

## Roche Medical Information Service | Larodopa

### FURTHER DEVELOPMENTS

Roche has played a prominent role in the development of L-Dopa; beginning with the first chemical studies, through years of intensive clinical research, and culminating with the introduction of Larodopa.

This commitment to the subject of Parkinsonism and its treatment is reflected in the decision to establish the Roche Medical Information Service/Larodopa.\* The aim of the Service is to provide doctors with Parkinsonian patients with the latest available information on the disease and its treatment.

For this reason, considerable space has been devoted in our Information Service reviews to a comprehensive list of clinical trials results, since these are the doctors main guides to effectiveness and safety on those rare occasions when the introduction of a new product really does mark a breakthrough in treatment. The results are encouraging.

The following table shows the cumulative percentage results of 19 trials carried out in 1969 and 1970.

Total no. of patients	Results "worthwhile"	Results "slight or nil"
1012 (107 not classified = 10%)	70% (703)	20% (202)

\* Larodopa is the trade mark for Roche preparations containing 3-(3,4-Dihydroxyphenyl)-alanine.

**Roche Medical Information Service | Larodopa**

Fuller details of all these trials are included in reviews mailed earlier this year. If you have not received your copies, simply write to Roche Medical Information Service/Larodopa at the address below or phone 01-935 5566.

For example in a trial,<sup>1</sup> 60 of the 77 patients showed benefit from Larodopa. Neither age nor duration of illness appeared to affect results. Seven of the nine patients whose disease was of more than 16 years duration and 13 of the 16 subjects aged over 70 showed improvement.

During these early days we shall continue to keep doctors informed of all important developments but meanwhile the supply situation remains unchanged and Larodopa is available through your hospital pharmacist. The great interest shown in the product will ensure the maximum effort to expand availability at the earliest possible moment.

FENFLURAMINE

is unique in substantially reducing  
weight by glycoliptic action plus reduction of  
hypertension and anxiety tension

● *The implications of these observations for treatment of mildly or moderately hypertensive obese patients is that maximum weight reduction should be attempted before institution of anti-hypertensive therapy, and that fenfluramine may well be worth trying in this situation.*

*See The Lancet (1969), ii, 1392.*

● *The mean weekly weight loss of 3.60 lb. which occurred during the fenfluramine administration was gratifyingly high... Anxious obese patients were especially benefited, since not only were they able to diet more easily but their anxiety was reduced in the majority of cases.*

The Haelan range is small, compact and sufficiently versatile to deal with most steroid responsive skin conditions.

Each member is an effective ready-to-use preparation with its own job to do—specifically formulated to meet the needs of both consultant and general practitioner.

The active ingredient, flurandrenolone, is four to six times as potent as hydrocortisone in its action on the skin<sup>1</sup>. The concentration has been adjusted by using a well-matched base, so that only three preparations are needed to treat the majority of steroid responsive skin disorders.

The Haelan range has been realistically developed for convenient prescribing.

## PRACTICAL PSYCHIATRY

Most doctors who have been qualified for more than ten years received very little training in psychiatry as medical students. Yet psychiatric problems confront all those practising clinical medicine. The articles collected together in this book were written for the *B.M.J.* to give practical advice to general practitioners and others on how to recognize and cope with the more common forms of mental disorder. Many patients are anxious or depressed; when should the doctor try to do something about it? This is the sort of question the authors set out to answer. As far as possible they have avoided the use of psychiatric jargon, and case histories have been used freely to illustrate the points made. Any doctor who feels ignorant about psychological medicine will find here a readable introduction to the practical aspects of clinical psychiatry.

## Data Handling in Epidemiology

Co-ordinating Editor  
**W. W. HOLLAND**

Professor of Clinical Epidemiology and Social  
Medicine, St. Thomas' Hospital Medical School,  
London

This book contains selected papers presented at the Fifth International Scientific Meeting of the International Epidemiological Association held in Yugoslavia. It is concerned with the uses of statistics in large-scale epidemiological studies, and with the wealth of information which these can give on the social context of disease and medical care. Throughout, there is a constant interplay between the three specialized disciplines of computer science and technology, epidemiology and statistics which permits the introduction of new forms of analysis and sets a new standard in the reliability of health service and activities.

# Halt at the flashing light

Flashing lights and visual disturbances, classically early warnings of migraine, are signals for arresting all manifestations of an attack – at onset.

