In a recent multicentre trial which included over 6,000 outpatients, the three most common causative organisms in urinary infections were reported to be *E. coli*, *Proteus mirabilis* and *Klebsiella aerogenes*. In one of the centres more than 98% of these organisms were sensitive to Bactrim Roche, whereas only 65% were sensitive to ampicillin and 70% to sulphonamide.¹

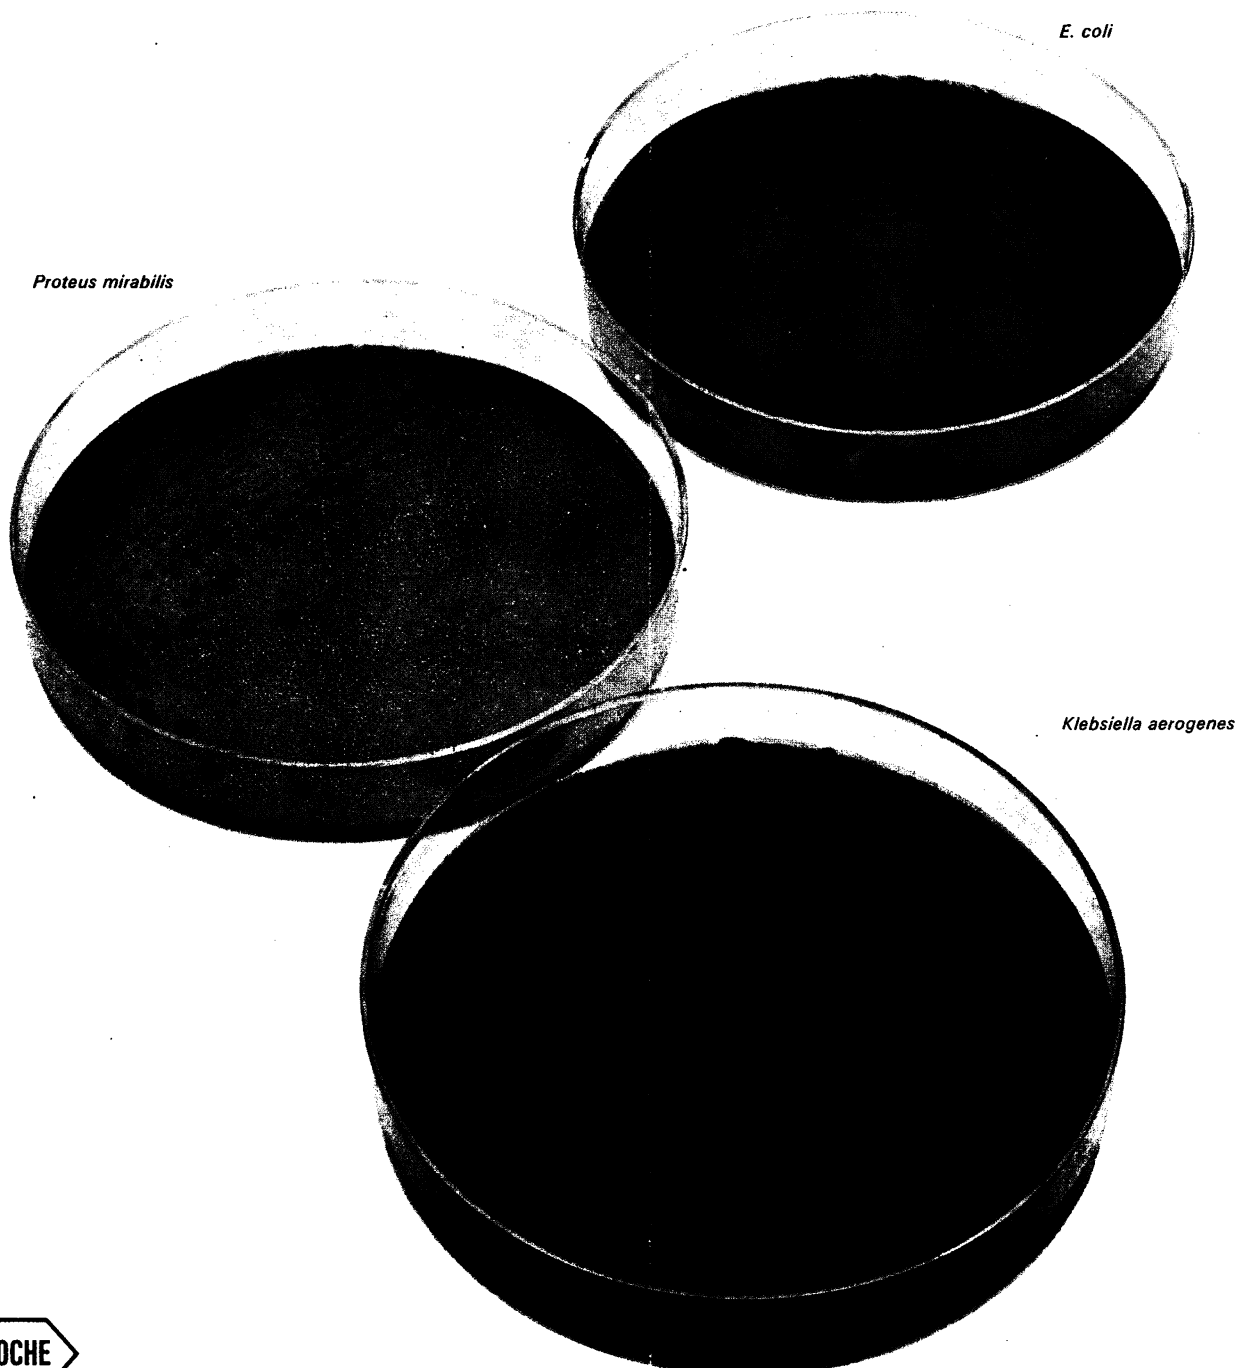

90% clinical success in recent double-blind trial²

"The extreme effectiveness of Bactrim in controlling and curing over 90% of patients with urinary infection in hospital suggests that this combination will become a most efficient agent in treating urinary infections, and therefore probably be the therapy of choice in most instances."²

Diseases of the Urinary Tract

One of the most rapidly growing specialties over the last few years has been that of urology. Many doctors now in practice could not have been taught much of the present-day management of many urinary tract diseases. Last year the *B.M.J.* published a series of "Current Practice" articles on diseases in the urinary tract, and these have now been collected together in a booklet. Beside articles on the newer aspects of the specialty, the booklet contains articles on established methods of managing renal disorders. Any doctor who wishes to bring himself up to date on modern practice in this field will find this a readable account of the important aspects of the specialty.

The Lymphatics: Diseases, Lymphography and Surgery

JOHN B. KINMONTH

The author and his colleagues have had extensive experience in the investigation and treatment of patients with diseases involving the lymph system. Their work has been greatly aided by the development of lymphography. This has helped to elucidate lymphatic and other oedemas as well as the state of the nodes in metastatic cancer and the lymphomas.

