TRICHOMONAL VAGINITIS

single drug stops triple trouble!

CANDIDAL VAGINITIS

NON SPECIFIC VAGINITIS

Five years of clinical trials with Magmilor, involving more than 6,000 patients with vaginitis, have shown success rates of the order of 90 per cent. The Magmilor Treatment Pack—a *single* drug presented as tablets and pessaries—deals effectively with all three common types of infective vaginitis—giving maximum assurance of a quick response in a condition where it is often difficult to make a clinical distinction as to pathogenesis:

Trichomonal vaginitis The systemic action of Magmilor oral tablets attacks *Trichomonas* in the vaginal walls. The local action of the pessaries eliminates free-swimming Trichomonads from the vaginal lumen, giving quicker and more complete relief than can be obtained with systemic action alone.

Candidal vaginitis The local action of Magmilor pessaries eradicates candidal infection and, in cases of trichomonal infection, prevents the candidal overgrowth which may occur if a trichomonacide only is used.

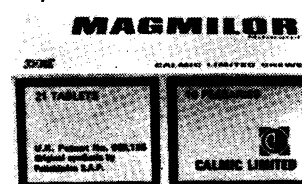

Non-specific vaginitis Magmilor pessaries also provide coverage against the bacteria which are implicated in non-specific vaginal infections—including *Streptococci* and *Coccobacilli*.

No co-prescribing hazards By using only one drug, Magmilor eliminates the potential hazard of drug incompatibility associated with co-prescribing.

R MAGMILOR TREATMENT PACK Xsingle-drug coverage in vaginitis

Magmilor Treatment Pack consists of twenty-one oral tablets (each containing 200 mg nifuratel) and ten pessaries (each containing 250 mg nifuratel).

Browne's ANTENATAL CARE

By J. C. McClure Brown and G. Dixon

This standard guide to medical care in pregnancy has now been rewritten as a new book. A new co-author has been introduced. There are special contributions by Dr. Erica Wachtel (vaginal cytology); Dr. J. L. Fluker (venereal diseases); and Professor John Davis (the infant of the diabetic mother). Advances in knowledge, in the complexity of medical conditions associated with pregnancy, are included. Authoritative coverage for students, reading for examinations, at various levels, particularly postgraduates, and for those engaged in practice—including nurses—remains the principal aim of the authors.

HUMAN CIRCADIAN RHYTHMS

By R. T. W. L. Conroy and J. N. Mills

This book is designed both for those interested in rhythms and those whose interest is rather in the separate fields of study, the kidney, the endocrines, etc., which provide some of the chapter headings. The authors confine themselves to those human rhythms with a frequency of around once a day. These have been extensively observed, and their usefulness is often, though not always apparent; most of those who study them have graduated from the stage of amassing observations, and now attempt to explain and interpret rhythmic phenomena in terms of known physiological influences. This volume will provide an indication to clinicians of the bearing this aspect of physiology has on clinical matters.

Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.* last autumn, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

Recurrent Urinary Tract Infections

Infections such as cystitis and pyelonephritis have shown a satisfactory clinical response to 'Keflex' in 80% of cases – with bacteriological success in 75%. (In acute infections the clinical success rate rises to 93% with elimination of pathogens in 91%). Bactericidal to the majority of urinary pathogens, 'Keflex' has such remarkably low toxicity that with care it may be given even in the presence of renal impairment.

Bronchitics

British Medical Journal, 5 September, 1977

In bronchitic patients a change of antibiotic therapy is sometimes necessary. Some patients may no longer show a satisfactory clinical response to initial therapy, and other patients may be unable to tolerate certain antibiotics. In problem cases such as these, 'Keflex' becomes a logical choice. Highly effective and bactericidal to the majority of causative pathogens, 'Keflex' has an overall success rate of 91% in bronchitis with elimination of the pathogen in 71% of cases. Gastro-intestinal disturbance and hypersensitivity reactions are rare.

Problem ENT's and soft tissues

British Medical Journal, 5 September, 1970

'Keflex' has an outstanding combination of properties in such infections—rapid absorption, high rate of effectiveness and unaffected by penicillinase. The overall clinical success rates are 97% in throat and ear infections, and 95% in skin and soft tissue infections. Importantly, 'Keflex' is extremely well tolerated and teeth staining in children has never been reported.

