

Introducing  
a new generation  
of oral contraceptives  
from Schering

Eugynon 30/Eugynon 50

Schering sets the pace...

## Eugynon 30

**THE NEW 'PILL' WITH REDUCED OESTROGEN,  
FOR THE NEW PATIENT**

- Provides an extremely low dose of the advanced new progestogen, 0.5 mg. dl-norgestrel per day.
- Reduces oestrogen intake to 30 mcg. ethinyl oestradiol per day.
- Exhibits unsurpassed reliability together with high acceptability and good cycle control.
- Especially indicated for the new patient.

## Eugynon 50

**THE NEW 'PILL' FOR THOSE WOMEN  
REQUIRING 50 mcg. OESTROGEN**

- Provides the same extremely low dose of advanced new progestogen as Eugynon 30, 0.5 mg. dl-norgestrel per day, but differs in oestrogen content, containing 50 mcg. ethinyl oestradiol.
- Proven world-wide to be a reliable oral contraceptive with outstanding cycle control.
- Particularly indicated for those women whose cycles will benefit from 50 mcg. oestrogen.

## The Eugynon System

**THE NEW GENERATION  
OF ORAL CONTRACEPTIVES FROM SCHERING,  
WORLD LEADERS IN ORAL CONTRACEPTION**

Eugynon 30 and Eugynon 50 together form a simple but comprehensive system, setting a new standard in oral contraception.

Note: The name 'Eugynon' is derived from the Greek and freely translated means 'Happier Women'. It is pronounced 'U-guy-non'.

## **IMPLANTS IN SURGERY**

In this book the authors discuss and correlate the basic theory, the results of experimental investigations and the clinical applications of all aspects of implant surgery. The book aims to provide the surgeon, clinician, biomedical engineer and non-medical scientist with an interrelated survey of all the factors affecting implant use and development. The emphasis of the book is placed on implant materials and on the correlation between their scientific properties and their behaviour in the body environment. Particular attention is paid to metallic corrosion, polymer degradation, the local response of tissues to implants (including carcinogenesis), blood-prostheses interactions (thrombogenesis, haemolysis) and possible systemic effects.

This detailed study of materials together with the scientific and engineering aspects of implant development is followed by a close examination of the use of implants in orthopaedic surgery, cardiovascular and thoracic surgery, and plastic and reconstructive surgery. Each chapter in this section, written by a specialist in his own field, defines the reasons for using implants, and the scope and status of current implant surgery.

## **MUSCLE RELAXANTS**

*Volume One of Major Problems in Anaesthesia*

*Consulting Editor: William W. Mushin, CBE, MA, MB, FRCS, FFARCS*

The intention behind this book is to bridge the gulf between the laboratory pharmacologist and the practising anaesthetist. Based largely on clinically observed phenomena it examines carefully the nature and action of muscle relaxant drugs. The author studies the occurrence of normal neuromuscular transmission, how this can be interrupted by blocking agents, and the physiological and pathological influences on the degree and duration of the drugs' effects.

The emphasis on clinical observation highlights the difficulty in theorising from in vitro tests only, and the author presents supporting evidence in instances where his approach conflicts with current opinion. A unique feature of the book is the study of clinical use in the light of theories as to the nature of the drugs' effects, a study which underlines the importance for the practising anaesthetist in understanding the chemical basis of muscle relaxant behaviour. Of especial interest to the reader will be the original material included in the book, particularly the information on the nature of the drugs' actions and the cause of dual block.

## The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which

are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

# Antacids work. Up to a point.

Antacids and stomach coatings work. Very well. But not always for long, and only against one of the major symptoms of the distress. That's why you need 'Stelabid'.

'Stelabid' provides protection against hypersecretion, hypermotility and painful spasm.

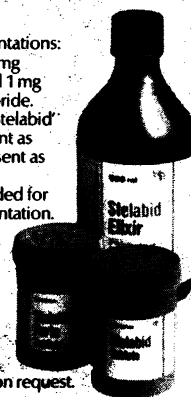

Its calming action alleviates the anxiety and stress so often associated

with gastro-intestinal disturbances.

