensitivity, and simplifies patient management.

Available in three forms to treat constipation in any patient of any age, *Dorbanex* provides the prospect of successful treatment that avoids the problems of conventional laxative therapy.

Dorbanex Capsules:

each capsule contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **Dosage:** Adults, one or two capsules. Children, one capsule. Before or after surgery: two to four capsules. Treatment should be taken at bedtime.

Dorbanex Forte:

each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone, 75 mg., poloxalkol 1000 mg. **Dosage:** One teaspoonful or as directed by the physician. Treatment should be taken at bedtime.

Dorbanex Liquid:

each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg. poloxalkol 200 mg. **Dosage:** Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery two to four teaspoonfuls. Treatment should be taken at bedtime.

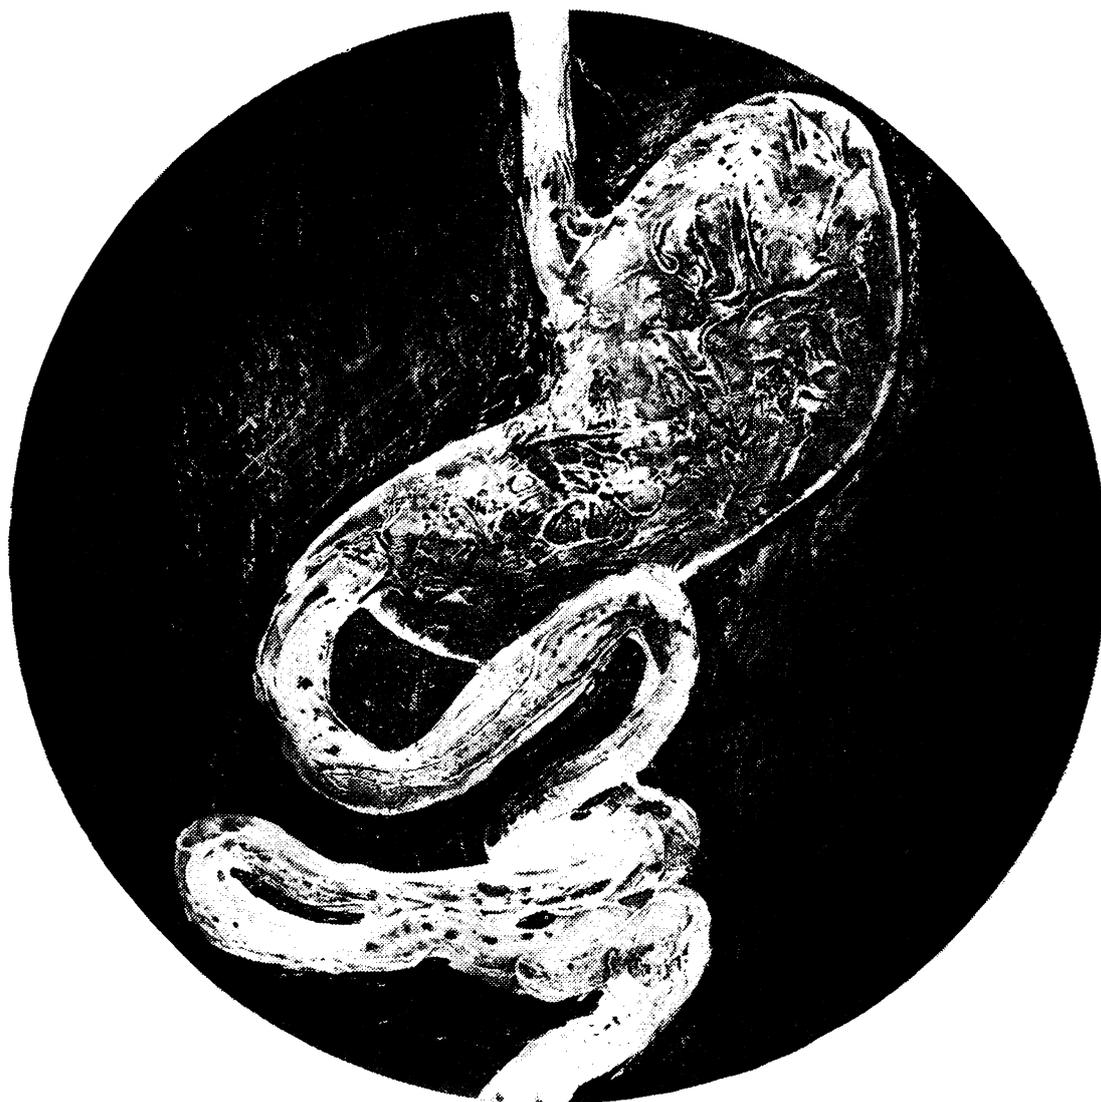

Contra-indications In common with other gastro-intestinal evacuants, *Dorbanex* should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. **Side-effects** Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients. **Basic NHS Prices** *Dorbanex* Capsules: bottles of 30 capsules 8/8; bottles of 300 capsules 78/-; *Dorbanex* Liquid: bottles of 60 ml. 4/-; bottles of 500 ml. 30/-; *Dorbanex* Forte: bottles of 60 ml. 6/-; bottles of 500 ml. 45/-.

Spasm Secretion Sickness Stress

