

Introducing  
a new generation  
of oral contraceptives  
from Schering

Eugynon 30, Eugynon 50

Schering sets the pace...

## Eugynon 30

**THE NEW 'PILL' WITH REDUCED OESTROGEN,  
FOR THE NEW PATIENT**

- Provides an extremely low dose of the advanced new progestogen, 0.5 mg. dl-norgestrel per day.
- Reduces oestrogen intake to 30 mcg. ethinyl oestradiol per day.
- Exhibits unsurpassed reliability together with high acceptability and good cycle control.
- Especially indicated for the new patient.

## Eugynon 50

**THE NEW 'PILL' FOR THOSE WOMEN  
REQUIRING 50 mcg. OESTROGEN**

- Provides the same extremely low dose of advanced new progestogen as Eugynon 30, 0.5 mg. dl-norgestrel per day, but differs in oestrogen content, containing 50 mcg. ethinyl oestradiol.
- Proven world-wide to be a reliable oral contraceptive with outstanding cycle control.
- Particularly indicated for those women whose cycles will benefit from 50 mcg. oestrogen.

## The Eugynon System

**THE NEW GENERATION  
OF ORAL CONTRACEPTIVES FROM SCHERING,  
WORLD LEADERS IN ORAL CONTRACEPTION**

Eugynon 30 and Eugynon 50 together form a simple but comprehensive system, setting a new standard in oral contraception.

Note: The name 'Eugynon' is derived from the Greek and freely translated means 'Happier Women'. It is pronounced 'U-guy-non'.

# Why should a qualified doctor even consider joining the Army?

We think the Army can offer you everything you'd get in a civilian practice plus one or two attractions of its own.

Firstly, the pay isn't bad. At 24 you can start life in the Army as a Captain at a salary of £3,942 with generous allowances on top of that. If you've been a doctor for a few years, you can start as a Major.

You'll get 6 weeks paid holiday each year and when your Short Service Commission ends after 3 years or 5 years you can leave with a substantial tax free gratuity. On the other hand, you might like the life well enough to apply for a Regular Commission.

Of course, you'll have plenty to do looking after soldiers and their families. But we will provide you with fully equipped, up to date surgeries to work in.

While you're with us you may want to study for higher qualifications. And some doctors specialise.

There's every chance that part of your service will be abroad. (Quite apart from seeing something of the world this can provide experience of treating tropical diseases.)

And then there's Army life itself. Plenty of friends and every facility for sport and recreation. And the feeling of being an essential member of a team.

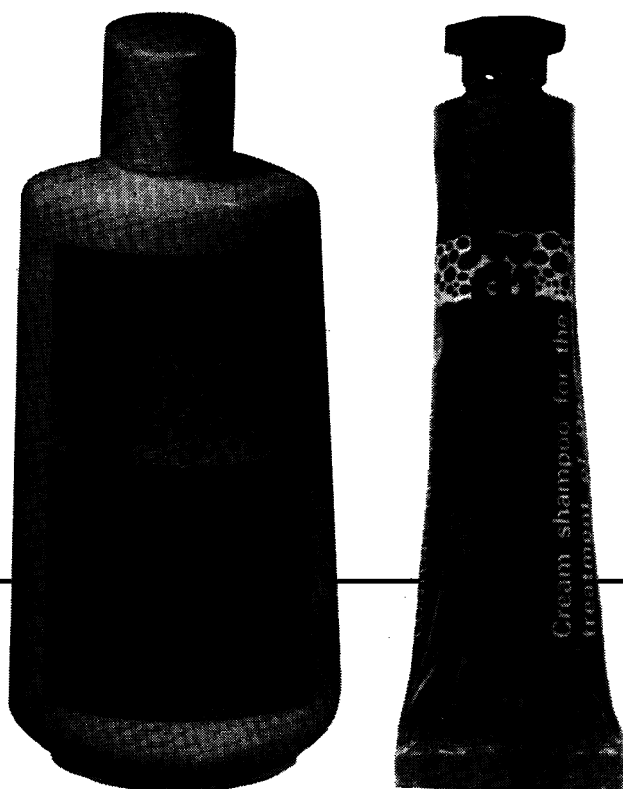

If you're interested in learning more about the opportunities the Army offers doctors, write to Colonel A. R. Worthington, MB, MFCM, DTM & H, RAMC, Ministry of Defence (AMD2), Dept. M37, Lansdowne House, Berkeley Square, London, W1X 6AA.