'Stelabid' prescribed with antacids, provides a most persistent and effective symptomatic control of gastro-intestinal disorder throughout the whole spectrum from functional disorders to ulceration.

And a simple b.i.d. dosage protects the patient even throughout the night.

'Stelabid' is now available in three presentations: **'Stelabid' Tablets** Each tablet contains 5 mg isopropamide present as the iodide, and 1 mg trifluoperazine present as the hydrochloride. **NEW 'Stelabid' Elixir** Each 5 ml dose of 'Stelabid' Elixir contains 5 mg isopropamide present as the iodide, and 1 mg trifluoperazine present as the hydrochloride. 'Stelabid' Elixir is particularly recommended for those patients who prefer a liquid presentation. **NEW 'Stelabid' Forte Tablets** Each tablet contains 7.5 mg isopropamide present as the iodide, and 2 mg trifluoperazine present as the hydrochloride. 'Stelabid' Forte Tablets are especially useful in more severe cases when an extra measure of relief from spasm and hypersecretion is required. Full prescribing information is available on request.

Intal is well established as a highly effective treatment for allergic asthma in the young.

But what of the late-onset patient — the dad who suddenly starts wheezing, blowing up balloons, at the kids' party?

Can Intal help him? Clinical studies<sup>1,2</sup> show that a surprisingly high proportion of

patients over 40 also benefit from Intal, even where there is no clearly defined allergic component.

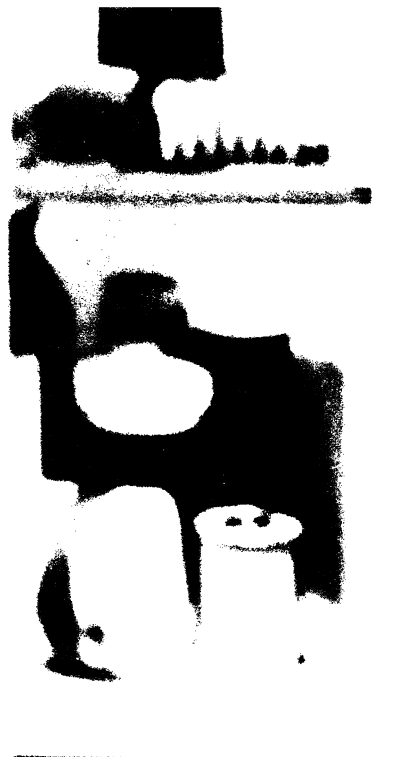

And it does it all with a specific local action.

Nobrium is the most recent product of the vast Roche international research programme into anxiety. It has a precise action which curbs anxiety at the source—the amygdala in the limbic system of the brain. Nobrium also damps the transmission of anxiety into the body by its action on the hypothalamus. As other brain structures are virtually unaffected, the incidence of side-effects is remarkably low.

This precise action is highly effective in anxiety and the many conditions caused by or associated with it. In clinical trials Nobrium has consistently produced success rates of between 80 and 90% in a wide range of conditions including psychosomatic disorders of the gut, heart or lungs; organic disease complicated by anxiety; phobias; menopausal syndrome; and alcoholism.

## PRACTICES (Executive Councils)

### INNER LONDON EXECUTIVE COUNCIL NATIONAL HEALTH SERVICE THAMESMEAD

The Thamesmead Joint Health Services Advisory Committee has pioneered a programme of integrated health care based on health centres for the residents (eventually about 50,000) of this riverside development in the London Boroughs of Greenwich and Bexley. The first group of general practitioners is already operating at the Lakeside Health Centre.

Applications are now invited from general practitioners of suitable experience and personal qualities to lead the way in building up a second team to serve the next area of Thamesmead in which the population is expected to grow to about 12,000 within the next five years. This team will be based on a well equipped temporary health centre working closely with nurses, health visitors, hospital and other staff employed from April, 1974, by the Bexley/Greenwich Area Health Authority and will be members of the Department of General Practice at Guy's Hospital Medical School. It will eventually be one of several groups occupying the main health centre which will be the main base for teaching and research and which in addition to the usual facilities will provide a wide range of specialist and diagnostic services.

