When you prescribe elastic stockings

Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

Scholl 'Soft Grip' for conditions requiring 'Elastic Yarn Standard Weight'.

Worn *under* normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support *around* the leg with plenty of comfortable 'give' lengthwise.

Scholl 'Nylastik' for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn *instead* of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

DISEASES OF THE DIGESTIVE SYSTEM

from the British Medical Journal

Gastroenterology is one of the fastest-growing specialties in medicine. Many recent discoveries and developments have immediate clinical applications, and in 1967 the *B.M.J.* began to publish a series of articles on Diseases of the Digestive System. The series was widely acclaimed, and the articles have now been revised by their authors and collected together in book form.

The list of authors includes many well-known names and the subjects range from peptic ulcer to rectal bleeding, and include pancreatic and liver disease. As a readable and authoritative refresher course the book will help doctors in hospital and general practice.

With five days of Norgesic, next week could be worked, not wasted

In just five days, the patient with a painful muscular condition could be back at work or well on the way—with *Norgesic*. Of 251 patients given *Norgesic*, nearly nine out of every ten recovered or improved in five days¹. Six days was the average treatment time when uniformly good or fair relief of pain was gained by nine-tenths of 478 patients given *Norgesic*².

Norgesic gives the patient the chance of rapid and reliable relief of pain—and an early return to normal work.

Norgesic contains two agents acting in different but complementary ways. Orphenadrine citrate releases muscles from painful and incapacitating stiffness. Paracetamol relieves the pain of local tissue damage. By relieving both pain and muscle spasm *Norgesic* quickly restores the pain-free movement that plays a major part in speeding recovery, overcomes the limitations of simple analgesics, and spares the patient wasted days of immobility and needless pain.

Each tablet contains Orphenadrine Citrate B.P. 35 mg. and Paracetamol B.P. 450 mg. Dosage is two tablets three times daily. **Side effects:** within the recommended dosage, undesirable side-effects are uncommon. Dry mouth, nausea, blurring of vision, dizziness, restlessness or drowsiness may however occur in some patients susceptible to the parasympatholytic action of orphenadrine. These symptoms disappear rapidly following reduction of dosage or withdrawal of treatment. **Contra-indications** to *Norgesic* result from the parasympatholytic action of orphenadrine. *Norgesic* should not be given to patients with glaucoma, urinary retention (e.g. in prostatic hypertrophy or bladder neck obstruction) or myasthenia gravis. It should be used with caution in patients with tachycardia.

Basic NHS prices: 100 tablets 14/4; 500 tablets 70/-. *Norgesic* is a registered trade mark.

by a comfortable margin. In a recent report of a comparative trial* involving three antihypertensive agents satisfactory control of blood pressure was obtained with each drug.

With 'Esbatal' for instance, a standing diastolic pressure of 100 mm. Hg or less was achieved in 75% of cases. The authors pointed out that

'Esbatal', guanethidine and methyldopa are probably similar in their ability to control blood pressure. *It was found, however, that 'Esbatal' produced fewer uncomfortable side-effects and was preferred by more patients than were the other agents. In contrast to the other drugs, all the patients on 'Esbatal' were able to complete the course of treatment.*

For many hypertensive patients, 'Hydromet' may be the most convenient treatment. 'Hydromet' contains both methyl dopa and hydrochlorothiazide, a combination already widely used in this country for the severer grades of hypertension. 'Hydromet' offers the patient these advantages:

- the convenience of a single tablet
- satisfactory control of blood pressure usually possible on a lower dosage of methyl dopa
- in some severe and resistant cases, a greater antihypertensive response than with methyl dopa alone
- the diuretic action of hydrochlorothiazide, of additional value when hypertension is complicated by heart failure and oedema

'ZYLORIC'
brand Allopurinol puts gout into reverse

In the gouty patient, 'Zyloric' controls uric acid formation. 'Zyloric' limits the formation of uric acid from its metabolic precursors, and they are excreted in much more soluble forms. Consequently the amount of uric acid passing through the kidney is not increased as with the uricosuric agents. Thus 'Zyloric' lowers serum uric acid, and at the same time prevents kidney damage—a major cause of death in 25 per cent of patients with chronic gout.

By markedly reducing the production of serum uric acid 'Zyloric' permits the gradual resorption of urates from tissues. Slowly and steadily the deposition of urates is reversed, joints become more mobile and tophi regress.

Cetiprin[®]

is altering established habits
of rising at night to pass water

The results of a recent double-blind crossover trial of Cetiprin suggest that "the drug may alter the established habit of rising at night to pass urine."¹

"This trial showed that emepronium bromide (Cetiprin) given in dosage of 150 mgs. on going to bed, effectively diminished nocturnal frequency of micturition in aged women. On the basis of a double-blind crossover trial an important difference emerged between those participants given the placebo before the drug, and those given the drug first. In the first case, there is little effect with the placebo but a moderate effect with the drug. In the latter case, there is a more marked effect with the drug – and this is carried over into the placebo period."²

"Nocturnal frequency of micturition is one of the trials of old age. In a previous paper we have shown it to be present in 64% of the total elderly population (70% of males and 61% of females of 65 years and over)."³

Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else's. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That's why it's so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. So write today. Together we'll find the policy which will work hardest for you.

Do it now.