He'll send you all the details and arrange for you to visit an Army medical establishment so that you can look around and chat to a few Army doctors.

They'll tell you what it's like. Warts and all.

## ADVERTISEMENT REPRESENTATIVE REQUIRED

The BRITISH MEDICAL JOURNAL, published by the British Medical Association, which also publishes seventeen specialist journals, and is responsible for the advertising in, and publication of the ANNALS OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND and the BRITISH DENTAL JOURNAL, requires an Advertisement Representative between 20 and 30 years of age.

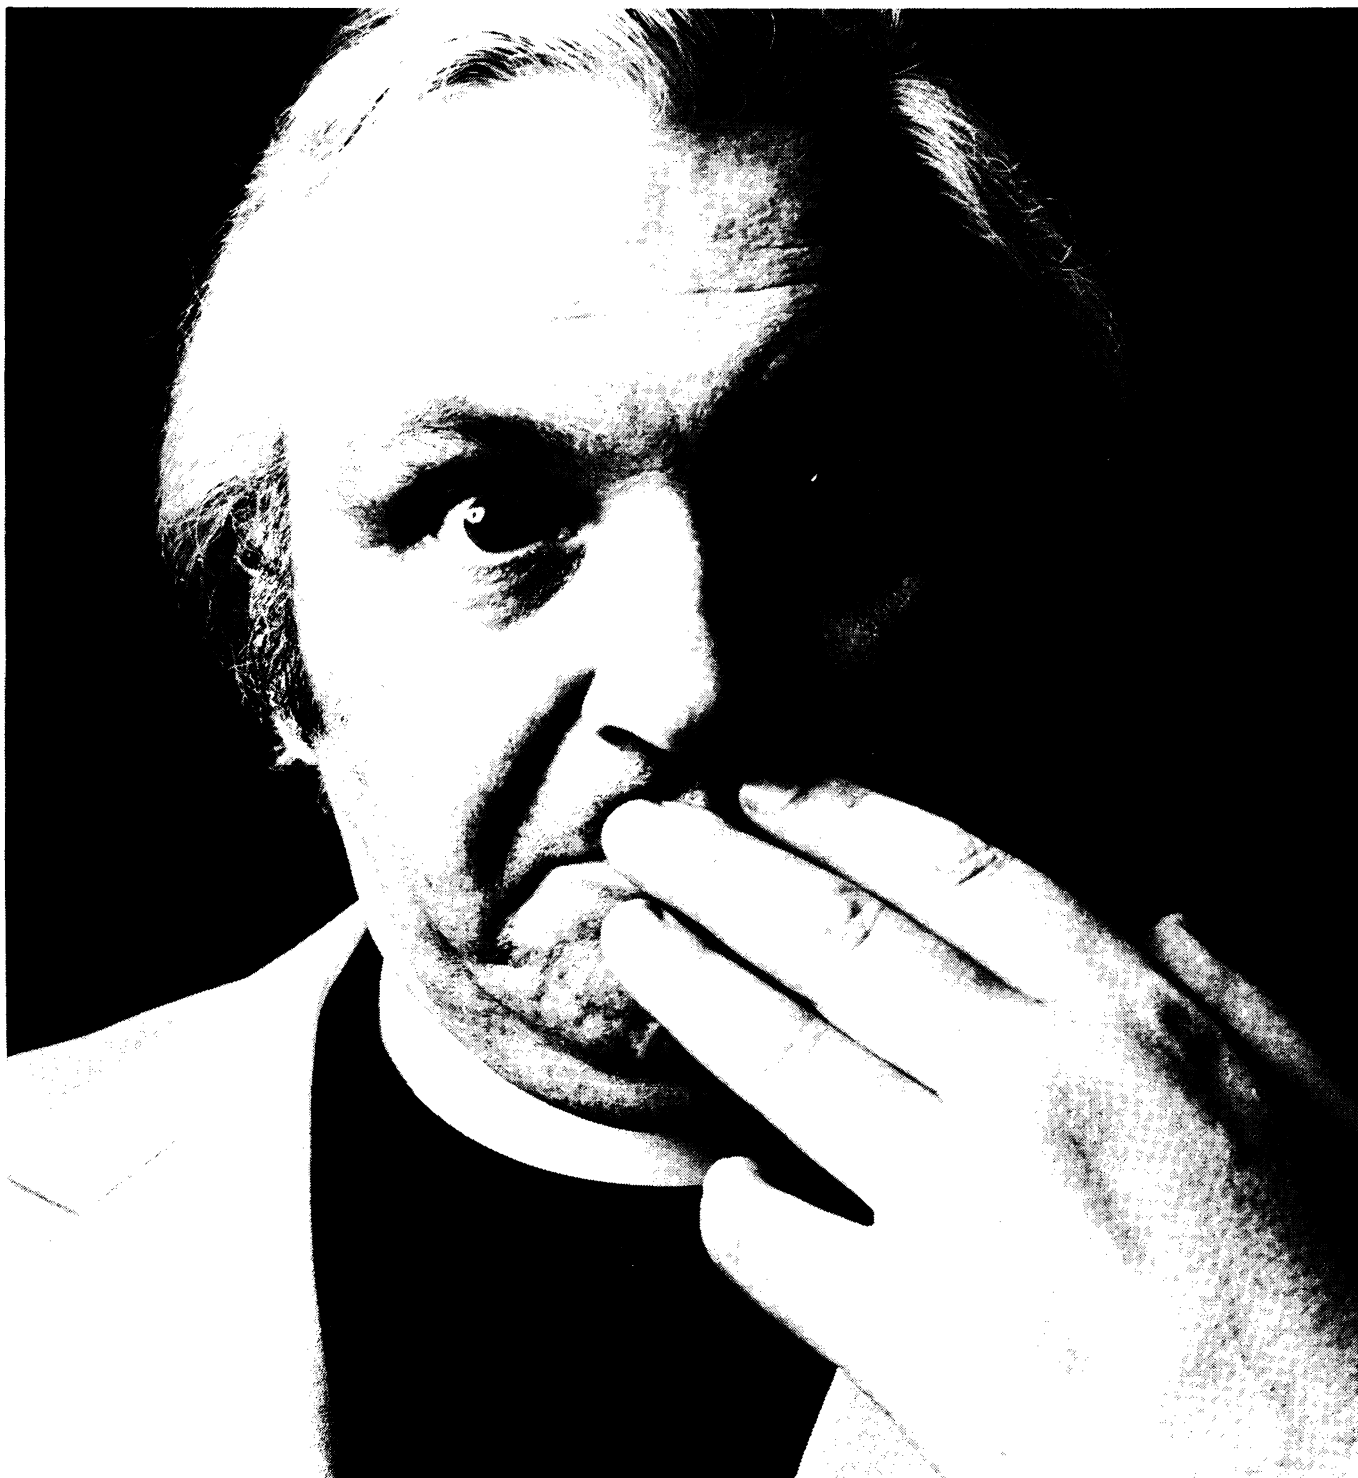

Applicants must be experienced in selling. Knowledge of the medical/pharmaceutical field and of advertising would be an advantage but to have both is not necessary. The position is therefore equally suitable, for instance, for a pharmaceutical detail representative or a space salesman.