The book is an account of clinical experience, chiefly at St. Thomas' Hospital, London but also to some extent at St. Bartholomew's Hospital where some of the earlier work was done.

The author's position as a pioneer of lymphography has ensured wide coverage of the subject. There is no comparable book combining clinical knowledge of the lymph system with that of the recent advances in lymphography and surgical techniques.

The Neuropathology of the Alimentary Tract

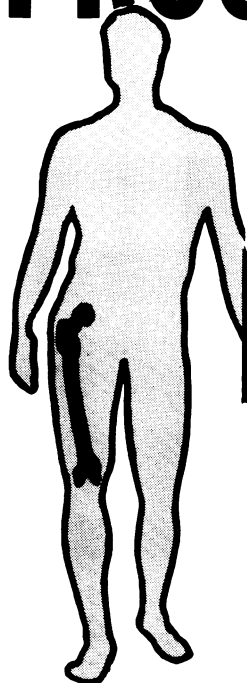

BARBARA SMITH

This book is an account of the intrinsic innervation of the alimentary tract and the changes which occur in certain pathological states. This has involved the introduction of a histological method which is able to display the myenteric plexus satisfactorily both in the normal and the abnormal. With this technique, conditions which are known to be the result of faulty innervation have been restudied and put on a firm pathological basis, and some new conditions described. The toxic effects of a number of commonly used therapeutic agents on gut motility, particularly that of the colon, have been demonstrated histologically both in man and the experimental animal. There are no monographs relating to this particular subject, and it is not dealt with in the textbooks of gastroenterology or neurology. Previous work has been hampered by the use of inappropriate histological methods. If the structures are not properly visualised, pathological changes cannot be interpreted.

Ceporex 250mg q.d.s. means success in bronchitis

In a recent clinical trial* conducted among General Practitioners, 156 bronchitic patients were treated with Ceporex 250mg q.d.s. Both chronic and acute conditions were treated, mainly of mild to moderate severity. Success rate with this economical dosage regimen was high – 80% in acute bronchitis and 81% in chronic bronchitis.

In bronchitis, Ceporex 250mg q.d.s. can reduce the risks and improve the results.

*GP trial – references available from Medical Department

Dosage recommendations for Ceporex

As indicated in the table below, the dosage requirements in some infections can vary considerably from patient to patient. However, most cases of urinary tract and skin infections, sinusitis, otitis media and bronchitis treated in General Practice respond well to a dosage of 1 gram a day.

Guide to adult dosage (oral)

	15–30mg/kg/day or 250mg q.d.s.	30–60mg/kg/day or 500mg q.d.s.	60–100mg/kg/day 1G t.d.s. to 1.5G q.d.s. or 2G t.d.s.
Urinary tract infections	Acute simple cystitis	Chronic, recurrent or complicated cystitis and pyelonephritis	Prostatitis (3G daily)
	Acute simple pyelonephritis 250–500mg q.d.s. Asymptomatic bacteriuria 250–500mg q.d.s.		
Ear, nose and throat infections	Acute tonsillitis Acute pharyngitis	Chronic sinusitis Chronic otitis media Peritonsillar abscess Mastoiditis	
	Acute sinusitis 250–500mg q.d.s. Acute otitis media 250–500mg q.d.s.		
Respiratory tract infections	Bronchitis 250–500mg q.d.s.		Pneumonia† Lung abscess†
Skin and soft-tissue infections	Furunculosis Lymphadenitis Lymphangitis Superficial wound infections	Cholecystitis Cholangitis	Infections with less sensitive gram-negative organisms, and deep or serious infections†
Gynaecological and obstetrical infections		Uterine and adnexal infections and acute mastitis	More severe infections or those with less sensitive organisms
Osteo-articular infections			Acute or chronic osteomyelitis and acute septic arthritis (4 grams daily)†
Severe systemic infections			Septicaemia† Bacterial endocarditis†
Dental treatment in heart disease		Temporary replacement of penicillin	
Venereal diseases (If penicillin is unsuitable)	<i>Gonorrhoea</i> : a single dose of 3 grams cephalaxin with 1 gram probenecid is usually effective in males, and 2 grams cephalaxin with 0.5 gram probenecid in females <i>Syphilis</i> : 500mg q.d.s. for two weeks		

†Dosage may be reduced later depending upon the response, and the sensitivity of the organism.

Ceporex is cephalaxin, a semi-synthetic antibiotic derived from cephalosporin C. It is acid-stable, and well absorbed after oral administration. Ceporex has a broad range of bactericidal activity, has little toxicity, and is apparently not nephrotoxic even in high dosage.

Antibacterial activity

Ceporex is bactericidal to many gram-positive and gram-negative micro-organisms. It acts more rapidly against the latter than against gram-positive organisms and appears to be completely stable to staphylococcal penicillinase. Most strains of *Staphylococcus aureus* (including penicillin-resistant types) are susceptible, but the rare methicillin-resistant strains are usually resistant to Ceporex. Other sensitive organisms include *Streptococcus pyogenes*, *Diplococcus pneumoniae*, *Corynebacterium diphtheriae* and most strains of *Streptococcus viridans*. *Str. faecalis* varies in its sensitivity. Sensitive gram-negative organisms include most strains of *Escherichia coli*, *Klebsiella pneumoniae*, *Proteus mirabilis* and many strains of *Haemophilus influenzae*. *Neisseria gonorrhoeae* and *N. meningitidis* are highly sensitive. *Salmonella* and *Shigella* spp. are also sensitive.

Ceporex is rarely active against *Proteus morgani* or *Pr. vulgaris* and is inactive against *Aerobacter aerogenes*, *Mycobacterium tuberculosis* and *Pseudomonas aeruginosa* (*pyocyanea*). Bacterial resistance develops slowly in a step-wise manner on repeated subculture.

Pharmacology

Absorption of Ceporex is probably from the duodenum after oral dosage and is rapid and nearly complete. If the antibiotic is given immediately after a large meal, absorption is slower and the peak serum levels are slightly reduced, but the total amount absorbed is unchanged. The peak serum level usually occurs between one and two hours after administration. The serum half-life of Ceporex is normally about one hour. In the new-born, serum levels are likely to be higher and more prolonged. Binding to serum protein is low, and reversible. The extent varies from zero to 30% depending upon the method of estimation.

Concurrent administration of probenecid usually raises peak serum Ceporex levels by 50 to 100%.

Ceporex is excreted in unchanged active form in the urine by glomerular filtration and by tubular secretion. Between 80 and 100% of a dose can be recovered from the urine within 24 hours (mostly within the first six hours).

The mean urinary concentration of Ceporex after one oral dose of 250mg falls from a peak of about 1,000 micrograms/ml to about 40 micrograms/ml over twelve hours.

About 3 to 5% of Ceporex is excreted in the bile, where concentrations are one to four times the concurrent concentration in the serum. The peak concentration in the milk after a dose of 500mg is about 5 micrograms/ml.

Precautions

In patients treated with Ceporex, a false-positive reaction for glucose in the urine may occur with Benedict's or Fehling's solutions, or with 'Clinitest' tablets, but not with 'Clinistix'.

