

Betnovate is better. So is she.

Dermatitis: all the better for Betnovate

Dermatitis patients respond better to Betnovate than to other topical steroids. Two clinical trials, involving 916 patients and comparing Betnovate with five other leading topical steroids, proved this conclusively.

Their findings included:

"... whenever preferences were expressed, there were always more for betamethasone 17-valerate than for the other corticosteroids"¹

"Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate subdivisions of the trial; in no instance was it inferior."¹

"A better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested."¹

"... response in psoriasis is a more stringent test of the efficacy of a corticosteroid than response in eczema. The superiority of betamethasone 17-valerate in this context is noteworthy."²

Betnovate gives rapid relief from itching and inflammation and thus achieves the best response. In dermatitis it's the one thing to remember because Betnovate is the most effective steroid you can prescribe.

A name to conjure with.

'*Largactil*' has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

'*Largactil*' was so named because of its LARGE variety of ACTIONS; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

'*Largactil*' has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; as an adjuvant to E.C.T.; drug withdrawal; senile dementia; the control of terminal pain and nausea and vomiting.

As a doctor, you'd be better off abroad. Or would you?

Obviously, the decision's a difficult one. Especially if you're only just about to register.

So may we suggest something?

Rather than taking up a normal practice here or leaving the country, try the Royal Army Medical Corps. And you'll get the chance to do both.

Because, for some of the time, in the RAMC you're likely to see something of the world: in Germany, Cyprus, or maybe on exercises in countries from Canada to the Far East.

You can join for 3 or 5 years. And in that time you'll not only travel, you'll also gain valuable medical experience.

You'll hold the rank of Captain. And at say 24 years of age you earn around £3395 gross p.a. On top of that, there are all sorts of allowances.

Your surgery is well equipped by the Army. And you won't just be dealing with soldiers. There are wives and children to care for, too.

What's more, you get 6 weeks' paid leave every year.

At any time during your service, you can apply to stay on for a Regular Commission. And have the opportunity of specialising. In fact, around 70% of all Regular Officers do take up post-graduate studies.

Alternatively, you can leave at the end of your Short Service Commission. All the better for the experience and for a tax-free gratuity. You get £1500 after 3 years. £3000 after 5.

So think about it. And before you

decide on anything, find out more about the RAMC.

Why not visit one of our military medical establishments and see for yourself how you'd get on?

If you want full details of the career, or would like to pay us a visit and meet an RAMC Officer, telephone 01-499 8040 extension 332 or write to:

The New General Practice 2

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

PRICE £1.25 (U.S.A. \$3.50), including postage

Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

Diseases of the Urinary Tract

One of the most rapidly growing specialties over the last few years has been that of urology. Many doctors now in practice could not have been taught much of the present-day management of many urinary tract diseases. Last year the *B.M.J.* published a series of "Current Practice" articles on diseases in the urinary tract, and these have now been collected together in a booklet. Beside articles on the newer aspects of the specialty, the booklet contains articles on established methods of managing renal disorders. Any doctor who wishes to bring himself up to date on modern practice in this field will find this a readable account of the important aspects of the specialty.

capsule

Indications: Acute and chronic anxiety states and psychosomatic conditions whether or not accompanied by depressive overlay, tension, apprehension, agitation, and sleep disturbances.

Dosage: The usual adult dose is one 10mg capsule three times daily, with a further capsule at bedtime if required. In certain cases up to 60mg daily may be needed. Should a milder effect be required the midday dose may be omitted.

Side Effects: Even in high doses, Integrin is well tolerated, with only minor, often transient, side effects. Some patients may experience some drowsiness. Dry mouth and dizziness have also been reported.

Precautions: Alcohol or other tranquillizers may potentiate the effect of Integrin and patients intending to drive should be made aware of this. Where MAO inhibitors have been used, 2-3 days should elapse before Integrin is started.

Safety Margins: No reports of toxicity or overdosage have been received, even where patients have taken up to 56 capsules in 24 hours. Neither dependence nor withdrawal symptoms have been reported.
Presentation: Containers of 100 capsules. Each grey/green capsule contains 10mg oxypertine.
Basic NHS cost of one week's treatment (1 capsule 10mg t.d.s.) is 36p.

undamental' or anxiety!

