

# PROGNOSIS IN ELEVATED BLOOD PRESSURE

## Implications of insurance statistics

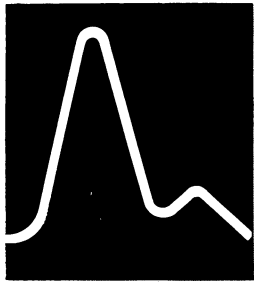

The charts on the opposite page are based on the accumulated experience of 26 insurance companies in America covering nearly 4,000,000 people who were accepted for life insurance. The statistics reveal that even modest elevations of blood pressure are associated with definite decreases in life expectancy.

For example, a male of 45 years with a blood pressure 150/100 mm Hg has his average life expectancy reduced from 32 to 20½ years—a loss of 11½ years.

Fortunately, substantial evidence has accumulated to show that effective treatment with modern antihypertensive drugs can considerably improve the depressing prognosis indicated by the insurance companies' statistics.

## Prognosis in Elevated Blood Pressure

### Reduction in Life Expectancy

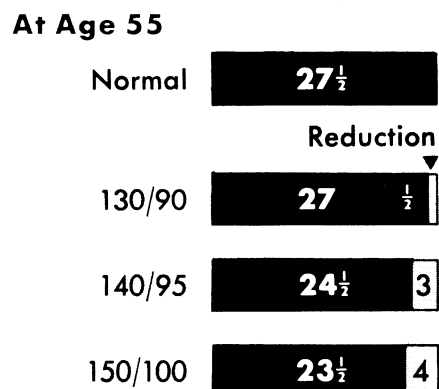

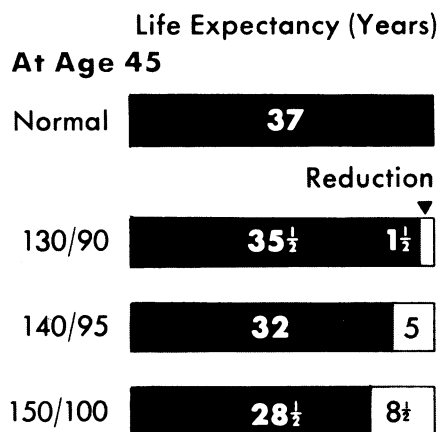

#### Life Expectancy in Elevated Blood Pressure Compared with Normal Expectancy

Reductions in expectation of life associated with elevated blood pressure are **not** proportionate to the degree of excess mortality. This holds even for very high blood pressures.