Ceporex is usually tolerated well by patients allergic to penicillin, but cross-reaction can occur occasionally.

As with other antibiotics, Ceporex should be administered with caution in patients with a history of allergy, especially to drugs. When renal function is markedly reduced, Ceporex will accumulate in the serum and tissues unless dosage is suitably reduced.

Laboratory experiments with animals and clinical experience show no evidence of teratogenicity, but as with all drugs, caution is needed during pregnancy.

Contra-indication

Hypersensitivity to cephalosporins.

Adverse reactions

A small proportion of patients receiving Ceporex may experience gastrointestinal disturbances such as nausea, vomiting, diarrhoea, anorexia and general abdominal discomfort. As with all broad-spectrum antibiotics, superinfection (sometimes monilial) can occur, and may present as vulvo-vaginitis. Reversible neutropenia has occurred in a few patients, but is very rare. Generalised drug rashes – urticarial or maculopapular – are uncommon.

Administration and dosage

Ceporex is administered orally. Treatment should continue for at least two days after the temperature has returned to normal and symptoms have subsided. However, in chronic, recurrent or complicated upper urinary tract infections a course of at least two weeks' duration may be necessary.

When renal function is considerably impaired, the dosage should be reduced. If the creatinine clearance is 20 to 50ml/minute, the adult dosage of Ceporex should not exceed 3 grams/day; if between 5 and 20ml/minute, not more than 1.5 grams daily; if the clearance is below 5ml/minute, dosage should not exceed 500mg/day.

Patients receiving intermittent dialysis should be given an additional 500mg of Ceporex after each dialysis, i.e., a total dosage of up to 1 gram on that day.

Ceporex 250mg q.d.s. means success in acute urinary tract infections

New clinical data* shows that Ceporex 250mg q.d.s. has produced a satisfactory response in acute urinary tract infections. This economical dosage regimen can therefore be used to treat a range of infections which includes acute cystitis as well as acute pyelonephritis and asymptomatic bacteriuria.

FIRST AGAIN!

Septrin rated top in major British survey¹ of urinary pathogen sensitivities

Six clinical bacteriology laboratories—in Glasgow, Liverpool, Hull, Cardiff, Guildford and Salisbury—tested widely used antibacterials against a total of 23,491 urinary isolates (all species). Both out-patient and in-patient strains were included. The results showed that trimethoprim/sulphamethoxazole (SEPTRIN*) outscored all other oral preparations:

Percentage sensitivity of isolates. Summation of six centres.

In-patient		Out-patient	
Trimethoprim/ sulphamethoxazole	88	Trimethoprim/ sulphamethoxazole	93

Nalidixic acid	81	Nalidixic acid	87
Ampicillin	63	Ampicillin	79
Sulphonamide	56	Sulphonamide	65

These results complement clinical findings of the superiority of SEPTRIN over ampicillin, previously reported in urinary infections.^{2,3}

In the treatment of boils

Floxapen destroys staph

When treating boils and other infections of skin and soft tissue, you need an antibiotic with virtually complete activity against staph. One which works quickly and consistently.

Floxapen, by reaching *effective* blood levels in half an hour, meets this need.

In conditions which patients find painful and discomforting, Floxapen provides rapid and effective treatment.

Adult Dosage: 250mg q.i.d. **Children** (2-10 years): half adult dose; (under 2 years): quarter adult dose. **Contra-indications:** Penicillin hypersensitivity, ocular administration. **Side-effects:** As with other penicillins.

What some doctors may forget

Bread is a major source of protein, B vitamins, iron and calcium, as well as providing energy. As such, it plays a key role in the national diet, and few can afford to do without it. For instance, almost *one-fifth* of the protein in an average diet comes from bread alone. It is one of the best food bargains in the world, when you consider that penny for penny bread contains nearly twice as much protein as cheese, and three times the protein of white fish or beef.

Yet bread is often underestimated as the

source of such a wide range of essential nutrients. In the right amount, it plays a vital part in helping to keep any diet in healthy balance. To deprive anyone, including the slimmer, of all the goodness of bread, can throw a diet drastically—and even imprudently—out of balance.

The 1970 National Food Survey confirms the vital importance of bread in the national diet. According to this survey the percentages of essential nutrients in the average daily diet deriving from bread alone are shown below.

NEW TWELFTH EDITION

The Merck Manual

NOW AVAILABLE

This widely accepted reference handbook for the medical profession has been substantially revised by more than 140 physician-authors. In 25 main sections, each thumb-indexed and covering a specific field of medicine, this edition comprises 1,980 pages of strong, fine bible paper. It features new subjects, an expanded index and additional tabular and illustrative material.

New features include:

- coronary care unit, genetics, and gynaecological malignancies
- new tables on a variety of subjects, such as pathogens in infections, anomalies in amino-acid metabolism, and characteristics of hyperlipoproteinaemias
- new illustrations dealing with the normal karyotype, patterns of inheritance, and blood cell development

The Merck Manual
is published by

and is on sale at medical booksellers for £3.50.

A lifetime of freedom begins with Intal

Before INTAL, a diagnosis of asthma often meant a life sentence of constantly aborting attacks with bronchodilators, anti-histamines or steroids. Patients were constantly at risk from the relentless progress of lung damage and lived in perpetual fear of an asthmatic episode.

The discovery of INTAL (Sodium Cromoglycate BP) represents a turning point in the management of this distressing complaint. Newly diagnosed patients, as well as those of long standing, benefit from this entirely new approach to therapy. INTAL actually prevents the onset of asthmatic attacks, and is notably free from serious side effects.

By preventing asthma attacks the possibility of consequent lung damage may be avoided enabling the patients to lead a fuller, happier life. If they remember their daily INTAL—they can forget their asthma.

INTAL—supplied in SPINCAPS® (each containing 20 mg Sodium Cromoglycate BP). For use in a special insufflator—SPINHALER®.

AMOXIL

an excellent new antibiotic for routine treatment

URTI Chest infections UTI Skin and soft tissue infections

Amoxil is a new antibiotic with distinct advantages in routine treatment.

Amoxil has a broad spectrum of activity against the common bacterial pathogens encountered in practice and its bactericidal action means further confidence in its everyday use.

The most practical advantage of Amoxil is that its oral absorption is outstanding, giving extremely high serum and tissue levels, irrespective of the presence of food. This ensures rapid and decisive activity at all sites of infection, even the more inaccessible.

Extensive British clinical trials have demonstrated its efficacy and penicillin safety in the treatment of Upper Respiratory Tract Infections, Otitis Media, Bronchitis, Urinary Tract Infections, and Skin and Soft Tissue Infections.