Long-acting 'Stelabid', with its comprehensive therapeutic action, ensures swift and prolonged relief of distressing local symptoms in a wide range of gastro-intestinal disorders, and particularly in peptic ulcer. 'Stelabid' reduces gastric hypersecretion, prevents nausea and vomiting, inhibits hypermotility and relieves painful spasm through-

out the gut. At the same time, 'Stelabid' exerts a beneficent calming action which effectively allays the background stress and worry that so often provoke or aggravate such conditions. A single dose of 'Stelabid' protects the patient for 12 hours - a useful advantage during the working day - and to ensure an undisturbed night's sleep.

Betnovate Rectal Ointment—effectiveness established in the treatment of haemorrhoids

The effectiveness of Betnovate rectal preparations in the treatment of haemorrhoids was shown by a recent clinical trial involving 133 patients. After seven days' treatment with either Betnovate Rectal Ointment, Betnovate Compound Suppositories or both, 87% of patients showed a good response, 39% being free of symptoms*.

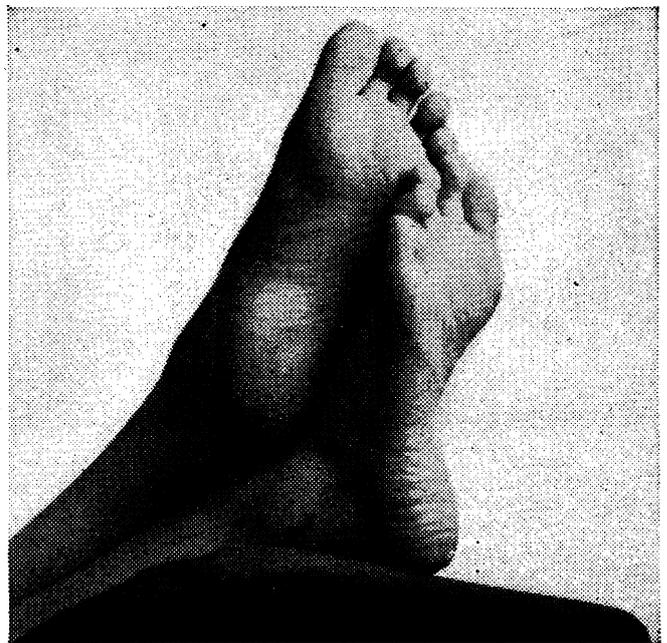

Betnovate Rectal Ointment and Betnovate Compound Suppositories both contain betamethasone 17-valerate, the most successful topical corticosteroid. In addition they contain lignocaine hydrochloride for rapid relief of pain. The vasoconstrictor phenylephrine hydrochloride is also included to minimise bleeding and to prolong the effect of the local analgesic.

