the diagnostic conflict in
anxiety/depression –
and successfully treat the
patient – with**

LIMBITROL*

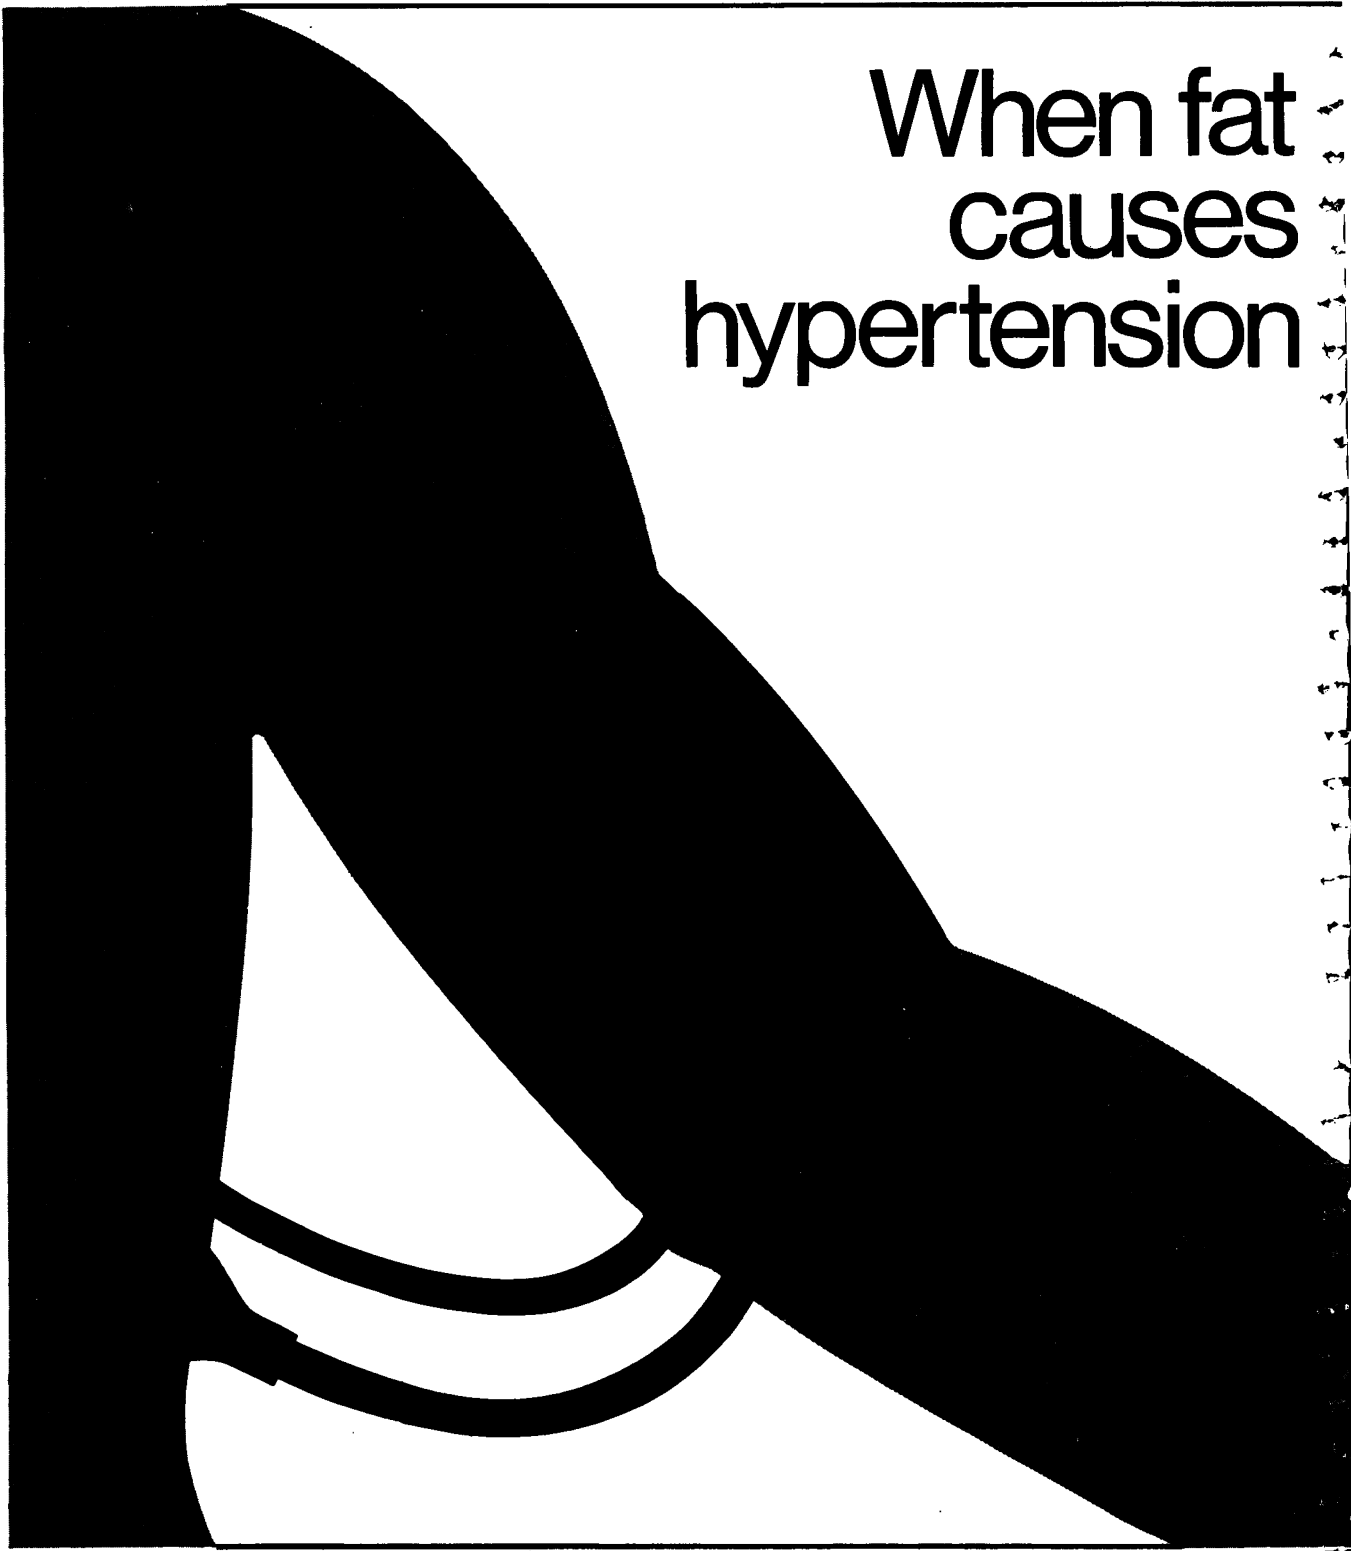

Conflicting symptoms often merge imperceptibly into the ill-defined syndrome in which anxiety and depression co-exist.¹ The problem of mixed anxiety and depression is ubiquitous.² The solution in 70 per cent of patients is the single therapy of Limbitrol:³ tranquilliser and anti-depressant in one capsule for co-ordinated treatment of some of the complex disturbances of *Homo sapiens*.

1. "The overtly depressed patient is usually anxious, tense or agitated as well, while in the predominantly anxious patient an underlying depression can often be discerned if care is taken to look for it." Brit. J. clin. Pract., 1967, 21, 348.
2. Over 10 per cent of all patients seen in general practice may be suffering from mixed anxiety and depression: J. roy. Coll. Gen. Practit., 1968, 15, 107; Proc. IV Int. Congr. Neuropsychopharmacology, 1967, p. 717.
3. 70 per cent of 3,500 patients in initial trials showed 'good' or 'very good' response to Limbitrol (unpublished data). In a comparative trial twice as many patients were 'greatly improved' on Limbitrol as on amitriptyline alone – Brit. J. Psychiat., 1967, 113, 993.