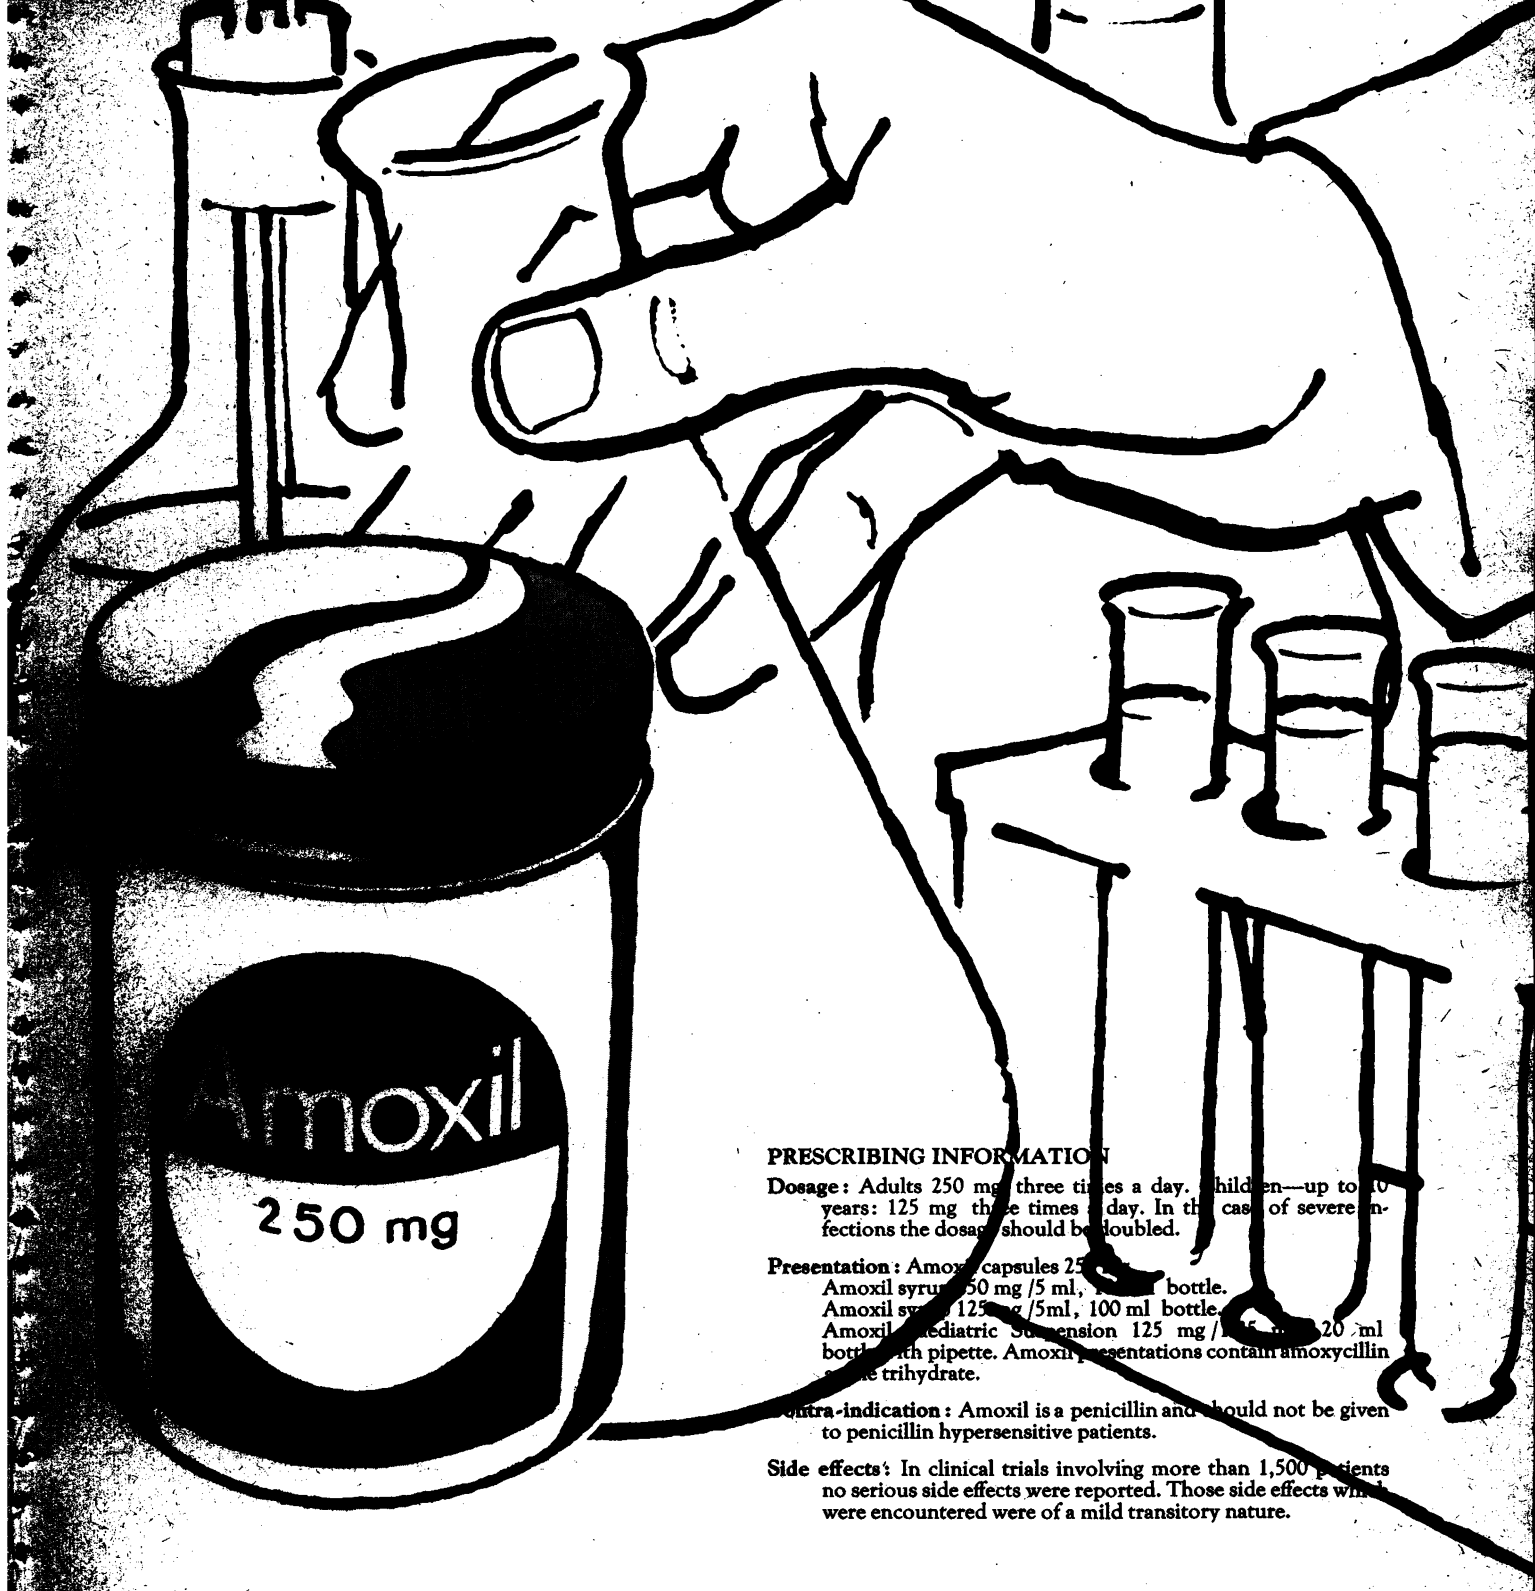

Add to this a convenient t.d.s. dosage—ensuring undisturbed sleep—a wide range of highly acceptable presentations, treatment costing as little as 16p per day and it is easy to see why Amoxil is practical antibiotic therapy at its best.

