## 21 years' world-wide use in pregnancy sickness

Dependable, acceptable and a safety record second to none. That's 'Avomine'. And that's why, twenty-one years after its introduction it is still regarded as number one choice in the prevention and treatment of pregnancy sickness.

"A great variety of drugs are used in pregnancy vomiting . . . promethazine should be regarded as the drug of first choice."

## the 'inside secret' of treating in-rolling feet

Prescribe an external shoe wedge, and you only do part of the job. The wedge wears away to become largely ineffective—and in any case it disturbs the proper balance of the shoe. On top of that you run the risk of introducing a psychological problem too—what child wants to wear shoes that make him look and feel abnormal?

The answer can be found in Start-rite INNERAZE, the shoes that are orthopaedically designed to correct in-rolling with an invisible built-in wedge that can't wear or change shape.

For further information about the shoes with an 'inside secret' or details of the explanatory 12-minute INNERAZE 16mm colour film available on loan, write to: C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

## FUNDAMENTALS OF THE TRACER METHOD

This book presents the "tracer method" as used in medicine, physiology, and biology without requiring a previous knowledge of higher mathematics, e.g. calculus. The mathematical symbols which are used throughout the book are developed and explained for the novice.

The authors have developed a systematic approach to some experimental problems which have the potential of being solved by the tracer method.

## DISORDERS OF THE RESPIRATORY TRACT IN CHILDREN

Volume I—Pulmonary Disorders  
New Second Edition

The first volume of this new edition emphasizes the clinical management of pediatric pulmonary diseases. The book is divided into 10 sections ranging from the functional basis of respiratory pathology to disorders of the respiratory tract due to trauma. New chapters have been added on metabolic lung function, intensive care, bronchopulmonary dysplasia, Wilson-Mikity Syndrome, desquamative interstitial pneumonitis, and fatal granulomatous disease.

## CYTOLOGIC DIAGNOSIS OF CANCER

New Third Edition

A new edition which incorporates the most recent advances in the cytological diagnosis of cancer. It continues to provide a detailed, authoritative guide to the possibilities and limitations of this important diagnostic procedure in the early detection of cancer.

New material of particular importance includes chapters on cellular abnormalities, prevalence rates for abnormal cells found among different groups during cytological screening, and advances in applying the cytological method to early diagnosis of carcinoma of the ovary.

from the British Medical Journal

Many doctors outside the neonatal and paediatric field may be unaware of the rapid advances made in the care of the newborn in the last decade. Last year the *B.M.J.* published a series of articles discussing the diagnosis and management of common conditions affecting newborn babies. The articles have been revised by their authors and collected together as a booklet, forming a useful guide to both serious problems and more everyday topics which confront doctors in their practice.

## Septrin rated top in major British survey<sup>1</sup> of urinary pathogen sensitivities

Six clinical bacteriology laboratories—in Glasgow, Liverpool, Hull, Cardiff, Guildford and Salisbury—tested widely used antibacterials against a total of 23,491 urinary isolates (all species). Both out-patient and in-patient strains were included.

The results showed that trimethoprim/sulphamethoxazole (SEPTRIN<sup>®</sup>) outscored all other oral preparations:

*Percentage sensitivity of isolates. Summation of six centres.*

<i>In-patient</i>		<i>Out-patient</i>	
Trimethoprim/sulphamethoxazole	88	Trimethoprim/sulphamethoxazole	93

Ampicillin	63	Ampicillin	79

for patients suffering from  
**schizophrenia**

Lundbeck Limited are pleased to announce the introduction of Depixol. It has

- \* inherent antidepressant activity
- \* lower incidence of side effects
- \* duration of action 2-4 weeks

Depixol is an effective antipsychotic indicated in the management of schizophrenic patients, particularly those who are withdrawn, apathetic or anergic.

The incidence of side effects with Depixol appears to be less than with long-acting phenothiazines.

