# The Pathology of Rheumatoid Arthritis

D. L. GARDNER

This book is a survey of current knowledge of the tissue pathology, pathogenesis and aetiology of rheumatoid arthritis, based on an extensive personal study of 150 cases of the disease over a 17-year period. More than 100 illustrations are provided and many tables. The literature review quotes 1,108 references, with particular emphasis on current work. Individual chapters deal with the microscopic and electron microscopic details of the disease, the chemical and immunopathology, its experimental study, the pathological complications of treatment and modern views on its aetiology and pathogenesis. There is no current book on this subject (but many journal reviews). This monograph condenses the available knowledge for the first time into a single fully annotated volume.

# Can you spot the difference?

For a start let's identify what they are - house dust mites. Allergy to them is now widely regarded as the major cause of house dust asthma, and immunisation is gaining increasing support as the treatment of choice.

The one on the right is *Dermatophagoides pteronyssinus*, clinically the most important British house dust mite. On the left is *Dermatophagoides farinæ* - its North American cousin, which has been available from us for some time.

Bencard are pleased to announce the availability of their *Dermatophagoides pteronyssinus* house dust mite extract. This is the only commercially available extract of the predominant British house dust mite and represents an important addition to the Bencard range of allergy products.

The extract is suitable for diagnosis by the prick test method and for use in specific desensitising vaccines (S.D.V.), either alone or with other allergen extracts.

Another first from Bencard.

An illustrated booklet, with further information on house dust mite allergy and Bencard's house dust mite extracts, is available on request from : Bencard, Freepost, Brentford, Middx.

# Depixol

(flupenthixol decanoate)

the first non-phenothiazine  
long-acting neuroleptic injection  
for patients suffering from  
**schizophrenia**

Lundbeck Limited are pleased to announce the introduction of Depixol. It has

- \* inherent antidepressant activity
- \* lower incidence of side effects
- \* duration of action 2-4 weeks

Depixol is an effective antipsychotic indicated in the management of schizophrenic patients, particularly those who are withdrawn, apathetic or anergic.

The incidence of side effects with Depixol appears to be less than with long-acting phenothiazines.

***Dosage and route of administration.***

Depixol is administered by deep intramuscular injection. Treatment should be initiated with a test dose of 20 mg (1 ml) followed 7-10 days later by a further dose of 20-40 mg (1-2 ml), depending on the patient's response. Thereafter 20-40 mg (1-2 ml) should be given every 2-4 weeks.

***Contra-indications and side effects.***

Depixol is not recommended for patients who are overactive or excitable since its activating effect may lead to exaggeration of these characteristics. The commonest unwanted effects are extra-pyramidal symptoms. Occasional depressive reactions have been reported, but they appear to be less frequent than after other depot neuroleptics.

Depixol is a 2% solution of flupenthixol decanoate in thin vegetable oil. It is presented as 20 mg (1 ml) and 40 mg (2 ml) ampoules. **Depixol treatment should be initiated by a psychiatrist, preferably in hospital.**

# ASTHMA

## A lifetime of freedom begins with Intal

Before INTAL, a diagnosis of asthma often meant a life sentence of constantly aborting attacks with bronchodilators, anti-histamines or steroids. Patients were constantly at risk from the relentless progress of lung damage and lived in perpetual fear of an asthmatic episode.

The discovery of INTAL (Sodium Cromoglycate BP) represents a turning point in the management of this distressing complaint. Newly diagnosed patients, as well as those of long standing, benefit from this entirely new approach to therapy. INTAL actually prevents the onset of asthmatic attacks, and is notably free from serious side effects.

By preventing asthma attacks the possibility of consequent lung damage may be avoided enabling the patients to lead a fuller, happier life. If they remember their daily INTAL – they can forget their asthma.

## AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

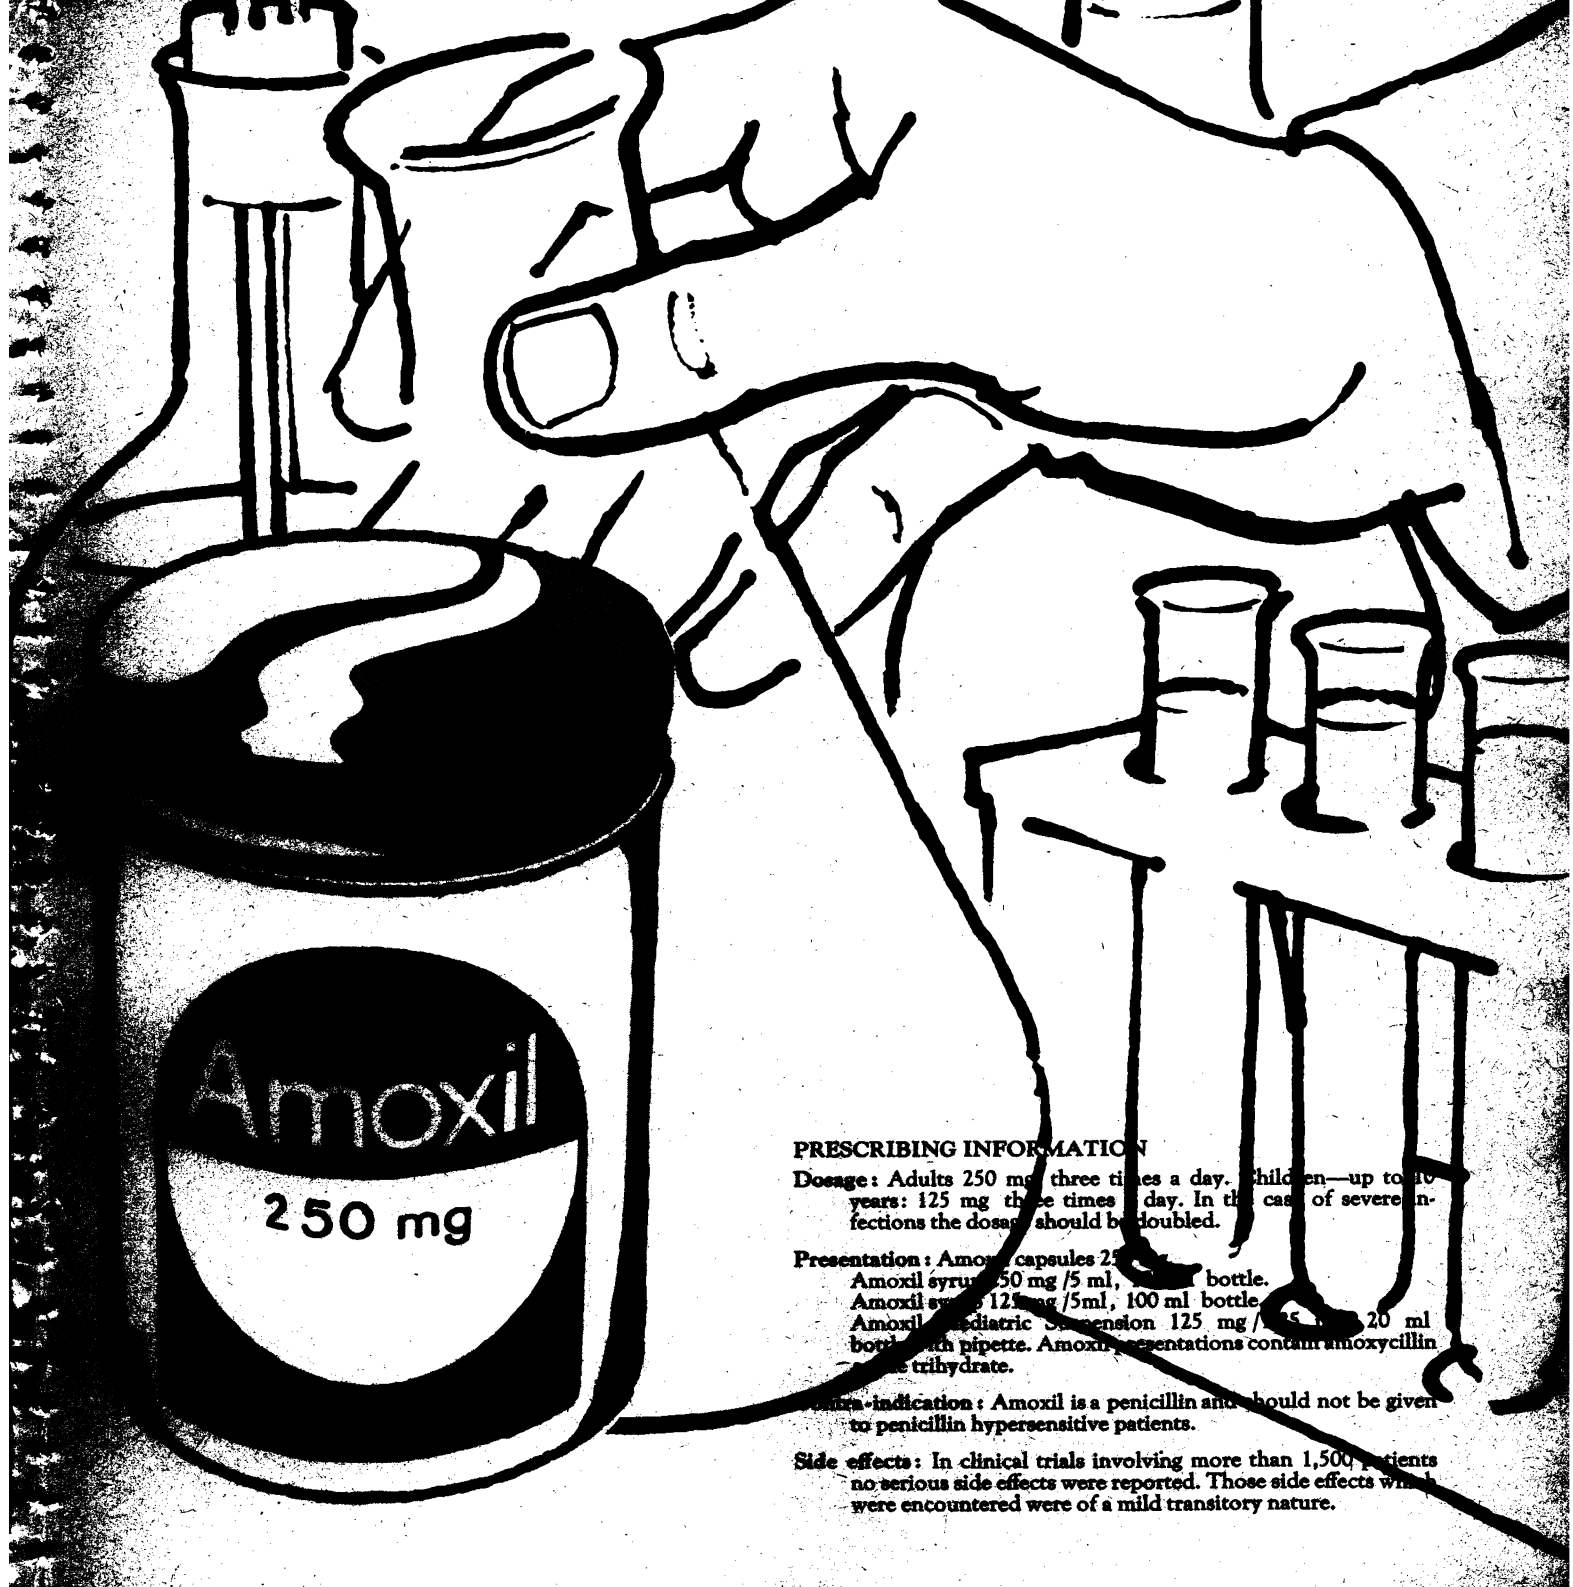

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

## PRACTICES (Executive Council)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council. Mark envelopes "Vacancy."

### RE-ADVERTISEMENT COUNTY OF SALOP EXECUTIVE COUNCIL PRACTICE VACANCY TELFORD NEW TOWN — STIRCHLEY DISTRICT

Applications are invited for an experienced general medical practitioner to commence a new practice in the Starchley District of Telford New Town. The New Town is set in the East Shropshire countryside, midway between Wolverhampton and Shrewsbury, and within easy reach of Central and North Wales and its coastline.

The Starchley District now under construction will eventually accommodate a population of about 24,000 people in a variety of house types for both rent and sale, any of which will be available to the appointed Doctor. The estimated growth is expected to be: 1,400-1,700 in 1972; 4,400-4,800 in 1973; 7,500-7,700 in 1974 continuing thereafter to the eventual population of 24,000.