MIGRIL\* acts in the minutes between initial warning and the otherwise inevitable full-blown attack.

As well as containing an effective dose of ergotamine (2mg in each tablet), enhanced by caffeine, MIGRIL contains the anti-emetic, cyclizine. Nausea and vomiting, due to migraine itself or to ergotamine, are very effectively relieved.

MIGRIL, taken at the first warning of an attack, provides a specific treatment that the patient will learn to rely on. Full information is available on request.

means  
a simple  
thing

To an arthritic patient, freedom can simply mean being able to do a few things for oneself, like tying a shoelace or making a cup of tea – the little things that become a big problem when joints are stiff and painful. Brufen relieves the pain and stiffness of arthritis, and provides the progressive improvement in joint flexion necessary to extend the patient's range of activity. Both to the arthritic patient and to the doctor, freedom also means effective therapy without the limitations imposed by frequent side-effects. Brufen is not only a highly effective antirheumatic agent, it is also extremely well tolerated by the majority of arthritic patients. Brufen is available as tablets, each of which contains 200 mg. ibuprofen.

## Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, it is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From the dispensing packs, the basic NHS cost of a spoonful of granules or two tablets is about a halfpenny.

Granules: 56, 170 and 900 grammes.

# in bronchitis more effective than ampicillin or tetracycline

## Compared with ampicillin

In a controlled single-blind trial involving 50 patients with chronic bronchitis SEPTRIN\* was shown to be more effective than ampicillin, with reference to reduction of sputum volume and purulence.

### Sputum volume reduction

There was a significantly greater reduction in mean sputum volume after treatment with SEPTRIN than after treatment with ampicillin.

### Sputum purulence reduction

23 out of 24 cases with purulent sputum receiving SEPTRIN improved (using MRC sputum grading) as compared with 16 cases out of 22 cases with purulent sputum receiving ampicillin who improved in this respect. The success rate for SEPTRIN was significantly higher than for ampicillin.

### Clinical improvement

Clinically, 24 out of 25 cases receiving SEPTRIN responded as compared with 19 out of 25 receiving ampicillin.

## Compared with tetracycline

In a trial designed to compare the effect of SEPTRIN with that of tetracycline in the treatment of chronic bronchitis, it was found that a week's course with SEPTRIN was more beneficial than a week's course of tetracycline.

24 patients received SEPTRIN and 22 received tetracycline, and objective data was collected from the two groups at the beginning and at the end of treatment.

### Sputum volume

The decrease in mean sputum volume after treatment, as a fraction of the initial measurements, was significantly larger for the SEPTRIN group.

### Sputum purulence

Objective grading of reduction in purulence of the sputum showed better results with SEPTRIN than with tetracycline at the end of treatment.

## TODAY'S DRUGS

**New 1970 Edition**

The problem facing the prescribing doctor today is choice. Catalogues of drugs—no matter how detailed—are of little help unless accompanied by advice on which drug to give for what condition. So this new edition of "Today's Drugs" not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy.

The new edition differs from the earlier one in other ways. It deals with only three subjects— infections, vitamin deficiencies and anaemias, and disorders of the nervous system. Further volumes will be published at intervals of about a year, and by the time the whole field of therapeutics has been covered this first volume will have become obsolete and due for replacement. In order to further emphasize the ephemeral nature of books on therapeutics—and to cut costs—the book is a paperback.

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinoylfructose, the molecule of which is gradually hydrolysed in the intestine, release is smooth and even—with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

## Propaderm relieves skin problems-usually within one week

Propaderm has been shown to be rapidly effective in the treatment of steroid-responsive skin conditions—even in cases which have failed to respond to other topical steroids. What is more, the wide range of Propaderm preparations enables you to choose a treatment to suit each individual case. It's not surprising that more and more doctors are making Propaderm their first choice. In a recent trial 94% of 252 patients

with eczema or psoriasis showed significant improvement after treatment with Propaderm (cream, ointment and ointment with 3% aureomycin BP). Most patients (92.8%) responded in the first week of treatment.

**"All three preparations which were tested were found to be superior to previous treatments. No side effects were reported".**

# Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.* last autumn, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

**Director****Medical Research Council  
Neuropsychiatry Unit**

The Medical Research Council is seeking a successor to Dr. D. Richter, the Director of their Neuropsychiatry Unit, at Carshalton and Epsom, Surrey, on his retirement in 1972.