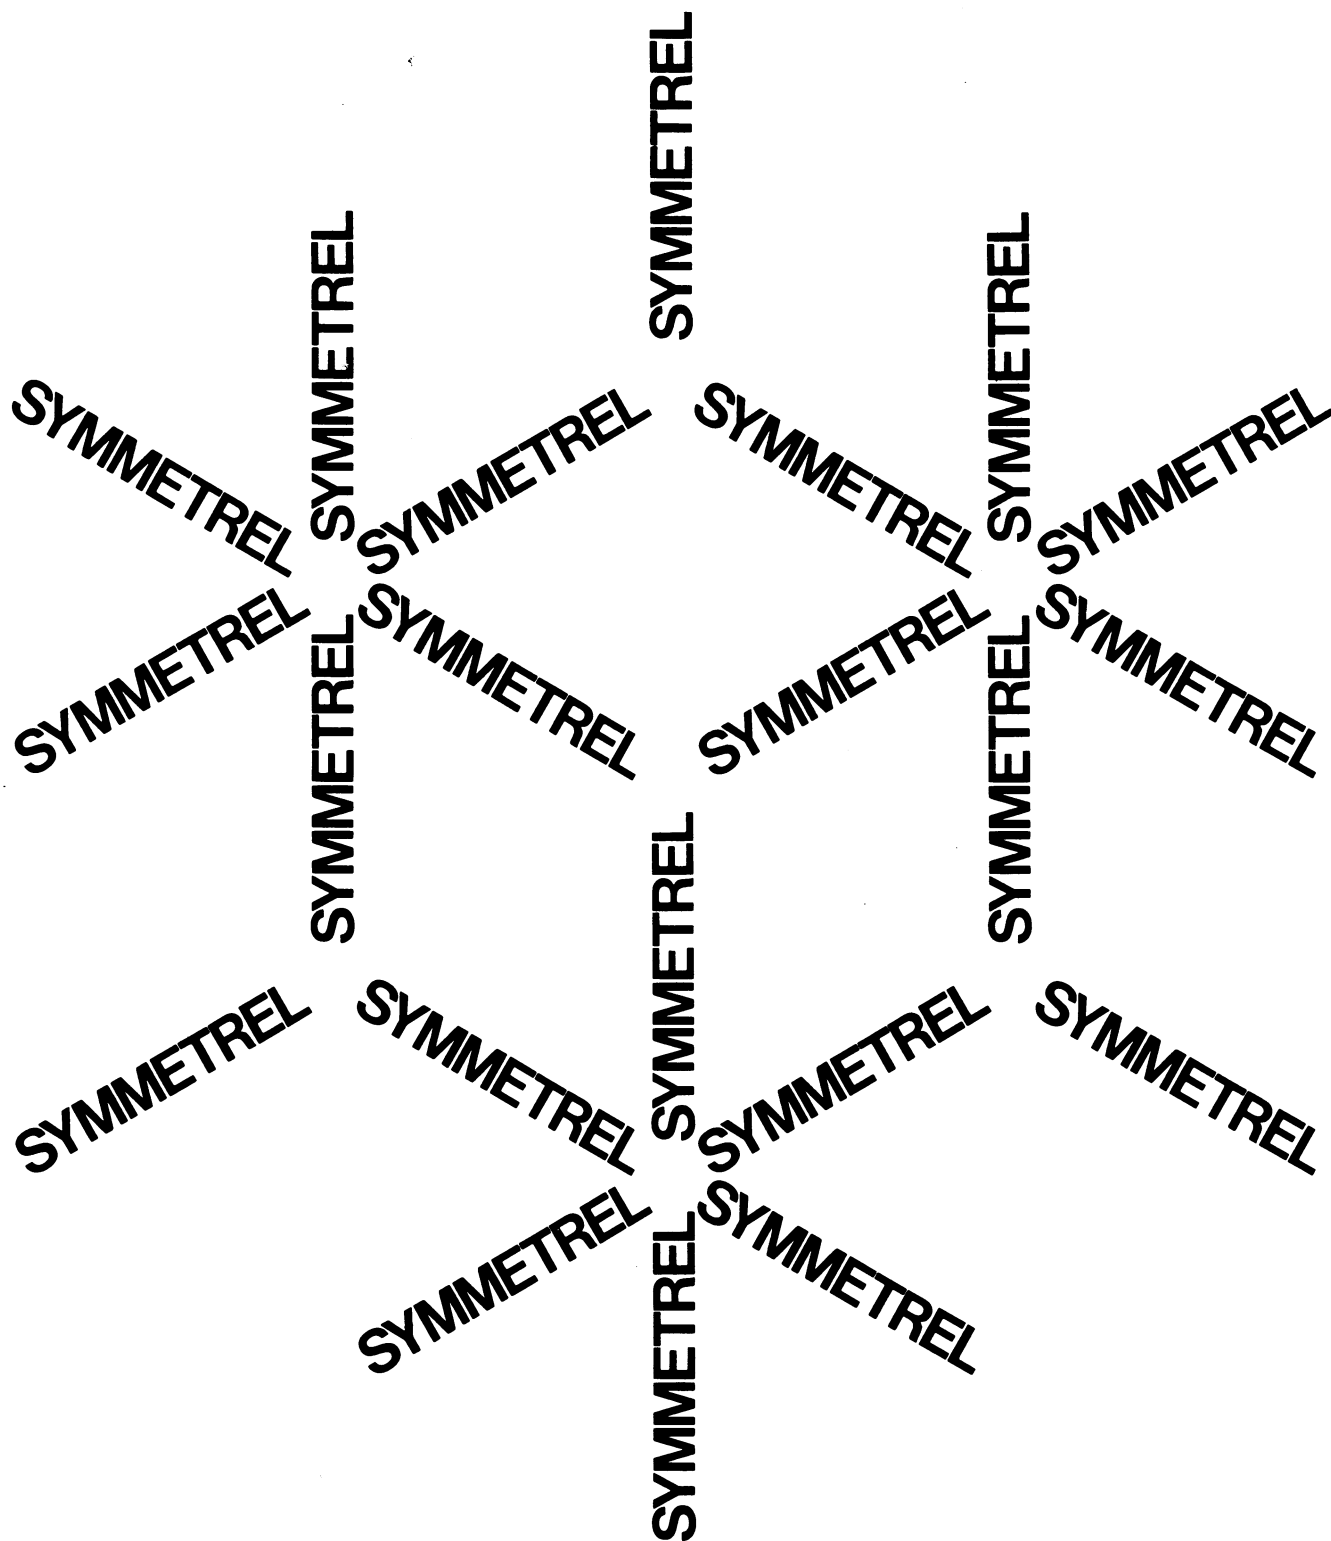

'Keflex' is available in green and white capsules containing 250 mg cephalexin (as the monohydrate), and as a suspension containing 125 mg cephalexin per 5 ml. Further information is available on request.

Halt at the flashing light

Flashing lights and visual disturbances, classically early warnings of migraine, are signals for arresting all manifestations of an attack – at onset.

MIGRIL* acts in the minutes between initial warning and the otherwise inevitable full-blown attack.

As well as containing an effective dose of ergotamine (2mg in each tablet), enhanced by caffeine, MIGRIL contains the anti-emetic, cyclizine. Nausea and vomiting, due to migraine itself or to ergotamine, are very effectively relieved.

