# another little victory for Prinalgin

In rheumatoid arthritis, every small gain can increase the patient's pleasure in life. In this respect, the anti-rheumatic agent Prinalgin is showing it to be an outstanding therapy.

Significant improvement of major physical indices such as grip strength and joint size is a major feature of Prinalgin therapy.

Concomitantly, there appears to be an antidepressant factor involved in Prinalgin therapy that re-awakens the psychic momentum of the patient.<sup>1</sup>

In a field where a little victory is really a big victory, shouldn't you be considering Prinalgin for your patients? 1. Lancet (1973), 1, 936.

# EMOTIONAL PROBLEMS IN CHILDHOOD AND ADOLESCENCE

During 1972 a series of articles appeared in the *B.M.J.* on emotional problems in childhood and adolescence. These articles, revised and brought up to date by their authors, have been collected to form a useful handbook on practical advice to the practising doctor on a subject which may give rise to many difficulties.

## CLINICAL ENDOCRINOLOGY

Over the last 25 years progress in endocrinology has been rapid. The important recent advances in treatment of disorders of the endocrine system were reviewed in a series of 'Medical Practice' articles published in the *B.M.J.* last year. These have been revised by their authors and collected together in a booklet, which forms a useful introduction to modern ideas in this specialty.

# There may be more o his insomnia than

'Tryptizol' can help to relieve the anxiety-depression that disturbs sleep.

Insomnia is one of the most frequent presenting symptoms of the anxietydepressive syndrome. In addition to its antidepressant action, 'Tryptizol' has a rapidly apparent anti-anxiety effect. It can quickly relieve the sleep disturbance associated with depression, usually obviating the need for hypnotics. While the patient is encouraged by this early improvement, 'Tryptizol' can effectively treat other distressing symptoms of the illness, such as agitation, anorexia, lack of interest, and lowered mood.

### a single solution to a dual problem

'Tryptizol' is supplied as tablets containing 10 mg, 25 mg, and 50 mg amitriptyline hydrochloride/MSD. The 50 mg tablet is especially convenient when a relatively large dose is prescribed at bedtime. 'Tryptizol' is also available as a syrup, and as an injection. Detailed information is available to physicians on request.

# The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which

are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

Full information is available on request.

# THE HISTAMINE CHALLENGE:

# Can any single antihistamine tablet fight off attacks for 24 hours?

In a study† designed to test the duration of protection afforded by PRO-ACTIDIL\*, human volunteers were given intradermal injections of histamine and the areas of flare and weal response were measured. After the responses had completely disappeared one PRO-ACTIDIL tablet was administered to each volunteer and the histamine challenge was repeated. By measuring the reduction in areas of flares and weals the protective effect of PRO-ACTIDIL could be plotted for the 24 hours following administration. After 24 hours the weals still showed a reduction of 65 per cent and the flares a reduction of 83 per cent. The authors concluded that the antihistaminic effect of PRO-ACTIDIL lasts for 24 hours. † Eur J clin Pharmacol (1971), 3, 215.

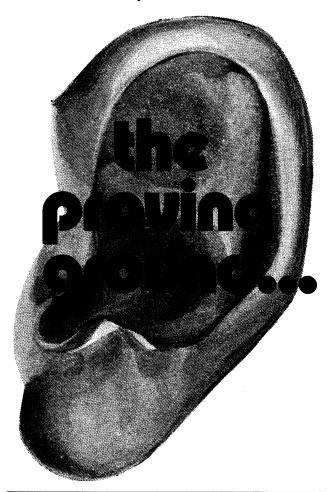

# PRO-ACT

wins the day for allergy sufferers

# CERUMOL<sup>®</sup>

# works where it is needed - in the ear

Cerumol has been shown in a double-blind clinical trial, as well as in twenty-five years of use in practice, to be the most effective substance for assisting in removing wax from the ear.

No wonder that Cerumol remains the most widely prescribed ear wax preparation.