The successful applicant must be London based and have his own car for which there is a satisfactory allowance. The salary is good and the position progressive. There is a generous superannuation scheme. The 3 weeks annual holiday increases after a few years to 4 weeks.

This is a splendid opportunity to make a worthwhile career in a group of journals of the highest quality and of worldwide renown.

Please write, giving age, education, full details of experience, qualifications and present salary to Mr. M. B. Cozens, Advertisement Manager, British Medical Journal, B.M.A. House, Tavistock Square, London WC1H 9JR. Applications will be treated with strict confidence.

## Flatulent dyspepsia. And the wind of change

A change to Maxolon brings you effective treatment of the *underlying problem* in many cases of dyspepsia—disturbed motility.

For your regular flatulent dyspeptic patients, a change to Maxolon will mean a break in the routine of frequent visits, recurrent symptoms and bulky liquids. Maxolon prevents symptoms in 4 out of 5 patients. In a month, normal motility may be re-established.

Prescribing a month's course of Maxolon will be a change you and your patients will appreciate.

**Prove Maxolon for yourself.** Use Maxolon on your regular flatulent dyspepsia patients. For a 7 day starter pack write to Beecham Research, Freepost, Brentford, Middlesex—post-free in the United Kingdom. *Full information is available on request.*

# Even a 21ft motor cruiser won't make the Safari sink.

You can see how the floor of the Citroën Safari estate stays level with the ground, even with a heavy load behind.

Almost every other car would sag down on its springs.

The Safari has no springs, instead Hydropneumatic suspension. In this Citroën system, a fluid and a gas interact so that the car reacts—automatically—to both load and road surface, maintaining a constant level at all times.

You can also raise the ground clearance of the car by a hand control inside. Up for driving over rough tracks or fields. Up more to drive for short distances through very thick mud or snow.

As well as the unique suspension advantages, the Safari offers you every other estate car virtue in generous proportions—plus the good looks and easy front wheel drive handling of the Citroën DS saloon.

The Safari is a 7-seater, the Familiale an 8/9 seater.

Both carry loads up to 15 cwt and—with rear seats folded down—offer you a cavernous area to take long, high or wide loads. And if you have any extras, there's even a built-in roof rack.

The D20 Estate in Safari or Familiale version is £1,945.67 plus VAT. The new D23 Estate—with the new, more powerful 2,347cc engine—also in Safari or Familiale versions is £2,120.09 plus VAT.