The District will broadly comprise three housing areas, each with its primary schools, shops for daily needs, Social and Community Centres, with a Central District Centre with a wider range of shops and services including a top tier Comprehensive School.

Temporary surgery accommodation will be located in a pair of specially adapted Corporation houses until the Health Centre is available in late 1974, and a new District General Hospital is planned for the area with

over 950 beds, including a G.P. Maternity Unit. There is the possibility of Local Authority work and the practice is expected to develop as an integrated service. It will be expected that normally the Doctor appointed will have been qualified for about ten years of which two should have been in hospital appointments and five in a busy general practice in this country and so be eligible to be paid a type "D" Initial Practice Allowance as described in E.C.N. 631. The Medical Practices Committee have agreed that initially the District be classified "Designated" for this purpose and then "Restricted". As the practice grows the appointed Doctor will be expected to take partners and to become the leader of the Medical Team in the Development Area. He should therefore have enthusiasm for administering a new project and the ability to attract and work with other practitioners.

Further details and Form E.C.16A may be obtained from the Clerk, County of Salop Executive Council, Abbeydale, 39 Abbey Foregate, Shrewsbury, Shropshire and the closing date for receipt of applications is 14th July, 1972. (H6774)

### GLASGOW

## INDUSTRIAL APPOINTMENTS

## AIR CORPORATIONS JOINT MEDICAL SERVICE MEDICAL OFFICER VACANCIES

Due to impending retirements and promotions, the Air  
Corporations Joint Medical Service will shortly be requiring  
three Medical Officers in the London area.

The Joint Medical Service provides a comprehensive  
Occupational Health Service for BEA and BOAC, and includes  
groups dealing with industrial medicine, aviation medicine, and  
the care of overseas staff. In addition, it provides an  
Immunisation Centre for staff and passengers at BOAC Air  
Terminal, Victoria, London, SW1.

## IMMUNISATION MEDICAL OFFICER

This appointment at Air Terminal, Victoria, requires a working  
knowledge of the International Health Regulations, and  
current immunisation practice. The post also has an interesting  
Occupational Health content, and is particularly suitable for a  
practitioner at, or near, the age of retirement, but preferably  
between the ages of 45 and 55 years, who has had previous  
experience in Public Health or in the Armed Services.

## FLIGHT MEDICAL OFFICER

There will also be a vacancy for a Flight Medical Officer at  
Heathrow Airport (London). The post is primarily concerned  
with the clinical care of the Corporations flying staff, although  
opportunities will arise from time to time for applied research  
in aviation medicine. The appointment will be of particular  
interest to a doctor with previous experience in aviation  
medicine, but others with good clinical experience may apply.  
The preferred age range is 27-40 years, although candidates  
outside this age range may be considered.

## INDUSTRIAL MEDICAL OFFICER

This appointment, also at Heathrow Airport (London), will be  
of interest to a younger person wishing to make a career in  
occupational health in a modern and progressive organisation  
with good career prospects, but a more experienced person  
will be considered. Possession of the DIH is desirable, but not  
essential.

Candidates for these posts must be medically registered in the  
United Kingdom. There are opportunities for holiday air travel  
and there is an excellent contributory pension scheme for  
those eligible. The commencing salary would not be less than  
£4,000 per annum.

The closing date is July 15.

Candidates should write, giving details of age, experience and  
qualifications to:—

### MEDICAL OFFICERS (2)

For Rosebery and District

Guaranteed salary \$A15,000 p.a.

Another \$A2,000 (approx.) is available through private medical examinations required by the State Occupational Diseases Board.

A furnished house is provided at a nominal weekly rental of \$A8 and heaters, T.V. receiver, washing machine, refrigerator etc., are included. There is an allowance of \$A8 per week for use of own car.

These are well-paid, challenging positions in an expanding Tasmanian mining centre. There is a small local hospital with ten beds and a good knowledge of obstetrics and anaesthetics would be desirable. There is a local ambulance to convey surgical cases to a base hospital.

Assistance with travel and removal expenses can be provided.