The doctor now to be appointed will be offered a suitable academic appointment in the Department of General Practice at Guy's and given the opportunity of taking an active part in teaching and research.

A Type D Initial Practice Allowance which takes the form of a guarantee that the doctor's income will be made up to an amount agreed with the Executive Council will be payable provided that the successful applicant has been qualified for about ten years, of which two have been in hospital appointments, and five in a busy general practice in this country. He should be experienced in maternity work and be acceptable for the Obstetric List. The successful applicant will be expected to take up his appointment in January, 1974.

Application forms and further information may be obtained from the Clerk, Inner London Executive Council, Addison House, 32-43 Chart Street, N1 6EF.

The closing date for receipt of completed forms is Wednesday, 29th August, 1973. (H13442) 5

# FELLOWSHIP AWARDS

# LILLY INTERNATIONAL FELLOWSHIP PROGRAMME

Since 1945, Eli Lilly and Company has sponsored an International Fellowship  
Programme which gives physicians from various parts of the world an opportunity  
of studying for one year at medical centres of their choice in the United States or  
Canada.

Fellowships are intended for postgraduate study in internal medicine or any of its  
sub-specialties.

The selection of a Fellow from the United Kingdom is undertaken on behalf of  
the Company by the Medical Research Council when applications for their own  
series of travelling fellowships are being considered.

All enquiries and requests for forms of application for the 1974-75 (tenable from  
1st October, 1974) award should accordingly be addressed to: **Medical Research  
Council, Training Awards Group, Secretariat and Universities Division, 20 Park  
Crescent, London W1N 4AL.**

The closing date for applications for these awards is **30 September 1973.** (H13414) 26

# THE WELLCOME TRUST

# WELLCOME RESEARCH TRAINING FELLOWSHIPS IN SURGERY

The Wellcome Trust is offering up to four fellowships in Surgery.  
The object of these awards is to give research training to young  
surgeons who may wish to take up an academic career. The  
fellowships will be tenable in Great Britain, in University  
Departments of Surgery, or in other departments where problems  
relevant to Surgery can be studied.

Professors of Surgery are invited to nominate candidates, who  
must be graduates, under the age of 35, who wish to spend one or  
two years on a research project. The sponsor must undertake to  
supervise the work and provide facilities.

The stipend offered will be in the range £1,900-£4,150 per annum,  
according to age and experience. The Fellow may take up his post  
at any time within 12 months of the award.

A copy of the regulations and an application form may be  
obtained from: **The Assistant Director, (Surgical Fellowships),  
The Wellcome Trust, 52 Queen Anne Street, London W1M 9LA.**

## COMMERCIAL APPOINTMENTS

# clinical pharmacologist

The first administration of investigational compounds to man requires exceptional care, expertise and a thorough understanding of pathophysiology and clinical medicine. C. H. Boehringer require a physician to initiate such studies in specialist departments of clinical pharmacology and medicine throughout Europe. A world-wide network of research laboratories employing over 2000 scientists has been particularly successful in the synthesis of original compounds which now deserve critical examination in man.

The department established in this country is an integral part of the parent company in Germany, working alongside the local company, Boehringer Ingelheim Ltd.; its responsibilities are international however. In addition, the department is responsible for liaison with other scientific institutions in questions of basic research, and is closely involved in project initiation and project appraisal in the research laboratories of the company.

Applicants should preferably hold a degree in basic science as well as medicine and have proven postgraduate ability (you would be encouraged to maintain a clinical appointment). A substantial salary and generous pension scheme are offered, a motor car is provided and assistance in relocation to the new company offices in Bracknell is given.

Please write in confidence to:  
Dr. Julian H. Shelley, C. H. Boehringer Sohn,  
Ellesfield Avenue, Southern Industrial Area,  
Bracknell, Berkshire.

# S Special Steels Division

## Medical Officers

Applications are invited for 2 medical posts in the Corporation medical service for the Sheffield area. The services are being re-grouped and this provides an excellent opportunity for those seeking a second appointment or as a training ground for those desiring to specialise in occupational medicine. Encouragement will be given to study for the Diploma of Industrial Health.

A particularly interesting programme of environmental and epidemiological projects has just been started in which the appointees would play a full part. Direct clinical responsibility is also involved.

