

The powerful bactericidal activity is derived from its unique mode of action. It interrupts two successive stages in a metabolic process essential to the survival of bacteria.

the bactericide in chronic bronchitis

Bactrim Roche is clearly effective.

At the London Hospital Bactrim Roche† was given twice daily to 50 chronic bronchitics with infections which had previously resisted treatment with one or more antibiotics. In all 50 cases, after five days "... purulent sputum became mucoid, with clinical improvement".¹ Bactrim Roche is bactericidal to many of the organisms – Gram-negative and Gram-positive – commonly found in respiratory infections, including Streptococci, Staphylococci and – probably most important in chronic bronchitis – Haemophilus Influenzae.

¹ Proceedings of the V Inter. Congress of Chemotherapy 1968, 1, 293.

† The formulation used in this trial was slightly different from that subsequently found to produce the best results and which has now been adopted.

'(a) the soaker and waker' '(b) the saturated sleeper'

These are the descriptive titles given by one author* to two main groups of enuretic children. The 'soaker and waker' he describes as timid and apprehensive, though often intelligent. The 'saturated sleepers' are madcaps or tomboys who overexert themselves physically and mentally; they are often defiant and misinterpret attempts at control as lack of love. They are distinguished by their behaviour—'Those in the first group awake, howling, immediately after wetting the bed. Those in the second group, having exhausted themselves, sleep deeply and do not awake till the morrow.'

Many cases of functional enuresis respond favourably to 'Tryptizol', the well-established antidepressant with tranquillising properties. Most bedwetters who respond to 'Tryptizol' do so in the first few days of management and tend to improve as the duration of therapy is extended.

BRUFEN

(ibuprofen)

The incident recreated here is taken from an actual report of the results achieved with Brufen. Many such reports about Brufen have been received, and provide convincing evidence of the very real benefits which this highly effective antirheumatic agent can bring to the arthritic. To those restricted by an arthritic condition, Brufen means the freedom of reduced stiffness,

improved joint flexion and an extended range of pain-free movement. There is also a remarkable freedom from adverse effects; and Brufen is so well tolerated by the gastro-intestinal tract that the first dose of each day can be taken on an empty stomach, as soon as the patient is awake.

Brufen is ibuprofen, the first non-steroidal antirheumatic agent evolved entirely by British research.

MUSCULAR RHEUMATISM, FIBROSITIS, LUMBAGO OR LOW BACK PAIN

For each of them the problem is pain

For all of them the answer is Paynocil

regd.

Lumbago or low back pain, fibrositis, muscular rheumatism—however you describe these rheumatic disorders, they mean the same thing to the patient. Pain. And the textbook therapy is the same, too—aspirin.

Then why prescribe Paynocil?

First, because Paynocil *is* aspirin. So it stops pain and relieves inflammation. **Second, because Paynocil is aspirin with all these additional benefits:**

Well tolerated: Paynocil also contains 300 mg. of glycine, which helps to distribute the aspirin rapidly into the stomach in the finest particles, thus minimising the risk of gastric irritation. Patients with rheumatic disorders who experience nausea, heartburn or epigastric pain after plain aspirin have found Paynocil acceptable.

Quick acting: Paynocil, at 600 mg. aspirin per tablet, has twice the strength of aspirin tablets B.P., and in equivalent dosage, is twice as rapidly absorbed. A property which could be of particular value—in combating the rheumatic's morning stiffness for example.