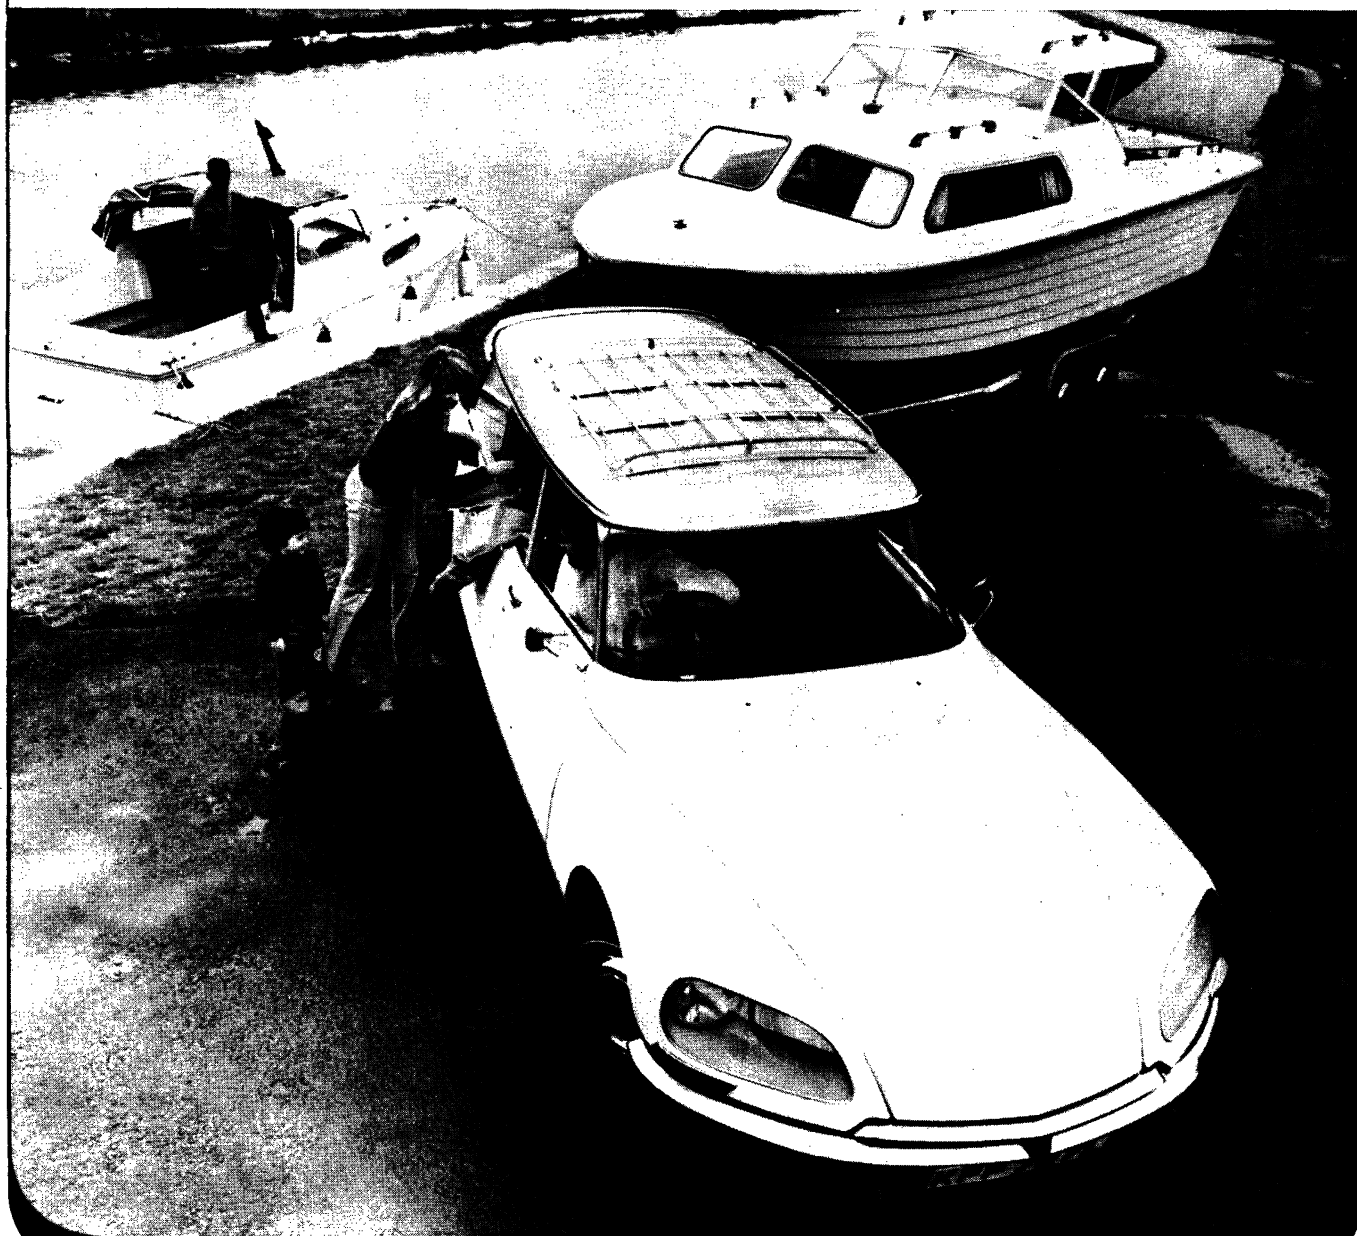

Your Citroën dealer will be delighted to give you a conducted tour of the big estate: the Citroën Safari or Familiale, or any of the DS saloons which start at £1,581.67 plus VAT. Visit him, or write for brochure and list of agents to:

# When an infection causes concern

Chest infections. Sinusitis, tonsillitis and quinsy. Infected wounds and abscesses. In treating worrying or severe cases you can be more certain of first time success when you prescribe Magnapen.

Magnapen is effective against virtually all bacteria encountered in General Practice. So in severe infections you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations, or night calls to patients who may fail to respond to other antibiotics.

# PHENERGAN ELIXIR

In young patients with infections or allergic conditions of the upper respiratory tract – from winter colds to hay-fever – ‘Phenergan’ Elixir brings rapid relief of uncomfortable symptoms:

## **dries up secretions**

The anticholinergic action of ‘Phenergan’ Elixir effectively reduces secretion in the swollen upper respiratory passages. This helps end the misery of running eyes and nose and restores the comfort of easy breathing.

## **reduces irritation**

The drying and central sedative actions of ‘Phenergan’, together with the demulcent effect of the elixir, all combine to provide soothing relief of nose and throat irritation.

## **combats restlessness**

By relieving distressing symptoms ‘Phenergan’

Elixir does much to ease the irritability of the young patient during the day. And at night its well-known sedative properties are of particular value in ensuring undisturbed sleep – for both child and parents.

# MEDICINE IN A TROPICAL ENVIRONMENT

**Edited by A.G. Shaper, J.W. Kibukamusoke, M.S.R. Hutt.**

*Medicine in a Tropical Environment* is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

### WESTERN REGIONAL COMMITTEE FOR POSTGRADUATE MEDICAL EDUCATION

#### SYMPOSIUM ON THE MODERN TREATMENT OF STROKE in The Stroke Unit, Lightburn Hospital, Glasgow 25th and 26th October, 1973

How do you treat a stroke? What methods of examination are worthwhile? How do you evaluate language deficit? Can strokes be prevented? What do you do about the blood pressure? Should you use anticoagulants, or vasodilators? Does rehabilitation achieve anything? Is speech therapy any good? Has electronics anything to offer? How do you prevent relapses? Do the patients ever recover? What happens to them after they leave hospital?

Do we need a stroke service? Shouldn't we all be doing something about it? These are some of the questions to be dealt with at the Symposium. The discussions will be led by the medical staff at the Unit, the non-medical members of the rehabilitation team, and distinguished visiting experts. Presentation will be by clinical demonstration, panel discussion and face-to-face interview, and audience participation will be strongly encouraged.

The course has been approved for General Practitioners under Section 63 of the Health Services and Public Health Act 1968. For others the course fee is £10.

Further information and application forms may be obtained from: The Dean of Postgraduate Medicine, The University of Glasgow, Glasgow G12 8QQ. (26186) 4

### UNIVERSITY OF EXETER

POSTGRADUATE MEDICAL INSTITUTE  
A full-time postgraduate course lasting 10 weeks will begin on 4th October, 1973. These courses are normally held 3 times a year starting in October, January and April, but there will be no course in January, 1974. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (26026) 4

# NEWCASTLE REGIONAL HOSPITAL BOARD

**SENIOR REGISTRAR  
IN ANAESTHESIA**  
whole-time, non-resident, to participate in a rotation scheme between the teaching hospitals and the Regional Cardiothoracic Surgical Service. The scheme is devised to ensure that the holders enjoy the best of the training facilities in the Region. All the hospitals may be served without change of Domicile.

