Heart-risk people and polyunsaturates

Diet is related to coronary disease. It is not the only factor and the relationship is still far from clear, but already considerable concern has been expressed about the amount of animal fats most of us are eating.

So to be on the safe side, it is suggested that we limit our consumption of fats to no more than 40% of our calorie intake, and as far as possible make sure the fats are polyunsaturated.

This means all of us, not just the incipient

heart case, and the younger we start the better.

Flora vegetable oil margarine was designed a few years ago to meet just this situation, and recently its polyunsaturate content—already high—was almost doubled. It tastes noticeably good, spreads easily, cooks well, and can be bought in almost any supermarket.

Everything you need to make Flora the kind of advice that people are likely to take.

Flora vegetable oil margarine contains 50% of polyunsaturates (natural cis-cis linoleic), ratio of polyunsaturates to saturates 2:1.

SEPTRIN* Paediatric Suspension is really "SEPTRIN in miniature". It has the same distinctive mode of action but has been specially formulated for your young patients.

SEPTRIN differs fundamentally from conventional antibiotics in that it inhibits two successive stages of bacterial metabolism. Its decisive bactericidal action against a wide range of Gram-positive and Gram-negative pathogens produces an exceptionally rapid clinical improvement in bacterial infections including bronchitis and UTI.

SEPTRIN Paediatric Suspension is available in 100 ml bottles and each 5 ml contains 40 mg trimethoprim and 200 mg sulphamethoxazole. *Trade Mark

Also available: SEPTRIN Paediatric Tablets, SEPTRIN Tablets and SEPTRIN Adult Suspension, containing trimethoprim and sulphamethoxazole.

Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

Before 'Eraldin' he'd have thought twice

In angina, 'Eraldin' makes the going easier for patient and doctor.

- Easier for the Patient

His confidence is restored because his heart is protected against the effects of stress. Emotional situations no longer herald anginal attacks. Although he still knows his physical limits, these have been extended - by 'Eraldin'.

- Easier for the Doctor

'Eraldin', the latest, most advanced long-term protection against angina, shields the heart - and the heart alone - against excessive sympathetic stimulation. This cardioselectivity

permits protection in a broader group of anginal patients. Management is straight forward and dosage is on a simple twice or thrice daily basis. 'Eraldin' has other valuable properties - mainly related to safety.

PROGNOSIS IN ELEVATED BLOOD PRESSURE

Implications of insurance statistics

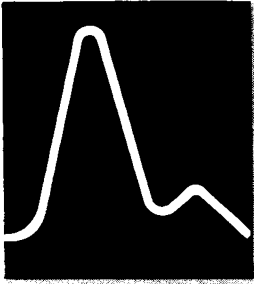

The charts on the opposite page are based on the accumulated experience of 26 insurance companies in America covering nearly 4,000,000 people who were accepted for life insurance. The statistics reveal that even modest elevations of blood pressure are associated with definite decreases in life expectancy.

For example, a male of 45 years with a blood pressure 150/100 mm Hg has his average life expectancy reduced from 32 to 20½ years—a loss of 11½ years.

Fortunately, substantial evidence has accumulated to show that effective treatment with modern antihypertensive drugs can considerably improve the depressing prognosis indicated by the insurance companies' statistics.

Prognosis in Elevated Blood Pressure

Reduction in Life Expectancy

Life Expectancy in Elevated Blood Pressure Compared with Normal Expectancy

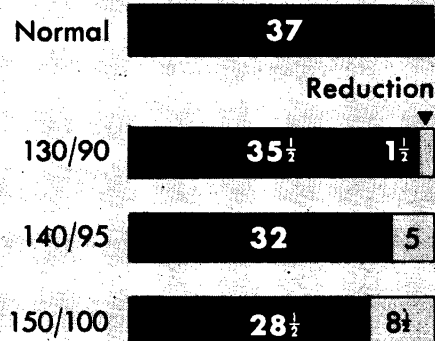

Reductions in expectation of life associated with elevated blood pressure are **not** proportionate to the degree of excess mortality. This holds even for very high blood pressures.

The magnitude of the reduction in life expectancy increases with elevation in blood pressure, but decreases with age.

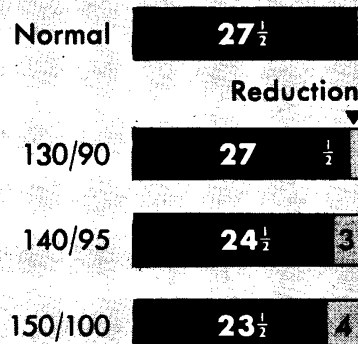

The figures illustrate approximate reductions in life expectancy associated with indicated elevations in blood pressure.