Interested doctors in Britain who would like application forms and further general information are asked to write to the Agent General for Tasmania, 458 Strand, London WC2R 0RJ. (12882) 118

## MEDICAL OFFICER

## Consultant Pathologist Zambia

Applications are invited for the position of Consultant Pathologist with the Rokana Division of Nchanga Consolidated Copper Mines Limited at Kitwe, Zambia.

The successful candidate will have a higher degree in pathology and will be primarily a morbid anatomist, preferably with experience in cytology. In addition to providing a histopathology and cytology service he will supervise the sections of bacteriology, parasitology, haematology, blood transfusion and biochemistry.

The central pathological laboratory of Rokana Division has a staff of five qualified laboratory technologists in addition to a number of local laboratory assistants. This laboratory also performs histopathology and cytology for the medical departments of the other three mines in the N.C.C.M. group. At present the qualified technical staff is entirely expatriate. However, in co-operation with the group training department and the Evelyn Hone College of Further Education in Lusaka, the Rokana pathological laboratory takes part in a scheme of technician training for Zambians. A training officer/laboratory supervisor has been appointed to supervise the (12902)

student technicians in the practical part of the course. The Pathologist will be required to take particular interest in this training.

The appointment is on a one to three year contract, renewable. Salary will be commensurate with experience and will be competitive. In addition a company house is provided free of charge and a furniture allowance is payable. Leave is at the rate of 66 days per annum. Children receiving education overseas are granted up to £480 per child towards school fees and are given two return passages per year to visit their parents during holidays.

*Income tax is lower than in the U.K. and Exchange Control Regulations allow for up to 33½% gross income to be remitted home.*

Applications giving full details will be treated in the strictest confidence and should be addressed to:

Prothiaden is an anti-depressant which not only treats depression, but also relieves the anxiety so often associated with depressive illness. A recent study\* has shown Prothiaden to be superior to amitriptyline in the treatment of depressive disorders, and to be much better tolerated. With Prothiaden, your patients will persevere with treatment – more of them will recover.

# Prothiaden breaks the web of depressive illness

\**Psychopharmacologia*, 1971, 19, 153

Prothiaden is dothiepin hydrochloride in capsules of 25 mg.

# Penbritin Territory

Right from the time they're too young to tell you where it hurts, treatment of children poses special problems. During this period, more than ever, the antibiotic you prescribe should ideally be safe – and sure.

The effectiveness of Penbritin and its safety as a penicillin are well-established. In contrast, tetracyclines are “absolutely contra-indicated for children aged under 8” because of serious effects on tooth development (Brit. med. J. (1970), 4, 509).

For the under two's, acceptability is of great importance. Penbritin paediatric suspension provides it – in an easily administered form. Syrup and paediatric tablets for the older child complete the Penbritin paediatric range.

In Paediatric Territory there's really only one choice.

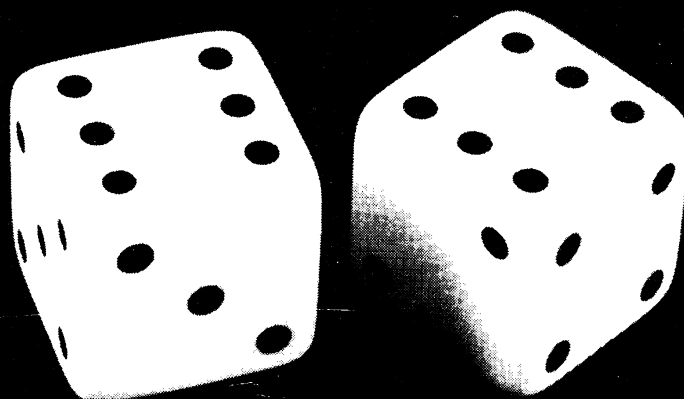

## Penbritin-tried, trusted and right-first-time

# Scheduled diuresis is not a gamble

## Lasix is predictable

You and your patient can both be certain that Lasix has a conveniently short duration of action which can be timed to suit the patient's routine. Additionally, you can be confident that you can adjust the dose of Lasix to remove just the amount of oedema required because Lasix has a precise dose/response relationship. And you know that Lasix gives fewer problems in long term therapy.

Lasix tablets contain 40 mg frusemide B.P.