*Dosage and route of administration.*

Depixol is administered by deep intramuscular injection. Treatment should be initiated with a test dose of 20 mg (1 ml) followed 7-10 days later by a further dose of 20-40 mg (1-2 ml), depending on the patient's response. Thereafter 20-40 mg (1-2 ml) should be given every 2-4 weeks.

*Contra-indications and side effects.*

Depixol is not recommended for patients who are overactive or excitable since its activating effect may lead to exaggeration of these characteristics. The commonest unwanted effects are extra-pyramidal symptoms. Occasional depressive reactions have been reported, but they appear to be less frequent than after other depot neuroleptics.

Depixol is a 2% solution of flupenthixol decanoate in thin vegetable oil. It is presented as 20 mg (1 ml) and 40 mg (2 ml) ampoules.

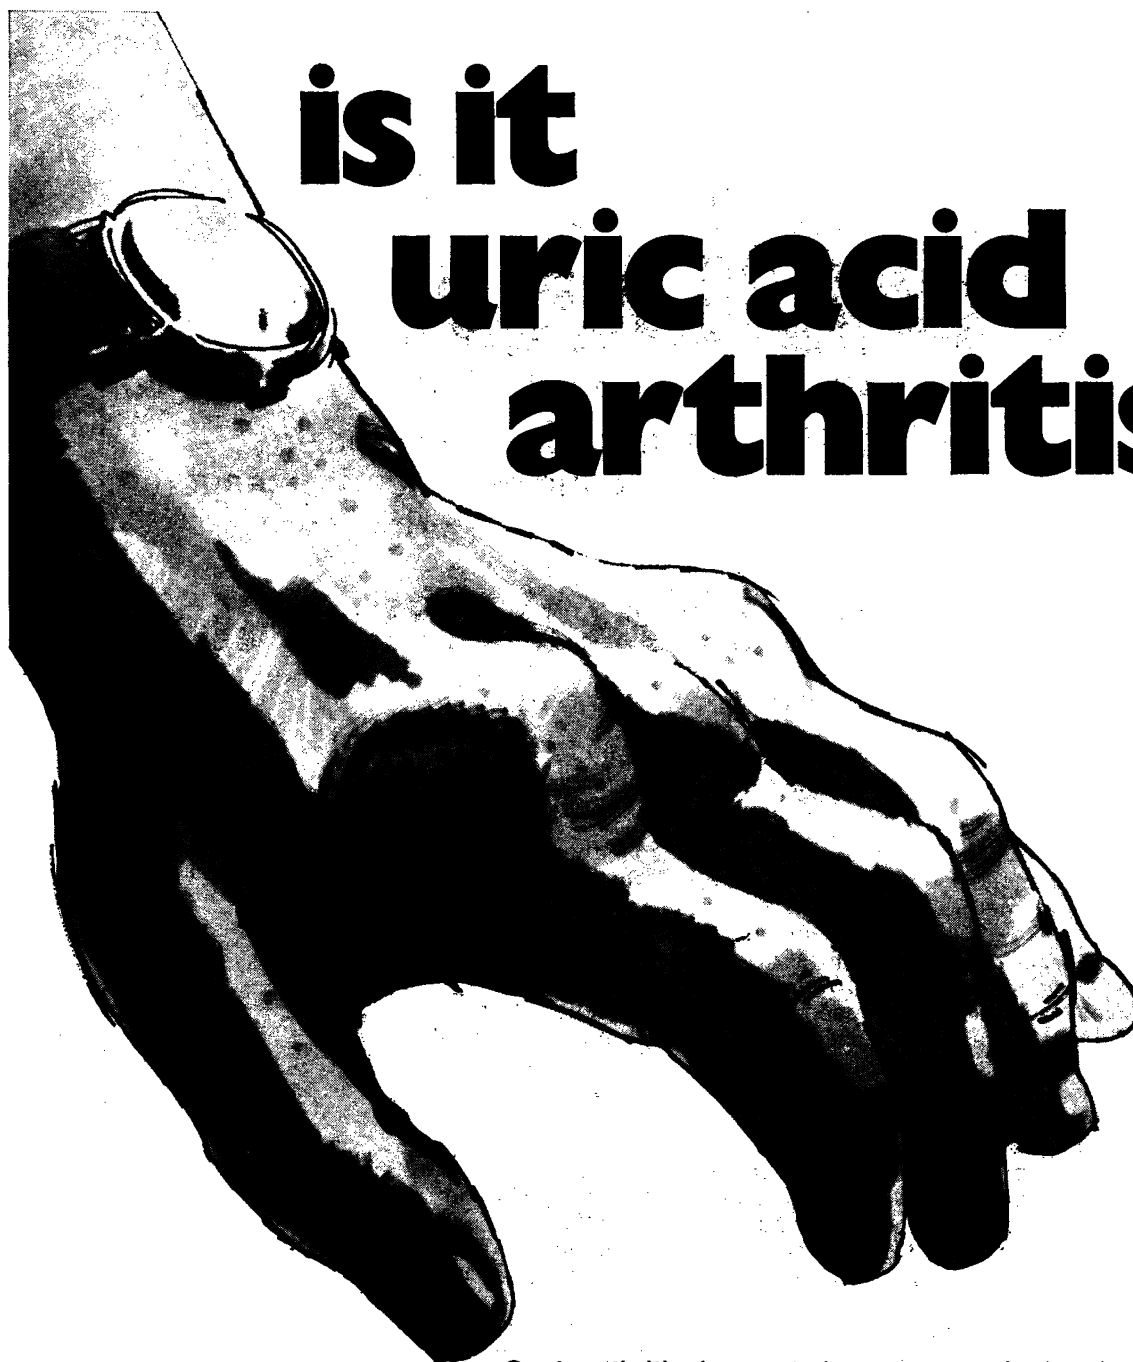

**Depixol treatment should be initiated by a psychiatrist, preferably in hospital.**

In the literature regarding the efficacy of ear wax solvents conclusions have been drawn based wholly on in vitro studies but their validity in clinical practice has been questioned.

## ESBATAL

**the effective antihypertensive with fewer side-effects**

# The case for treating chronic urinary tract infection with **Hiprex**

## Hiprex can eliminate urinary infection in eight out of ten patients

*Hiprex* is effective against the organisms which most commonly cause urinary tract infection. Success rates of more than 80 per cent have been reported in clinical trials.

## Hiprex can end the frustration of treatment failure

Unlike other agents, notably antibiotics, sulphonamides and nalidixic acid, *Hiprex* is unlikely to produce bacterial resistance—a major cause of treatment failure. *Hiprex* has proved effective even when other treatment has failed.

## Hiprex is especially suitable when long-term treatment is indicated

*Hiprex* does not lose its effect during prolonged use and for this reason is of particular value in persistent and recurrent urinary infections. Minor side-effects have been reported in fewer than four per cent of patients, and no serious adverse reactions have been reported. Treatment costs are kept low—as little as 4p a day.

