

The next best thing to a new skin. Metosyn.

*The Iguana from South America sheds its skin continually over its 12 year life-span.
The casting-off process reveals a new and perfectly healthy skin beneath.*

Patients with inflammatory dermatoses may often wish that they could step out of their old skin with all its defects and, like the Iguana emerge with a healthy new skin. Unfortunately, they can't—so for them the next best thing to a new skin is 'Metosyn'.

"It would seem therefore, that fluocinonide ['Metosyn'] is an important advance in the

treatment of psoriasis and eczema compared to betamethasone valerate." *Acta Dermatoven. Suppl.* 67, (1972), 64-65.

Roche¹

In a recent multicentre trial which included over 6,000 outpatients, the three most common causative organisms in urinary infections were reported to be *E. coli*, *Proteus mirabilis* and *Klebsiella aerogenes*. In one of the centres more than 98% of these organisms were sensitive to Bactrim Roche, whereas only 65% were sensitive to ampicillin and 70% to sulphonamide.¹

90% clinical success in recent double-blind trial²

"The extreme effectiveness of Bactrim in controlling and curing over 90% of patients with urinary infection in hospital suggests that this combination will become a most efficient agent in treating urinary infections, and therefore probably be the therapy of choice in most instances."²

In infected eczema, it's the eczema you worry about.

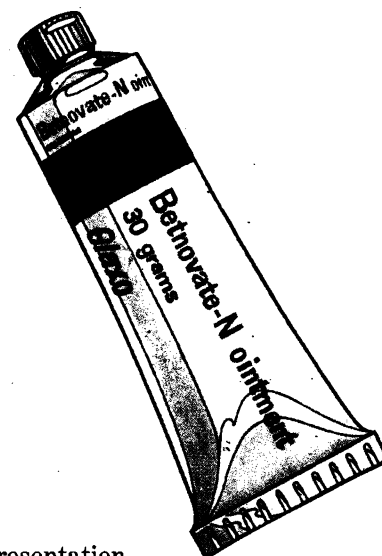

And no combination of anti-infectives will stop the scratching that starts the infection that results in infected eczema.

But Betnovate-N will.

And it will do it quicker than other preparations designed to combat infected eczema, because it contains betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops the infection at the same time.

All at a price others can't match.

Septrin rated top in major British survey¹ of urinary pathogen sensitivities

Six clinical bacteriology laboratories—in Glasgow, Liverpool, Hull, Cardiff, Guildford and Salisbury—tested widely used antibacterials against a total of 23,491 urinary isolates (all species). Both out-patient and in-patient strains were included.

The results showed that trimethoprim/sulphamethoxazole (SEPTRIN*) outscored all other oral preparations:

Percentage sensitivity of isolates. Summation of six centres.

In-patient		Out-patient	
Trimethoprim/sulphamethoxazole	88	Trimethoprim/sulphamethoxazole	93
Nitrofurantoin	82	Nitrofurantoin	88
Nalidixic acid	81	Nalidixic acid	87
Ampicillin	63	Ampicillin	79
Sulphonamide	56	Sulphonamide	65
Tetracycline	50	Tetracycline	65

These results complement clinical findings of the superiority of SEPTRIN over ampicillin, previously reported in urinary infections.^{2,3}

a certain way to treat a lady

The certainty of positive microbicidal action, against all classes of vaginitis pathogens, is provided by Betadine vaginal pessaries. Therefore the risk of overgrowth of non-susceptible organisms associated with specific therapies is avoided.

Because of povidone iodine's decisively microbicidal action Betadine pessaries deodorize, which is particularly important in all forms of infective vaginitis.

Oral systemic anti-protozoal agents, antifungals and antibiotics may be used concomitantly if this is desired.

The following alternative forms of Betadine vaginal therapies are recommended:

Betadine Vaginal Pessaries—night and morning
Each pessary contains povidone-iodine 200 mg (USNF)

Betadine Vaginal Gel—at night
contains povidone-iodine 10% w/w (USNF)

Betadine Vaginal Douche—in the morning

The beauty of Calmurid HC in eczema:

The difficulty of treating the essentially inflammatory condition of dry eczema is that it occurs beneath a barrier of dry, scaly skin.