Autohaler

ISO-AUTOHALER OR DUO-AUTOHALER

A new kind of inhaler
operated by breath alone

Breath-triggered operation

A dose is automatically released at exactly the right moment in the patient's breathing cycle.

Built-in synchronism

The patient no longer has to co-ordinate pressing a vial and inhaling to be sure of an effective dose. *Autohaler* makes every patient an expert in inhalation technique with little instruction.

Controlled action

Patients cannot pump the *Autohaler* unit and take several puffs while inhaling. And *Autohaler* eliminates wasted doses resulting from test-firing or faulty use.

Treatment economy

Treatment costs as little as 0.33p per inhalation.* (Some ordinary aerosols cost more per puff.)

*Average cost per dose calculated from cost of one *Iso-Autohaler* complete plus one replacement cartridge.

Governed doses

With *Autohaler* it is more difficult for the patient to take excess dosage because the unit must be reset between inhalations.

Unparalleled inhalation efficiency

Because every dose from *Autohaler* is made to count, a patient is more likely to get full benefit from treatment and therefore less likely to take extra, ill-advised doses.

Iso-Autohaler and *Duo-Autohaler* are supplied as complete units for which replacement cartridges are available.

Composition *Iso-Autohaler* contains a suspension of Isoprenaline Sulphate B.P. 4 mg./ml. and delivers to the patient 0.08 mg. in each dose. *Duo-Autohaler* contains a suspension of isoprenaline hydrochloride 8 mg./ml. and phenylephrine bitartrate 12 mg./ml., and delivers to the patient 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate in each dose.

Indications *Iso-Autohaler* and *Duo-Autohaler* give immediate relief of bronchospasm in bronchial asthma, chronic bronchitis and emphysema. **Dosage** One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day. Children: *Iso-Autohaler* and *Duo-Autohaler* should be administered to children only under the supervision of a responsible adult. **Side-effects** Overdosage may cause dry mouth, palpitations, or

nervousness. **Cautions and contra-indications** There are no absolute contra-indications, but *Iso-Autohaler* and *Duo-Autohaler* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism.

Basic NHS prices *Iso-Autohaler*, complete unit £1.97, replacement cartridge £0.72. *Duo-Autohaler*, complete unit £2.10, replacement cartridge £0.85.

Chances are you have over 100 Psoriatics on your list... ...Alphosyl could help them.

A great many people in Britain suffer from Psoriasis. On average, more than 100 for every G.P. in the country. And that's why every G.P. should know about Alphosyl.

Alphosyl Lotion is the most widely prescribed treatment specifically for Psoriasis. Patients get complete clearing or a marked improvement without systemic reactions, without uncomfortable restrictive dressings and without serious side effects or contraindications.

Alphosyl Lotion is the primary treatment, for use all over the body. And its effectiveness is backed up by the Cream and Application PC. The Cream is particularly effective in the intertrigenous areas, and Application PC removes scales from the scalp and prepares the head for treatment with the Lotion.

Alphosyl therapy (Lotion, Cream and Application PC) can be adjusted to suit the patients individual needs . . . or preferences.

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin (2%) in a Cream and Lotion. Alphosyl Application PC is a unique combination of coal tar extract (5%) and hexachlorophane (1%).

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1 2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

Hypertension. Introduce her to treatment gently with Neo-NaClex-K.

When a patient is new to hypertension, Neo-NaClex-K makes it a lot easier to live with.

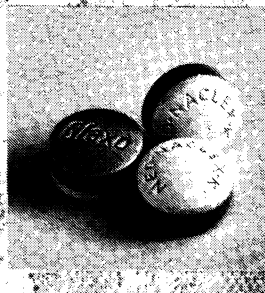

Easier, because just once-a-day treatment can control the mild to moderate case.

Easier, because her sleep won't be disturbed by diuresis during the early days of treatment.

Easier, because postural hypotension won't be something she'll wake up to.

And even in severe hypertension you can still keep her on Neo-NaClex-K in conjunction with minimal doses of a more potent antihypertensive. So you can control the severe condition with less risk of side effects.

Neo-NaClex-K is a unique two layered tablet containing bendroflumazide to lower blood pressure safely and surely, plus a potassium supplement to replace any loss. And right from the start, it provides a gentle introduction to the long-term treatment your new hypertensive patient may need.