MIGRIL, taken at the first warning of an attack, provides a specific treatment that the patient will learn to rely on. Full information is available on request.

Long term illness is unpleasant.

Long term debt is unnecessary.

You have to face the fact that when you can't work your income soon drops.

But when illness or accident strikes you the bills still have to be paid.

Too often illness means long term debt. Which is unnecessary. For a small monthly sum you could ensure that when your income falls due to incapacity the Medical Sickness Society will start sending you a monthly cheque to replace it.

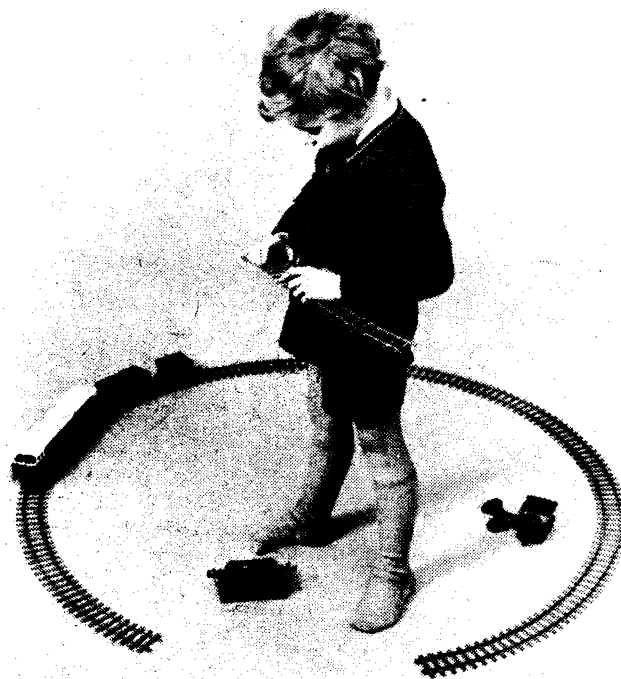

And the cheques will continue either until you're fit enough to return to work or until normal retirement age, whichever is earlier. And we can't cancel the policy because of long or frequent claims.