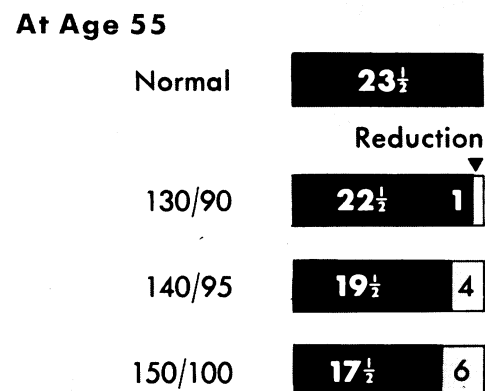

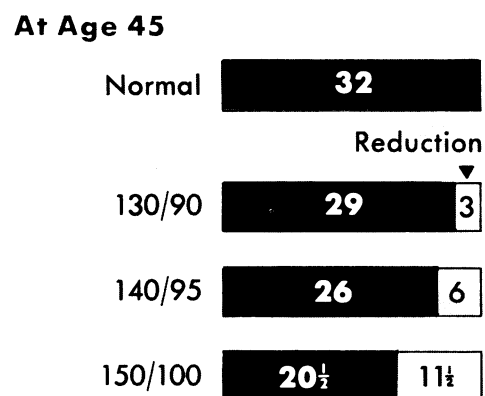

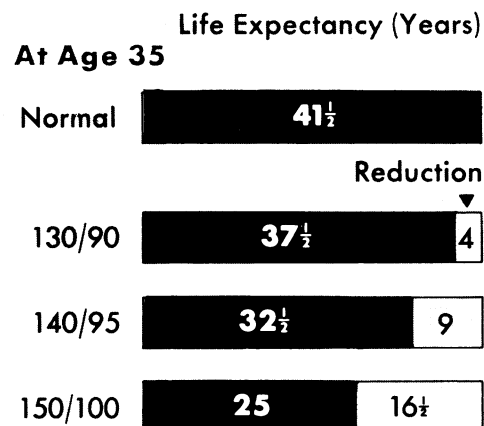

The magnitude of the reduction in life expectancy increases with elevation in blood pressure, but decreases with age.

The figures illustrate approximate reductions in life expectancy associated with indicated elevations in blood pressure.

# three faces of Valium\* Roche

## 1 Valium Roche in simple anxiety

Anxiety may be a physical, as well as an emotional state. Often, it presents as a rather bizarre pattern of largely physical symptoms, things like headache, 'dyspepsia', insomnia, muscular pains and disturbances of appetite.

Hundreds of clinical trials, involving tens of thousands of patients in almost every country in the world have shown that Valium Roche affords remarkable symptomatic relief in such cases, 'curing' a long list of apparently intractable physical symptoms.

## 2 Valium Roche in psychosomatic illness

Sometimes, anxiety disturbs physiological or bio-chemical function to the point of producing functional or structural disorders. Such conditions take on a life of their own and demand – in addition to the relief of anxiety – active, specific treatment.

In such cases Valium Roche curbs anxiety and – coupled with specific treatment – helps to ease or eradicate a long list of conditions involving the skin, gastro-intestinal tract, the heart and circulation, the muscles and the organs of reproduction and excretion.

## 3 Valium Roche in organic disease

Even patients whose clinical condition is clearly organic can become excessively anxious. When they do, the anxiety and its physical effects may hinder recovery or – in conditions like myocardial infarction – amount to a major complication.

Valium Roche has been used in many such cases. Invariably, it produces a sharp improvement in the patient's emotional outlook and attitude. Where anxiety has produced an increase in sensations of pain or discomfort Valium Roche can afford dramatic relief from organic symptoms.

# Lentizol

## a significant improvement in antidepressant therapy

Amitriptyline is one of the most widely-prescribed of all psychotropic agents. But like any drug, it works properly only when taken as prescribed. And published work<sup>1</sup> clearly shows that as many as 48% of outpatients default in taking tranquillisers and antidepressants. Even among inpatients, some 19% default in this way<sup>2</sup>. A recent study reported in the *Practitioner*<sup>3</sup>, indicates that a once-daily dosage regimen is less likely to be abused.

### **Lentizol:**

#### **simplifying dosage to reduce patient default**

Lentizol is a sustained-release form of amitriptyline designed to be taken once daily, at bedtime. Thus Lentizol offers a new simplicity of dosage to reduce patient default. Instead of having the trouble – and possible embarrassment – of taking three doses during each day, the patient simply takes one dose at bedtime.

#### **Often lessens the incidence of daytime drowsiness**

Lentizol has a sedative effect within a short time after the daily dose is taken. This can be very helpful to those depressed patients who have difficulty in getting off to sleep. Its sleep-enhancing effect is spread over the early

hours of the morning, too, so that Lentizol also benefits patients whose condition causes early-morning waking. By daytime, Lentizol will continue to provide symptom relief until the next daily dose is taken, with less risk of drowsiness.

#### **No increase in treatment cost**

One Lentizol 50 mg. capsule at bedtime will replace treatment by one 25 mg. amitriptyline tablet t.d.s. This means that the daily cost of Lentizol is equivalent to the daily cost of standard amitriptyline.