The Unit is at present engaged on a wide programme of neurobiological and clinical research in relation to psychiatry. The Council is anxious to maintain and develop work in this field, and the Director will be expected to lead a multi-disciplinary group comprising both medical and non-medical scientists. The precise scope of the programme will, however, be a matter for discussion between the Director and the Medical Research Council.

The Director will have an established reputation as a scientific investigator in his own specialist field and be expected to have a wide interest both in psychiatry and neurobiology. He may or may not be medically qualified.

The Council will wish to discuss with the new Director the possibility of moving the Unit to another site, which would allow a greater degree of integration of the clinical and the laboratory work than is at present possible. This site might well be within a university, as the Council attach the greatest importance to collaboration with relevant academic departments.

If the Director's work makes it possible for him to hold an honorary clinical contract and this is awarded at consultant level by a Hospital Board, he will be paid on the M.R.C. clinical scales at the top point of the N.H.S. consultant scale (at present £6,069). If, on the other hand, the holding of a clinical contract is not considered necessary, the Director will be paid on M.R.C. non-clinical scales at the top of their special appointments grade, at present £5,775 per annum, plus £100 London Allowance. Superannuation provision will be made under the Federated Superannuation System for Universities. Applications for the above post should be submitted not later than October 26, 1970 in the form of a short statement (not exceeding 400 words) outlining in general terms the scientific programme that the applicant would wish to undertake and indicating the type of staff and other facilities required, together with a curriculum vitae and list of publications, to the Secretary, Medical Research Council, 20-Park Crescent, London, W1N 4AL. Further particulars may be obtained from Mrs. J. Evens, at the same address (or telephone 01-636 5422). (36598) 14-1

## COMMERCIAL APPOINTMENTS

# Glaxo

## Clinical Research

A Physician is required to join a team in our medical department at Greenford. He will be concerned with the initiation and supervision of clinical and pharmacological studies of new and established products and to contribute to medical aspects of other company activities. Provision will be made for continuation of some general clinical work in a hospital clinic.

The successful candidate will be either a man or woman who has had clinical experience at registrar or senior registrar level, preferably in general medicine, and may have been involved in laboratory or clinical research. Previous experience in the pharmaceutical industry would be an advantage, but is not essential. The preferred age range is between 28 and 35.

The conditions of employment include a contributory pension scheme and the opportunity to participate in the group profitability through a bonus scheme. Assistance with the expense of relocation will be offered in appropriate cases.

Please write quoting reference AM.203 to the Personnel Manager (ST), Glaxo Laboratories Limited, Greenford, Middlesex. (11541)

## Medical Entrepreneurs

30-45

c. £5,000 + car

A major British pharmaceutical company which manufactures and markets a growing range of ethical and proprietary drugs is seeking experienced doctors to work within the U.K. These positions, offering attractive alternative careers to those seeking wider horizons, are closely concerned with both the company research and marketing functions in developing new drugs of major significance. Based in an attractive part of the Midlands the men selected will arrange and progress clinical trials, obtaining the co-operation of medical authorities, consultants and G.P.s. Other responsibilities will include addressing clinical meetings and advising and training company personnel on medical matters. They will also be required to travel overseas to carry out similar work in the development of some of the Company's international markets.

Applicants, who should be aged between 30 and 45, will ideally hold a postgraduate qualification and have the maturity and breadth of clinical experience to be able to work effectively with senior members of the medical profession.

An excellent salary will be negotiated, a car will be provided and there are good employee benefits.

Replies will be forwarded direct, unopened and in confidence to the client unless addressed to our Security Manager listing companies to which they may not be sent. They should include comprehensive career details, not refer to previous correspondence with P.A., quote the reference on the envelope and be sent to:

P.A. Advertising Limited,  
2 Albert Gate, London, S.W.1.  
Telephone: 01-235 6060.

SMITH & NEPHEW PHARMACEUTICALS LTD.  
SMITH & NEPHEW RESEARCH LTD.

## TWO PHYSICIANS

The Medical Department serving these two associated Companies is continuing its planned programme of expansion and applications are now invited for two further vacancies.