A two year period will provide five months in a full-time Cardiothoracic Unit, three months of Anaesthesia for Neuro-surgery, two months in Paediatrics and Neo-natal work, and extensive contact with all branches of therapy. One year will be spent in the Royal Victoria Infirmary, Newcastle upon Tyne, with facilities for research and training and two months of this time will be free from clinical duties to be spent in an approved Postgraduate activity.

Post vacant mid-October, 1973.  
Applications, naming three referees, to Senior Administrative Medical Officer, Regional Hospital Board, Benfield RTAD, Newcastle upon Tyne, NE6 4PY, by 6th August, 1973. (53078) 52-5

## SERVICES

# AS A NAVAL DOCTOR, YOU'D GET A WHOLE LOT MORE OUT OF LIFE.

(AND SO WOULD YOUR FAMILY)

Right from the start, you'd have a complete change of scene.

Serving either with the Navy at sea or among service personnel and their families at a naval establishment. Very likely in another part of the world.

Either way, you'd never find yourself short of assistance. (Every naval doctor is fully supported by medical staff).

Equally important, you'd never find yourself getting into a rut – for in two years or so you'd receive a new appointment.

In a new place. Doing a different job. Perhaps with the chance to learn something of the special problems of diving, aviation, or tropical medicine for example.

It's a stimulating life. Not only for yourself but for your family too.

For in most cases they'd accompany you. And wherever you go there are usually married quarters – fully furnished houses or flats, equipped with everything you need. And at very reasonable rents.

What's more, a generous education

allowance is made for your children if they are at boarding school. £363 p.a. for a first child, £432 p.a. for a second, £519 p.a. for a third. On top of this, removal and other allowances are also provided.

Add this to the salary and you'll see how well a naval doctor's pay compares with a civilian doctor's.

For instance, with five years' post registration experience you would join us as a Surgeon Lieutenant-Commander on £4,767 a year.

And any specialist qualifications/experience you have could increase your salary even more.

There are opportunities, too, to keep up with the latest developments in medicine. For the Navy fully recognises the need for such opportunities both in the interests of naval medicine and a doctor's professional advancement.

That's not all. You can join on a 3-year or 5-year commission (each carrying a tax-free terminal gratuity of £1,500 and £3,000 respectively) and you can transfer to a full 16-year pensionable commission if you wish.

To find out more, write to Surgeon Cdr. L. C. Banks, M.B., B.Ch., R.N. (724 ABH), Dept. of the Medical Director-General (Navy), Empress State Building, London S.W.6.

# She'd like the answer to a burning problem

And you, doctor, can supply that answer. By prescribing Ceporex.

Ceporex swiftly and reliably puts out the fires of cystitis. Because Ceporex (cephalexin from Glaxo) destroys most of the gram-negative pathogens, particularly *E. coli* and *Klebsiella* spp, responsible for most urinary tract infections.

High urine levels are rapidly

reached by Ceporex, and between 80 and 100% of the dose can be recovered from the urine in 24 hours, most of it in the first six hours. This, coupled with high blood and tissue levels, helps promote swift remission of both symptoms and disease.

That's why Ceporex has achieved a 92% success rate in acute cystitis.\*

## Ceporex clears cystitis

Ceporex is available as tablets, capsules and syrups in 250mg and 500mg strengths

Dear Doctor,

F.D.A. APPROVAL FOR PONDERAX\*

Ponderax (fenfluramine HCl) which has been successfully used in the U.K. since 1963 for the treatment of overweight patients has now been approved by the Food and Drug Administration of the U.S.A. for use in that country.

Fenfluramine was first synthesised in Servier's Research Laboratories in 1960 and since that time considerable evidence has been accumulated from laboratory investigations and clinical trials to demonstrate its effectiveness and safety.

Animal and human pharmacological studies over 12 years have shown its anorectic effect, its actions on carbohydrate and lipid metabolism and its lack of central nervous system stimulation.

Clinical use in more than 11 million patients throughout the world has reinforced the confidence felt by patients and prescribers in Ponderax for effective weight reduction.