#### **Clinical assessment in progress**

Clinical appraisals of Lentizol are being carried out by a number of investigators throughout the United Kingdom. Early results<sup>4</sup> indicate that Lentizol produces an improvement in patients who would be expected to respond to amitriptyline. Lentizol is widely preferred because of the simple, convenient dosage regimen. Also some workers have found it possible to discontinue night-time sedatives.

Lentizol is supplied as capsules of 50 mg. and 25 mg. amitriptyline in a sustained release formulation, each strength in packs of 50 and 250. Further information is available on request.

# A name to conjure with.

*'Largactil'* has been a name to conjure with in psychiatric medicine for over sixteen years. An influence of such magnitude and long duration can be explained by examining this legendary name.

*'Largactil'* was so named because of its LARGE variety of ACTIONS; apart from being the first major tranquillizer, it acts in two other pharmacologically distinct ways – as a potentiator of central nervous depressants, including analgesics, narcotics and sedatives, and as an anti-emetic.

*'Largactil'* has achieved success in the fields of psychiatry, general medicine and anaesthetics in an ever-widening range of indications. These include major and minor psychoses; as an adjuvant to E.C.T.; drug withdrawal; senile dementia; the control of terminal pain and nausea and vomiting.

## Diseases of the Urinary Tract

One of the most rapidly growing specialties over the last few years has been that of urology. Many doctors now in practice could not have been taught much of the present-day management of many urinary tract diseases. Last year the *B.M.J.* published a series of "Current Practice" articles on diseases in the urinary tract, and these have now been collected together in a booklet. Beside articles on the newer aspects of the specialty, the booklet contains articles on established methods of managing renal disorders. Any doctor who wishes to bring himself up to date on modern practice in this field will find this a readable account of the important aspects of the specialty.

## Today's Drugs/1

The problem facing the prescribing doctor today is choice. Catalogues of drugs—no matter how detailed—are of little help unless accompanied by advice on which drug to give for what condition. So this new edition of "Today's Drugs" not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy.

The new edition differs from the earlier one in other ways. It deals with only three subjects—infections, vitamin deficiencies and anaemias, and disorders of the nervous system. Further volumes will be published at intervals of about a year, and by the time the whole field of therapeutics has been covered this first volume will have become obsolete and due for replacement. In order to further emphasize the ephemeral nature of books on therapeutics—and to cut costs—the book is a paperback.

PRICE £1.00 (U.S.A. \$3.00), *including postage*

## Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

# six good reasons for prescribing Bactrim\* Roche for urinary tract infections

Urinary Infections respond outstandingly well to Bactrim Roche, a combination of trimethoprim and a sulphonamide. One such combination was used prophylactically in 25 cases of chronic bacteriuria where the usual treatment (ampicillin, tetracycline or nitrofurantoin) had failed. Although the dose used was very much below the level normally recommended<sup>†</sup> the treatment controlled 22 (88 per cent) of the group for periods of 6 to 36 months.<sup>1</sup> The combination used in Bactrim Roche (trimethoprim/sulphamethoxazole) achieved a cure rate of 85 per cent one week after treatment ended and 67 per cent after four to five weeks, compared with 70 per cent and 52 per cent for ampicillin.<sup>2</sup> An editorial in the British Medical Journal commented that the combination "was therefore clearly superior . . . and this superior effect was even more appreciable in the treatment of patients who had failed on another drug."<sup>3</sup>

# Chances are you have over 100 Psoriatics on your list... ...Alphosyl could help them.

A great many people in Britain suffer from Psoriasis. On average, more than 100 for every G.P. in the country. And that's why every G.P. should know about Alphosyl.

Alphosyl Lotion is the most widely prescribed treatment specifically for Psoriasis. Patients get complete clearing or a marked improvement without systemic reactions, without uncomfortable restrictive dressings and without serious side effects or contraindications.

Alphosyl Lotion is the primary treatment, for use all over the body. And its effectiveness is backed up by the Cream and Application PC. The Cream is particularly effective in the intertriginous areas, and Application PC removes scales from the scalp and prepares the head for treatment with the Lotion.