For the first of these appointments, there will be some emphasis on the interpretation of laboratory data and on human pharmacology. For the second appointment there will be more concern with the medical background and services supporting the marketing of ethical pharmaceutical products. Both, however, will be members of a broadly-based team and activities will not be restricted to one or other area. Although the work centres on the development of new drugs, the human aspects of adhesives and plastics technology and other research areas play a part.

Candidates must be registered medical practitioners. Although previous experience in the pharmaceutical industry would be useful it is not essential and applications from recently fully-registered members of the medical profession will be very carefully considered. Career prospects in the Industry are good.

Travel, some of which may be abroad, will be necessary. The salary will be negotiated and will be attractive and will be linked to qualifications and ability; a good pension scheme operates and a car will be provided.

Applications, in writing, enclosing a curriculum vitae, should be addressed to:

The Medical Director  
SMITH & NEPHEW PHARMACEUTICALS LTD.  
Bessemer Road, Welwyn Garden City, Herts.

Members of Smith & Nephew Associated Companies

**GOVERNMENTAL****DEPARTMENT OF HEALTH AND SOCIAL SECURITY**

# Chief Scientific Officer

  
**£6875**

A new post of Chief Scientific Officer has been created following the Government's acceptance of recommendations contained in the Zuckerman Committee's Report on Hospital Scientific and Technical Services.

The principal recommendations of the report were that arrangements should be made in the Department and in the National Health Service to ensure the orderly development of hospital scientific and technical services in support of medicine; and that a new staffing structure should be designed to make more efficient use of resources of manpower. To implement these recommendations the Department is setting up a new unit headed by a Chief Scientific Officer.

The Chief Scientific Officer will be the focus for policy advice to the Department of Health and Social Security and to the Welsh Office on scientific matters. He will of course have to use his knowledge of the best sources from which advice on the whole spectrum of scientific affairs can be obtained. The work will be in a new field which is in an early stage of growth. A variety of approaches have been adopted by hospital authorities and the Chief Scientific Officer will need to be versatile and imaginative and to have a talent for organisation and administration in order to provide the initiative and authoritative guidance which will be called for to encourage coherent development. He will advise Departments on the new staffing structure and improved grading arrangements needed in a growing hospital scientific service. He will need to be in close touch with the hospital authorities in planning and expanding the services in their hospitals. Whether medically qualified or otherwise he will be working in the closest association with the medical profession.

Applicants should normally have First or Second Class Honours degrees and/or high professional attainment in science or technology. They should have had wide experience preferably including experience of organisation and management of staff.

There is a non-contributory pension. The post is based at the Department's Headquarters, Alexander Fleming House, London S.E.1.

Fuller details of this appointment may be obtained by writing to the **Civil Service Commission, Alencon Link, Basingstoke, Hants.**, or telephoning Basingstoke 29222 extn. 500 or London 01-734 6464 (24 hour 'Ansafone' service), quoting reference AM/7559. Closing date 9th October, 1970.

# Overseas Development

The provision of skilled man-power is a vital element in Britain's aid to the developing countries. Your professional skills will be welcome and you will have the satisfaction of doing a challenging, responsible and worthwhile job. In addition to the emoluments quoted for the vacancies below there are usually substantial extra benefits such as terminal gratuities, family passages, paid leave, educational grants and free or subsidized accommodation. For certain of these appointments an appointment grant of up to £200 and current purchase loan of up to £300 may be payable. Employment will be on contract to the overseas Government; in most cases superannuation rights can be preserved or maintained. Candidates should be citizens of, and permanently resident in, the United Kingdom. They must possess full medical qualifications and be eligible for full registration with the General Medical Council in the United Kingdom.

## SPECIALIST PATHOLOGIST £4,074/Brunei

To take administrative charge of Pathological Services, with responsibility for advising the Director of Medical Services on all matters associated with such services. Candidates should be under 55, preferably with a specialist qualification and experience of histopathology. Emoluments quoted above include an inducement allowance of £610. No income tax at present. Private practice not permitted. Contract three years.

## SPECIALIST OPHTHALMOLOGIST £4,074/Brunei

To be responsible to the Director of Medical Services for all Ophthalmic Services, and the care of all Ophthalmic In and Out Patients. Also to advise the Director on all Ophthalmic subjects. # Latest research suggests unique action of Negram

Artist's impression of Esch. coli.