## Hiprex improves the prospects of co-operation in long-term use

Published reports stress that *Hiprex* can overcome the major difficulty of ensuring uninterrupted therapy. All but refractory cases respond to a simple twice-daily dosage, normally without need for special measures to acidify the urine.

**Composition** Each tablet contains hexamine hippurate 1 g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. Prophylaxis before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years:  $\frac{1}{2}$  tablet twice daily. In refractory cases, the dosage may be increased to: 1 tablet three or four times daily in adults.  $\frac{1}{2}$  tablet three or four times daily in children aged 6-12 years. Tablets may be halved but should not be crushed. **Alkalinuria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. Administration of ascorbic acid 2 g. daily in divided doses (either as powder or as tablets) is recommended in these cases. **Side-effects** Occasionally, rashes, gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** If the symptoms of infection such as painful micturition or bladder irritation do not subside within seven days of starting treatment, or if such symptoms develop on prolonged treatment at high dosage, this probably indicates drug-induced bladder irritation. Prompt relief can be obtained by the consumption of copious quantities of water and 2-3 teaspoonsful of bicarbonate of soda. **Contra-indications** Hepatic insufficiency, severe dehydration, severe renal failure (serum creatinine level  $> 5$  mg.%) or metabolic acidosis. *Hiprex* may be used where mild to moderate renal insufficiency is present. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidneys. *Hiprex* should not be administered concurrently with sulphonamides owing to the danger of crystalluria, or with alkaling agents such as mixtures of potassium citrate. **Basic N.H.S. price** 100 tablets £2.00. *Hiprex*, registered trade mark. Full information is available on request.