Footloose and fungus-free

Athlete's foot patients prefer Tinaderm because it is pleasant to use, soothing and it usually works. Tinaderm (1% tolnaftate) swiftly relieves burning, itching and discomfort – often within 48 hours – followed by rapid clearance of lesions. Tolnaftate is not a keratolytic agent, but applied topically, it penetrates lesions to kill the fungus. Thus there is no excessive scaling to cause soreness and spread infection. Tinaderm Cream is gentle and soothing even when applied to raw areas. Tinaderm Powder has a special value where perspiration is a problem, and when sprinkled into all footwear, can help to clear up any reservoirs of infection. In athlete's foot, Tinaderm gives swift relief – even in resistant cases.

Fersaday and Pregaday
in once-monthly packs—
easy for you to
prescribe

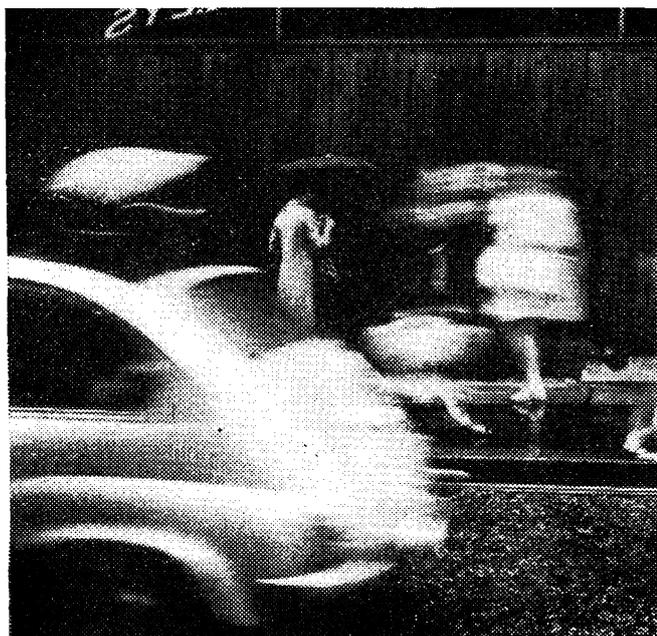

Fersaday and Pregaday are once-daily iron tablets – easy for patients to remember. Each Fersaday Tablet contains 100 mg ferrous iron as ferrous fumarate BP for prevention of iron deficiency anaemia. Each Pregaday Tablet contains 100 mg ferrous iron as ferrous fumarate BP plus 350 micrograms folic acid for prophylactic use during pregnancy. The low irritancy of ferrous fumarate means Fersaday and Pregaday can be taken in one dose without the risk of gastric upsets.

The specially designed Fersaday and Pregaday packs make it even easier for the patient to remember, by identifying each tablet with the day of the week. The pop-out packs each contain 28 tablets so it's easy for you too – simply prescribe Fersaday or Pregaday once a month. Fersaday and Pregaday are among the least expensive of the once-daily iron and iron plus folic acid tablets – another good reason for prescribing them whenever extra iron is needed.

Crystapen G patients
this year

Although summer's here, sore throats continue all the year round and with them the need for antibiotics. No matter how many patients need antibiotics this year, there is a strong case for using penicillin—still the drug of choice in common infections. An established penicillin in a modern form is Crystapen G (penicillin G). One you can rely on in the treatment of strep. throats for example.¹ And Crystapen G is as effective clinically as penicillin V.² All Crystapen G Tablets are printed with their full name and strength on them. They are film-coated, tasteless and easy to swallow. Specify Crystapen G Tablets 250 mg for adults and 125 mg for children. In each 100 ml bottle of Crystapen G Syrup there is sufficient for twenty doses – five days' continuous therapy at normal dosage. When the patient 'doesn't like tablets' specify Crystapen G Syrup – old and young like its pleasant fruit flavour. For adults 250 mg/5 ml, for children 125 mg/5 ml.