If you have not got around to ensuring that we take over your financial worries when incapacity stops you working write to us today quoting reference number 5013. You will be surprised how little this essential cover will cost.

Break the threadworm life-cycle with single-dose Pripsen

Threadworms often infect families, one child can infect the others.

A single dose of Pripsen, taken by each member of the family, can eradicate threadworm infection. Pripsen treats the affected child and protects others against infection. As a precaution against possible re-infection a second dose of Pripsen should be given after two weeks.

Pripsen (piperazine phosphate and standardized senna) is also effective against roundworms.

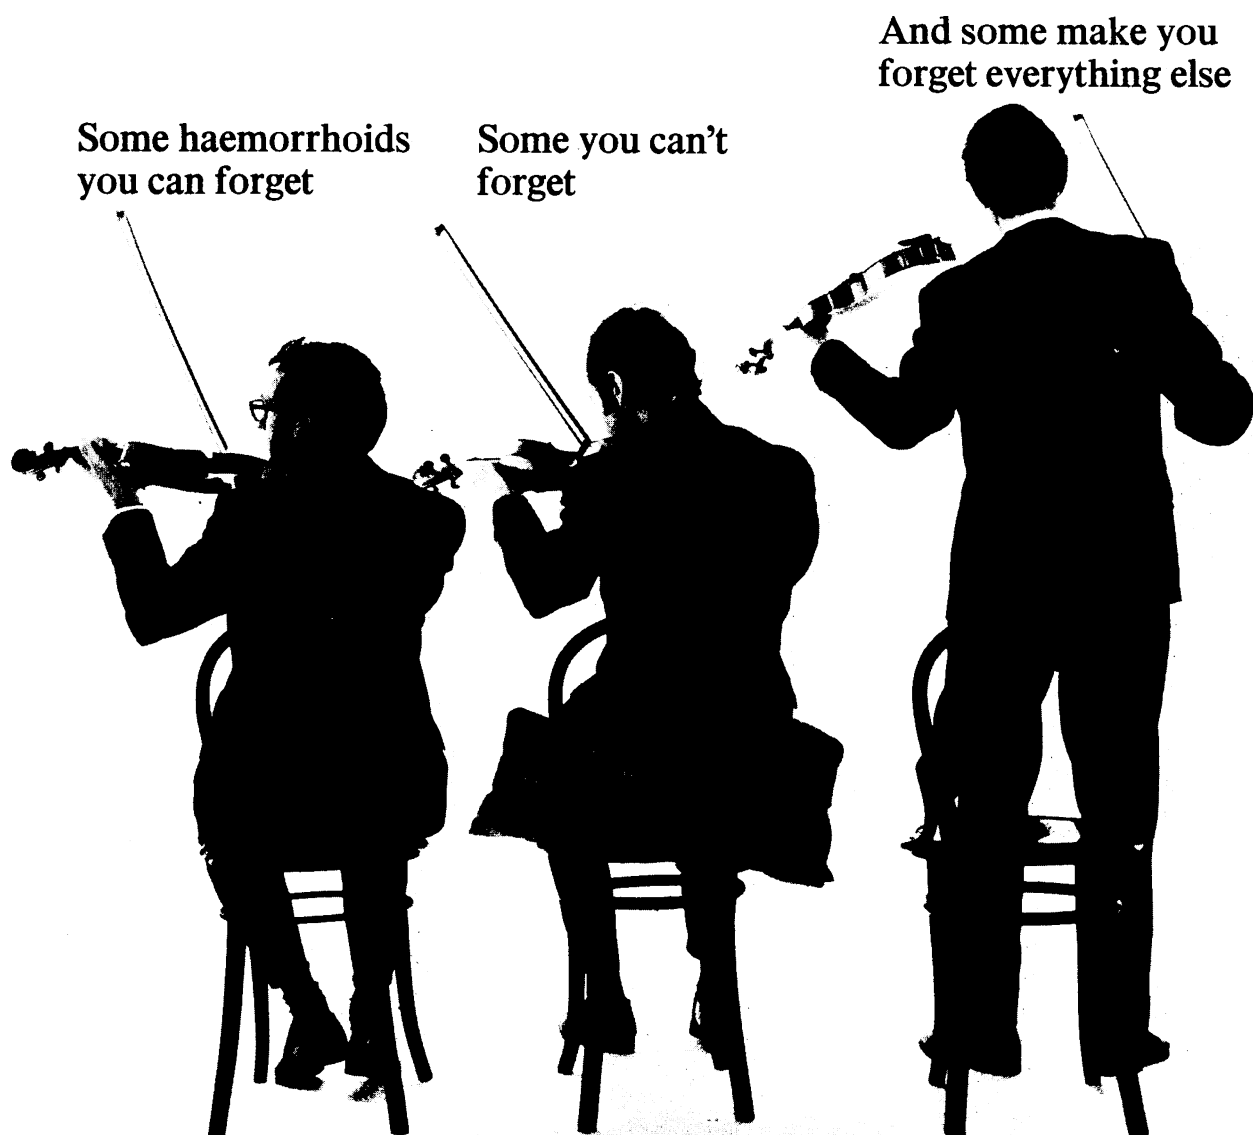

Tube of 10G (one full dose). Tins of 80G (dose measure enclosed).
Pripsen can be mixed with milk or water.

Propaderm relieves skin problems-usually within one week

Propaderm has been shown to be rapidly effective in the treatment of steroid-responsive skin conditions—even in cases which have failed to respond to other topical steroids. What is more, the wide range of Propaderm preparations enables you to choose a treatment to suit each individual case. It's not surprising that more and more doctors are making Propaderm their first choice. In a recent trial 94% of 252 patients

with eczema or psoriasis showed significant improvement after treatment with Propaderm (cream, ointment and ointment with 3% aureomycin BP). Most patients (92.8%) responded in the first week of treatment.

"All three preparations which were tested were found to be superior to previous treatments. No side effects were reported".