CANDIDAL VAGINITIS

NON SPECIFIC VAGINITIS

Five years of clinical trials with Magmilor, involving more than 6,000 patients with vaginitis, have shown success rates of the order of 90 per cent. The Magmilor Treatment Pack—a *single* drug presented as tablets and pessaries—deals effectively with all three common types of infective vaginitis—giving maximum assurance of a quick response in a condition where it is often difficult to make a clinical distinction as to pathogenesis:

Trichomonal vaginitis The systemic action of Magmilor oral tablets attacks *Trichomonas* in the vaginal walls. The local action of the pessaries eliminates free-swimming Trichomonads from the vaginal lumen, giving quicker and more complete relief than can be obtained with systemic action alone.

Candidal vaginitis The local action of Magmilor pessaries eradicates candidal infection and, in cases of trichomonal infection, prevents the candidal overgrowth which may occur if a trichomonocide only is used.

Non-specific vaginitis Magmilor pessaries also provide coverage against the bacteria which are implicated in non-specific vaginal infections—including *Streptococci* and *Coccobacilli*.

No co-prescribing hazards By using only one drug, Magmilor eliminates the potential hazard of drug incompatibility associated with co-prescribing.

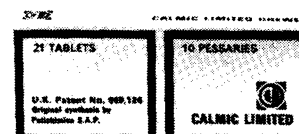

R MAGMILOR TREATMENT PACK

Xsingle-drug coverage in vaginitis

Magmilor Treatment Pack consists of twenty-one oral tablets (each containing 200 mg nifuratel) and ten pessaries (each containing 250 mg nifuratel).

Cloth DM 198,—
US \$ 54.50

Aided by a staff of 21 polyglot documentalists and librarians, Selye attempted to correlate the world literature on experimental cardiovascular diseases with his own experimental findings gathered during 40 years of research in this field. Over 6000 publications have been selected for discussion and summarized in simple concise English.

The "analytico-synthetic style" is used: Quoted data (printed in small type) present objective summaries which are always preceded by a subjective interpretation (printed in distinctive type) based on Selye's experience. Thus, the volume represents a "book within a book": Classified abstracts are clearly separated from personal interpretations and summaries of each subject.

Primary emphasis is placed upon the techniques for the production and prevention of cardiovascular diseases in the light of clinical problems. Attention is focused upon light- and electron-microscopic alterations, but associated chemical changes are also described. The volume is richly illustrated and contains numerous unpublished observations of the author's group, especially on the prevention of cardiovascular diseases by potassium, potassium-sparing agents and catabolic steroids.

PUBLISHED TODAY

TODAY'S DRUGS

New 1970 Edition

I—Antibiotics

The problem facing the prescribing doctor today is choice. Catalogues of drugs—no matter how detailed—are of little help unless accompanied by advice on which drug to give for what condition. So this new edition of "Today's Drugs" not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy.

The new edition differs from the earlier one in other ways. It deals with only three subjects—infections, vitamin deficiencies and anaemias, and disorders of the nervous system. Further volumes will be published at intervals of about a year, and by the time the whole field of therapeutics has been covered this first volume will have become obsolete and due for replacement. In order to further emphasize the ephemeral nature of books on therapeutics—and to cut costs—the book is a paperback.

FOLIC ACID DEFICIENCY and ANAEMIA OF PREGNANCY

FOLEX-350

CONTAINING FOLIC ACID 350 MICROGRAMS WITH
FERROUS FUMARATE 308 MILLIGRAMS IN EACH TABLET

DOSE

ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

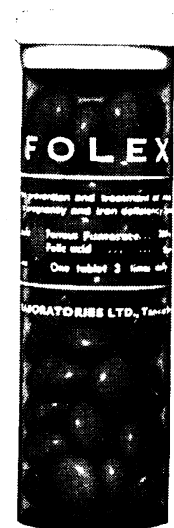

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 308 mg. of ferrous fumarate (equivalent to 100mg elemental iron) has been introduced.