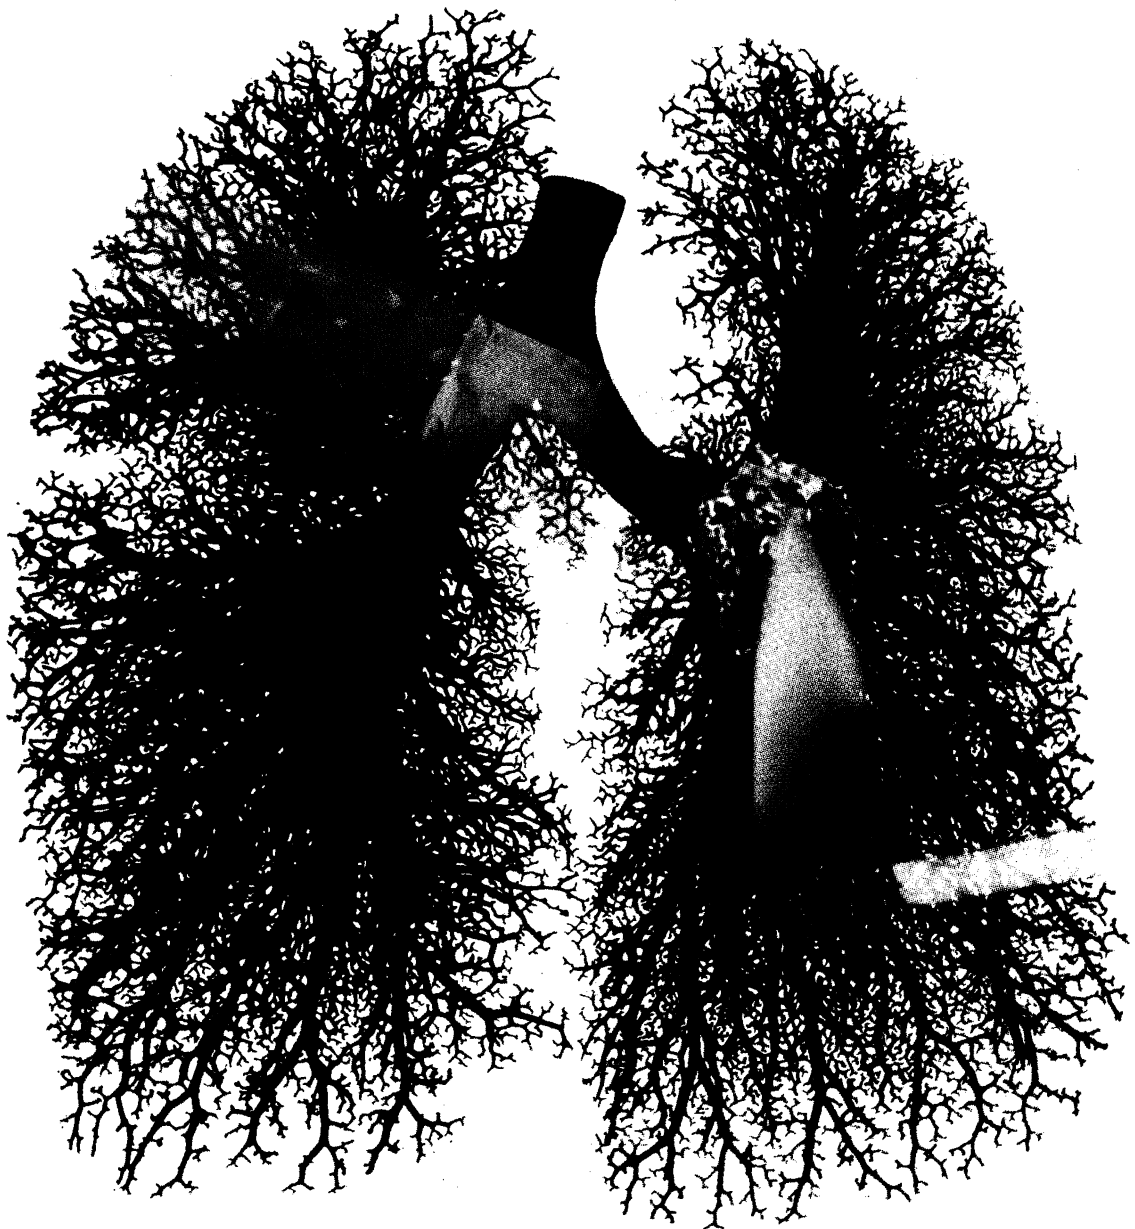

Convenient: Paynocil can be taken without water, for glycine masks the unpleasant taste of aspirin and allows the tablet to disperse instantly on the tongue in a burst of lemon flavour. The tablets come in protective foil strips which slip easily into handbag or pocket. All of which makes Paynocil a most practical form of aspirin for active people.