Found effective in 90% of patients

In recent G.P. studies improvement was shown in 9 out of 10 patients within 2 weeks. In double-blind comparisons with chlordiazepoxide, Integrin gave relief to nearly 10% more patients.

Gives more profound relief from anxiety

Seventy eight patients, most of whom were already on tranquillo-sedatives, were switched to Integrin. Their average anxiety-rating dropped to less than one third of its previous level.

In another trial, Integrin gave complete – as opposed to partial – relief from anxiety within 4 weeks to as many as 35% of patients: nearly twice the rate of chlordiazepoxide.

Lifts any depressive overlay

In contrast to the tranquillo-sedatives, Integrin actually enhances mood and restores a normal sense of well-being.

Fast action—fast clinical response

Integrin answers the need for a faster acting tranquillizer. Clinical trials show that up to 90% of patients improve within the first week of treatment.

Hypertension. Introduce her to treatment gently with Neo-NaClex-K.

When a patient is new to hypertension, Neo-NaClex-K makes it a lot easier to live with.

Easier, because just once-a-day treatment can control the mild to moderate case.

Easier, because her sleep won't be disturbed by diuresis during the early days of treatment.

Easier, because postural hypotension won't be something she'll wake up to.

And even in severe hypertension you can still keep her on Neo-NaClex-K in conjunction with minimal doses of a more potent antihypertensive. So you can control the severe condition with less risk of side effects.

Neo-NaClex-K is a unique two layered tablet containing bendrofluazide to lower blood pressure safely and surely, plus a potassium supplement to replace any loss. And right from the start, it provides a gentle introduction to the long-term treatment your new hypertensive patient may need.

Prevention is better than migraine

'Migraine does not destroy life but can destroy the joy, value and rewards of living.'¹

Dihydroergotamine-Sandoz is a new tablet formulation that makes migraine prophylaxis simpler and more practicable than ever before. Dihydroergotamine has a vasoconstrictor action on distended extracranial arteries similar to that of ergotamine,

while being largely free from its uterotonic and pressor actions. In one trial², Dihydroergotamine 2 mg. administered regularly 3 times a day was used to treat 80 patients with migraine. Improvement was recorded in 58 (72.5%); migraine disappeared in 32 patients and was greatly or partially reduced in the remaining 26.

the 'inside secret' of treating in-rolling feet

Prescribe an external shoe wedge, and you only do part of the job. The wedge wears away to become largely ineffective—and in any case it disturbs the proper balance of the shoe. On top of that you run the risk of introducing a psychological problem too—what child wants to wear shoes that make him look and feel abnormal?

The answer can be found in Start-rite INNERAZE, the shoes that are orthopaedically designed to correct in-rolling with an invisible built-in wedge that can't wear or change shape.

For further information about the shoes with an 'inside secret' or details of the explanatory 12-minute INNERAZE 16mm colour film available on loan, write to: C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

COMMERCIAL APPOINTMENTS

MERCK SHARP & DOHME LIMITED

MEDICAL ADVISER

This is an opportunity for a qualified doctor, male or female, to establish a career outside the direct practice of medicine. This leading manufacturer of ethical pharmaceuticals requires a physician to join its team of Medical Advisers which, under the Medical Director, provides a service of information and advice to the profession on the application of the Company's products, and the investigation of clinical problems. The team also monitors published data and product information material and trains the Company's Medical Representatives. The training of Representatives is very important and the candidate should enjoy teaching.

The Medical Adviser has a very important position in the Company and in this appointment there is considerable scope for a physician who also possesses commercial aptitude.

The work is highly congenial and the offices are situated in a pleasant part of Hertfordshire near London. Benefits include a company car, life insurance and superannuation. Please write for further details and application form to:

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £2,328 per annum x £144(3) x £126(1) — £2,886. Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £4,512 per annum x £201(8) x £210(1) — £6,330. Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters may be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association. November 1970

ST. ANDREW'S HOSPITAL
Northampton

Medical Director: James Harper, M.B., F.R.C.P. (Edin), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of psychiatric illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy Department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges. Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99