Keflex
SUSPENSIONS OF CEPHALEXIN MONOHYDRATE

KEFLEX combines a degree of effectiveness and safety second to none. It is now well established as a particularly suitable antibiotic for the treatment of the very young. Where there is any doubt about the diagnosis, KEFLEX is the logical answer. Broad spectrum, even against penicillinase-producing pathogens, rapid absorption and high serum levels. KEFLEX therapy offers maximum coverage with minimum complications.

When infection is anything but simple

he suffers from
dysmenorrhoea

He suffers because she's miserable, irritable, unable to cope

Duphaston defeats dysmenorrhoea – brings her cheerful efficiency into his life again. Its progestational activity is unique in that it is orally active and non-contraceptive. Duphaston has been shown in 3 double blind trials to be successful in treating dysmenorrhoea. Endometriosis, a cause of secondary dysmenorrhoea and sometimes infertility, responds remarkably well to Duphaston. Because Duphaston does not inhibit ovulation, pregnancy, the best treatment, is not prevented. Each Duphaston tablet contains 10mg dydrogesterone. Further information on request.

Interest rates offered to big investors and small savers alike are many and varied, but each investment has its own particular set of terms and conditions.

Some investments tie up your savings for a fixed period of years, whilst others offer prompt withdrawal facilities.

Some are designed to provide regular income; others offer capital growth. Either may or may not be taxable.

Both may incorporate life assurance and the income tax relief then obtainable can further improve the attractiveness of the investment.

It's all very confusing unless you are a financial expert. How else can you choose a plan to suit your own particular needs and be safe in the knowledge that the Company to which you are to entrust your savings is absolutely secure?

Whether you are interested in saving a monthly sum out of salary, or making a single investment, you would be wise to consult the experts at the M.I.A. They are there to help you, as they have helped thousands of your colleagues—their advice is free and entirely without obligation.

MEDICAL Golf Tournament

GREAT BRITAIN ^v UNITED STATES

A challenge has been received from an American medical journal that sponsors the U.S. Medical Open for a Challenge Cup Match between British and American doctors, to be played off at Pebble Beach, California in 1973. Teams are to comprise 16 players in four sections based on the handicaps of 0-5, 6-10, 11-15, 16-20.

The Medical Golfing Society, in conjunction with the British Medical Association and Medical News-Tribune, has accepted the challenge and will arrange competitions on an area basis throughout the United Kingdom to select the teams. It is anticipated that the final will be played off in the London area.

The competitions will be organized with the assistance of the B.M.A.

Regional Offices. Golf and refreshment provided free of charge.

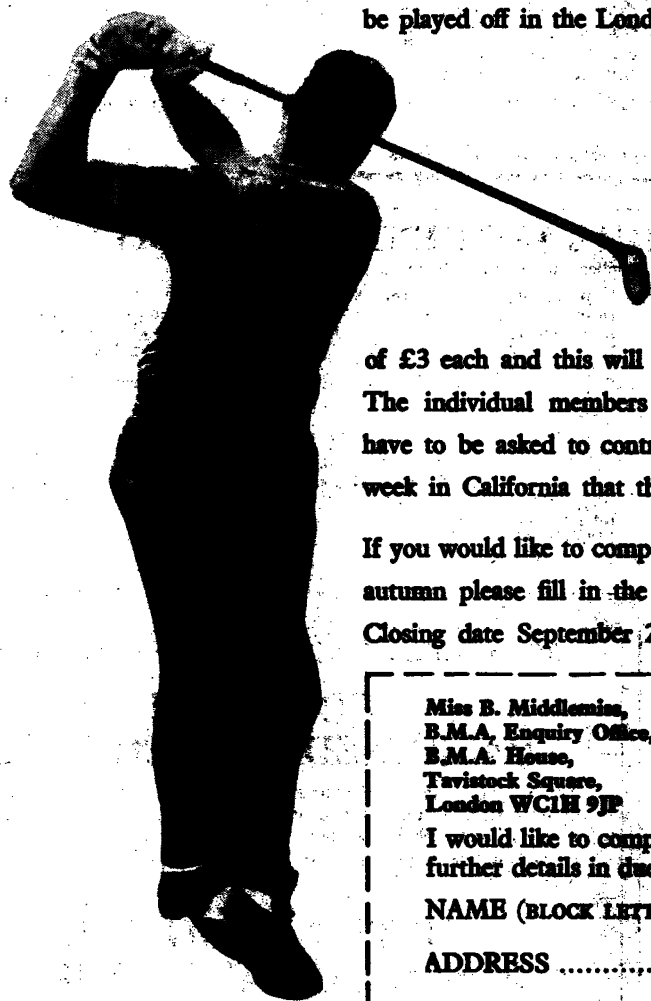

To send a British team to America is costly so all competitors will be expected to pay an entrance fee

of £3 each and this will meet some of the expenses of the team.

The individual members of the team to go to America might also have to be asked to contribute towards their own expenses of the week in California that the Challenge Match will occupy.

If you would like to compete in an area competition to be held later this autumn please fill in the coupon and return it as soon as possible.

Closing date September 23.

THE ROTUNDA HOSPITAL
Dublin

The Rotunda Hospital contains 134 maternity beds, 23 gynaecological beds and 51 paediatric cots. Over 5,000 patients are delivered annually in the hospital, and the External Maternity Service attends many patients in their own homes.

Undergraduate teaching includes the conduct of normal labour, attendance at gynaecological operations and abnormal labour cases, and opportunities for gynaecological examinations. Comprehensive lecture courses are arranged throughout the year and cover clinical obstetrics and gynaecology, pathology, and paediatrics. The gynaecological clinic, which offers comprehensive care, affords excellent opportunities for the study of all aspects of antenatal obstetrical practice.

There are extensive facilities for postgraduate tuition consisting of lecture programmes as listed above, together with opportunities for limited participation in clinical work under supervision. Postgraduate courses cater especially for the D.G.O., M.A.O., and L.M. (Rotunda).

Full particulars of all courses are available from the Master, Rotunda Hospital, Dublin.

Part-time courses are held in MEDICAL STATISTICS AND EPIDEMIOLOGY. Facilities are available for suitable candidates to study for the degrees of MPhil and PhD in appropriate subjects. Fees for full-time courses are £250 a year; for part-time courses are variable in relation to the full-time fee. The next session starts on 2 October, 1972.