LONDON
SEPT 15TH - 18TH
1970

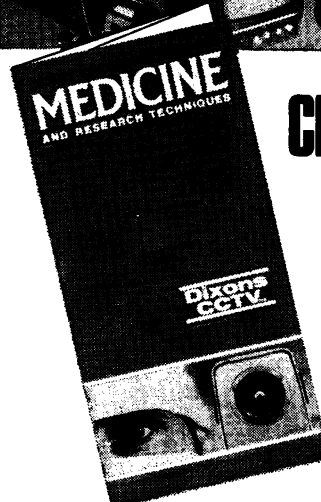

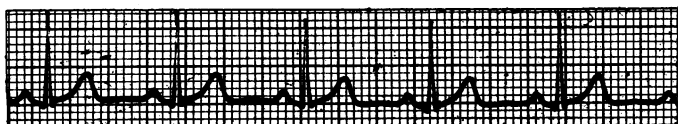

The phenomenal growth of the bio-medical engineering industry can be most effectively seen at Olympia this September. The latest instrumentation and equipment from more than 60 companies throughout the world will be displayed and demonstrated. The Bio-Medical Engineering Exhibition presents a unique opportunity to see all the relevant equipment together under one roof.

A lecture programme is being arranged by The Biological Engineering Society who will also be organising a series of scientific displays demonstrating the most recent original research.

10.00 to 18.00 hrs Tues. Weds. Thurs.
10.00 to 16.00 hrs Fri.

Sponsored by the publishers of 'Bio-Medical Engineering'.

in bronchitis more effective than ampicillin or tetracycline

Compared with ampicillin

In a controlled single-blind trial involving 50 patients with chronic bronchitis SEPTRIN* was shown to be more effective than ampicillin, with reference to reduction of sputum volume and purulence.

Sputum volume reduction

There was a significantly greater reduction in mean sputum volume after treatment with SEPTRIN than after treatment with ampicillin.

Sputum purulence reduction

23 out of 24 cases with purulent sputum receiving SEPTRIN improved (using MRC sputum grading) as compared with 16 cases out of 22 cases with purulent sputum receiving ampicillin who improved in this respect. The success rate for SEPTRIN was significantly higher than for ampicillin.

Clinical improvement

Clinically, 24 out of 25 cases receiving SEPTRIN responded as compared with 19 out of 25 receiving ampicillin.