*Ref. *B.M.J.* No. 5529. p. 158.

COMPOSITION

Ferrous fumarate 308 mg.
Folic acid 350 mcg.

FOLEX

The original Folex containing a therapeutic dose of folic acid (folic acid 5 mg. and ferrous gluconate 300 mg.) will remain available for the treatment of confirmed cases of megaloblastic anaemia and

for those practitioners who might prefer to rely on the larger dose of folic acid which for several years has been given prophylactically with such excellent results.

in bronchitis more effective than ampicillin or tetracycline

Compared with ampicillin

In a controlled single-blind trial involving 50 patients with chronic bronchitis SEPTRIN* was shown to be more effective than ampicillin, with reference to reduction of sputum volume and purulence.

Sputum volume reduction

There was a significantly greater reduction in mean sputum volume after treatment with SEPTRIN than after treatment with ampicillin.

Sputum purulence reduction

23 out of 24 cases with purulent sputum receiving SEPTRIN improved (using MRC sputum grading) as compared with 16 cases out of 22 cases with purulent sputum receiving ampicillin who improved in this respect. The success rate for SEPTRIN was significantly higher than for ampicillin.

Clinical improvement

Clinically, 24 out of 25 cases receiving SEPTRIN responded as compared with 19 out of 25 receiving ampicillin.

Reference: Postgrad med J, (1969) 45, Supplement (November) 86

Compared with tetracycline

In a trial designed to compare the effect of SEPTRIN with that of tetracycline in the treatment of chronic bronchitis, it was found that a week's course with SEPTRIN was more beneficial than a week's course of tetracycline.

24 patients received SEPTRIN and 22 received tetracycline, and objective data was collected from the two groups at the beginning and at the end of treatment.

Sputum volume

The decrease in mean sputum volume after treatment, as a fraction of the initial measurements, was significantly larger for the SEPTRIN group.

Sputum purulence

Objective grading of reduction in purulence of the sputum showed better results with SEPTRIN than with tetracycline at the end of treatment.

Reference: Postgrad med J, (1969) 45, Supplement, (November) 91.

BRUFEN new freedom for the arthritic

(ibuprofen)

Brufen is a highly effective anti-rheumatic agent with a remarkable freedom from side-effects. Its value in the treatment of arthritic disease is now well established and the benefits of Brufen are well known to thousands of arthritic patients. Experience in hospitals and general practice clearly shows that, in arthritic conditions, Brufen relieves pain and stiffness, reduces swelling, improves joint flexion and extends

the pain-free walking distance. To the arthritic patient, Brufen brings the new freedom of a progressive improvement in functional capacity.

Brufen tablets each contain 200mg. of ibuprofen, the first anti-rheumatic compound to be evolved entirely by British research.

The book deals with the role of the quantitative method in the development of biology and medicine, and with changes in the attitude of the medical profession to the quantitative point of view. Using historical developments as a basis, the book discusses problems of demography, epidemiology, clinic and therapy, biology and physiology, and contrasts the contributions of logical medical statistics with those of mathematical statistics to medicine.

Glaxo brief

"It's that pain
again doctor,
when I pass water"

It's her third attack of acute cystitis in six months. A number of treatments were tried. This time Ceporex is being prescribed.

In urinary tract infections Ceporex has given very high clinical success rates. Ceporex rapidly kills the common gram-negative organisms responsible for most urinary tract infections and is particularly successful against most strains of *E. coli*. It also kills most gram-positive organisms which may be present, including penicillin-resistant strains. Ceporex absorption is rapid and virtually complete, giving high serum and urine levels within an hour of administration. It has low toxicity, is well tolerated and can be considered in patients hypersensitive to the penicillins.