DIPLOMA IN BACTERIOLOGY

For graduates in medicine, science (including veterinary science) and pharmacy who intend to follow a career in bacteriology. Closing date for applications: 1 March. The number of places is strictly limited.

DIPLOMA IN CLINICAL MEDICINE OF THE TROPICS (LONDON)

Designed particularly for the training of intending specialist physicians and medical research workers in the tropics. Closing date for applications: 1 March.

DIPLOMA IN TROPICAL PUBLIC HEALTH (LONDON)

Intended for medical practitioners proposing to make a career in public health administration or in preventive medicine in the tropics. Closing date for applications: 1 March.

MSc in HUMAN NUTRITION

For medical practitioners and graduates in science or agriculture with a biochemical or physiological background. Applicants not qualifying for an MSc degree may attend the course and sit a School examination for the Diploma in Human Nutrition. After the written examination MSc students will carry out practical work — which may take place overseas — for at least six months and will submit a written report. Closing date for applications: 1 March.

MSc in MEDICAL DEMOGRAPHY

For graduates in medicine, science or social science with suitable experience. Candidates with insufficient experience of the kind required may be accepted on condition that they take not less than two academic years and attend specified courses in the School during the first year. Closing date for applications: 1 March.

MSc in MEDICAL PARASITOLOGY

Designed mainly for graduates in medicine, veterinary medicine and veterinary science, but graduates in science or persons with approved non-graduate qualifications in medicine and veterinary medicine can be accepted. Gives training with special emphasis on parasitic and vector-borne diseases in the tropics. Closing date for applications: 1 March. The number of places is strictly limited.

MSc in MEDICAL STATISTICS

Intended for graduates with a mathematics background and a good general knowledge of mathematical statistics. Closing date for applications: 1 March.

MSc in OCCUPATIONAL HYGIENE

Designed for graduates in physics, chemistry, engineering, medicine or allied subjects. Closing date for applications: 1 April.

MSc in OCCUPATIONAL MEDICINE

For registered medical practitioners, covering all aspects of occupational health and also fulfilling the requirements for the Diploma in Industrial Health of the Conjoint Board. Previous experience in occupational medicine is not essential. Closing date for applications: 1 February.

MSc in SOCIAL MEDICINE

A two-year course, starting each autumn, designed to provide professional training for doctors wishing to specialize in social medicine and follow careers in either medical administration and community medicine or teaching and research in social medicine. Students must be medically qualified and have had at least two years' clinical experience. A limited number of bursaries are available to suitable candidates. Closing date for applications: 1 March. The number of places is strictly limited.

DIPLOMA IN TROPICAL MEDICINE AND HYGIENE (ENGLAND)

A five-months' course for medical practitioners starting next on 19 February 1973. Closing date for applications for the 1974 course: 1 May 1973.

COURSES IN MEDICAL STATISTICS AND EPIDEMIOLOGY

Part-time courses in medical statistics and/or epidemiology (courses S1/2, E1) are held occupying various mornings from October to December. In general, only applicants with a medical qualification will be accepted. Extended training in these subjects is offered from January to March (courses F2, S3). Applicants may be accepted for a combined course consisting of all four courses, i.e. S1/2, E1, E2, S3. Closing date for applications: 1 June.

FURTHER DETAILS MAY BE OBTAINED FROM THE REGISTRAR, LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE, KEPPEL STREET, (GOWER STREET), LONDON, WC1E 7HT.

Clinicals & Orals Week commencing 20th November, 28th May, 26th November.

CLOSING DATES FOR RECEIPT OF ENTRIES
Preliminary Test October 1972, 31st August 1972.

Preliminary Test March 1973, 19th January 1973.

Preliminary Test September 1973, 24th July 1973.

Membership Examination November 1972: Complete — 31st August 1972. Involving exemptions — 31st July, 1972.

Membership Examination April/May 1973: Complete — 14th February, 1973. Involving exemptions — 15th January, 1973.

Membership Examination October/November 1973: Complete — 31st July, 1973. No exemptions.

EXEMPTIONS

For two years, and two years only, following the inception of the Royal College of Psychiatrists (1971) candidates for the Membership Examination of the College who possess certain qualifications may be able to claim exemptions from the Preliminary Test and/or certain part(s) of the Membership Examination. All applications for exemption(s) must be made on the prescribed form.

PRELIMINARY TEST

All candidates in possession of a D.P.M. (or a qualification judged to be equivalent thereto by the Court of Electors) and who can show that they have had one year's approved experience in psychiatry may claim exemption from the Preliminary Test provided that they have fulfilled these conditions before 1st February, 1973.

MEMBERSHIP EXAMINATION

Candidates for the Membership Examination may at any time before 1st February, 1973 apply for exemption from part(s) of the examination (except a final oral) on the grounds of having obtained special experience or of having additional higher qualifications or of having published original work. Each such application will be considered on its individual merits by the Court of Electors.

The power to grant exemption from part(s) of the Membership Examination is limited by the Charter and Bye-laws of the College to the two year period ending on 15th June, 1973. Any candidate granted exemption(s) must therefore pass the Examination before 16th June, 1973. Thus, the last opportunity of taking the Examination will be in April/May, 1973, for which the last date for entry (if applying for exemption(s)) is 1st February, 1973.

Any candidate who has been granted exemption(s) but has failed part(s) of the examination may only apply for re-entry (with any exemption to which he may be entitled) up to 1st February, 1973.

UNIVERSITY OF DUNDEE

FACULTY OF MEDICINE

The University awards the following medical and dental qualifications: M.B., Ch.B., B.D.S., B.M.Sc., (Honours), M.D., Ch.M., M.D.S., D.D.Sc., M.M.Sc., Ph.D., D.I.H., D.P.D., C.I.H.

MEDICAL CURRICULUM. Preclinical instruction in the Medical Sciences Institute (opened in 1970). Clinical instruction at Dundee Royal Infirmary (582 beds), Maryfield Hospital (366 beds), Royal Dundee Liff Hospital (650 beds), Perth Royal Infirmary (272 beds) and elsewhere and, as soon as it is completed, in the Ninewells Hospital and Medical School.

DENTAL CURRICULUM. Instruction in the Dundee Dental School and Hospital.

GENERAL INFORMATION. Halls of residence for men or women students available. An entrance scholarship and bursary competition is open to prospective medical and dental students. Facilities for postgraduate study and research.

CONSOLIDATED ANNUAL FEE. Inclusive of matriculation fee, tuition fee, etc., for M.B., Ch.B., B.D.S., B.M.Sc.(Honours) and D.P.D. courses, £75 (£250 for overseas students). Fee for Ph.D. and M.M.Sc., £60 plus £15 laboratory fee if applicable (£250 for overseas students, with or without laboratory facilities). A composite membership fee of £13.75 *per annum* for the Students' Association and Sports Union is also payable. Fee for C.I.H. and D.I.H. Courses, both held during the Summer Term (April to June), £25.

APPLICATIONS FOR ADMISSION for first degree courses in October, 1973 should be sent to UCCA, P.O. Box 28, Cheltenham, Glos. GL50 1HY by 15th December, 1972 (or 15th October, 1972 for candidates who are also applying to Oxford or Cambridge).