So the heavy artillery is wheeled in. The massively potent fluorinated steroids. The logic: *saturation* treatment. The result? Only too often such serious side effects as skin atrophy and wasting, systemic absorption and adrenal suppression.

Now reverse the logic. *Select*, rather than *saturate*. Take a medicament proven highly successful in the treatment of dry, scaly skin: Calmurid. Use its deeply penetrating action as a means of carrying the milder, natural steroid, hydrocortisone, right through to the eczematous area.

The result this time is a very evident clearance of inflammation. And the remarkably early disappearance of the dry, scaly skin.

Double blind trials have shown that Calmurid incorporating hydrocortisone at least equals the potent fluorinated steroids in efficacy: it is without their hazards. It lends itself especially to the treatment of infants and children and for use in all long-term therapy. A sample awaits your request.

Indications

Atopic Eczema, Besnier's Prurigo, acute and chronic allergic eczema, neurodermatitis and other hyperkeratotic skin conditions with accompanying inflammation.

Unwanted Effects

Being hypertonic and acidic Calmurid HC may cause stinging following initial applications to raw, fissured or weeping surfaces.

Application to mucous membranes may cause stinging for the same reason.

Contra-indications

Skin tuberculosis, viral infections accompanied by dermal manifestations, herpes simplex, vaccinia, chickenpox, shingles, Syphilis, active and latent, and other infections. Concomitant antibiotic therapy (excepting tetracyclines) should be complemented with antimycotic treatment.

Application

Apply twice daily after washing the affected area. If a long-term therapy should be aimed at drying the area before instituting Calmurid HC therapy.

