three faces of Valium* Roche

1 Valium Roche in simple anxiety

Anxiety may be a physical, as well as an emotional state. Often, it presents as a rather bizarre pattern of largely physical symptoms, things like headache, 'dyspepsia', insomnia, muscular pains and disturbances of appetite.

Hundreds of clinical trials, involving tens of thousands of patients in almost every country in the world have shown that Valium Roche affords remarkable symptomatic relief in such cases, 'curing' a long list of apparently intractable physical symptoms.

2 Valium Roche in psychosomatic illness

Sometimes, anxiety disturbs physiological or bio-chemical function to the point of producing functional or structural disorders. Such conditions take on a life of their own and demand – in addition to the relief of anxiety – active, specific treatment.

In such cases Valium Roche curbs anxiety and – coupled with specific treatment – helps to ease or eradicate a long list of conditions involving the skin, gastro-intestinal tract, the heart and circulation, the muscles and the organs of reproduction and excretion.

3 Valium Roche in organic disease

Even patients whose clinical condition is clearly organic can become excessively anxious. When they do, the anxiety and its physical effects may hinder recovery or – in conditions like myocardial infarction – amount to a major complication.

Valium Roche has been used in many such cases. Invariably, it produces a sharp improvement in the patient's emotional outlook and attitude. Where anxiety has produced an increase in sensations of pain or discomfort Valium Roche can afford dramatic relief from organic symptoms.

Lentizol

a significant improvement in antidepressant therapy

Amitriptyline is one of the most widely-prescribed of all psychotropic agents. But like any drug, it works properly only when taken as prescribed. And published work¹ clearly shows that as many as 48% of outpatients default in taking tranquillisers and antidepressants. Even among inpatients, some 19% default in this way². A recent study reported in the *Practitioner*³, indicates that a once-daily dosage regimen is less likely to be abused.

Lentizol:

simplifying dosage to reduce patient default

Lentizol is a sustained-release form of amitriptyline designed to be taken once daily, at bedtime. Thus Lentizol offers a new simplicity of dosage to reduce patient default. Instead of having the trouble – and possible embarrassment – of taking three doses during each day, the patient simply takes one dose at bedtime.

Often lessens the incidence of daytime drowsiness

Lentizol has a sedative effect within a short time after the daily dose is taken. This can be very helpful to those depressed patients who have difficulty in getting off to sleep. Its sleep-enhancing effect is spread over the early

hours of the morning, too, so that Lentizol also benefits patients whose condition causes early-morning waking. By daytime, Lentizol will continue to provide symptom relief until the next daily dose is taken, with less risk of drowsiness.

No increase in treatment cost

One Lentizol 50 mg. capsule at bedtime will replace treatment by one 25 mg. amitriptyline tablet t.d.s. This means that the daily cost of Lentizol is equivalent to the daily cost of standard amitriptyline.

Clinical assessment in progress

Clinical appraisals of Lentizol are being carried out by a number of investigators throughout the United Kingdom. Early results⁴ indicate that Lentizol produces an improvement in patients who would be expected to respond to amitriptyline. Lentizol is widely preferred because of the simple, convenient dosage regimen. Also some workers have found it possible to discontinue night-time sedatives.

Lentizol is supplied as capsules of 50 mg. and 25 mg. amitriptyline in a sustained release formulation, each strength in packs of 50 and 250. Further information is available on request.

The Retreat, York

For the Treatment of Psychiatric Illnesses

This Private Registered Nursing Home at York of 275 beds, established in 1792, is managed by members of the Religious Society of Friends (Quakers).

It combines psychological and physical investigations and modern forms of treatment for patients suffering from psychiatric illnesses, including drug dependence, and has a separate unit for the assessment and treatment of psycho-geriatric conditions. There are also facilities for long-stay patients.

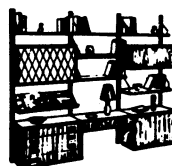

The Hospital is surrounded by 42 acres of its own grounds and is within easy walking distance of the City centre. In recent years, the Hospital has been modernised throughout. A new spacious occupational therapy centre provides a wide range of creative activities.

British United Provident Association and Private Patients Plan assist their members who become patients at The Retreat within the range of their published benefits.

For terms and further particulars, apply to The Medical Director, The Retreat, York, YO1 5BN. Telephone: York 54551 (STD 0904).