Junior Paynocil is available, for children, at 150 mg. aspirin per tablet.

- effective against penicillinase-producing organisms.
- new mode of bactericidal action overcomes problems of bacterial resistance.

clearly superior in URINARY INFECTION

'Septrin' was compared with ampicillin and sulphadimidine in the treatment of 106 hospitalised patients with urinary infections. Cure rates one week after finishing treatment were: 'Septrin' 85 per cent, ampicillin 70 per cent, and sulphadimidine 40 per cent; and after four or five weeks 67, 52 and 15 per cent respectively. (Cure=eradication of original organism from urine).¹

ACT RAPIDLY ILOSONE DOES.

'Ilosone' rapidly attacks the pathogens in tonsillitis, acute bronchitis, streptococcal pharyngitis, otitis media, and bacterial pneumonia.

'Ilosone' causes minimal interference with the natural gut flora, thus diarrhoea or gastro-intestinal upset is rare.

Most strains of staphylococci, streptococci, and pneumococci are sensitive to 'Ilosone'. In addition to its high activity against these organisms 'Ilosone' is also active against *H. influenzae* and *Mycoplasma pneumoniae*. The clinical response is rapid, and the chance of relapse is small.

The range of presentations is such that 'Ilosone' can be prescribed for the whole family.

Cetiprin[®]

is altering established habits
of rising at night to pass water

The results of a recent double-blind crossover trial of Cetiprin suggest that "the drug may alter the established habit of rising at night to pass urine."¹

"This trial showed that emepronium bromide (Cetiprin) given in dosage of 150 mgs. on going to bed, effectively diminished nocturnal frequency of micturition in aged women. On the basis of a double-blind crossover trial an important difference emerged between those participants given the placebo before the drug, and those given the drug first. In the first case, there is little effect with the placebo but a moderate effect with the drug. In the latter case, there is a more marked effect with the drug – and this is carried over into the placebo period."²

"Nocturnal frequency of micturition is one of the trials of old age. In a previous paper we have shown it to be present in 64% of the total elderly population (70% of males and 61% of females of 65 years and over)."³

More pain-free days

In angina pectoris, Inderal protects the heart from the oxygen-wasting effects of emotion and effort.

Through adrenergic beta-receptor blockade, 'Inderal' protects the heart from the action of adrenaline. There is a slowing of the heart-rate and reduction in the oxygen needs of the myocardium.

The results: more pain-free days; increased effort tolerance. 'Inderal' is the only treatment to have been proved consistently in double-blind

clinical trials. Tests also show it to be effective in very severe cases of angina.

'Inderal' depends for its effect on a specific pharmacological action. Before using 'Inderal', doctors should read the detailed literature for information on dosage, precautions and contra-indications.

Dorbanex

avoids the
problems
of
conventional
laxative
treatment

With a faecal softener to prepare the way, and just a small dose of peristaltic stimulant completing evacuation, *Dorbanex* avoids the problems of conventional laxative treatment. What difference does the faecal softener make to treatment?

A soft but formed stool; the restoration of faecal bulk to normal; non-oily lubrication of the gut contents. By this comprehensive approach, *Dorbanex* provides easier and more predictable evacuation than conventional laxatives, reduces the need for enemas and suppositories, minimises the risk of straining at stool or faecal impaction, lessens apprehension about answering the call to stool, helps to break the laxative habit, gently restores neuromuscular sensitivity, and simplifies patient management.

Available in three forms to treat constipation in any patient of any age, *Dorbanex* provides the prospect of successful treatment that avoids the problems of conventional laxative therapy.

Dorbanex Capsules:

each capsule contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **Dosage:** Adults, one or two capsules. Children, one capsule. Before or after surgery: two to four capsules. Treatment should be taken at bedtime.