Prospectus from Dean, Faculty of Medicine, The University, Dundee DD1 4HN or from the Director of Dental Studies, as appropriate. 4

UNIVERSITY OF OXFORD MEDICAL SCHOOL

The University grants the degrees of Bachelor of Medicine and Bachelor of Surgery (B.M., B.Ch.), Master of Surgery (M.Ch.), and Doctor of Medicine (D.M.).

A candidate who wishes to read for the degrees of B.M., B.Ch., M.Ch., or D.M. must be a member of a college and must subsequently be matriculated as a member of the University. A candidate for these degrees must also take the B.A. degree in some subject (usually the Final Honour School of Physiological Sciences). Application for admission should be made to the Oxford Colleges Admissions Office, 58 Banbury Road, Oxford.

Pre-clinical Course. The pre-clinical course lasts nine terms. The first five terms are spent preparing for the First B.M. examination. After the First B.M. four further terms are spent in the study for a Final Honour School which qualifies for the B.A. degree. Then follows the clinical course. For further information apply to the Secretary of the Medical School.

Clinical Course. This course lasts for 28 months. The clinical school is based on the Radcliffe Infirmary, the Churchill Hospital, the John Radcliffe Hospital and the specialist hospitals in Oxford. There are ten University Chairs in clinical subjects and the medical hospital group and several important Research Units.

The United Oxford Hospitals (over 1,400 beds) serve both as the Area Hospital and also as a Regional Centre. The range of clinical material is exceptional for teaching hospital and clinical firms are small. The tutorial system continues throughout the clinical course.

Students who are admitted from other universities may read for the medical degree of their own university or may apply to transfer to the Oxford B.M. examinations.

Osler House and its garden adjoin the Radcliffe Infirmary and provide attractive premises for the clinical students' club.

Prospectus may be obtained on application to the Secretary of the Medical School, 43 Woodstock Road, Oxford.

Higher Degrees. The degrees of D.M. and M.Ch. are open to those who have taken the degrees of B.M., B.Ch. at Oxford or to Masters of Arts from Oxford who hold the medical qualifying degree of another approved university. The degrees of M.Sc. and D.Phil. are also available. Further information may be obtained from the Director of Postgraduate Medical Education and Training.

Research in clinical subjects and in the clinical or laboratory department in one of the teaching hospitals or to the Director of Postgraduate Medical Education and Training, 43 Woodstock Road, Oxford. 4

ROYAL COLLEGE OF SURGEONS IN IRELAND

The Medical School attached to the College offers a complete medical course of six years, including the Pre-registration year in Chemistry, Physics and Biology. Students may take the M.B. of London University as external students.

The Students' Union includes rugby, sailing, cricket, caving and other clubs.

The College conducts examinations leading to the Fellowship of the College in Surgery, Otolaryngology or Ophthalmology.

Fellowships are also awarded in the Faculties of Anaesthetists, Dentistry, and Radiologists, following Primary and Final examinations.

The Primary Fellowship of the College and that of the Faculty of Anaesthetists, is reciprocal with the examinations of the other Royal Colleges.

The Primary examination of the Faculty of Dentistry is reciprocal with the examinations of the other Royal Colleges. Candidates for the final examination for the Fellowship of the Faculty of Dentistry may offer Oral Surgery, Orthodontics, Prosthetics, Restorative Dentistry or Public Health Dentistry as the special subject.

The Fellowship of the Faculty of Radiology may be taken in either Radiodiagnosis or Radiotherapy. The Primary Fellowship of this Faculty includes Physics, Pathology, Medicine and Surgery. Fellows of the Faculty of Radiology of London are exempted from the Primary Examination. Holders of the D.M.R.D. and other higher qualifications may be exempted single subjects in the examination.

Postgraduate Education:

1. There are two courses each year for primary fellowship students.
2. There is a postgraduate course in advanced surgery organized with the co-operation of University College and Trinity College. This intensive whole-time course is for candidates preparing for the Fellowship examinations. Early application for places desirable.

Further particulars may be obtained from the Registrar, Royal College of Surgeons in Ireland, 123 St. Stephen's Green, Dublin 2. 4

CHARING CROSS HOSPITAL MEDICAL SCHOOL

(University of London)

WINTER SESSION BEGINS
4th OCTOBER 1972

During the year 1972-73 Charing Cross Hospital and its associated Medical School are moving from the site in Central London which they have occupied for the last 150 years into their new premises at Fulham where the Hospital will expand to close on 1,000 beds and the Medical School increase its annual intake of students from 48 to 120.

Full clinical instruction is provided for students proceeding to the degrees of the Universities of Oxford, Cambridge and London, and the total number of beds is sufficient to provide nearly every student with a pre-registration house post upon qualification.

Senior Entrance Scholarships. A number of scholarships are open to members of Oxford and Cambridge Universities wishing to proceed to their clinical studies. These scholarships are awarded on the results of examinations held annually in late June or early July, embracing subjects (1) Anatomy and Physiology or (2) Bio-chemistry or Pathology. Their annual value is £100 for each of the three years of the period. Many other scholarships, exhibitions and prizes are open to students pursuing their clinical course.

The Pathological Museum, which is subject to continual revision, is designed so as to display exhibits to the greatest advantage. It includes the well-known Lockyer Collection of Gynaecological and Obstetric Pathology specimens.

The Library, which includes a branch at Fulham, is extensive and contains not only a wide range of books for undergraduate and specialist use but also an exceptionally comprehensive section allocated to periodicals.

The Students' Union provides facilities for almost every form of athletic activity at its Sports Ground of 24 acres at Cobham, Surrey, and also includes a large number of societies, both social and cultural.

The annual composition fee is £100. Any further information may be obtained from the Dean or the Secretary, both of whom are available for interview by appointment at:

ST. GEORGE'S HOSPITAL MEDICAL SCHOOL (University of London)

THE HOSPITAL at Hyde Park Corner is one of the oldest centres of medical learning and probably the most accessible in London. There are 905 beds in the Group which includes St. George's Hospital, Tooting, and Atkinson Morley's Hospital at Wimbledon.

THE SCHOOL. In spite of an increase in the number of students attending for clinical training, the School is still able to maintain its policy of close contact between staff and students in all departments and to offer a wide range of clinical experience in the two hospitals at Hyde Park Corner and Tooting. A major reconstruction of the School's buildings at Hyde Park Corner in the 1950's provided increased social and laboratory facilities and a new library. There are established clinical academic departments of Medicine, Surgery and Psychiatry in addition to Departments of Pathology, Chemical Pathology, Medical Microbiology, Haematology and Forensic Medicine.

HOUSE APPOINTMENTS. Pre-registration appointments are sufficiently numerous to allow the majority of graduates of the School to hold one appointment within the Group.

RECREATION. There are School playing fields of thirteen acres at Atkinson Morley's Hospital, Wimbledon which cater for all the usual field sports, squash courts on the Hospital site at Tooting and others only a few minutes walk from Hyde Park Corner. Club rooms and refectories are on the premises at Hyde Park Corner and at Tooting, those at Tooting forming part of a Students' Centre completed in 1968 with its own library.