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

CHILDREN'S ANTISPASMODIC MIXTURE

A PLEASANTLY FLAVOURED SYRUP
READILY TAKEN BY ALL CHILDREN

For asthma & bronchitis

A full antispasmodic effect from
fractional dose of ephedrine

TESTS show that 2-Diethylaminoethyl-x-phenylbutyrate Citrate has a more pronounced bronchodilatory effect than ephedrine. Three parts of 2-Diethylaminoethyl-x-phenylbutyrate Citrate producing the same effect as five parts of ephedrine. It acts more rapidly than ephedrine, reaches maximum effect somewhat later and falls away at a slightly slower rate. With a mixture of the substances the curve of bronchial dilation showed that the effect produced was considerably greater than when double the quantity of each substance was administered separately.

**4 mg. OF THE MIXED SUBSTANCES
(CONTAINING 2 mg. OF EPHEDRINE)
HAS THE BRONCHODILATORY EFFECT
OF 8 mg. EPHEDRINE.**

Whilst a full bronchodilatory effect is produced with this mixture, side-effects, such as nausea, restlessness, sweating, &c., due to over-dosage or idiosyncrasy to ephedrine are avoided.

Ceporex Syrup
reduces the risks
and improves the results

Glaxo brief

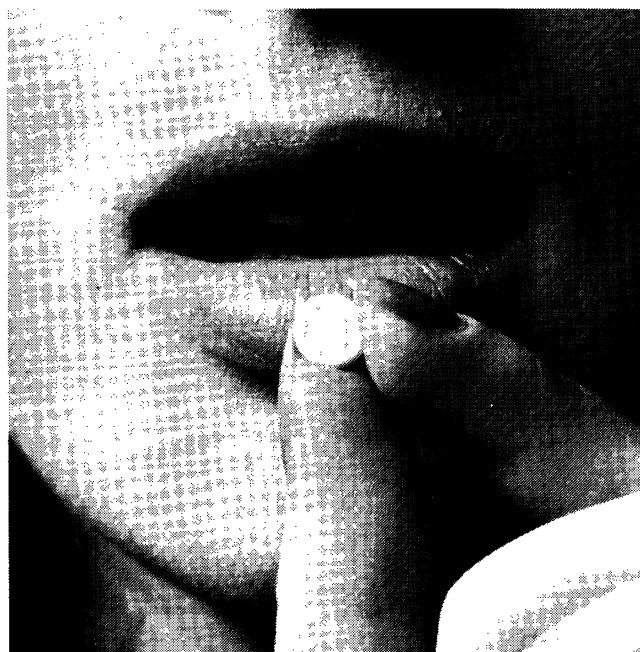

When a child has tonsillitis **Ceporex Syrup** reduces the risks and improves the results

Tonsillitis treated with penicillin can result in diarrhoea. And penicillin-hypersensitivity rashes are another problem which can complicate therapy. Ceporex (cephalexin) is ideally suited for tonsillitis treatment. It is clinically as effective as penicillin G against the beta-haemolytic streptococci, but is less likely to produce side effects. It is very well tolerated by children of all ages and can often be used in penicillin-hypersensitive patients. And Ceporex achieves rapid results, producing high blood and tissue levels quickly; and it is not metabolised in the body so it remains fully active to fight infection. Ceporex Syrup has a pleasant blackcurrant flavour which encourages children to finish the course.

Dermatitis — all the better for Betnovate

Dermatitis is ugly. It causes embarrassment, especially in public. Betnovate saves embarrassment. Dermatitis patients respond better to Betnovate than to other topical steroids. Two clinical trials, involving 916 patients and comparing Betnovate with five other leading topical steroids, proved this conclusively. Their findings included:

'Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate subdivisions of the trial; in no instance was it inferior.'

'A better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested.'

'... response in psoriasis is a more stringent test of the efficacy of a corticosteroid than response in eczema. The superiority of betamethasone 17-valerate in this context is noteworthy.'

Betnovate gives rapid relief from itching and inflammation and thus, achieves the best response. In dermatitis it's the one thing to remember because Betnovate is the most effective steroid you can prescribe.