Dorbanex Forte:

each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone, 75 mg., poloxalkol 1000 mg. **Dosage:** One teaspoonful or as directed by the physician. Treatment should be taken at bedtime.

Dorbanex Liquid:

each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg. poloxalkol 200 mg. **Dosage:** Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery two to four teaspoonfuls. Treatment should be taken at bedtime.

Contra-indications In common with other gastro-intestinal evacuants, *Dorbanex* should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. **Side-effects** Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients. **Basic NHS Prices** *Dorbanex* Capsules: bottles of 30 capsules 8/8; bottles of 300 capsules 78/-; *Dorbanex* Liquid: bottles of 60 ml. 4/-; bottles of 500 ml. 30/-; *Dorbanex* Forte: bottles of 60 ml. 6/-; bottles of 500 ml. 45/-.

The dietary treatment of metabolic disorders

Automatic Amino Acid Analyser
by kind permission of
Technicon Instruments Co. Ltd.

The dietary treatment of metabolic disorders in infancy and allied conditions is aided by Trufood's extensive range of readily available synthetic and modified foods. Nearly 50 years' specialised experience of making foods for babies, combined with continuous and intensive research into their preparation, has enabled us to provide such trusted products as:

Minafen—
for the dietary treatment of phenylketonuria

HF (2)—
for the dietary treatment of histidinaemia

LPT (1) and LPTM (2)
for the dietary treatment of tyrosinosis

Galactomin—three formulae
No. 17— for the dietary treatment of galactosaemia and lactose intolerance — No. 18 with reduced fat — No. 19 with fructose as the sole carbohydrate.

Edosol—
for low sodium diets

Locasol—
for the dietary treatment of hypercalcaemia

Himaizol—
for the dietary treatment of hypercholesterolaemia

And—for normal babies—**TRUFOOD** baby milk.

We will be pleased to share our skill and knowledge with you if you have any problems involving special diets, especially if they are for babies.

In dry, scaling
dermatoses
Betnovate Ointment
is best

**Glaxo
brief**

In dry, scaling dermatoses **Betnovate Ointment** is best

Betnovate Ointment is best for patients because it is quickest to succeed in dry, scaling lesions. Betnovate Ointment soothes and softens hard, sore areas of cracked and thickened skin. And Betnovate Ointment contains 0.1% betamethasone as 17-valerate – the most successful topical steroid. In a clinical investigation, it was shown that in the treatment of psoriasis and a number of other dermatoses "... betamethasone 17-valerate is superior to fluocinolone acetonide in its therapeutic efficiency" and "betamethasone 17-valerate closely approaches the criteria of the ideal topical corticosteroid."¹ Not only does Betnovate achieve a faster and more complete clearance in relatively responsive conditions^{1,2,3} but also it often succeeds when other topical corticosteroids fail.^{1,2,3}