FUTURE DEVELOPMENTS. A completely new Hospital with 1,400 beds is to be built at Tooting. It will include a new Medical School for pre-clinical and clinical studies which will be amongst the most modern in the country and closely integrated with the Hospital buildings and those of the Royal Dental Hospital and its School of Dentistry. The first phase of this development including the central facilities for the Medical School is due for completion in 1976.

FEES. £87.35 including full membership of Club with its amenities, and sporting and social activities.

ENTRY. All applicants for entry should be made through the Universities Central Council on Admissions.

A prospectus is available on application to the Dean.

REGIONAL HOSPITAL BOARD

invites applications for the post of
REGISTRAR IN PSYCHIATRY
at the Airedale General Hospital, Eastburn,
Keighley, which is a new 650-bedded District
General Hospital opened two years ago.

The Psychiatric Unit, which is an integral
part of the hospital, consists of 62 beds, a day
hospital, a department of psychology and an
occupational therapy department. The Unit
follows a policy of active treatment and
rehabilitation for all forms of psychiatric
disorder including the use of behaviour and
group therapy, individual psychotherapy
under supervision, and standard psychiatric
treatments. The person appointed will be part
of a team consisting of two Consultants, two
Registrars and two Senior House Officers. The
Unit has been fully staffed since its opening
two years ago. There is a particularly active
teaching programme plus every opportunity
for individual research, and there are close
links with the other hospital departments,
including E.E.G.

Study leave for higher examinations can be
granted and courses for the D.P.M. and the
M.R.C.Psych. are available at the University
of Leeds.

Senior Posts in the Employment Medical Advisory Service

Up to £7,865

As recommended in a report issued by the Secretary of State's Industrial Health Advisory Committee, the Employment Medical Advisory Service is being set up to replace the Appointed Factory Doctor Service. A Deputy Chief Employment Medical Adviser (based in London) and at least 2 Senior Medical Officers (based in London or in a large provincial town) are needed to help direct the new Service. The responsibilities of the EMAS include the medical supervision of people exposed to hazards at work, people undergoing training or rehabilitation and young people not fully fit for employment. Advice will be given to workers (and their representatives) and employers, and close liaison will be maintained with general practitioners, hospital staff, works medical officers etc.

The field work involved will, in most cases, be carried out by Employment Medical Advisers. The main function of these appointments will be to direct the work of these Advisers, to assess the significance of technical reports and the

work being undertaken, and to provide advice on matters of policy.

Qualifications: candidates for all these posts must be fully registered medical practitioners in the U.K. A higher qualification or a Diploma in Public or Industrial Health will be an advantage. Proved competence in industrial medicine or closely allied subjects is highly desirable, and a high standard of professional ability and personal initiative is essential.

Salaries: Deputy Chief Medical Employment Adviser—£7865; Senior Medical Officers—£7451 (£175 less outside London). The pension is non-contributory and previous public service superannuation rights will normally be transferable.

For full details of these posts and an application form (to be returned by 18 September) please write to the Civil Service Commission, Alencon Link, Basingstoke, Hants, or telephone Basingstoke 29222 ext. 500 or London 01-839 1696 (24 hour 'Ansafone' service) quoting reference S/8024/2.

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the Royal Air Force has to offer.

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in pediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties—perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

General Practice? With a difference. At this RAF Clinic, in the busy town of Limassol, in Cyprus, almost all the patients are women and children (specially children). Staff is 7 doctors, each with his (or her) own panel of patients; and 5 dentists. There are 5 SRN Nurses, and 7 Health Visitors. Next door is the RAF's Child Guidance Clinic, with psychiatrist, educational psychologist and speech therapist.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3942; after 5 years it rises to £4767; after 13 years to £5898. There are various other allowances; for instance, with children at boarding school the figures are £363 (net) for one child, £795 (net) for two children, £1314 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain J. G. Donald, OBE, MB, ChB, MRCP, DTM&H, RAF, Ministry of Defence, 1-6 Tavistock Square (724JZ5), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

CLINICAL RESEARCH IN GERMANY

As a result of expansion in the Medical Department, opportunities have arisen for young physicians to participate in the clinical development of new therapeutic agents in a number of fields including pulmonology, gastroenterology, cardiology, hypertension and chemotherapy.

The successful candidates will be responsible for the design, initiation, supervision and assessment of clinical studies and will be expected to communicate with physicians in hospital and general practice about the medical aspects of Boehringer Ingelheim products. They will be encouraged to remain fully conversant with recent developments in clinical and experimental medicine both in Germany and abroad.

Previous experience in the pharmaceutical industry is not essential, but a background and interest in one of the above fields is a precondition for application.

C. H. Boehringer Sohn is a leading international pharmaceutical company situated on the Rhine between Bingen and Mainz. Conditions and benefits, which include an attractive salary, occasional foreign travel and assistance with re-location, are in keeping with a company of our standing.

A working knowledge of German is desirable but not essential. An intensive course in German will be arranged if necessary.

Applicants, who should ideally be between the ages of 25-35, should write in the first instance to:

C. H. Boehringer Sohn,
Pharma-Vertrieb,
Personal Referat,

RESEARCH PHYSICIANS U.S.A.-FRANCE

A major expansion of our worldwide research effort has created some new clinical research positions which may be of immediate or future interest to you. We plan to interview in London in late September. Why not write us to see if your abilities and interest realistically match our needs and opportunities!

WHO ARE WE?

Richardson-Merrell has concentrated its basic research for human ethical drugs in 2 research centres. One in Cincinnati, Ohio and a brand new laboratory in Strasbourg, France. We are a growth company committed to the concept that basic research in specific disease areas is a key to continued growth.

WHAT DO WE WANT?

Currently we have specific openings in both the United States and France. For instance we seek a specialist in cardiovascular diseases — another in psychiatry — and others who are interested in the early introduction of drugs into man. Tomorrow, of course, we may have other openings.

In general we want doctors who are

- really interested in planning and following up drug studies in man.
- at least familiar with the basic concepts of modern day research, e.g., design of clinical trial protocol — statistical interpretations — cause and effect relationships.
- creative and energetic.
- willing to move to Cincinnati or Strasbourg. Immigration restrictions in the U.S. have relaxed recently.

If these opportunities sound attractive to you let's hear about you and your interest. Write to:

Penbritin Territory

Right from the time they're too young to tell you where it hurts, treatment of children poses special problems. During this period, more than ever, the antibiotic you prescribe should ideally be safe – and sure.

The effectiveness of Penbritin and its safety as a penicillin are well-established. In contrast, tetracyclines are "absolutely contra-indicated for children aged under 8" because of serious effects on tooth development (Brit. med. J. (1970), 4, 509).

For the under two's, acceptability is of great importance. Penbritin paediatric suspension provides it – in an easily administered form. Syrup and paediatric tablets for the older child complete the Penbritin paediatric range.

In Paediatric Territory there's really only one choice.