Alphosyl therapy (Lotion, Cream and Application PC) can be adjusted to suit the patients individual needs . . . or preferences.

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin (2%) in a Cream and Lotion. Alphosyl Application PC is a unique combination of coal tar extract (5%) and hexachlorophane (1%).

# Which patients benefit most from Floxapen?

**Young patient aged 4** Sore throat, temperature 101.4; "Pharyngitis, may develop into quinsy."

**Elderly patient aged 73** Deep seated infection of knee which had failed to respond to penicillin G and tetracycline.

**Diabetic aged 29** Presents with infected wound on left foot. "Only seemed a scratch at first," she says. You notice extensive reddening around the area.

You can recognise in your practice the patients who will most benefit from Floxapen, Beecham's new penicillin.

Patients who need a more effective antibiotic, in whom the risks of infection are greatest or where the consequences of inadequate treatment are serious. The young and elderly, diabetics, asthmatics, patients suffering severe infection, patients on steroids or recently discharged from hospital and those with a history of treatment failure, will all benefit from Floxapen's extra margin of activity.

Floxapen's absorption is unique in that both oral and injectable preparations achieve similarly high blood levels at a simple dose of 250 mg q.i.d.

Floxapen offers the traditional penicillin advantages of low toxicity and bactericidal action against streptococci, pneumococci, and staphylococci.

Moreover it destroys staphylococci resistant to other penicillins, which present an increasing problem in General Practice.

**Floxapen.**

Simple to administer, well absorbed, effective.

**Indications:** Infections due to Gram-positive organisms: upper and lower respiratory tract infections, skin and soft tissue infections and otitis media.

**Dosage:** Oral and Intramuscular:

Adults: 250 mg q.i.d.

Children: 2-10 years: half adult dose.

Under 2 years: quarter adult dose.

Oral doses should be taken one hour before meals.

In severe infections these dosages may be increased if required.

**Availability:** Syrup 125 mg/5 ml. Capsules (black/caramel) and Vials each containing 250 mg flucloxacillin.

**Contra-indications:** Penicillin hypersensitivity.  
Subconjunctival injection.

**Side-effects:** As with other penicillins.

# Improved tax incentives for business investment.

In the House of Commons on 27 October 1970, the Chancellor of the Exchequer proposed the introduction of a revised system of investment incentives for industry. In his statement on 19 July 1971 Mr Barber announced that some of these incentives were being further improved.

Expenditure on most plant and machinery bought after 26 October 1970 and used for the purposes of a trade now qualifies for allowance against profits at the following rates:

## THE FIRST-YEAR ALLOWANCE

- |  |       |
|--|-------|
| 1. Generally   | 60%   |
| 2. On expenditure incurred between 20 July 1971 and 31 July 1973 inclusive   | 80% * |
| 3. On expenditure on new immobile plant and machinery in use for industrial purposes in a development area or Northern Ireland | 100%  |

For expenditure incurred after 19 July 1971 this allowance applies\* to plant and machinery used in those areas for non-industrial purposes. (Companies may now set the 100% allowance against the profits of the preceding *three* years if it cannot be absorbed by their current year's profits.)

\*Subject to legislation

## THE ANNUAL WRITING-DOWN ALLOWANCE

On all plant and machinery which does not qualify for 100% first-year allowance ("free depreciation"), calculated on each year's reducing balance

25%

The benefits of early investment are clear. The high rate of 80% first-year allowance is now in operation – but only until 31 July 1973. It follows that where capital projects can be brought forward, so that expenditure on them is incurred before 1 August 1973, they will qualify for the extra 20% first-year allowance.

Businessmen who wish for information about the working of the new allowances should consult their accountants or the local Inspector of Taxes.

## NATIONAL RADIOLOGICAL PROTECTION BOARD

# MEDICAL ADVISER

Applications are invited for the post of Medical Adviser on the staff of the Board.