Neo-NaClex-K the gentle treatment for hypertension

When a patient is new to hypertension, Neo-NaClex-K makes it a lot easier to live with. Easier, because just once-a-day treatment can control the mild to moderate case. Easier, because her sleep won't be disturbed by diuresis during the early days of treatment. Easier, because postural hypotension won't be something she'll wake up to. And even in severe hypertension Neo-NaClex-K used with a more potent antihypertensive can control the condition with less risk of side effects. Neo-NaClex-K is a unique two layered tablet containing bendrofluazide to lower blood pressure safely and surely, plus a potassium supplement to replace any loss. Against a background of increasing concern about the danger of barbiturate poisoning (as few as 20 or 30 tablets may prove fatal), the advent of Mogadon must be of considerable importance. Indeed, Mogadon "..... appears to be as nearly as safe as a drug can be."² Even as many as 80 tablets have produced no untoward effects. Wherever gout strikes— **Zyloric*** protects

With ZYLORIC, serum uric acid levels are reduced and kept within normal limits, urate deposition in the joints regress and acute attacks of gout become less frequent or disappear.

ZYLORIC acts by limiting the formation of uric acid from its metabolic precursors. Uricosuric agents, in contrast, do not limit the production of uric acid, they increase the flow of urates through the kidney.

With ZYLORIC less uric acid passes through the kidney which is protected from the effects of urate deposition and urate nephropathy (kidney damage is a cause of death in 25 per cent of patients with chronic gout).†

six good reasons for prescribing **Bactrim* Roche** for urinary tract infections

Urinary Infections respond outstandingly well to Bactrim Roche, a combination of trimethoprim and a sulphonamide. One such combination was used prophylactically in 25 cases of chronic bacteriuria where the usual treatment (ampicillin, tetracycline or nitrofurantoin) had failed. Although the dose used was very much below the level normally recommended† the treatment controlled 22 (88 per cent) of the group for periods of 6 to 36 months.¹ The combination used in Bactrim Roche (trimethoprim/sulphamethoxazole) achieved a cure rate of 85 per cent one week after treatment ended and 67 per cent after four to five weeks, compared with 70 per cent and 52 per cent for ampicillin.² An editorial in the British Medical Journal commented that the combination "was therefore clearly superior . . . and this superior effect was even more appreciable in the treatment of patients who had failed on another drug."³

Mynah^{*}
ETHAMBUTOL-ISONIAZID

For many years isoniazid has been accepted as the leading standard drug in the chemotherapy of tuberculosis^{1,2}.

And more recently Myambutol (ethambutol) has become a firmly established drug in cases of toxicity or resistance to PAS and streptomycin³.

Now these two leading drugs have been combined in one product – Mynah.

RANGE OF STRENGTHS Dosage of Mynah is established according to the patient's bodyweight; therefore Mynah is presented in four different strengths – to cover weights and dosages in both initial and subsequent periods of treatment. It is the included quantity of Myambutol that varies; the amount of isoniazid in each tablet remains standard at 100 mg.

CONVENIENT FOR THE DOCTOR The dosage of Myambutol and isoniazid when used together has therefore been made far more convenient; the physician need prescribe only one product to ensure the maximum benefit from both drugs.

CONVENIENT FOR PATIENTS Only one medicine to take, so the daily dose is less likely to be forgotten or ignored – and Mynah need be taken only once a day.

SAFETY Isoniazid and Myambutol are among the safest of all antituberculous drugs. Myambutol has a different mode of metabolism from that of isoniazid – with obvious advantages in terms of safety – whereas several other drugs used against tuberculosis involve the same metabolic process as isoniazid.

DIMINISHED RESISTANCE Although resistance to both Myambutol and isoniazid may develop if these drugs are used separately and alone, it has been shown that combination treatment with them greatly diminishes the risk of resistance developing^{4,5}. There have been no reports of cross-resistance between the two drugs.

Mynah has been developed in Britain for the purpose of easier management of tuberculosis. For full information on this important advance in chemotherapy – plus a dosage calculator – please apply to the Medical Department of Lederle Laboratories or ask your Lederle representative.

Sheer Panache- or the most surprising cars in their class?

The first—sheer panache—you can see at a glance.

The second comes only from a more intimate knowledge of cars.

204 Saloon

Motoring critics have been generous in their praise. Some have been surprised, for example, that the 204 has an engine capacity of an 1100 when its performance implies that of a 1500.