It is skin deep

AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

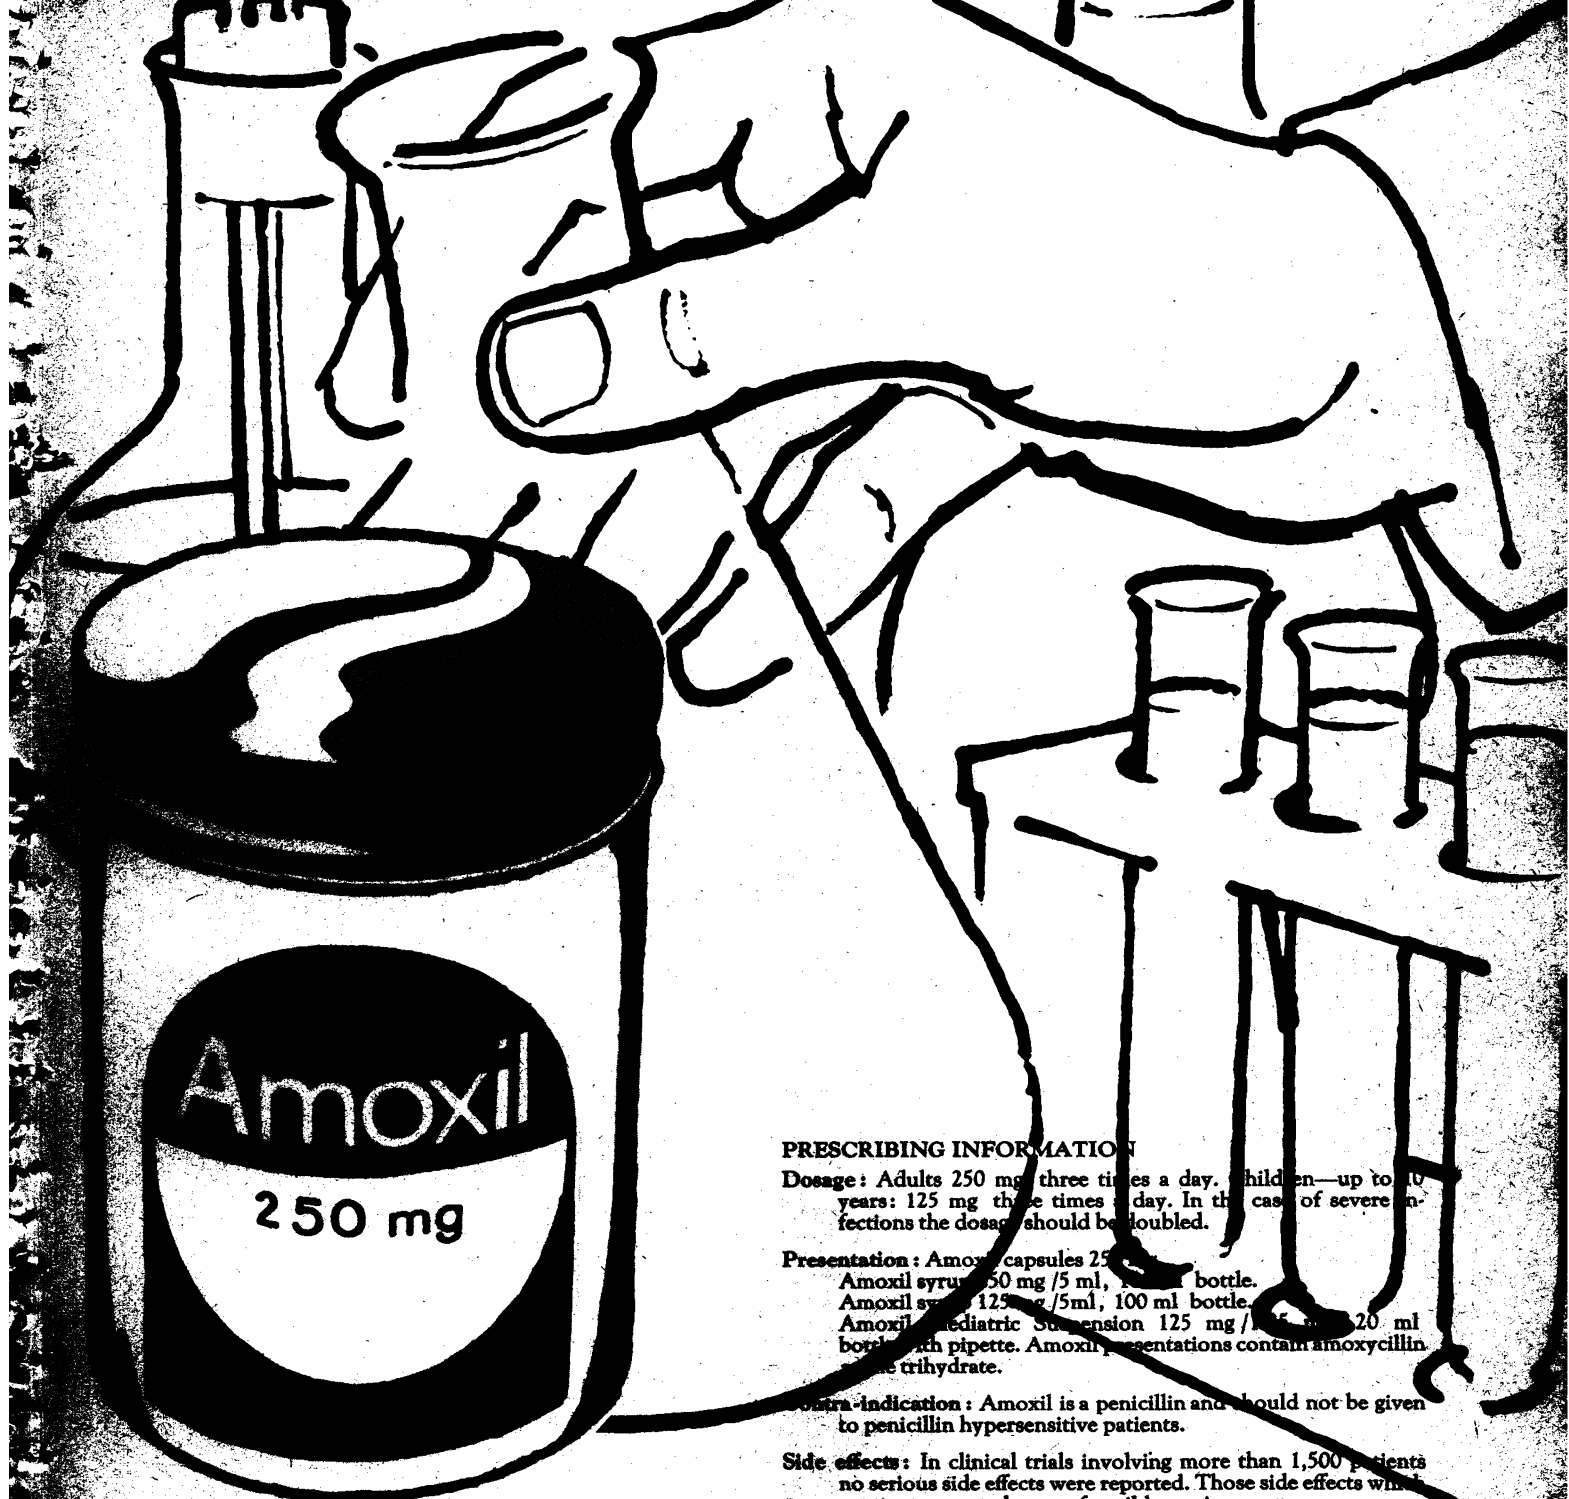

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

The programme is planned so that students
wishing to specialize in a particular clinical
subject are given facilities to do so, while
other students are taught in each of the main
clinical departments. Unpaid clinical
attachments can be arranged at the end of the
course for students requiring a longer period
of training, but these are normally reserved
for students sponsored by some official body.

It is sometimes possible to accept general
practitioners for 1 or 2 weeks of a course, and
attendance for this period is recognized under
Section 63 of the Health Services and Public
Health Act 1968. These courses are also
recognized under the special scheme for the

Clinical Investigation

We are a British pharmaceutical company with a rapidly expanding research programme and considerable recent success to our credit in antirheumatic drugs. We are now seeking an additional **PHYSICIAN** to join an existing dynamic team of clinical investigators with world-wide responsibilities. He or she will be concerned primarily with initiating and progressing trials of original compounds arising from our research programme and will be expected to organise and discuss clinical investigation with members of the medical profession.

It is essential that applicants should have originality of thought and the ability to communicate at different levels with a variety of disciplines. Ideally, the person appointed will be between the ages of 26 and 40 and will have a good background in general medicine together with an interest in clinical pharmacology and therapeutics.

The post is at present based in London and will involve travel both within the U.K. and overseas.

We would welcome applications from persons who feel that their interests and abilities are compatible with those outlined above and who possess a genuine desire to establish a career within the pharmaceutical industry.