Neobacrin Ointment

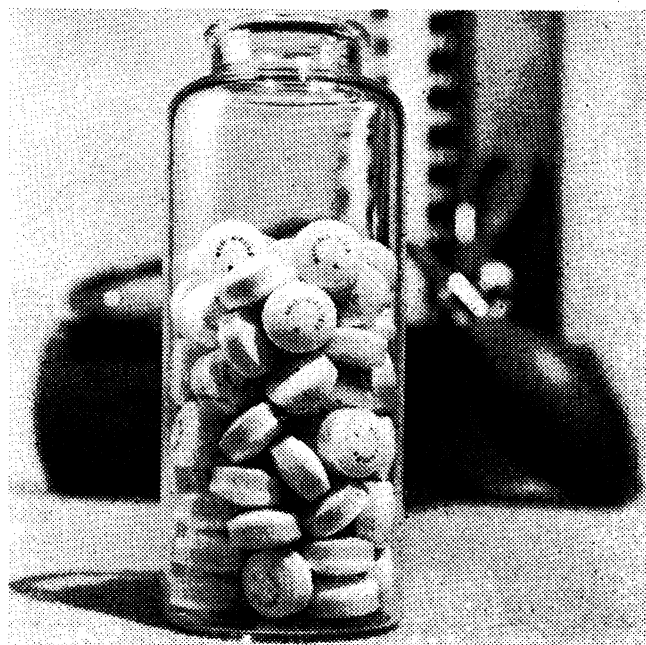

designed for
infections of the
skin and eye

Neobacrin is a combination of two antibiotics (neomycin and bacitracin) which together provide a complementary bactericidal action against a wide range of Gram-positive organisms (including penicillin-resistant staphylococci) and Gram-negative organisms. The majority of skin and eye infections can be treated rapidly and effectively with Neobacrin – with little risk of sensitisation occurring. A bland paraffin base ensures patient-acceptability, and swift eradication of the causative organisms makes it an economical prescription too.

Unique tablet for the safer management of hypertension Neo-NaClex-K

Neo-NaClex-K is a unique two-layered tablet for use in all grades of hypertension. The white layer contains 2.5 mg bendrofluazide which lowers the blood pressure in mild hypertension by an average of 10 to 15 mm Hg and maintains this fall on a low dosage. In severe hypertension, the addition of a more potent drug will produce an adequate fall. The dosage of the more potent drug can be up to 50% less than that required without the thiazide treatment. This leads to a corresponding reduction of side effects from the more potent drug. The coloured layer of each Neo-NaClex-K Tablet contains 630 mg potassium chloride which is released slowly to minimise the danger of gastric irritation or small bowel ulceration.

Tricloryl Syrup— the safe and sure sedative

Tricloryl Syrup provides a safe and reliable sedative for the elderly and young patient. Tricloryl is free from any tendency to cause 'hangover', and is generally well tolerated. The pharmacology of Tricloryl is essentially that of chloral hydrate, but Tricloryl is palatable, making it suitable for children. Whenever a mild sedative is required Tricloryl is the safe answer.

A morning's surgery brings a lot of Crystapen G patients

Penicillin is still the drug of choice in so many infections. An established penicillin in a modern form is Crystapen G (penicillin G) — one you can rely on in the treatment of strep. throats for example.* All Crystapen G Tablets have their full name and strength printed on them. They are film-coated, tasteless and easy to swallow. Specify Crystapen G Tablets 250 mg for adults, and 125 mg for children. In each 100 ml bottle of Crystapen G Syrup there is sufficient for twenty doses — five days' continuous therapy at normal dosage. When the patient "doesn't like tablets" specify Crystapen G Syrup — old and young like its pleasant fruit flavour. For adults 250 mg/5ml, for children 125 mg/5 ml.

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical—often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity—contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg
Testosterone Phenylpropionate B.P. 40mg
Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity—contains 250mg testosterone per ml:

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

Packs: Boxes of 3 ampoules of 1 ml in either strength.
Single 1 ml Orgaject disposable syringes in either strength.
Contraindication: in males, carcinoma of the prostate.

OVERSEA

Attention is drawn to the desirability of obtaining full details of remuneration and terms of service in advertised appointments where these are not stated in the advertisement. In some cases local B.M.A. Branches or affiliated Associations may be in a position to provide information, and their addresses are available on application to the Secretary of the Association.

A GROUP PRACTICE OF GENERAL practitioners and consultants in a university city on the Canadian prairies needs a second psychiatrist. Interested applicants should be on the home list of the G.M.C. and possess the D.P.M. This is an interesting and stimulating post for a psychiatrist mainly interested in community medicine with some hospital work as well. Apply to Medical Director, with curriculum vitae and photograph. Community Health Clinic, Second Floor Avenue Building, Saskatoon, Saskatchewan.

APPLICATIONS ARE INVITED FOR positions of Assistant or Associate Professor in the Department of Anatomy, Sir Charles Tupper Medical Building, Halifax, Nova Scotia, Canada. Owing to the revised medical curriculum, and the larger classes in medicine, it has become necessary to enlarge the staff for instruction in the areas of gross and neuroanatomy. Previous teaching experience in anatomy is essential, and preference will be given to applicants who have had both teaching and research experience. The salaries offered are in line with those offered by other Canadian schools, but take into consideration the training and qualifications of the applicant. The school of medicine is housed in one of the most modern buildings in Canada, and the department of anatomy has excellent research facilities. It is well equipped for work in the fields of light, conventional and scanning electron and x-ray microscopy. Applications should be made to the Secretary, and contain a biography, recent photograph and names of three referees.