The commencing salary will be within BMA recommendations with periodic reviews. The preferred age would be about thirty, though this need not preclude others.

The Corporation has an extensive country-wide medical service and career development prospects would be particularly good for the successful candidates.

Applications should be sent, quoting reference SS4, to:

## UNITED NORWICH HOSPITALS

**SENIOR HOUSE OFFICER**

(resident post — single or married accommodation available) in General Medicine required for these hospitals to commence duty on 15th October, 1973. The post will in the first instance be for a period of six months in General Medicine under the supervision of the Senior Registrar in General Medicine. At the end of this period the successful applicant can (1) opt out voluntarily (2) be considered unsuitable for further specialist training by the Consultants to whom he/she is responsible or (3) be offered a post at registrar level (non-resident post) in a three year comprehensive training programme in which there is a rotation through the Departments of General and Metabolic Medicine, Chest Medicine, Cardiology, Nephrology, Neurology and Dermatology in an attractive city with first class postgraduate educational facilities. Although the rotational registrar posts are non-residential, there is a possibility that married or single accommodation can be offered if desired.

In the event of (1) or (2), the appointee would be able to continue in post in a locum capacity for a further three months in order to allow him/her to obtain a post elsewhere. Candidates will be interviewed by a Medical Appointments Committee for Registrars in order that the successful applicant, if satisfactory, may be promoted to Registrar at the end of the first six months' training and continue with the comprehensive training programme.

Application forms obtainable from the Administrative Assistant, Medical Executive Secretariat, Norfolk & Norwich Hospital, Norwich, NOR 53A, and should be returned by 22nd August, 1973. Appointments Committee will be on 3rd September, 1973. (54242) 67-8

### FELLOWSHIP FOR MEDICAL RESEARCH

Applications are invited from medical and science graduates with appropriate senior qualifications for the Edward Wilson Memorial Fellowship (1974) which may be awarded annually to an Australian or overseas graduate for a period of either one or two years.

(a) Australian Graduates: The Fellowship would enable an Australian graduate to travel overseas to pursue an area of research in an appropriate research centre for one year. The appointee would then be eligible for appointment for a second year to return to Alfred Hospital to continue his research project. In addition to the Fellowship stipend, an Australian appointee would be entitled to one return economy air fare to an appropriate overseas destination and a grant towards living expenses.

(b) Overseas Graduates: The Fellowship would enable an overseas graduate to travel to Australia to work in medical research at Alfred Hospital. An overseas appointee will be expected to commence duties at some time between 1st January and 31st March, 1974, and will be eligible for appointment for a second year.

In addition to the Fellowship stipend, an overseas appointee would be entitled to a free flat or accommodation allowance during his stay and the equivalent of one return economy air fare to Australia.