It has also been said that the 304 really belongs in the 1600–1800 class. One motoring journalist* even went so far as to describe the 504 injection as the best two-litre car in the world.

But it doesn't stop there.

Peugeot reckons your comfort is very important—especially on long journeys. So there are the kind of seats that take you there and back in armchair luxury.

There's a really generous boot for luggage enthusiasts. Childproof rear doors for child minders. An electric clock for time watchers.

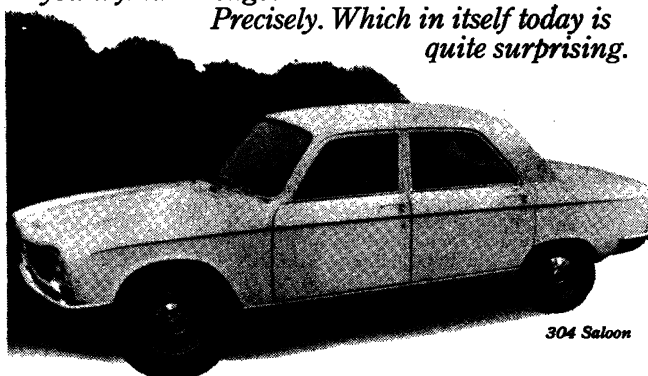

And—surprisingly as standard features on all models—heated rear windows and front seat safety belts.

In an age of noise and aggravation, another welcome surprise is the

Peugeot quiet. Which comes from meticulous damping of the all-round independent suspension (again a feature on all models). And from the fact that we have cut down vibration to an absolute minimum.

If you like to check your needs we think you'll find a Peugeot saloon to match them.

Precisely. Which in itself today is quite surprising.

304 Saloon

Peugeot 504. 2 litres. 98 bhp (carburettor) or 110 bhp (fuel injection). 5 seats. Up to 108 mph. 4 wheel discs. From £1624.37†

Peugeot 304. 1300 cc O.H.C. engine. Front wheel drive. 70 max. bhp. Luxury for four adults at up to 93 mph. Servo assisted disc/drum brakes. From £1188.12†

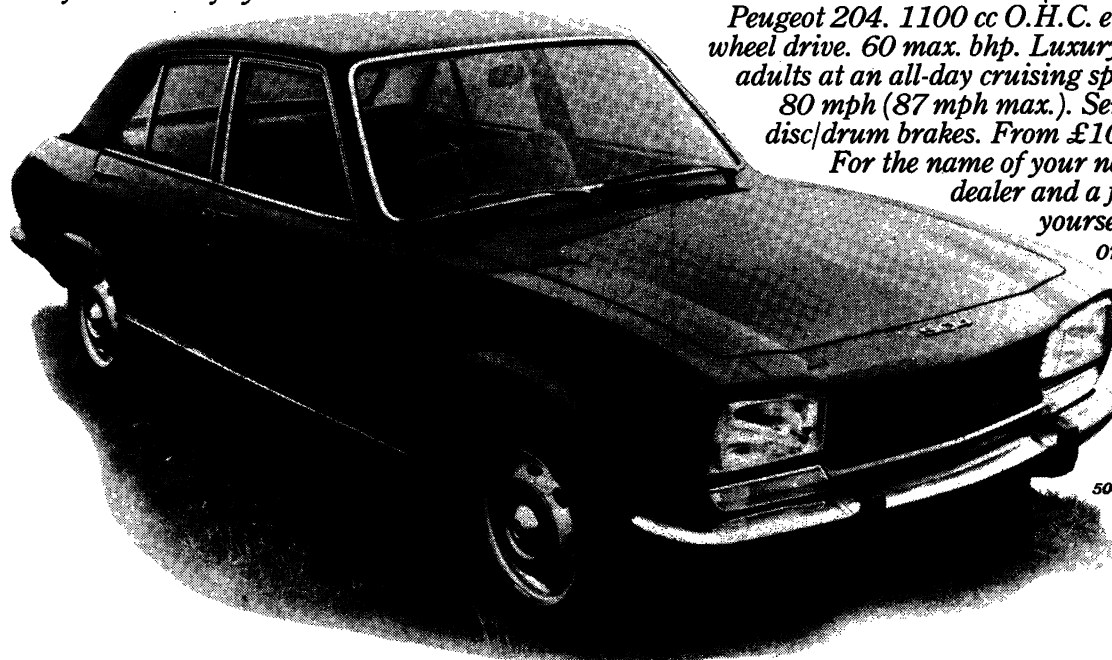

Peugeot 204. 1100 cc O.H.C. engine. Front wheel drive. 60 max. bhp. Luxury for four adults at an all-day cruising speed of 80 mph (87 mph max.). Servo assisted disc/drum brakes. From £1098.12†

COMMERCIAL APPOINTMENTS

MEDICAL DIRECTOR
(CLINICAL RESEARCH)

from £4,000 p.a.

