multi-spectrum antibiotic

'Keflex' is the oral antibiotic that could resolve these problems — combining bactericidal action, broad-spectrum activity, *and very high urine levels*. With care, 'Keflex' may be used even in patients with renal damage.

Its rapid action together with almost complete absorption, plus a very low incidence of gastro-intestinal side effects are the reasons why so many patients with urinary infections recover so quickly with so few problems following 'Keflex' therapy.

WHEN EXCESSIVE
ANXIETY EXPLODES
INTO THE BODY

NOBRIUM

Anxiety starts in the mind but profoundly effects the body

When excessive anxiety arises in the amygdala it is transmitted, mainly by the hypothalamus, to the body, where it produces a collection of physical changes which, if repeated too often or sustained for too long, give rise to chronic functional disorders and organic disease

Anxiety makes the heart work harder but less efficiently

In anxiety, heart rate and variation in heart rate¹ increase, so does the blood pressure. Blood viscosity rises and clotting time shortens² often to a fraction of the normal value. Serum cholesterol levels rise.³ Recovery from exercise is slow and inefficient. Cardiac arrhythmias are not uncommon. These effects can produce cardiac reactions in previously healthy patients. In existing cardiac disease they may be a direct threat to the patient's life

3 Circulation, 1959, 19, 496

Anxiety attacks, often damages, the gastro-intestinal tract

Direct observations through gastrostomies, dating back as far as 1833¹ record changes in the tone, motility, secretion, and vascularity of the digestive tract produced by emotional stress, changes which frequently lead to functional disorders and structural damage. Authoritative lists of gastro-intestinal conditions produced or exacerbated by anxiety typically² range from one end of the tract to the other: from globus hystericus to irritable colon

1 Experiments and observations on the gastric juice and the physiology of digestion Plattsburg, 1833

2 Med. Clin. N. Amer. 1956, 40, 329

Anxiety that takes the patient's breath away

Anxiety increases the rate of respiration¹ but impairs respiratory efficiency.² Hyperventilation, which is common in anxiety³ can produce dizziness, visual disturbances, feelings of unreality, sighing, yawning, sensations of suffocation and many other symptoms, apparently involving the heart, gastro-intestinal tract or the body generally. Anxiety often plays a distinct role in the aetiology and exacerbation of asthma

Anxiety as a burden on the muscles

The physical tension characteristic of anxiety has been measured electromyographically. This tension is associated with physical symptoms and disorders. Skeletal muscle hypertonia is associated, in susceptible persons subject to emotional stress, with low back pain.² Patients with limb pain or 'rheumatic pain' showed high forearm readings while those with headaches showed high frontalis levels³

A MOVE TOWARDS TRUE

CONTROL OF ANXIETY
WHICH PRODUCES A

RESPONSE IN 72.1% OF
ANXIETY-BASED
PHYSICAL DISORDERS

In December 1970 a survey* was made of 58 published clinical trials of Nobrium. Analysis of these data showed that of 563 patients with symptoms affecting the heart, gastro-intestinal system and lungs or with headache presumably related to muscular tension, 406 (72.1%) showed a good or excellent response to treatment with Nobrium. Of 1,122 symptoms reported as 'anxiety with physical symptoms and psychosomatic disorders' 870 (77.6%) showed a good to excellent response

Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

1905 An important year for coffee lovers

It was the year Dr. Ludwig Roselius discovered how to remove caffeine from coffee without altering its flavour.

Since then, thanks to him and his Kaffee H.A.G., no one need say "No" to coffee! Today, in nearly every country in the world, the Medical Profession is recommending it increasingly in cases where caffeine is contra indicated.

Broxil Syrup, reduced

The price of Broxil Syrup has been reduced to 40p for a 100 ml. bottle (5 days' treatment), a price which is comparable with traditional penicillin syrups. But Broxil offers considerably more in the treatment of infections.

Broxil is rapidly and efficiently absorbed. Its blood levels are more than four times those achieved with oral penicillin G.

Broxil's clinical results are also excellent. In practice, patients do seem to get better quicker with Broxil.

With the average daily cost down to only 8p, Broxil Syrup may now be prescribed as routine for E.N.T., respiratory and skin and soft tissue infections.

Tablets and capsules also available. Further information is available on request.

SOME things go naturally together.
And last a lifetime.

It's that way with over 27,000 doctors and the Medical Sickness Society.

Which is hardly surprising. Our sole business is looking after the life assurance, sickness insurance and retirement needs of doctors and dentists.

That gives us a unique understanding of your particular problems.

Isn't it time you got together with your Society? You'll find it a profitable relationship because we're a mutual society. Which means

all the profits go back to our with-profits policyholders.

And it could be the relationship of a lifetime.

The smooth response to Seborrhoeic Dermatitis

Healthy hair is the envy of most people because scalp dermatoses, which are unsightly and disfiguring, are so common. These conditions include simple dandruff and seborrhoeic dermatitis.

'Synalar' Gel provides rapid

and effective treatment for the scalp and at the same time enlivens the hair.

It does this in a pleasant and highly acceptable way because it is a clear, non-greasy, non-sticky preparation which leaves the hair clean and healthy.

'Synalar' Gel in 30G. tubes, sufficient for approximately two weeks' treatment.

LARGACTIL

let's throw a little light on the subject...

The tablet that started the psychiatric revolution in 1954, derives its name from an early worker's description of chlorpromazine's LARGE variety of ACTIONS. Apart from being the first major tranquillizer, 'Largactil' acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, sedatives

and narcotics and as an anti-emetic. 'Largactil' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; drug withdrawal; senile dementia; the management of terminal pain and nausea and vomiting.