The Retreat, York

For the Treatment of Psychiatric Illnesses

This Private Registered Nursing Home at York of 275 beds, established in 1792, is managed by members of the Religious Society of Friends (Quakers).

It combines psychological and physical investigations and modern forms of treatment for patients suffering from psychiatric illnesses, including drug dependence, and has a separate unit for the assessment and treatment of psycho-geriatric conditions. There are also facilities for long-stay patients.

The Hospital is surrounded by 42 acres of its own grounds and is within easy walking distance of the City centre. In recent years, the Hospital has been modernised throughout. A new spacious occupational therapy centre provides a wide range of creative activities.

British United Provident Association and Private Patients Plan assist their members who become patients at The Retreat within the range of their published benefits.

MEDICAL SERVICES

Cheviot, New Zealand

A general practitioner is required for the Cheviot district which is centred in Cheviot township, North Canterbury, New Zealand, and is served by a modern, well maintained four bed maternity hospital and an up-to-date pharmacy.

An attractive three bedroomed house, including a surgery and new waiting room, is available at a nominal rental, and is situated close to the hospital.

The practice is a one-man practice and is of a general nature, serving the needs of a prosperous farming community. The township of Cheviot enjoys most modern amenities, including sewerage, water supply, ambulance service, automatic telephone exchange and a modern hotel. It is situated 72 miles from Christchurch on State Highway No. 1 and the facilities of that city are within easy reach. There is good fishing and shooting in the area.

The practice serves about 2,000 people and is capable of considerable development. It should provide an excellent living for a good practitioner. Other practitioners are located at centres about 40 to 50 miles from Cheviot township.

Good-will is required, and the records of the doctor at present serving the district will be available to the new practitioner without charge.

Doctors who have resided in the United Kingdom for at least two years may be entitled to substantial financial assistance towards the cost of their fares (including their families) to New Zealand. Certain conditions apply, and enquiries about this aspect should be made from the Chief Migration Officer, London, or from the undersigned, from whom any further information relating to the practice is available.—V. B. Novis, County Clerk, P.O. Box 229, Cheviot, New Zealand. (H.9209)

NOVA SCOTIA. I AM A WELL ESTABLISHED English general practitioner in an isolated fishing port and am looking for another experienced practitioner with whom I may share my lucrative dispensing practice with 12-bedded hospital privileges, so that each doctor does tours in rotation of roughly four months followed by four months' leave. The basis will be that each of us use the same office, house and staff in rotation, and keep our own profits after paying our share of the expenses. My present profit after expenses vary from \$2,500 to \$4,000 per month worked. There is another independent Canadian doctor who practises from the same building, and with whom I have arrangement for week-end and night calls rotation. I will be in England early in August to interview applicants who should send full details of education, career, and availability, and address and telephone number at which I may contact them after August 5. Availability by early September is important, but a better one could be considered for the right applicant.—Please send details to Box OV.3379, B.M.J.

PRACTICE NEW ZEALAND. EXCELLENT island solo general practice with adequate facilities for a two man practice. Fully furnished new executive house with attached modern surgery and fully landscaped garden. Handy to beaches. 5,000 patients grossing \$25,000.—Reply to Box OV.3505, B.M.J.

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper, M.B., F.R.C.P.(Edin.) D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Vantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc. Fees range from 25 guineas per week and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers. Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment either at the hospital or at 55 Harley Street, London W.1.

Roche make a new and compelling approach to the production of medical films

recreates the whole experience of emotional disturbance: breakdown, treatment, recovery.

“A sensitive and compelling study of a difficult and disturbing subject.”
GLASGOW HERALD

“...will almost certainly rank as one of the really exceptional films of 1969.”
SCOTLAND

“...thoroughly recommended – a vivid reminder of the reality behind what we can so easily know only as a statistic.”
MEDICAL TRIBUNE

“Full marks to Roche... for this courageous first step into film sponsorship.”
FINANCIAL TIMES

If you have not already been invited to attend a showing of 'Time out of Mind' you will shortly be hearing from the Roche Representative in your area.