+ bonus and car.

Home Counties

Our client is a fast growing ethical pharmaceutical manufacturing company which is setting up a new Clinical Research Department and wishes to appoint a Medical Director to carry out this project and run the new Department.

Candidates (age broadly 30-35 years) will be medically qualified with experience in research in the Pharmaceutical Industry and ideally some time spent in general practice. They must have a facility to absorb Medical Statistics and be able to design, implement, interpret, and evaluate clinical trials. A commercially oriented approach to the work and ability to mix with people at all levels will be important.

Commencing salary from £4,000 p.a. plus bonus and car. Apply for application form to J. H. Howatt, Knight Wegenstein Ltd., Executive Recruitment Division, Commercial Union House, 75 Mosley Street, Manchester M2 3HR, Telephone 061-228 1393, quoting reference 71/34.

ADMINISTRATIVE

MANCHESTER REGIONAL HOSPITAL BOARD
 (a) **ASSISTANT SENIOR MEDICAL OFFICER**
 (b) **TRAINEE IN MEDICAL ADMINISTRATION**

Applications are invited from fully registered medical practitioners for (a) the post of Assistant Senior Medical Officer on the headquarters staff. The successful candidate will assist the Senior Administrative Medical Officer with the organization, planning and development of the hospital services and with matters of general medical administration. A good clinical background and previous experience of hospital and/or Local Health Authority administration is desirable. Salary £4,017 x £183 (6) - £5,115.

(b) For a Training Appointment in Medical Administration which will be designed to fit candidates for posts in integrated Health Service. Previous administrative experience is not necessary. The appointment will be tenable for a year in the first instance, which the successful applicant will spend in practical work and training within the Board, including probably some secondment to local authorities. At the end of that period and subject to suitability and satisfactory progress, the appointment will be extended for a second year and (subject to review at the end of that time) for a third year. These two years will be spent undertaking a full time postgraduate course at Manchester University leading to a M.Sc. degree, which involves one year of academic study at the University and a second year spent undertaking supervised practical work at the Board. It is a condition of being granted facilities to attend the course that the appointee must undertake to remain with the Board for a further two years on completion of the course. Salary on appointment and whilst undertaking the course will be on the Medical Officer scale (i.e. the same as for senior registrars, namely: £2,760 rising to £3,588 p.a. by annual increments of £126, £174, £177, £174 and £177). A post in the grade of Assistant Senior Medical Officer (salary: £4,017 rising to £5,115 p.a. by six annual increments of £183) will be held open for the trainee to which he may be appointed if he obtains his degree. Thereafter, he will be eligible to apply for posts in the Principal Assistant Senior Medical Officer grade (salary: £4,512 x £201 (6) - £5,718 p.a.).

Applications for either post to be made on forms obtainable from the Senior Administrative Medical Officer to the Board at Gateway House, Piccadilly South, Manchester, M60 7LP, which are to be returned by 6th October, 1971. (12780) 54

CANADA

Newfoundland, Canada's newest and rapidly developing province, looks for graduates of British Medical Schools. Vacancies will exist in 1972 for the following posts:

SENIOR MEDICAL OFFICERS

Suitable for doctors with, preferably, some surgical experience, not necessarily to fellowship standard. A good background of experience in general medicine would be helpful. The successful applicant will, with his assistants, be responsible for the medical and health needs of a population of from 5,000 to 10,000 people. Minimum salary is \$28,000 (£11,336). A furnished house at reasonable rent is available. Benefits include subsidized pension plan, medical and hospital coverage for whole family, transportation and removal costs paid if applicant agrees to complete two years' service, three weeks' vacation and a month's study leave after a year. Road or air facilities are available for transfer of serious cases from smaller to larger centres.