## does that little bit more

In addition to its anti-nauseant action, 'Stemetil' exerts a mild tranquillizing effect which helps the patient cope with both physical and mental discomfort. # Penbritin Territory

Right from the time they're too young to tell you where it hurts, treatment of children poses special problems. During this period, more than ever, the antibiotic you prescribe should ideally be safe—and sure.

The effectiveness of Penbritin and its safety as a penicillin are well-established. In contrast, tetracyclines are “absolutely contra-indicated for children aged under 8” because of serious effects on tooth development (Brit. med. J. (1970), 4, 509).

For the under two's, acceptability is of great importance. Penbritin paediatric suspension provides it—in an easily administered form. Syrup and paediatric tablets for the older child complete the Penbritin paediatric range.

In Paediatric Territory there's really only one choice.

# A lifetime of freedom begins with Intal

Before INTAL, a diagnosis of asthma often meant a life sentence of constantly aborting attacks with bronchodilators, anti-histamines or steroids. Patients were constantly at risk from the relentless progress of lung damage and lived in perpetual fear of an asthmatic episode.

The discovery of INTAL (Sodium Cromoglycate BP) represents a turning point in the management of this distressing complaint. Newly diagnosed patients, as well as those of long standing, benefit from this entirely new approach to therapy. INTAL actually prevents the onset of asthmatic attacks, and is notably free from serious side effects.

By preventing asthma attacks the possibility of consequent lung damage may be avoided enabling the patients to lead a fuller, happier life. If they remember their daily INTAL – they can forget their asthma.

## THE MEDICAL PROTECTION SOCIETY

# Northern Regional Secretary (Medical)

Applications are invited from registered medical practitioners for the whole-time post of Northern Regional Secretary in charge of the Society's established office at Leeds, with responsibilities for the membership in the north of England; the office was the first development of the Society's Regional policy to improve the service to members outside the home counties. The vacancy has occurred through promotion within the secretariat.

Wide experience of the National Health Service and an interest in legal aspects of medical practice are important; also the ability to communicate sympathetically with colleagues. Experience in lecturing at pre- or postgraduate level would be an advantage. Preferred age 35-50.

Salary on the incremental scale £6,182 to £7,343, the starting point to be negotiated. Good superannuation provisions.

Candidates may in the first instance contact Dr. P. G. T. Ford, 30 Park Square, Leeds LS1 2PF (0532-42115) or The Secretary, 50 Hallam Street, London W1N 6DE (01-580 9241) for further information. Closing date for applications 11th September, 1972. (H7635) 3

The Executive Council for Essex, in conjunction with the Essex Local Training Scheme Committee, invites applications for the one year training scheme for general practice based on Chelmsford. Preference will be given to those who have already completed two years in post-registration posts in the hospital service, including an appointment in obstetrics. If the applicant has held recognized posts in the hospital service, participation in this scheme will qualify the applicant for the Vocational Training allowance. This Training Scheme is also approved by the Royal College of General Practitioners under similar conditions for the purpose of entry to its membership examination. A weekly half-day release course will be held at the Chelmsford Medical Academic Unit commencing on 12th September, 1972 and embracing three 12-week terms during the year. This day release course forms part of the Vocational Training Scheme run by St. Bartholomew's Hospital Medical College in conjunction with the Chelmsford Group of Hospitals, in which the Chelmsford General Practice Scheme forms the third year of a three year course.

Applications should be made as soon as possible, but late applications may be considered as long as it is possible to enter the Scheme during the year.