Salary will reflect qualifications and experience and employment conditions include good profit sharing and contributory pension schemes. Assistance with relocation expenses will be given in appropriate cases.

COMMERCIAL APPOINTMENTS

Pharmaceuticals Division

Clinical Research

ICI Clinical Research Department requires an additional doctor to help organize the investigation of newly discovered compounds. Our greatest activity at present is in coronary heart disease, hypertension and mental disease, but we cover nearly all areas of research.

The successful candidate will be trained to co-ordinate clinical trial programmes in various hospitals, and to conduct pharmacological studies on volunteers within the Company, in collaboration with our pharmacologists and biochemists. There will be opportunities to travel abroad. To maintain contact with clinical medicine an appointment at a local hospital is encouraged.

A postgraduate qualification, or previous experience in clinical pharmacology would be an advantage, although full training for the job will be given.

The Clinical Research Department is located at our research establishment in rural Cheshire, 14 miles south of Manchester, with excellent housing and educational facilities. A competitive salary will be offered, based on qualifications and experience and there are good pension and profit sharing schemes in operation. Assistance towards relocation expenses will be given to married appointees.

Letters may be addressed, in confidence, to:
The Medical Director,
Imperial Chemical Industries Ltd.,
Pharmaceuticals Division,
Alderley House, Alderley Park,
Macclesfield, Cheshire.

INDUSTRIAL APPOINTMENTS

AIR CORPORATIONS JOINT MEDICAL SERVICE MEDICAL OFFICER VACANCIES

Due to impending retirements and promotions, the Air Corporations Joint Medical Service will shortly be requiring three Medical Officers in the London area.