* There are six posts becoming vacant during 1972. These hospitals are connected with the main highway system. Facilities exist for the usual basic laboratory and X-ray investigations. Memorial University in St. John's has a medical school where opportunities for postgraduate study exist.

ASSISTANT MEDICAL OFFICERS

Suitable for recent graduates and provide considerable experience in all fields of medicine. The salary commences at \$20,000 (£8,096) per annum with increments. There are also the benefits described above.

PUBLIC HEALTH OFFICERS

Two vacancies exist for doctors with the Diploma in Public Health. These doctors will be based at Corner Brook for Western Newfoundland and Grand Falls for Central Newfoundland and will work as assistants to the Chief Public Health Officer in St. John's. Corner Brook and Grand Falls are the sites of large paper mills. Facilities for recreation include hunting, fishing, golf, and there is an active theatrical group in both places. These doctors will be responsible for the public health of their areas, including the supervision of the Public Health Nurses and the Health Inspectors located there and, in addition, advise and assist local doctors regarding public health. Starting salary is \$23,000 (£9,311) per annum but under review. The benefits described for (a) will apply, including a furnished house, as well as car mileage allowances.

For other information, write by air mail the Deputy Minister, Department of Health, Confederation Building, St. John's, Newfoundland, Canada. A recruiting team will visit the United Kingdom in October where interviews will be held.

ST. ANDREW'S HOSPITAL
Northampton

Medical Director: James Harper, M.B., F.R.C.P. (Edin), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds which is equipped for the investigation and treatment of all forms of psychiatric illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas, for longer-stay patients and geriatric patients. The hospital's amenities include Gloucester House, which comprises an Occupational Therapy Department, a swimming pool, a squash-court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

Diseases of the Urinary Tract

One of the most rapidly growing specialties over the last few years has been that of urology. Many doctors now in practice could not have been taught much of the present-day management of many urinary tract diseases. Last year the *B.M.J.* published a series of "Current Practice" articles on diseases in the urinary tract, and these have now been collected together in a booklet. Beside articles on the newer aspects of the specialty, the booklet contains articles on established methods of managing renal disorders. Any doctor who wishes to bring himself up to date on modern practice in this field will find this a readable account of the important aspects of the specialty.

“

Treatment with Paroven significantly altered the PO_2 , oxygen saturation, and the oxygen content of varicose vein blood and the oxygen extraction in tissues of varicose vein legs towards normal values. The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow.

”