A vast amount of data was considered by the F.D.A. including all recent publications and comments on Ponderax. The expression of confidence is demonstrated by the placing of fenfluramine in schedule 4 of the American poisons regulations which is the least restrictive schedule. All other anti-obesity products are placed in higher schedules indicating concern at their dependence and/or abuse potential.

We shall be pleased to send you further information.

Yours sincerely,  
SERVIER LABORATORIES LIMITED

## When the "hot" urinary tract infection let's keep it that way"

In urinary tract infection, antibiotics and other agents usually give prompt relief of acute symptoms. But all too often the infection is left smouldering, only to flare up again perhaps months later.

And even if the initial treatment is completely successful, the patient remains at risk from re-infection.<sup>1,2</sup>

Yet this risk diminishes with time. If the patient can be kept free of infection, there should be progressively less chance of another flare-up.<sup>1,2</sup>

*Hiprex* can help to buy this valuable time. *Hiprex*, given for months, meets the need for long-term therapy.

## When the "hot" urinary tract infection cools down — finish the job with **Hiprex**

<sup>1</sup> *Postgraduate Medical Journal* (1971) Supplement vol. 47: 31.

<sup>2</sup> *New England Journal of Medicine* (1970) 282: 1443.

**Composition** Each tablet contains hexamine hippurate 1g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. Prophylaxis before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years:  $\frac{1}{2}$  tablet twice daily. In refractory cases the dosage may be increased to: 1 tablet three or four times daily in adults,  $\frac{1}{2}$  tablet three or four times daily in children aged 6-12 years. Tablets may be halved but should not be crushed. **Alkalinuria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. Administration of ascorbic acid 2 g. daily in divided doses (either as powder or as tablets) is recommended in these cases. **Side-effects** Occasionally, rashes,

gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** If the symptoms of infection such as painful micturition or bladder irritation do not subside within seven days of starting treatment, or if such symptoms develop on prolonged treatment at high dosage, this probably indicates drug-induced bladder irritation. Prompt relief can be obtained by the consumption of copious quantities of water and 2-3 teaspoonfuls of bi-carbonate of soda. **Contra-indications** Hepatic insufficiency, severe dehydration, severe renal failure (serum creatinine level > 5 mg%) or metabolic acidosis. *Hiprex* may be used where mild to moderate renal insufficiency is present. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidney. *Hiprex* should not be administered concurrently with sulphonamides owing to the danger of crystalluria, or with alkalinising agents such as mixtures of potassium citrate.

*Hiprex*: trade mark.

# "...Readily controls the symptoms of allergic rhinitis"

LANCET 1971 1 55

Rynacrom is unlike anything else in the treatment of allergic rhinitis. Instead of merely providing symptomatic relief it actually **prevents** the condition.

Regular insufflation of Rynacrom (Sodium Cromoglycate BP) inhibits the disruption of the cells which, in the face of challenge, release the spasmogens and cause the distressing symptoms.

Thus the patient is protected all year round and not subjected to troublesome side effects which so often accompany symptomatic treatment.

# NEW for Maintenance Therapy

Patients with mild oedema requiring maintenance therapy particularly appreciate the convenience of Lasix 20mg. Its gentle diuresis will be over in four hours rather than spread throughout the day or disturbing the night's rest. Your patient, too, can avoid the problems of the thiazide diuretics with Lasix 20mg.

*"Predictability of response enabled us to tailor the diuresis to the individual patient's life circumstances."<sup>1</sup>*

Containing only 20mg frusemide Lasix 20mg provides the required diuresis with all the advantages of Lasix – reduced risk of electrolyte imbalance or need for potassium supplements, low incidence of adverse reactions.

*"Frusemide, thus, fulfils all the criteria which are needed for the majority of conditions met with in general practice."<sup>2</sup>*

## Lasix<sup>®</sup> 20mg

Lasix 20mg. Tablets contain 20mg frusemide B.P.