Salary and allowances will be in accordance with the N.H.S. Trainee Practitioner Scheme. Applications giving full details of all previous medical experience and including the names of two referees should be sent to the undersigned. They will be considered by the Adviser to the Scheme who will arrange interviews with trainers taking part. S. H. A. Shaw, Clerk of the Council, Carnarvon House, Carnarvon Road, Clacton-on-Sea, Essex CO15 6DD. (H7604) 22

**APPLICANTS ARE ADVISED NOT TO send original testimonials when replying to advertisements. Copies will serve the purpose quite as well, and in the event of their being lost or mislaid no inconvenience will ensue.**

## UNIVERSITY OF BRISTOL

### VOCATIONAL TRAINING FOR GENERAL PRACTICE

Applications are invited for a three year traineeship in Vocational Training for General Practice, consisting of two years' hospital and elective training and one year traineeship in an approved practice.

After a short period of orientation of not more than three months in the training practice, trainees will be given hospital appointments at S.H.O. level in a Bristol Hospital; six months each in Medicine and Obstetrics with gynaecology are offered, followed by two three month periods in Paediatrics and Geriatrics. The remaining six month period in hospital will partly or wholly elective when opportunities will be given to gain experience in special hospital and other departments. The trainee will complete the year in practice before or after this elective period. There will be a half-day release course during university term time throughout the three years which will contain a special extended course in psychiatry.

The period of orientation should start in November, 1972 and the first hospital appointments will start on 1st February, 1973.

Applications from suitably qualified practitioners should give details of previous experience, the names and addresses of two referees, and quote a date when they would anticipate being able to start the preliminary orientation period in practice. Applications should be sent before 31st August, 1972.

It may be possible also to assist practitioners wishing to complete requirements for vocational training, who have already in part fulfilled the necessary criteria.

Applications and requests for further information, should be sent to: The Adviser in General Practice, Medical Postgraduate Department, University of Bristol, Senate House, Tyndall Avenue, Bristol BS8 1TH. (14243) 22

## COMMERCIAL APPOINTMENTS

# Medical Adviser UK and Overseas

Our client, Fisons Limited, Pharmaceutical Division, seeks an additional Medical Practitioner to participate in the further expansion of its international therapeutics evaluation programme.

The man, or woman, appointed will be responsible for initiating, co-ordinating and evaluating clinical trials of new and established therapeutic products on a world-wide basis: the work will involve close co-operation with leading clinicians and research workers in the UK and internationally, and with the medical staff of the Company's overseas subsidiaries and associates.

He, or she, will also attend national and international medical meetings and symposia, participate in the medical training of the Company's representatives, and contribute fully to the efficient daily running of the Medical Department.

The successful candidate is likely to be within the age range 32-45 and will have a keen interest in therapeutics. Particularly advantageous, but not essential, would be knowledge of an additional

major language or previous experience in the pharmaceutical industry, in medical administration or in an overseas environment.

The position carries an attractive salary and a number of other important benefits, including a company car, and generous re-location expenses. It is based at the Company's research and development laboratories, in Loughborough, Leicestershire, an area with good educational facilities and pleasant residential amenities.

As recommended in a report issued by the Secretary of State's Industrial Health Advisory Committee, the Employment Medical Advisory Service is being set up to replace the Appointed Factory Doctor Service. A Deputy Chief Employment Medical Adviser (based in London) and at least 2 Senior Medical Officers (based in London or in a large provincial town) are needed to help direct the new Service. The responsibilities of the EMAS include the medical supervision of people exposed to hazards at work, people undergoing training or rehabilitation and young people not fully fit for employment. Advice will be given to workers (and their representatives) and employers, and close liaison will be maintained with general practitioners, hospital staff, works medical officers etc.

The field work involved will, in most cases, be carried out by Employment Medical Advisers. The main function of these appointments will be to direct the work of these Advisers, to assess the significance of technical reports and the

work being undertaken, and to provide advice on matters of policy.

**Qualifications:** candidates for all these posts must be fully registered medical practitioners in the U.K. A higher qualification or a Diploma in Public or Industrial Health will be an advantage. Proved competence in industrial medicine or closely allied subjects is highly desirable, and a high standard of professional ability and personal initiative is essential.