HOW TO CHOOSE THE BEST COURSE

It may indeed be difficult to choose the best course, when there are so many fine ones available. The choice is obvious, however, when it comes to safeguarding your own and your family's future.

It will pay handsomely to get in touch with the Insurance Agency which specialises in selecting the right policies for medical men, and can discuss his particular problems knowledgeably and sympathetically.

The Medical Insurance Agency can through its country-wide organisation give unbiased, expert advice on all insurance, estate duty and many financial problems, and undoubtedly "Choose the best Course" for you, personally.

a little knowledge is not enough . . . give teen-agers the facts about menstruation

Some teen-agers have heard they shouldn't bathe or wash their hair during their menstrual periods. Some think unmarried girls shouldn't use tampons. Others say exercise brings on "cramps". No wonder they call it the "curse".

Give them the facts...with the help of the illustrations in charts like the one above prepared by R. L. Dickinson, M. D. and available to you free from Tampax Limited. These 11"x8½" coloured charts are laminated in plastic for permanence and are suitable for marking with grease pencil. Social myths can be exploded, too, by giving teen-agers either of the two booklets we will be glad to send you in quantity for distribution. One booklet is written for the young girl just beginning menstruation and the other for the older teen-ager. The booklets tell them what menstruation is, how it will affect them, and how easily they can adjust to it normally and naturally.

Unmarried girls, of course, can use tampons. And

they have many good reasons to do so. Tampax tampons are easy to insert—comfortable to wear. Because they're worn internally there's no irritation or chafing; no menstrual odour.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

Simply write to the address below for your free set of charts and sample booklets. These booklets may then be reordered in any quantity you need for your patients' personal use.

UNIVERSITY OF EXETER

POSTGRADUATE MEDICAL INSTITUTE
Full-time postgraduate course of 10 weeks duration will begin on 6th October, 1971. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialise in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognised under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognised under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application fees for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (10608) 2

Now a fundamental treatment for peptic ulcer symptoms

Maxolon's action in restoring normal gastro-duodenal motility² is of great benefit to all who suffer peptic ulcer symptoms, including those patients with no demonstrable pathology, and post-operative cases.

Maxolon provides a rational method of treatment not afforded by either antacids or anticholinergics. These relieve symptoms by lowering acid levels in the stomach. Maxolon promotes gastric emptying¹, and thus removes both the stimulus to secrete and the excess acid present in the stomach. In this way it also relieves the symptoms of "over-fullness".

Maxolon's effect of synchronising antral and duodenal contractions² is even more significant in treating peptic ulcer symptoms. By eliminating regurgitation through the pyloric and oesophageal sphincters³, it prevents the repeated reflux of acid or bile which aggravates the condition. This action also relieves the symptoms of regurgitation and epigastric pain⁴.

Maxolon introduces a new concept into the treatment of peptic ulcer. But it can be prescribed with more confidence than if it were something entirely new. Maxolon, in establishing a seven-year record of clinical success as an anti-emetic, has demonstrated a reassuring freedom from toxicity, even when used for long periods.

Further information is available on request.

THE NEW GENERAL PRACTICE 2

from the British Medical Journal

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

When you diagnose Tonsillitis, you're in Penbritin Territory

The right-first-time antibiotic for infections in children

Penbritin is right because its broad spectrum includes β -haemolytic streptococci. This pathogen, the most common bacterial cause of tonsillitis, is becoming increasingly resistant to the tetracyclines.

Penbritin destroys it.

Penbritin is right because its safety is well proven. This contrasts with recent publicity drawing attention to the problems of tooth staining and bone deposition which may follow tetracycline therapy.

Two palatable syrups, capsules, tablets and the new paediatric suspension enable you to prescribe Penbritin in the right form for any patient. Injectable Penbritin is also available if required. Following the recent price reduction the average daily cost of treating tonsillitis with Penbritin is just 8½p.

Penbritin is right because it is well proven. Published references show that Penbritin has an overall success rate of 95% in upper respiratory infections. This figure confirms Penbritin as the right-first-time antibiotic.

Dosage: Children under 10 years – 125 mg q.i.d. $\frac{1}{2}$ – 1 hour a.c.
Older children and adults – 250 mg q.i.d. $\frac{1}{2}$ – 1 hour a.c.
In severe infections these dosages may be increased.

Contra-indication: Penicillin hypersensitivity.

Side-effects: as with other penicillins.

Further information is available on request.

Betnovate is better. So is he.

**Infected
eczema:
all the better for
Betnovate-N**

Eczema patients respond better to Betnovate than to other topical steroids. Two clinical trials, involving 916 patients and comparing Betnovate with five other leading topical steroids, proved this conclusively.

Their findings included:

"... whenever preferences were expressed, there were always more for betamethasone 17-valerate than for the other corticosteroids."¹

"Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate subdivisions of the trial; in no instance was it inferior."¹

"A better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested."¹

"... response in psoriasis is a more stringent test

of the efficacy of a corticosteroid than response in eczema. The superiority of betamethasone 17-valerate in this context is noteworthy."²

When you add the broad-spectrum antibiotic neomycin to the most effective steroid you can prescribe, the result is Betnovate-N. In infected eczema it gives rapid relief from itching and inflammation and thus achieves the best response. The one thing to remember is Betnovate. Add an N to fight the infection.