The National Radiological Protection Board is an independent public authority sponsored by the Health Departments, the Medical Research Council and the United Kingdom Atomic Energy Authority. It came into being in October 1970 following the Radiological Protection Act 1970. Its functions are:-

by means of research and otherwise, to advance the acquisition of knowledge about the protection of mankind from radiation hazards;

and

to provide information and advice to persons (including government departments) with responsibilities in the United Kingdom in relation to the protection from radiation hazards either of the community as a whole or of particular sections of the community;

and the Board will provide a range of services to persons concerned with radiation hazards.

The Medical Adviser will be responsible initially to the Assistant Director for Research and his duties will include the following:

Advice on the medical supervision of persons employed in radiation work and on the management of cases of over-exposure to ionising radiations or radioactive substances; this will include liaison with the Department of Employment and the Department of Trade and Industry.

Liaison with the National Health Service in connection with protection of staff and patients against radiation hazards in medical and dental procedures.

Advice on the medical aspects of the Board's research programmes in applied radiation biology, including epidemiological studies of particular groups of the population in relation to the effects of ionising radiations.

The qualities required are therefore diverse and include experience in clinical and preventive medicine, interest in epidemiology and applied medical research, and knowledge of the safety procedures in radiological departments. At least one of these should be supported by a successful record of post-graduate experience.

It is expected that the salary will be in the range of £6,705-£6,910 a year. A contributory superannuation scheme is in operation.

The Medical Adviser will join the staff of the Board's Headquarters at Harwell in Berkshire.

Application forms may be obtained from the Personnel Officer, National Radiological Protection Board, Harwell, Didcot, Berks. (telephone: Abingdon 4141, extension 3256). The closing date for applications will be 12th October, 1971.

## SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

**HOUSE OFFICER:** Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

**SENIOR HOUSE OFFICER:** £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

**REGISTRAR:** £2,328 per annum x £144(3) x £126(1) — £2,886.

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRAR:** £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANT:** £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

**CONSULTANT:** £4,512 per annum x £201(8) x £210(1) — £6,330.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

**COMPULSORY RESIDENCE:** The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

## SERVICES

# Travel with the Navy for three years before you go into practice.

Just because you've finished your training, it doesn't mean you have to settle down into practice or a routine hospital job.

Especially when you can spend three years, as a naval doctor, seeing something of the world and getting a lot of useful experience on the way.

You'll get plenty of variety and all the responsibility you can handle. And at sea, as the only doctor on board your ship, you will find yourself having to cope with medical emergencies of every kind.

But you're more than just a doctor. Above all you are a naval officer—with the ever-changing scene and the full, satisfying life that every naval officer enjoys.

How do you become a naval doctor?

If you are in your pre-registration year or are already a qualified practitioner, you simply apply to join for a 3-year or 5-year commission. Then, if selected, you enter the Navy as a Surgeon-Lieutenant at £3,395 p.a. You are then given a short course in the special problems of maritime practice (including nuclear and underwater medicine) after which you take up your first appointment.