The Joint Medical Service provides a comprehensive Occupational Health Service for BEA and BOAC, and includes groups dealing with industrial medicine, aviation medicine, and the care of overseas staff. In addition, it provides an Immunisation Centre for staff and passengers at BOAC Air Terminal, Victoria, London, SW1.

IMMUNISATION MEDICAL OFFICER

This appointment at Air Terminal, Victoria, requires a working knowledge of the International Health Regulations, and current immunisation practice. The post also has an interesting Occupational Health content, and is particularly suitable for a practitioner at, or near, the age of retirement, but preferably between the ages of 45 and 55 years, who has had previous experience in Public Health or in the Armed Services.

FLIGHT MEDICAL OFFICER

There will also be a vacancy for a Flight Medical Officer at Heathrow Airport (London). The post is primarily concerned with the clinical care of the Corporations flying staff, although opportunities will arise from time to time for applied research in aviation medicine. The appointment will be of particular interest to a doctor with previous experience in aviation medicine, but others with good clinical experience may apply. The preferred age range is 27-40 years, although candidates outside this age range may be considered.

INDUSTRIAL MEDICAL OFFICER

This appointment, also at Heathrow Airport (London), will be of interest to a younger person wishing to make a career in occupational health in a modern and progressive organisation with good career prospects, but a more experienced person will be considered. Possession of the DIH is desirable, but not essential.

Candidates for these posts must be medically registered in the United Kingdom. There are opportunities for holiday air travel and there is an excellent contributory pension scheme for those eligible. The commencing salary would not be less than £4,000 per annum.

The closing date is July 15.

Candidates should write, giving details of age, experience and qualifications to:—

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the Royal Air Force has to offer.

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in pediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

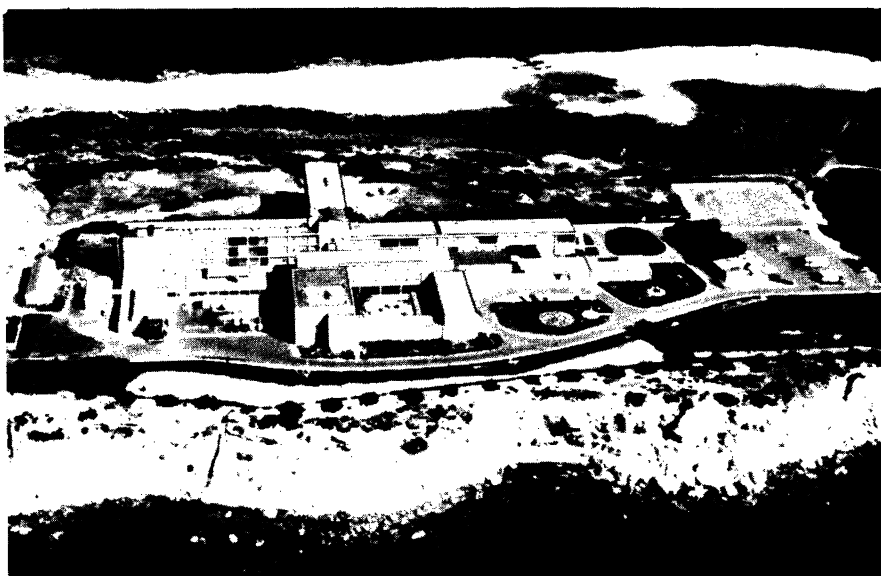

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties—perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the

The RAF hospital at Akrotiri, Cyprus. It has 130 beds and can be adapted to accommodate up to 250. Here are a few figures for 1970: admissions, 4041, with an average length of stay of 11 days; X-Rays, 10,857; path lab tests, 53,703; anaesthetics, 2,035. Medical staff is 22 doctors, 31 nurses, 25 nursing auxiliaries. The hospital has specialist departments of surgery, orthopaedic surgery, medicine, gynaecology and obstetrics, pathology, dentistry, neuropsychiatry, radiology, anaesthetics, otorhinolaryngology and ophthalmology; and, in the tamarisk trees by Dreamers' Bay, perhaps the most beautiful location of any hospital.

local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3668; after 5 years it rises to £4424; after 13

years to £5453. There are various other allowances; for instance, with children at boarding school the figures are £330 (net) for one child, £723 (net) for two children, £1194 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain J. G. Donald, OBE, MB, ChB, MRCP, DTM&H, RAF, Ministry of Defence, 1-6 Tavistock Square (724KC6), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

SERVICES

AS A NAVAL DOCTOR, YOU'D GET A WHOLE LOT MORE OUT OF LIFE.