- "Cerumol was found to be the only produce significantly more effective than the control . . . in facilitating ear syringing."
- "... there are no reports in the literature of *otitis* externa following the use of Cerumol, no cases have occurred in the present trial ..."

I. Laryng. & Otol. (1970) LXXXIV No. 10, 1055.

Constituents: an arachis oil base containing oil of turpentine, chlorbutol and paradichlorobenzene.

H-FAd

# Vertigo is an anxious business. Hence Vertigon.

The psychological aspects of vertigo can be critical. Anxiety can trigger the attacks.1 And the attacks intensify anxiety.2

That's why therapy must be aimed at both. That's why we've produced 'Vertigon'.

'Vertigon' is a powerful vestibular sedative with both anxiolytic<sup>3,4,5</sup> and antemetic

properties.6,7,8

It is effective during attack and can provide protection, too. Taken early or in stressful situations it should usually avert the active phase.

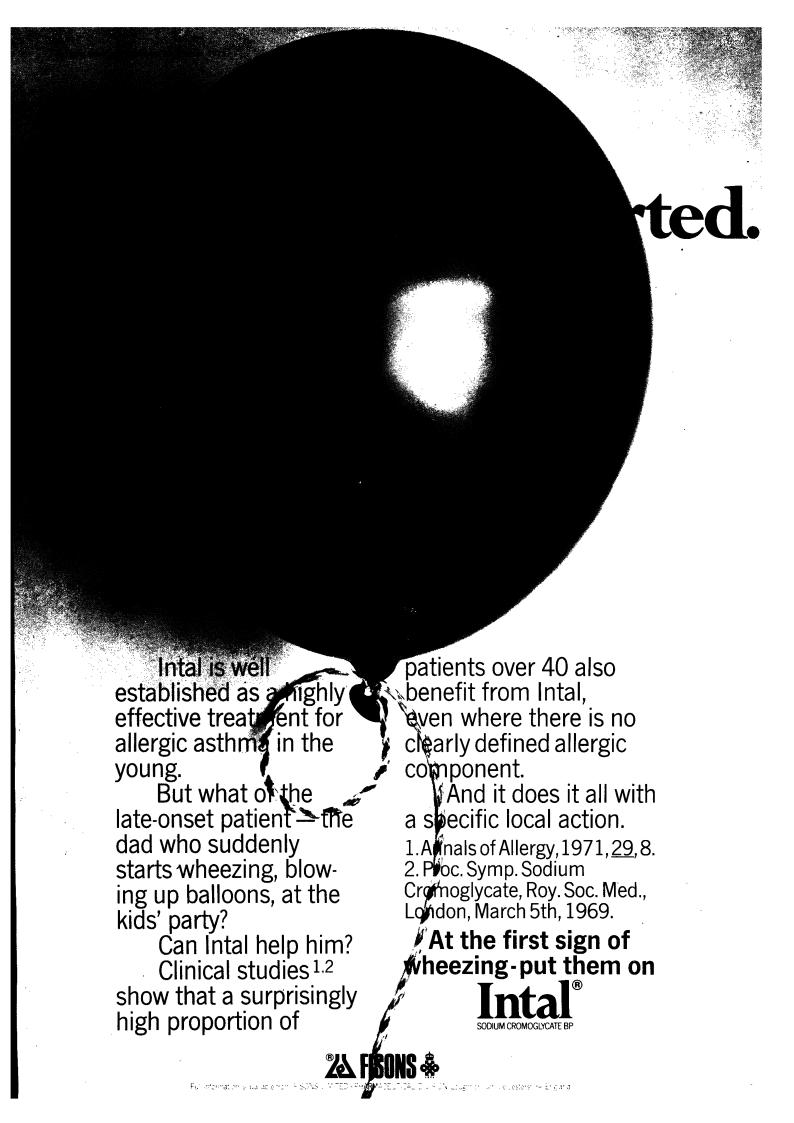

'Vertigon' is available as sustained-release 'Spansule' Capsules. It gives smooth, continuous, day-long control so there is steady drug release, less chance of break-through symptoms and fewer side effects.