## Penicillins and Cephaloridine weaken the cell wall.

This may kill the bacteria by removing their outer defences. But it can - and often does - result in the survival of L-forms.<sup>1,2</sup>

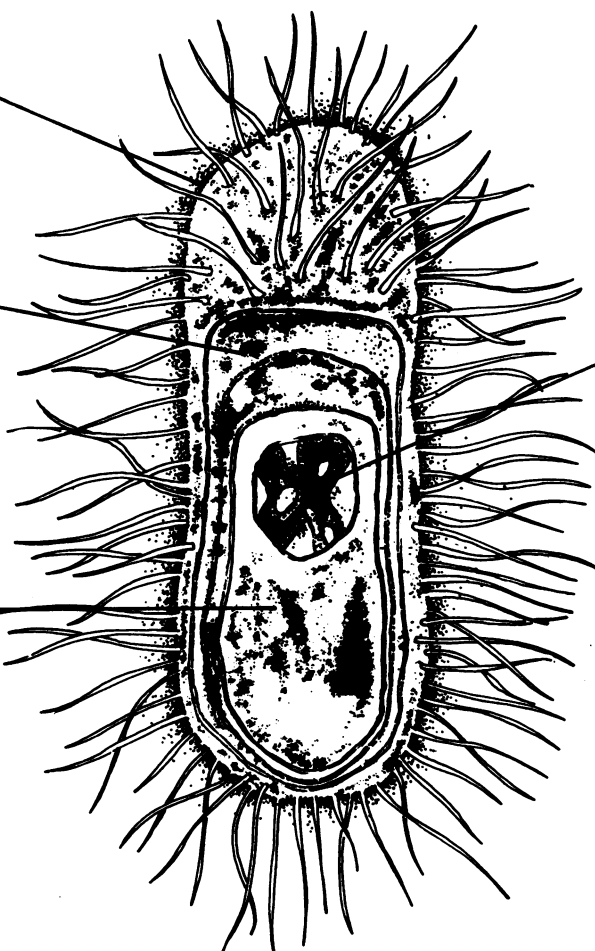

## Sulphonamides, Trimethoprim and Nitrofurantoin block the metabolic pathways.

Each of these antibacterials blocks only one specific step in the process.

Very often these particular steps can be by-passed without detriment to the bacteria.<sup>1</sup>

## Tetracyclines and Chloramphenicol affect the ribosomes.

Though the ribosomes are the 'assembly plants' of the cells, their function is controlled by DNA. Unless this control is knocked out, the cell functions are never completely destroyed.<sup>2</sup>

## Only Negram destroys bacterial DNA, the basis of all bacterial life!

DNA controls the whole structure and function of bacteria. For cells to divide and multiply, the DNA must replicate itself.