Compared with tetracycline

In a trial designed to compare the effect of SEPTRIN with that of tetracycline in the treatment of chronic bronchitis, it was found that a week's course with SEPTRIN was more beneficial than a week's course of tetracycline.

24 patients received SEPTRIN and 22 received tetracycline, and objective data was collected from the two groups at the beginning and at the end of treatment.

Sputum volume

The decrease in mean sputum volume after treatment, as a fraction of the initial measurements, was significantly larger for the SEPTRIN group.

Sputum purulence

Objective grading of reduction in purulence of the sputum showed better results with SEPTRIN than with tetracycline at the end of treatment.

Reference: Postgrad med J, (1969) 45, Supplement, (November) 91.

He is taking the hypotensive therapy preferred by patients.†

This is clearly demonstrated in a recent report of a comparative trial† involving three antihypertensive agents. ESBATAL accomplished a standing diastolic pressure of 100 mm Hg in 75 per cent of cases. A lower incidence of side-effects, than with

guanethidine or methyldopa was recorded—and moreover, ESBATAL was preferred by more patients than were the other two agents.

UNIVERSITY OF EDINBURGH
FACULTY OF MEDICINE

The University grants the Degrees of Bachelor of Medicine and Bachelor of Surgery (M.B., Ch.B.), Doctor of Sciences (D.Sc.) Doctor of Medicine (M.D.), and Master of Surgery (Ch. M.).

The curriculum for the degrees of M.B., Ch.B. normally extends over six years. For consideration for admission, applicants must apply through the Universities' Central Council on Admissions, G.P.O. Box No. 28 Cheltenham Glos., on the Council's own special form, either via School, established Agency, or directly. The appropriate form is obtainable from Head of School, the Agency or from the Central Council's Office direct, together with a booklet explaining the full scheme. The closing date for receipt of applications by the Council, both from United Kingdom and Overseas Applicants, is December 15 of the year prior to that in which admission is desired. Applications for admission should not be submitted to the U.C.C.A. Office earlier than September 1 of the year prior to that in which admission is desired. The definition of an Overseas Applicant is given by the Universities Central Council in their Handbook.

The University conducts full courses of instruction and grants Diplomas in Radiodiagnosis, Radiotherapy, Tropical Medicine and Hygiene, Social Medicine and Psychological Medicine.

In the various Departments of the Faculty of Medicine provision is made for research by students of graduate standing.

A copy of the Prospectus and Faculty Programme may be obtained from the Dean of the Faculty of Medicine, University Medical School, Teviot Place, Edinburgh 8. Programmes regarding Degrees in other Faculties may be obtained from the Matriculation Office, University South Bridge, Edinburgh 8.

School of Dental Surgery
Two Degrees in Dental Surgery are conferred by the University of Edinburgh, viz. Bachelor of Dental Surgery (B.D.S.), and Doctor of Dental Surgery (D.D.S.).

The curriculum for the B.D.S. Degree normally extends over a period of five years.

The procedure for the submission of applications for admission to the Dental School is similar to that for the medical school except that inquiries should be addressed to the Director of Dental Studies, School of Dental Surgery, 31 Chambers Street, Edinburgh 1. Applicants may be required to attend for interview by a Selection Committee.

Information regarding exemption from or direct admission to the First Professional Examination in Physics, Chemistry and biology is contained in the Prospectus obtainable on application to the Dean of the Faculty of Medicine or to the Director of Dental Studies.

CHARLES H. STEWART
Secretary to the University.

**ST. GEORGE'S HOSPITAL MEDICAL SCHOOL
(University of London)**

THE HOSPITAL at Hyde Park Corner is one of the oldest centres of medical learning and probably the most accessible in London. There are 905 beds in the Group which includes St. George's Hospital, Tooting, and Atkinson Morley's Hospital at Wimbledon.

THE SCHOOL. In spite of an increase in the number of students attending for clinical training, the School is still able to maintain its policy of close contact between staff and students in all departments and to offer a wide range of clinical experience in the two hospitals at Hyde Park Corner and Tooting. A major reconstruction of the School's buildings at Hyde Park Corner in the 1950s provided increased social and laboratory facilities and a new library. There are established clinical academic departments of Medicine, Surgery and Psychiatry in addition to Departments of Pathology, Chemical Pathology, Medical Microbiology, Haematology and Forensic Medicine.