**Salaries:** Deputy Chief Medical Employment Adviser—£7865; Senior Medical Officers—£7451 (£175 less outside London). The pension is non-contributory and previous public service superannuation rights will normally be transferable.

For full details of these posts and an application form (to be returned by 18 September) please write to the Civil Service Commission, Alencon Link, Basingstoke, Hants, or telephone Basingstoke 29222 ext. 500 or London 01-839 1696 (24 hour 'Ansafone' service) quoting reference S/8024/1.

# RESEARCH PHYSICIANS U.S.A.-FRANCE

A major expansion of our worldwide research effort has created some new clinical research positions which may be of immediate or future interest to you. We plan to interview in London in late September. Why not write us to see if your abilities and interest realistically match our needs and opportunities!

## WHO ARE WE?

Richardson-Merrell has concentrated its basic research for human ethical drugs in 2 research centres. One in Cincinnati, Ohio and a brand new laboratory in Strasbourg, France. We are a growth company committed to the concept that basic research in specific disease areas is a key to continued growth.

## WHAT DO WE WANT?

Currently we have specific openings in both the United States and France. For instance we seek a specialist in cardiovascular diseases — another in psychiatry — and others who are interested in the early introduction of drugs into man. Tomorrow, of course, we may have other openings.

In general we want doctors who are

- really interested in planning and following up drug studies in man.
- at least familiar with the basic concepts of modern day research, e.g., design of clinical trial protocol — statistical interpretations — cause and effect relationships.
- creative and energetic.
- willing to move to Cincinnati or Strasbourg. Immigration restrictions in the U.S. have relaxed recently.

If these opportunities sound attractive to you let's hear about you and your interest. Write to:

D. G. Duncan

Vice President, Merrell-National Laboratories

# Medical Officer

## General duties & obstetrics

In Zambia, Roan Consolidated Mines provides a comprehensive medical service for its employees. Based at Mufulira, the doctor appointed will undertake general duties involving hospital out-patient sessions and domiciliary and clinic visits. He will also have medical and obstetrical in-patient responsibilities and will share hospital obstetrical call duties on a rota basis with the principal obstetrician and one other medical officer. Experience in hospitals and general practice is called for which must include obstetrics. This is a post for a doctor holding the DRCOG rather than MRCOG.

Curative medical services are centred on two well-equipped hospitals totalling 460 beds. There are a total of 13 medical officers, including those with higher qualifications working in their specialised fields. The services are provided for employees and their dependants which comprises about 55,000 local and 2500 expatriate personnel.

A competitive salary will be negotiated, depending on experience and qualifications. Employment will be on a two or four year contract by agreement. Benefits include ■ children's education allowances ■ return passages ■ low rental housing ■ paid leave which accrues at the rate of 55 days per annum.

Immediate interviews are offered but because of documentation procedures it will be about three months before the man appointed will take up his duties in Zambia.

In infected eczema, it's the eczema you worry about.

And no combination of anti-infectives will stop the scratching that starts the infection that results in infected eczema.

**But Betnovate-N will.**

And it will do it quicker than other preparations designed to combat infected eczema, because it contains betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops the infection at the same time.

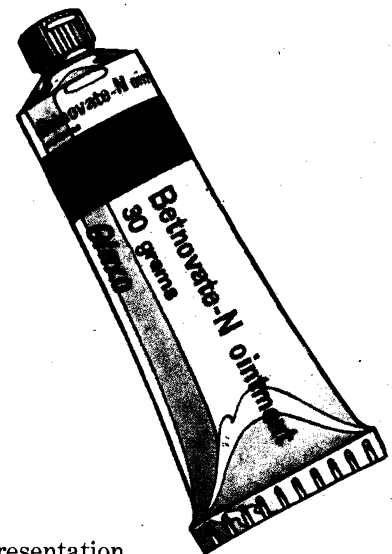

All at a price others can't match.