(Trimethoprim and Sulphamethoxazole)

- 'Septrin' acts quickly and decisively.
- eradicates common pathogens – including *H. influenzae*, *Pneumococci*, *Proteus* sp., *E. coli*, *Klebsiella* sp.
- effective against penicillinase-producing organisms.
- new mode of bactericidal action overcomes problems of bacterial resistance.

clearly superior in URINARY INFECTION

'Septrin' was compared with ampicillin and sulphadimidine in the treatment of 106 hospitalised patients with urinary infections. Cure rates one week after finishing treatment were: 'Septrin' 85 per cent, ampicillin 70 per cent, and sulphadimidine 40 per cent; and after four or five weeks 67, 52 and 15 per cent respectively. (Cure=eradication of original organism from urine).¹

'Septrin' was "... clearly superior to either of the other treatments, and this superior effect was even more appreciable in the re-treatment of patients who had failed on another drug."²

BRITISH MEDICAL ASSOCIATION

REGIONAL MEDICAL SECRETARY BASED ON BIRMINGHAM

The Council of the British Medical Association invites applications from registered medical practitioners for the post of Regional Secretary. The post is a new one, based on the Council's policy of decentralization. The Regional Medical Secretary will be in charge of the Association's Birmingham office and his duties will consist generally in supervising and promoting the Association's activities in the Midlands and surrounding area.

The successful candidate will be based on the Association's Birmingham office and will be required to reside in the area. He will be expected to travel widely throughout the whole of his region, to attend Branch and Division meetings whenever practicable, and generally to advise and assist the profession locally.

The salary scale for this appointment is £3,800 by £200-£4,600 per annum, but in fixing the starting salary regard may be had to the successful candidate's age and experience. Although the appointment is a whole-time one, the Council would be prepared to consider applications from candidates with other commitments which would not prevent them from devoting the major part of their time to the duties of the post.

The appointment will be for a probationary period of six months in the first instance, and thereafter may be terminated by six months' notice on either side. The post, which is superannuable, offers opportunities for promotion within the Association's medical secretariat.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Secretary of the Association, B.M.A. House, Tavistock Square, London W.C.1, and must be received not later than August 30, 1969.

TWO DOCTORS REQUIRED FOR GENERAL PRACTICE IN FORT NELSON, B.C.

One must have at least six months' anaesthetic experience. The second doctor should have some postgraduate experience in obs. and gynae. or medicine or paediatrics. Both are needed to join surgeon (F.R.C.S.Ed.) who also does general practice. This community has great future growth; present population 3,500 (school enrolment up 25% this year). We expect that the practice will double in three years. 250-mile railway extension under construction—copper mines, into production this year, pulp mill licence applied for and biggest gas field in Canada is being developed, agricultural development started. For outdoor man abundant hunting and fishing, boating and flying available 50 miles away in beautiful northern Rockies. New 35-bed hospital operated by incumbent doctors. Hospital equipped far beyond bigger new hospitals thanks to industrial interest in the area. Building new medical clinic this year. Applicants could design own offices. There are no limitations to scope of medicine practised other than training and ability. Interests outside medicine are boundless—except no nightclubs so no city orientated men should apply. Partnership offered after six months' probationary period but other arrangements could be considered.—Write Box 594, Fort Nelson, B.C., Canada.

**ST. ANDREW'S HOSPITAL
NORTHAMPTON**

Medical Director: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from 25 guineas per week, and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354) who can be seen in consultation by appointment either at the hospital or at 55 Harley Street, London W.1.

precision-release of the right iron in the right place

CIBA slow-release expertise, which solved the problems of giving KCl by formulating 'Slow-K', has now produced an improved ferrous sulphate tablet 'Slow-Fe' with unique features which will rapidly justify its selection as the ideal oral treatment for iron deficiencies.

If iron is released in the stomach it can cause irritation ('Slow-Fe' is designed to minimise release of iron in the stomach)

Iron released in lower gut is wasted and may increase tendency to constipation ('Slow-Fe' is designed to avoid this wastage)

- **Convenient once-daily dosage**
- **Gastrointestinal irritation virtually eliminated**
- **Safety-conscious pack**

'Slow-Fe' tablets contain 160mg dried ferrous sulphate (\equiv 50mg Fe) in a specially formulated slow-release tablet base

Prescribe in units of 30. Basic NHS price 30: 4/6 to 5/- from larger dispensing packs

'Slow-Fe' and 'Slow-K' are trademarks. Detailed information on this new product is available on request. CIBA Laboratories Limited, Horsham, Sussex.

What are *Nacton forte* conditions^{regd.}

The symptoms suggest a peptic ulcer—your patient has chronic epigastric pain associated with food. He worries—and he smokes too much. You'll refer him for radiological examination, meanwhile you'll want to control that persistent pain.

Sometimes radiological examination fails to confirm the ulcer—but your patient still has all the symptoms: dyspepsia associated with food, interrupted sleep. The pain continues and antacids only give temporary relief.

Then there are the relapsed cases. The patient who thought his ulcer was healed, now he's back with all the old symptoms—he leads a miserably restricted life and he's beginning to think the pain is a life sentence.

These are *Nacton forte* conditions

Nacton forte—a new presentation from Bencard—provides the most convenient, effective dose of poldine methysulphate B.P. (4 mg.) in a single tablet.

Nacton forte:

* Controls pain at source by continuously reducing gastric acid secretion.

* Eliminates routine need for antacids.

* Leaves the electrolyte balance of the body undisturbed—so supplementary therapy is not required.

* Will not induce side-effects in the majority of patients