HOUSE APPOINTMENTS. Pre-registration appointments are sufficiently numerous to allow more than half the graduates of the School to hold one appointment within the Group.

RECREATION. There are School playing fields of thirteen acres at Atkinson Morley's Hospital, Wimbledon which cater for all the usual field sports, squash courts on the Hospital site at Tooting and others only a few minutes walk from Hyde Park Corner. Club rooms and refectories are on the premises at Hyde Park Corner and at Tooting, those at Tooting forming part of a Students' Centre completed in 1968 with its own library.

FUTURE DEVELOPMENTS. A completely new Hospital with 1,300 beds is to be built at Tooting. It will include a new Medical School for pre-clinical and clinical studies which will be amongst the most modern in the country and closely integrated with the Hospital buildings and those of the Royal Dental Hospital and its School of Dentistry. The first phase of this development including the central facilities for the Medical School is due for completion in 1975.

FEES. £87 7s. 0d. including full membership of Club with its amenities, and sporting and social activities.

ENTRY. All applicants for entry should be made through the Universities Central Council on Admissions.

A prospectus is available on application to the Dean.

UNIVERSITY OF BRISTOL**FACULTY OF MEDICINE**

THE SESSION commences on October 1, 1970.

The University grants the Degrees of Bachelor of Medicine and Surgery (M.B., B.Ch.), Master of Surgery (Ch.M.), Doctor of Medicine (M.D.), Bachelor of Surgery (B.D.S.), Master of Dental Surgery (M.D.S.), Bachelor of Veterinary Science (B.V.Sc.), and Doctor of Philosophy (Ph.D.), as well as a Diploma in Public Health (D.P.H.), and holds a Training Course for Health Visitors.

The lectures and laboratory courses, which are given in the University, are designed to give the curricula for the University's qualifications.

Hospital Practice and Clinical Instruction are provided in the Hospitals associated with the University for this purpose, and students have exceptional opportunities for studying the practice of medicine from a large variety of cases.

There are Halls of Residence for men and women students.

Inclusive fees:
For the M.B., B.Ch. curriculum £87 p.a.
For the B.D.S. curriculum £87 p.a.
For the B.V.Sc. curriculum £87 p.a.

For additional particulars apply to the Registrar, The University, Senate House, Bristol 2.

**UNIVERSITY OF OXFORD
MEDICAL SCHOOL**

The University grants the degrees of Bachelor of Medicine and Bachelor of Surgery (B.M., B.Ch.), Master of Surgery (M.Ch.), and Doctor of Medicine (D.M.). A candidate who wishes to read for the degrees of B.M., B.Ch. must be accepted as a member of a college and must be subsequently be matriculated as a member of the University. A candidate for these degrees must also take the B.A. degree in some subject (usually the Final Honour School of Physiological Sciences). Application for admission should be made to the Oxford College Admissions Office, 58 Banbury Road, Oxford.

Pre-clinical Course.—The pre-clinical course lasts nine terms. The first five terms are spent preparing for the First B.M. examination. After the First B.M. four further terms are spent in the study for a Final Honour School which qualifies for the B.A. degree. Then follows the clinical course. For further information apply to the Secretary of the Medical School.

Clinical Course.—This course lasts for 33 months. The clinical school is based on the Radcliffe Infirmary, the Churchill Hospital and the specialist hospitals in Oxford. There are eight University Chairs in clinical subjects in the teaching hospital group and several important Research Units.

The United Oxford Hospitals (over 1,400 beds) serves both as the Area Hospital and also as a Regional Centre. The range of clinical material is exceptional for a teaching hospital and clinical firms are small. The tutorial system continues throughout the clinical course. Students who are admitted from other universities may read for the medical degree of their own university or may apply to transfer to the Oxford B.M. examinations.

Osler House and its garden adjoin the Radcliffe Infirmary and provide attractive premises for the clinical students' club.

A Prospectus may be obtained on application to the Secretary of the Medical School, Oxford.

Higher Degrees.—The degrees of D.M. and M.Ch. are open to those who have taken the degrees of B.M., B.Ch. at Oxford. Further information may be obtained from the Director of Postgraduate Medical Studies, Research and Specialist Training. Enquiries may be addressed to the head of the relevant clinical or laboratory department in one of the teaching hospitals or to the Director of Postgraduate Medical Studies, 43 Woodstock Road, Oxford.