**MEDICAL
OFFICERS**

**Good short term
contracts
with Anglo American
in Zambia**

The Anglo American Corporation Group is the largest mining finance organisation in the world. In Zambia the Group mines copper and lead-zinc; as the world's fourth largest producer of copper, Zambia has an output that represents 90% of the country's exports. Well over half the copper is mined by Anglo American. To give you an outline picture of the well-equipped medical facilities provided at four centres by the Group, take Nchanga mine at Chingola: there are two hospitals, one contributory and fee-paying, the other non-fee-paying. Both have diagnostic, radiological and laboratory services. There are nine medical officers including a Chief Medical Officer, a Specialist Surgeon and Physician, and a visiting Radiologist. Zambia Broken Hill Development Company at Kabwe operates three clinics for employees and their dependants, and has facilities at the Government hospital for the hospitalisation of mine patients under the care of the Mine Medical Officers who number three, including the Chief Medical Officer. Duties are of a general nature, including hospital care of patients and domiciliary visiting; obstetrics, anaesthetics and surgery.

VACANCIES

From time to time vacancies arise for Medical Officers on a contract period

of one year. Typical minimum salaries would not be less than K6,400 per annum (equivalent to £3,733 sterling). Other benefits include Christmas Bonus, terminal gratuity, educational allowances, partly furnished accommodation at moderate rentals, and free return passages to and from Zambia. There are generous leave conditions. A car allowance is paid and an initial interest free loan is also available for the purchase of a car.

Short-term locums

There are occasional locum appointments for minimum periods of 2 months. Terms and conditions differ from the more permanent positions but they are no less attractive. The sunny climate of Zambia, the full social life, and the many sports and cultural activities one can take up make for a most enjoyable time. Swimming, tennis, sailing; amateur dramatics; these are just a few ways in which you can live a really satisfying off-duty life. Posts are usually filled for an initial contract period of three years.

PHYSICIAN FOR CLINICAL RESEARCH

U.S.A.

An international pharmaceutical company, respected for its ethical approach, wishes to engage a qualified physician to join the staff of its Department of Clinical Research. The duties are wider and more interesting than those usually associated with clinical research: the successful candidate will be involved with the various projects from inception through to commercial availability and work closely with colleagues from other disciplines. Every encouragement is given to publish and to attend outside meetings whenever possible. Ideally candidates should have extensive registrar experience in medicine together with an interest in clinical pharmacology. A higher qualification and experience in the industry are added advantages. The preferred age range is 30-40. The Medical Research Laboratories are situated in one of the most pleasant rural areas of the Eastern Seaboard with easy access to a full range of amenities. Conditions of employment are excellent and full removal expenses will be paid for the successful candidate. A starting salary will be negotiated within the range \$22,000 to \$25,000.

WELLINGTON HOSPITAL BOARD**DIRECTOR OF LABORATORY SERVICES**

Applications are invited for the post of Director of Laboratory Services to the Wellington Hospital Board. Applicants must possess a higher qualification in one of the relevant disciplines and be eligible for registration in New Zealand and to qualify as a Specialist in accordance with the Hospital Employment Regulations. The laboratory services include the metropolitan laboratory at Wellington Hospital (900 general beds) and a smaller department at Hutt Hospital (390 general beds) 12 miles away. The former has a total staff of approximately 130 and the latter 20. The disciplines involved are morbid anatomy and morbid histology, haematology and serology, bacteriology, chemical pathology, transfusion service, cytology and cytogenetics. The total number of tests dealt with for the year 1968-69 was approximately 570,000.

The Wellington Hospital is a metropolitan institution with all special departments including cardiac (medical and surgical), renal and endocrinology. It serves a population of over 300,000 and it is anticipated that this will increase to half a million by 1986.