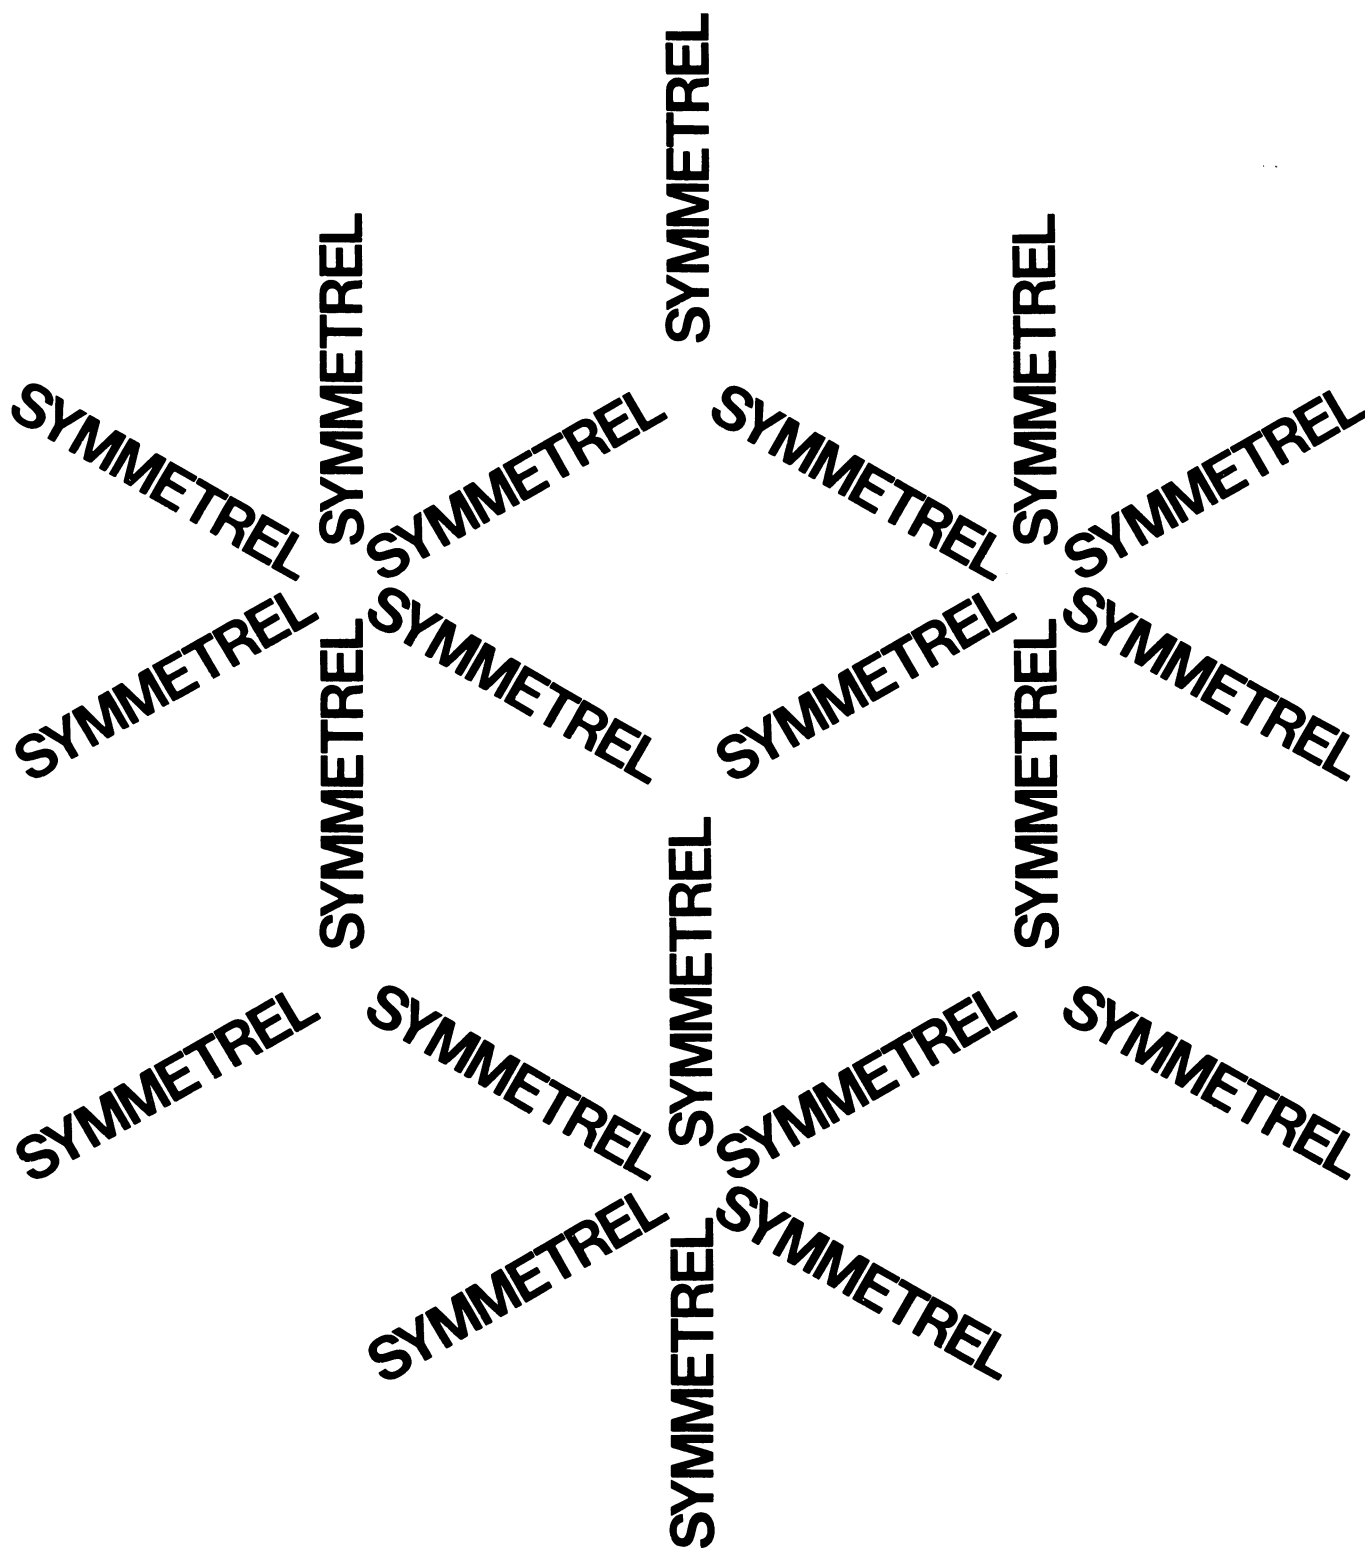

It is at this point that Negram attacks. It prevents the replication of DNA. This fundamental disruption of the control element not only prohibits the proliferation of bacteria but destroys the complete bacterial system.<sup>3</sup>

# Fucidin — parenterally

## as well as orally

Clinicians often require a parenteral antibiotic in the treatment of severe staphylococcal infections. To meet this need LEO research over a three-year period has led to the development of Fucidin for intravenous infusion. This preparation widens the scope of Fucidin (sodium fusidate B.P.) which over the last seven years has been increasingly used as a potent *ora*/ antistaphylococcal agent.

### **Fucidin for intravenous infusion.**

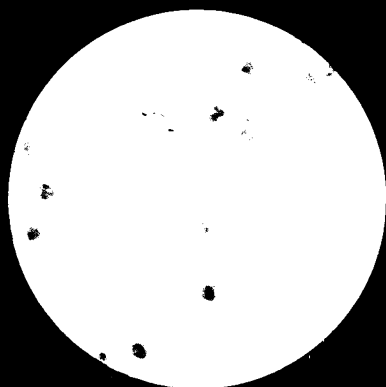

Presented in packs of 2 ampoules one of which contains 580 mg diethanolamine fusidate B.P.C. as a dry powder (equivalent to 500 mg sodium fusidate B.P.) and the other 50 ml sterile phosphate-citrate buffer.

## TRICHOMONAL VAGINITIS

# single drug stops triple trouble!

## CANDIDAL VAGINITIS

## NON SPECIFIC VAGINITIS

Five years of clinical trials with Magmilor, involving more than 6,000 patients with vaginitis, have shown success rates of the order of 90 per cent. The Magmilor Treatment Pack—a *single* drug presented as tablets and pessaries—deals effectively with all three common types of infective vaginitis—giving maximum assurance of a quick response in a condition where it is often difficult to make a clinical distinction as to pathogenesis:

**Trichomonal vaginitis** The systemic action of Magmilor oral tablets attacks *Trichomonas* in the vaginal walls. The local action of the pessaries eliminates free-swimming Trichomonads from the vaginal lumen, giving quicker and more complete relief than can be obtained with systemic action alone.

**Candidal vaginitis** The local action of Magmilor pessaries eradicates candidal infection and, in cases of trichomonal infection, prevents the candidal overgrowth which may occur if a trichomonocide only is used.

**Non-specific vaginitis** Magmilor pessaries also provide coverage against the bacteria which are implicated in non-specific vaginal infections—including *Streptococci* and *Coccobacilli*.

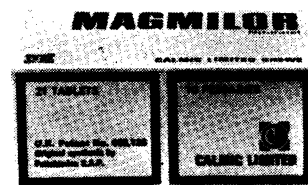

**No co-prescribing hazards** By using only one drug, Magmilor eliminates the potential hazard of drug incompatibility associated with co-prescribing.

## R MAGMILOR TREATMENT PACK

### Xsingle-drug coverage in vaginitis

Magmilor Treatment Pack consists of twenty-one oral tablets (each containing 200 mg nifuratel) and ten pessaries (each containing 250 mg nifuratel).

Full information is available on request.

## ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms both in the main hospital and in various villas, for longer-stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31 10s. per week, and subscribers to private medical insurance schemes, such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges. Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel. Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 67-13