**CHARING CROSS HOSPITAL
MEDICAL SCHOOL**

(University of London)

WINTER SESSION BEGINS

OCTOBER 7, 1970

The School and its parent Hospital at present occupy adjoining sites in the centre of London. A new and fully integrated Hospital and Medical School of unique design and three times the present size is, however, under construction at Fulham, the move to which is due to take place in 1973.

Full clinical instruction is provided for students proceeding to the degrees of the Universities of Oxford, Cambridge and London, and the total number of beds is sufficient to provide nearly every student with a pre-registration house post upon qualification.

Senior Entrance Scholarships. A number of scholarships are open to members of Oxford and Cambridge Universities wishing to proceed to their clinical studies. These scholarships are awarded on the results of examinations held annually in late June or early July, embracing subjects (1) Anatomy and Physiology or (2) Biochemistry or Pathology. Their annual value is £100 for each of the three years of the clinical period. Many other scholarships, exhibitions and prizes are open to students pursuing their clinical course.

The Pathological Museum, which is subject to continual revision, is designed so as to display exhibits to the greatest advantage. It includes the well-known Lockyer Collection of Gynaecological and Obstetric Pathology specimens.

The Library, which includes a branch at Fulham, is extensive and contains not only a wide range of books for undergraduate and specialist use but also an exceptionally comprehensive section allocated to periodicals.

The Students' Union provides facilities for almost every form of athletic activity at its Sports Ground of 24 acres at Cobham, Surrey, and also includes a large number of societies, both social and cultural.

The annual composition fee is £100. Any further information may be obtained from the Dean or the Secretary, both of whom are available for interview by appointment at:

The Adelphi, 1-11 John Adam Street,

Telephone: 01-836 7788

Dean: S. J. R. Reynolds, M.A., M.B., B.Ch., D.M.R.E.
Secretary: Brian S. Drewe, E.R.D., T.D., LL.B., M.A., F.T.C.L.

**UNIVERSITY OF EXETER
Postgraduate Medical Institute**

A full-time postgraduate course lasting 10 weeks will begin on October 7, 1970. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialise in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (19377)

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin.), D.P.M.
St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.
Fees range from £31 10s. per week, and subscribers to private medical insurance schemes, such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges. Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel. Northampton 34354), who can be seen in consultation by appointment either at the hospital or at 55 Harley Street, London, W.1. 67-13

effective in both anxiety and depression

IN ANXIETY

"... [Sinequan] was significantly superior to chlordiazepoxide".

Curr. ther. Res., 1968, 10, 514.

IN DEPRESSION

"... Sinequan appeared to be a useful antidepressant with a distinct anti-anxiety and possibly also antihyperexcitation property".

A Scientific Exhibit presented at American Psychiatric Association, Boston, U.S.A., May 13-17, 1968.

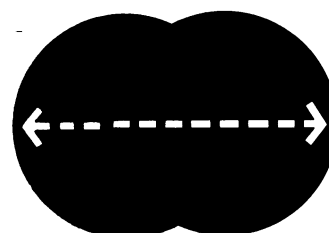

IN MIXED ANXIETY/DEPRESSION

"... we have a drug here [Sinequan] which has certainly a dual action ..."

even chests need a good night's rest

Bronchospasm has a nasty habit of disturbing people's rest:
the patient's rest if he is on q.d.s. treatment;
yours when he calls you for help in the middle of the night.

The simple answer is often the best: truly effective
prophylactic cover given at a dosage which disturbs no one.

Theograd[®]
bronchodilation night and day

Theophylline gradually, consistently, predictably released from the Gradumet in the small intestine; reliably absorbed to give relief from bronchospasm over a 24-hour period, from one 350 mg. tablet b.d.

Recommended dosage: 2 tablets initially, followed by 1 b.d. As with all theophylline preparations, some patients may experience gastrointestinal side effects; the Gradumet[®] presentation reduces these to a minimum. No clear contraindications; relatively non-toxic.

Test Tube

A crowded tube: a tough test confirming the success of Declinax measured both in mm/Hg¹ and in the patient's ability to cope with and enjoy life^{1, 2}

Brit. med. J., 1966, *ii*, 732.

1. "In this trial many patients treated with debrisoquine [Declinax] had been unsatisfactorily controlled by other hypotensive agents; the change to this drug made satisfactory blood-pressure control possible, and there was relative freedom from troublesome side-effects."

*Declinax is the registered trade mark for pharmaceutical preparations containing debrisoquine sulphate.