Betnovate – the topical steroid quickest to succeed

All Betnovate preparations contain betamethasone 17-valerate – the most successful topical steroid. In clinical investigations it was shown that in the treatment of psoriasis and a number of dermatoses "... betamethasone 17-valerate closely approaches the criteria of the ideal topical corticosteroid."¹ Not only does Betnovate achieve a faster and more complete clearance in relatively responsive conditions,^{1,2,3,4} but also it often succeeds^{1,2,3} when other topical steroids fail.

Sound reasons, together with its low cost, for prescribing Betnovate – the most successful topical steroid. Betnovate Cream and Ointment are available in 15, 30 and 100 gram tubes. Betnovate Lotion is presented in 20 ml bottles.

COMMERCIAL APPOINTMENTS (see also pp. xxii-xxiii)

PHARMACEUTICALS DIVISION

PHYSIOLOGIST PHARMACOLOGIST

We have a vacancy for a Physiologist/Pharmacologist to join a team, composed of chemists, biochemists and biologists, engaged in research in inflammation and immunopathology. The successful candidate would be responsible for the design and supervision of tests for anti-inflammatory activities, the further development of active compounds and basic research into the mechanisms and control of inflammation. Because we require someone who can initiate and carry out his own ideas previous research experience is essential.

Our modern research laboratories are well equipped and set in a very attractive part of rural North Cheshire, yet with easy access to Manchester.

Conditions of service, career prospects and assistance available to married men in moving home are designed to attract and retain staff of high calibre, and would be discussed at interview.

Applications, giving brief details of age, qualifications and experience should be addressed to:

G. D. Searle & Co. Ltd.

MAKERS OF ETHICAL PHARMACEUTICALS
have a vacancy for a

Doctor

in their Medical Department in
HIGH WYCOMBE, BUCKINGHAMSHIRE

Internal promotion has created this vacancy in our Medical
Department. We are a fast growing company with an enviable
reputation in the profession as a manufacturer of ethical
pharmaceuticals. What is perhaps more important is our wide
and continuing research programme which has produced an
outstanding succession of worthwhile drugs. The person
appointed will be expected and encouraged to remain in the
forefront of medical progress.

The doctor will be involved in evaluating new drugs and their
uses, and will advise the company on the marketing aspects of
new and existing products. There is ample opportunity for
travel and for the assumption of increased responsibility.

Candidates should be medically qualified. Ideal age limits are
26-35. A lively mind and good personality may be greater
attributes than experience.

Salary will be attractive and negotiable. Conditions and benefits
are excellent, and a company car is provided for this position.

Please write in the first instance, giving brief career details to:—

The Medical Director,
G. D. Searle & Co. Ltd.,
Lane End Road,
High Wycombe,

GOVERNMENTAL**Scottish Health Services
Research & Intelligence Unit****Deputy
Director****New appointment: £5200**

This Unit is a division of the Scottish Home & Health
Department. It is primarily responsible for the collection,
analysis and publication of data on the operation of the
Health Service; for carrying out research into its workings;
for development of computer applications, and for
advising on and providing (as appropriate) financial
support for operational research by universities and other
relevant outside organisations.

The Deputy Director will assist the two Co-Directors (one a
Principal Medical Officer and the other non-medical) in
directing the Unit but will be given specific supervisory
responsibilities suitable to his interest and experience. He
will be encouraged to develop his own lines of work and to
publish results. At present there are several projects at
varying stages concerned with the health and welfare of
old people, with the development of a computer policy, and
with staffing requirements and operations of the Health
Service. An important part of the duties will be the written
and oral exposition of the Unit's work, and the maintenance
and development of close relationships with colleagues and
support staff within the Health Service and universities etc.
Candidates (men or women) must be fully registered as
medical practitioners in the UK and have wide experience
in medical care research. The post is in the grade of Senior
Medical Officer: non-contributory pension.