The Director of Laboratory Services will be responsible to the Superintendent-in-Chief. He is in charge of all laboratory diagnostic services and responsible for their proper function. The appointee will be expected to take part in the teaching of final year medical students enrolling from the Otago Medical School in the Wellington Branch Faculty of Medicine. In addition to his purely administrative duties the Director may elect to work in any field of laboratory medicine for which he has special experience and could be head of one of the major disciplines.

The pathology department has an establishment of six Registrars in addition to more senior medical specialists in their particular disciplines and is a recognized "A" grade training school for membership of the College of Pathologists of Australia.

It is expected that the head of the laboratory service in Wellington will assist the central administration of the Department of Health of N.Z. wherever his special knowledge can be of use.

This is a whole-time position and conditions will be in accordance with Hospital Employment (Medical Officers) Regulations. Commencing salary will be within the scale \$NZ6,090-8,100 with automatic annual increments to the maximum of the scale. There is provision for a proportion of specialists to be given higher gradings up to \$10,000 per annum.

\$NZ2,149 approximately equals £1 Sterling. There is provision for assistance with transport expenses from the United Kingdom for the appointee and his family.

Applicants should obtain a copy of the conditions of appointment and a form of application from the High Commissioner for New Zealand, New Zealand House, Haymarket, London S.W.1.

Applications will be received by the Secretary, Wellington Hospital Board, Private Bag, Wellington Hospital, Wellington, New Zealand, up to 9 a.m. on Friday, November 7, 1969. (11632)

The Retreat, York

For the Treatment of Psychiatric illnesses

This Private Registered Nursing Home at York of 275 beds, established in 1792, is managed by members of the Religious Society of Friends (Quakers).

It combines psychological and physical investigations and modern forms of treatment for patients suffering from psychiatric illnesses, including drug dependence, and has a separate unit for the assessment and treatment of psycho-geriatric conditions. There are also facilities for long-stay patients.

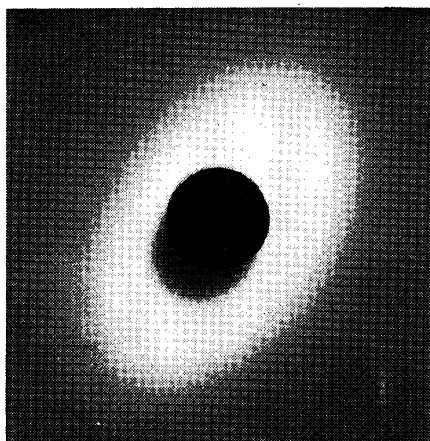

The Hospital is surrounded by 42 acres of its own grounds and is within easy walking distance of the City centre. In recent years, the Hospital has been modernised throughout. A new spacious occupational therapy centre provides a wide range of creative activities.

British United Provident Association and Private Patients Plan assist their members who become patients at The Retreat within the range of their published benefits.

For terms and further particulars, apply to Dr. John E. O'N. Gillespie, MA., MD., FRCPI., MRCP., DPM., Medical Director, The Retreat, York, YO1 5BN. Telephone: York 54551 (STD 0904).

the best iron is useless

(unless it's taken)

'The co-operation of patients on a once-daily dosage of iron (Ferro-Gradumet) was significantly better than those taking a thrice-daily preparation.'[†]

Each Ferro-Gradumet contains the exsiccated equivalent of 525 mg ferrous sulphate BP (\equiv 105 mg Fe) in a Gradumet for maximum absorption with minimum gastric upset: *the right iron, in the right form, at the right dosage.*

OCTOBER 4 - THE PROBLEM A large weeping ulcer infected with staphylococcus pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times

TWO WEEKS LATER - DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Ichthol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14 - HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that **ASERBINE** is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

Aserbine is prepared from	100 G. cream	500 ml. solution
Malic Acid	0.36%	2.25%
Benzoic Acid	0.024%	0.15%
Salicylic Acid	0.006%	0.0375%
Propylene Glycol	1.7%	40%