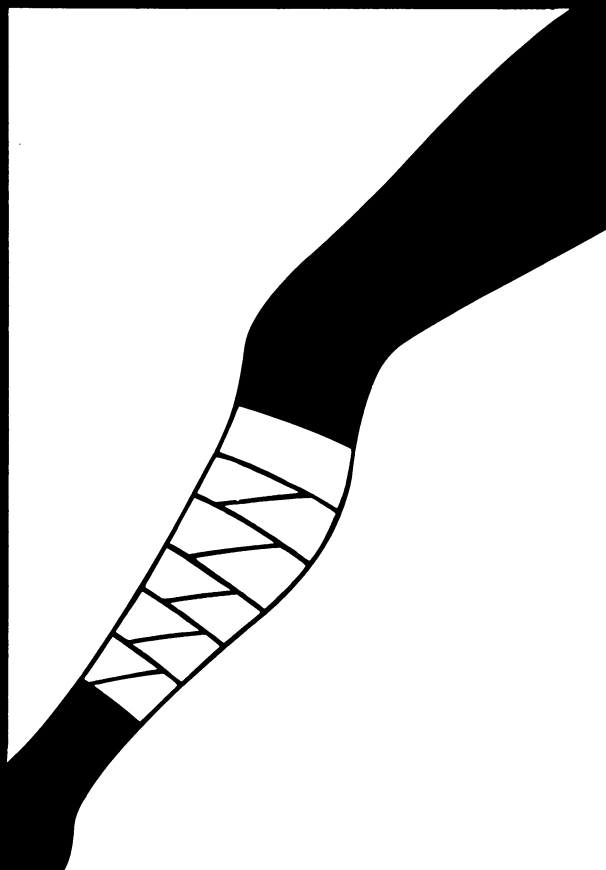

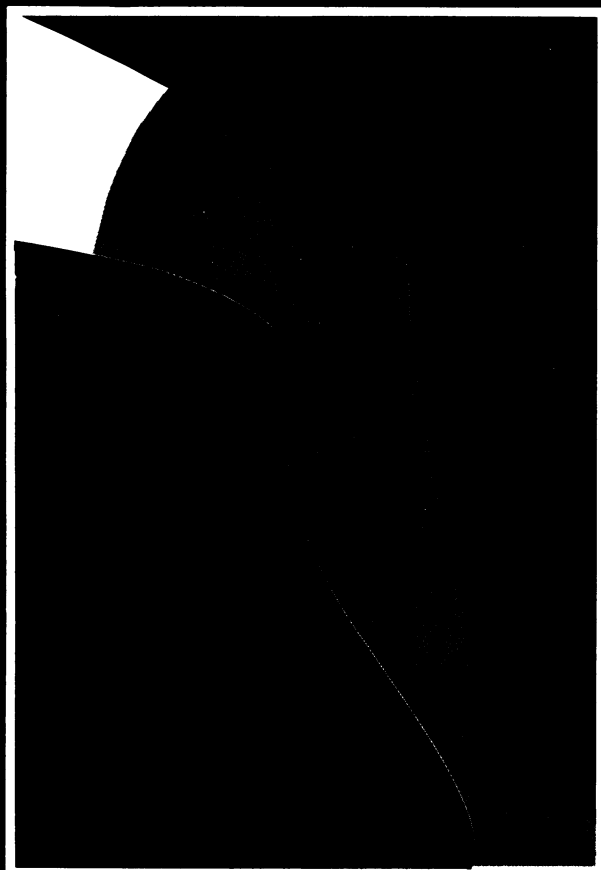

improves capillary flow relieves varicose disorders

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent".

(Brit J Clin Pract (1970) 23, 161)

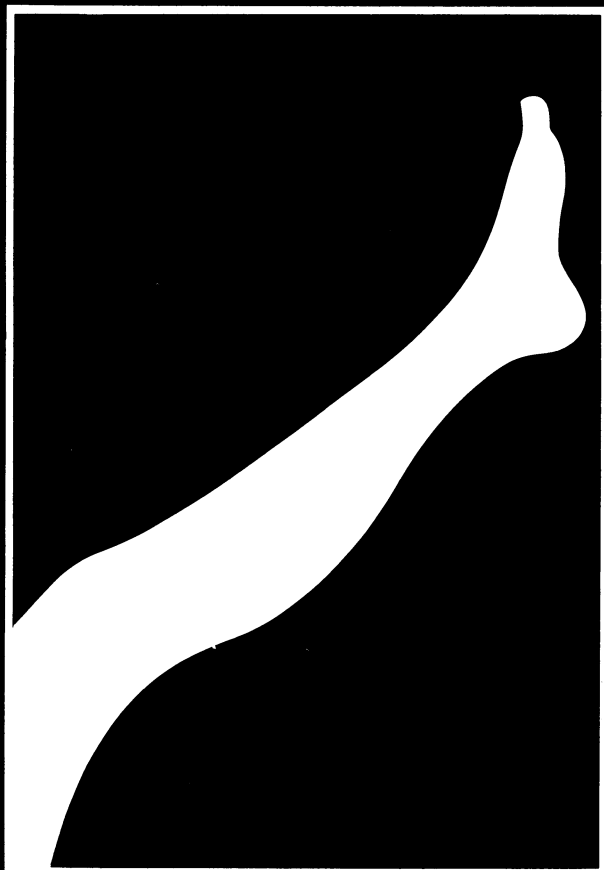

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent".

(Brit J Clin Pract (1970) 23, 161)

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile".

Long term treatment with **PAROVEN[®]** in varicose veins and post phlebitic syndrome

Recent clinical and double blind trials^{1, 2, 3} have confirmed that PAROVEN provides outstanding relief of symptoms due to chronic venous insufficiency or back pressure. Particularly good results were obtained in night cramps, heavy legs and chronic aching pain. Other symptoms which respond to long-term therapy with PAROVEN include:
superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage. Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions. In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability. Capsules, each containing 250 mg of O - (β - hydroxyethyl) - rutosides (not less than 45% troxerutin), in bottles of 20 and 100 capsules.