(AND SO WOULD YOUR FAMILY)

Right from the start, you'd have a complete change of scene.

Serving either with the Navy at sea or among service personnel and their families at a naval establishment. Very likely in another part of the world.

Either way, you'd never find yourself short of assistance. (Every naval doctor is fully supported by medical staff).

Equally important, you'd never find yourself getting into a rut – for in two years or so you'd receive a new appointment.

In a new place. Doing a different job. Perhaps with the chance to learn something of the special problems of diving, aviation, or tropical medicine for example.

It's a stimulating life. Not only for yourself but for your family too.

For in most cases they'd accompany you. And wherever you go there are usually married quarters – fully furnished houses or flats, equipped with everything you need. And at very reasonable rents.

What's more, a generous education

allowance is made for your children if they are at boarding school. £330 p.a. for a first child, £393 p.a. for a second, £471 p.a. for a third. On top of this, removal and other allowances are also provided.

Add this to the salary and you'll see how well a naval doctor's pay compares with a civilian doctor's.

For instance, with five years' post registration experience you would join us as a Surgeon Lieutenant-Commander on £4,424 a year.

And any specialist qualifications/experience you have could increase your salary even more.

There are opportunities, too, to keep up with the latest developments in medicine. For the Navy fully recognises the need for such opportunities both in the interests of naval medicine and a doctor's professional advancement.

That's not all. You can join on a 3-year or 5-year commission (each carrying a tax-free terminal gratuity of £1,500 and £3,000 respectively) and you can transfer to a full 16-year pensionable commission if you wish.

Provided you're resident in the U.K. or Eire, you can find out more by writing to Surgeon Cdr. F. M. Kinsman, O.B.E., R.N. (724AB4) Dept. of the Medical Director-General (Navy), Empress State Building, London S.W.6.

He'll give you all the facts.

Trends in Clinical Pathology

Essays in Honour of Gordon Signy

This book is no pious collection of personal tributes but a survey of the old and the new disciplines in clinical pathology since the second world war — research in atherosclerosis and ischaemic heart disease, progress in medical virology, microbiology and cytology, the impact of antibiotics on medical bacteriology, chemical pathology and also molecular defence, haematology in mid-century, including haemostasis and blood transfusion. The place of fibrin in the story of hyalin is another modern study, so also is that on automation. The outlook on some members of the family Enterobacteriaceae is changing, and the 'old' forensic medicine is indeed new. And those pathologists working in the under-developed countries are not forgotten. The contributors are internationally renowned.

ZAMBIA FLYING DOCTOR SERVICE

MEDICAL OFFICERS

Applications are invited from single registered Medical Practitioners to join the Zambia Flying Doctor Service. Some surgical experience is preferable, but not essential.

One-year contracts, which are renewable, are offered and salary would be in the range K5,420 to K7,052, plus a 25% gratuity upon completion of one year's resident service; baggage allowance; comfortable Mess in Ndola.

The work is challenging and Medical Officers would be expected to fly to airstrip clinics in the rural areas and to stay in simple accommodation at these clinics to carry out medical and preventive work in the area.

Medical Officers are required immediately, but Employment Permits would have to be obtained from the Zambia Immigration Authorities by the Service before actual employment could commence.

Applications, in writing, with full details should be submitted to:— **Ag. Director, Zambia Flying Doctor Service, P.O. Box 1856, NDOLA, Zambia.**

MEDICINE IN A TROPICAL ENVIRONMENT

Edited by A.G. Shaper, J.W. Kibukamusoke, M.S.R. Hutt.

Medicine in a Tropical Environment is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.