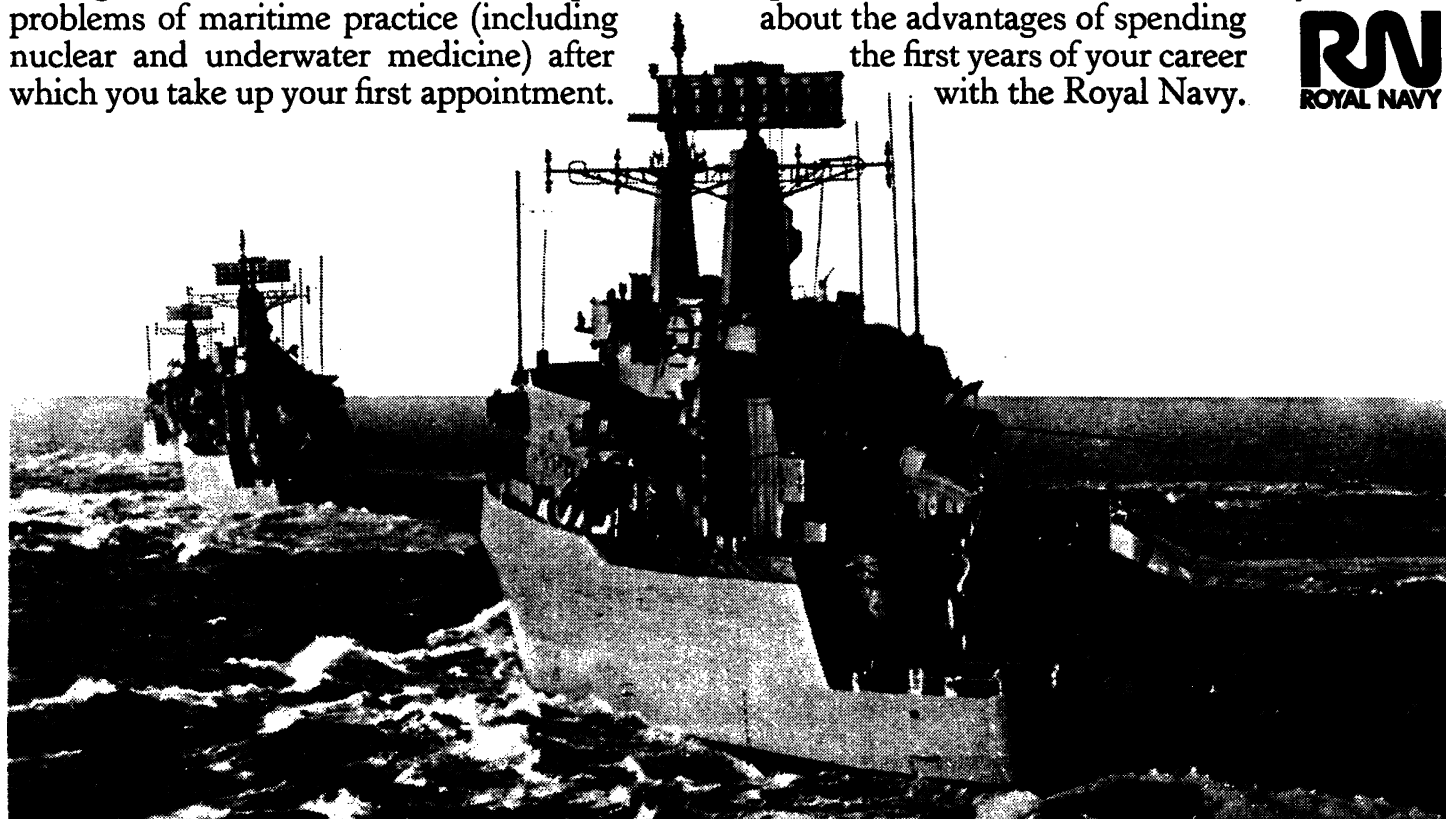

At sea, you would be looking after the health of a whole ship's company. Ashore, you may be looking after their families as well. (So we can even give you experience in obstetrics and paediatrics.)

And, at the end of your commission, you'll not only have a lot of useful experience and happy memories, but you'll also have a pretty useful tax-free gratuity. £1,500 after three years and £3,000 after five years.

Even if you're still at medical school, it's not too early to join us. Every year, we award about twenty-five Medical Cadetships to selected 2nd M.B. students. Each award pays for tuition fees and gives a salary of £1,814 a year in the rank of Surgeon Sub-Lieutenant. When you're registered, you're promoted to Surgeon Lieutenant and you begin your five-year commission.

Write now to Surgeon-Commander F. M. Kinsman, R.N., (724AA1), Dept. of the Medical Director-General (Navy), Empress State Building, London, S.W.6, and tell him your age and qualifications. In return he'll tell you more about the advantages of spending the first years of your career with the Royal Navy.