MEDICAL OFFICER, CLASS 2

The Australian Commonwealth Serum Laboratories require a Medical Officer with postgraduate experience or qualifications in haematology/serology to work in the W.H.O. National Blood Group Reference Laboratory. We are seeking a suitable person to train under, and eventually succeed, the present Officer-in-Charge of the Laboratory, Dr. R. T. Simmons, who is approaching retirement.

The Commonwealth Serum Laboratories is a semi-Government statutory authority which operates under the control of an independent Commission. Its function is to undertake research into and to produce biological products. It is located in the city of Melbourne and comprises well-equipped laboratories and a comprehensive technical library. Its total staff exceeds 900 and approximately 120 graduates are employed.

The current work of the Blood Group Reference Laboratory involves blood group genetic studies, the investigation of difficult blood group and cross-matching problems and research related to the prevention of Rh-haemolytic disease. Opportunities will be available to pursue research in these and related fields.

Conditions are excellent, and include liberal leave provisions and superannuation after a qualifying period. Salary will be up to \$A12,300 per annum, dependent upon the qualifications and experience of the successful applicant. The cost of travel to Australia for the appointee and his family will be paid by C.S.L.

Applications or enquiries should be directed by air mail to the Personnel Manager, 45 Poplar Road, Parkville, Victoria, Australia, to reach there no later than August 17, 1970.

NIGHT CRAMPS

90% improvement

“The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent.”

(Brit J Clin Pract (1970) 23, 161)

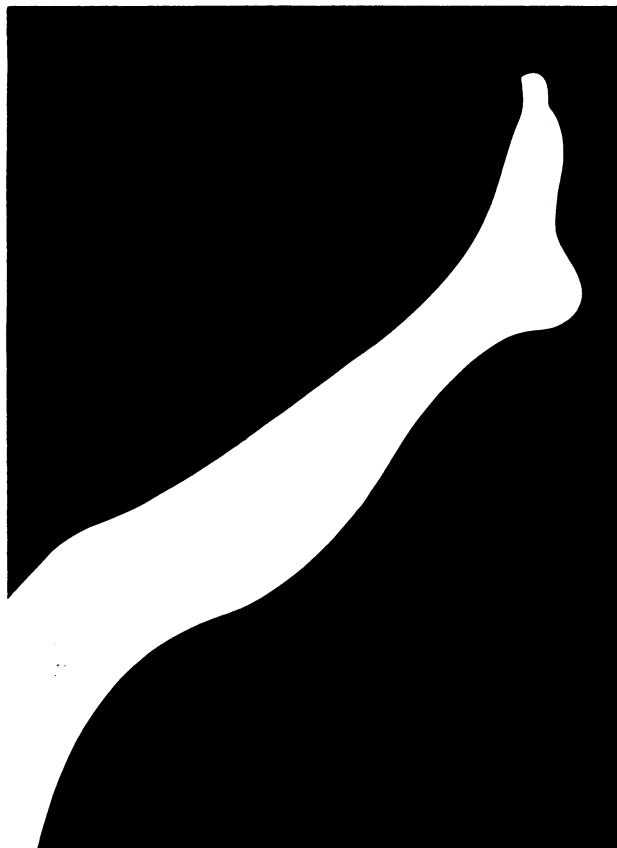

CHRONIC ACHING PAIN

54% improvement

“The degree of relief in chronic aching pain in the legs was not so marked, (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent.”

(Brit J Clin Pract (1970) 23, 161)

PAROVEN[®]

HEAVY LEGS 70% improvement

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

(*Brit J Clin Pract* (1970) 23, 161)

improves capillary flow

PAROVEN[®] in varicose veins and post phlebitic syndrome

Recent clinical and double blind trials^{1 2} have confirmed that PAROVEN provides outstanding relief of symptoms due to chronic venous insufficiency or back pressure. Particularly good results were obtained in night cramps, heavy legs and chronic aching pain. Other symptoms which respond to long-term therapy with Paroven include:

superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contra-indications to Paroven; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of 0-(β hydroxyethyl) - rutosides (not less than 45% troxerutin), in bottles of 20 and 100 capsules.