Symmetrel in Parkinsonism

edited by G. F. B. Birdwood
S. S. B. Gilder and C. A. S. Wink

August 1971, xii + 116pp., £2.50

This clinical symposium was organized in order to reduce delays in studying and making known the efficacy and side-effects of a particular new drug, amantadine hydrochloride (Symmetrel®).

The symposium provided leading international neurologists and pharmacologists with a unique opportunity to discuss the role of the drug in treatment of Parkinson's disease in the light of their own experience and to bring their views to a wider medical audience.

Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.*, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

The new Peugeot 304 estate has a lot of style. And offers a lot for your money.

In performance figures, its highly responsive 1300 c.c. engine will surprise you into thinking there's much more power than that under the bonnet.

Its road holding capabilities are nothing short of grand touring. You'll be hard put to beat its rugged determination. And the 304 estate has the kind of welcome quiet that makes every Peugeot really individual.

Inside, the great thing is space. There's plenty of it. Plenty enough for four or even five people. Plus 24.7 cu. ft. of luggage space (53 cu. ft. with the rear bench seat down) which is a lot of luggage!

Then there are the many thoughtful extra touches. Like the individual arm chair seats in the front that adjust and recline - fully.

Like the automatic roof light that comes on when the tail gate is raised.

Like the cigarette lighter, electric clock, anti-thief lock, child-proof rear doors, heated rear window. And front seat safety belts. All as standard.

Result: a very satisfying combination of natural in-bred elegance and a forthright appreciation of everyday needs.

Which means you could say the Peugeot 304 estate has a split personality. In the nicest possible way. Because whichever way you look at it, the latest in the line of quiet individualists is very impressive indeed. By anybody's standards.

SERVICES

Flying. As well as being responsible for the medical care of aircrew, RAF doctors are encouraged to fly and thereby gain first-hand knowledge of the operational environments. Their responsibilities can also include aero-medical evacuation, by the RAF's remarkable long-range airborne ambulance service, using Britannias and VC10s of Air Support Command. In 1970 approximately 2000 patients

were flown back to the United Kingdom. Equipment on the aircraft is most elaborate, and can include Radcliffe ventilators, dialysis machines, air-conditioned oxygen cots and a number of items specially designed by RAF consultants. A doctor—say a physician, a surgeon or an anaesthetist—may often be needed as part of the team to 'special' a patient.

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the Royal Air Force has to offer.

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in pediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF

doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties—perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large

financial outlay at the beginning of your career.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3395; after 5 years it rises to £4106; after 13 years to £5110. There are various other allowances; for instance, with children at boarding school the figures are £306 (net) for one child, £669 (net) for two children, £1104 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain J. G. Donald, MB, ChB, DTM&H, RAF, Ministry of Defence, 1-6 Tavistock Square (724KB1), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

Trends in Clinical Pathology

Essays in Honour of Gordon Signy

This book is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war — research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director: James Harper, M.B., F.R.C.P. (Edin), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of psychiatric illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy Department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

LARGACTIL

let's throw a little light on the subject...

the standard
major tranquillizer

anti-emetic

Potentiator
of central
nervous
depression

The tablet that started the psychiatric revolution in 1954, derives its name from an early worker's description of chlorpromazine's LARGE variety of ACTIONS. Apart from being the first major tranquillizer, 'Largactil' acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, sedatives

and narcotics and as an anti-emetic. 'Largactil' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; drug withdrawal; senile dementia; the management of terminal pain and nausea and vomiting.

THE NEW GENERAL PRACTICE 2

from the British Medical Journal

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

**"All the
coal-cellar stairs in one go—
for the first time
in 5 years"**

T/29

A simple achievement.
Yet a tremendous one for the
angina patient. Because without
Trasicor he could only manage
five stairs before pain
stopped him.

Trasicor gives the angina
patient a new lease of life.
Protects his heart from the
effects of excessive sympathetic
stimulation due to physical
and emotional stress.

But Trasicor does more
than just relieve anginal pain.
It exerts a continual beneficial
action on the heart, even at rest,
producing a fundamental
improvement in the heart's
efficiency. Moreover, because
Trasicor is less likely to
provoke heart failure than
previous beta-blockers it can
be used earlier and more
widely in angina.

Tablets
40mg (for angina)
20mg (for arrhythmias)
in 100's and 500's.
Also ampoules 2mg.