# Most doctors know that for many patients with asthma, treatment with Ventolin is all that is needed.

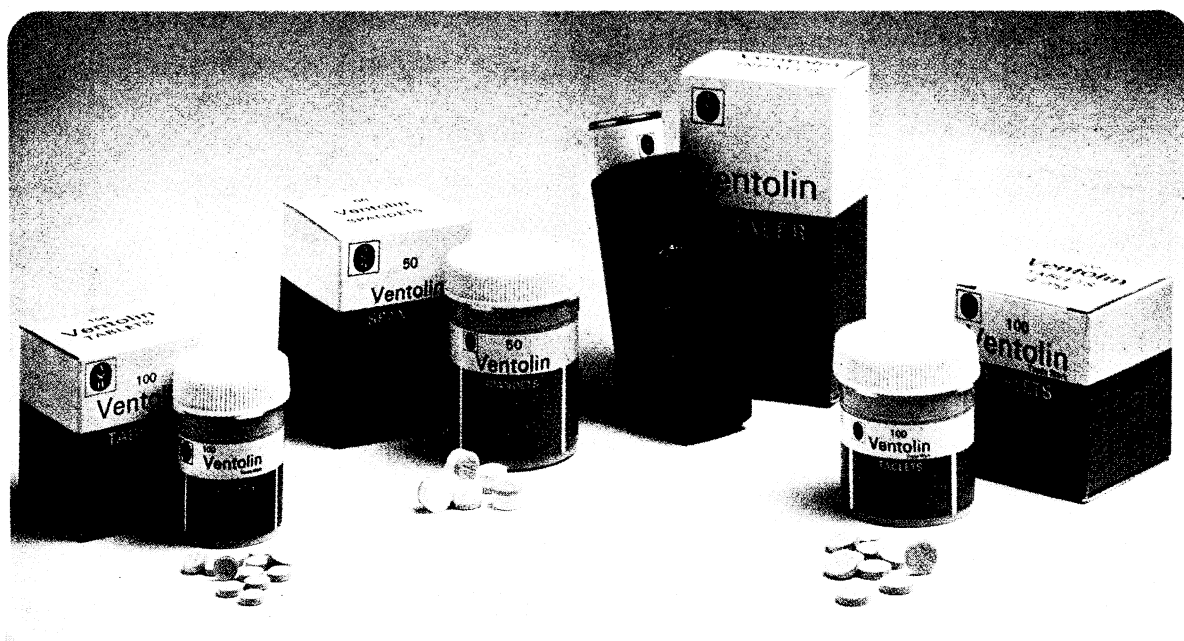

\* A bicycle ergometer was used to the extent necessary to induce an asthmatic attack in 9 asthmatic patients. All these patients had positive skin tests.

A dose of two inhalations of Ventolin Inhaler prior to the exercise prevented an asthmatic attack in 8 out of 9 of the patients. The one who failed, obtained full protection when the dose of Ventolin was doubled.

As a comparison sodium cromoglycate, in a dose of one capsule (20mg), was given to 6 of the same patients prior to exercise. Protection against asthma was obtained in 4 of the 6 patients.

Doubling the dose to two capsules still failed to protect the one patient who had required a double dose of Ventolin.

(*Brit. J. Dis. Chest*, 1972, 66, 133.)

Ventolin Inhaler – a metered aerosol of salbutamol BP – rapid, effective and long-lasting.

Ventolin Tablets 2mg and 4mg – each contain salbutamol BP as sulphate – for routine, oral bronchodilator therapy.

Ventolin Syrup – contains salbutamol BP as

sulphate – fruit flavoured for ready acceptability by children.

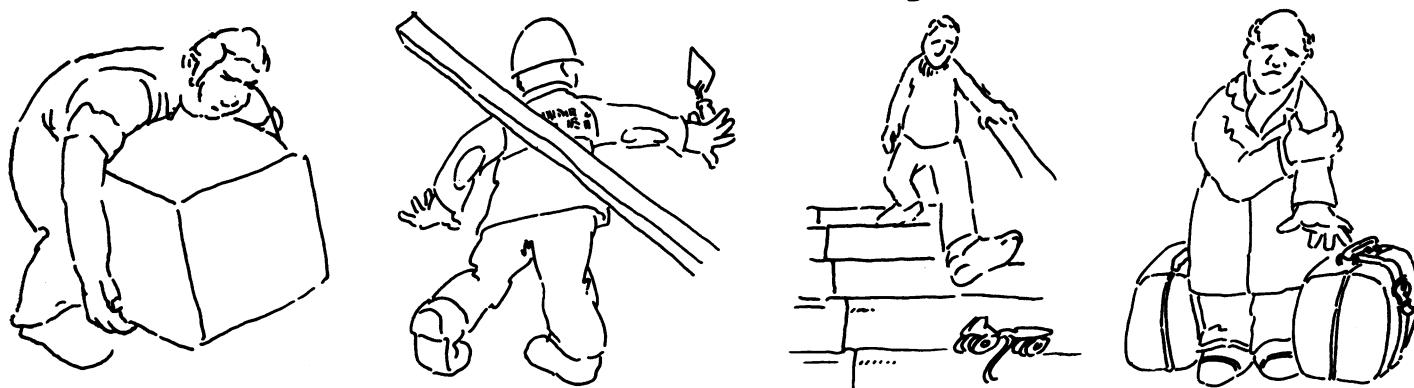

Ventolin Spandets – each contain salbutamol BP as sulphate – sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.