'Vertigon' can be taken for long periods of time. 9,10 Further information available on request. References

# anti-inflammatory that your patients can stomach

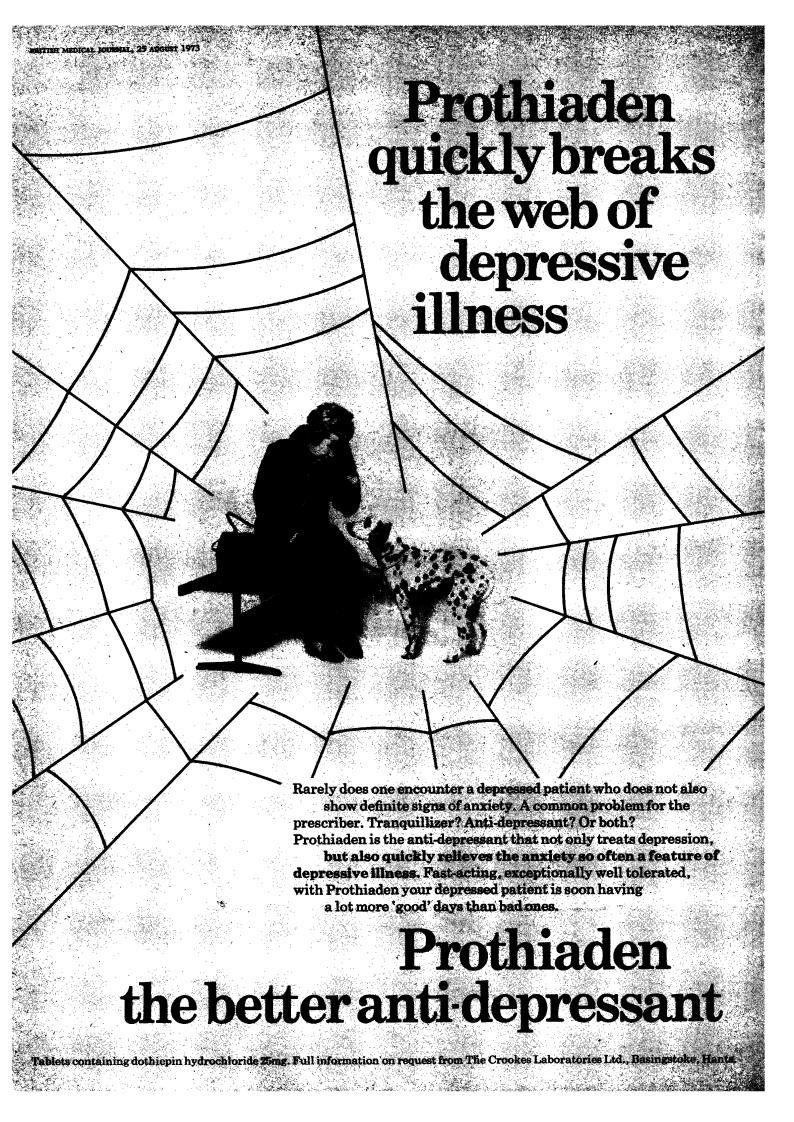

Powerful anti-inflammatory and analgesic action - without the gastric irritation that so often complicates therapy with aspirin and other anti-inflammatory agents. This is the principal advantage that Benoral Suspension now brings to the treatment of acute and chronic rheumatoid arthritis, osteo-arthritis and many forms of soft tissue (non-articular) rheumatism.

Moreover, because Benoral Suspension has a long duration of effect it allows a simple twice-daily regimen which controls swelling and pain and affords significant relief from night discomfort and early morning stiffness. Can any other anti-inflammatory offer so much?

# Benoral suspension

the powerful anti-inflammatory free from gastric irritation

# Senior **Medical Officer**

£6300-£7750

The Post Office, which employs over 400,000 people in its 4 businesses (Posts, Telecommunications, Giro and Data Processing), will have a vacancy in its Occupational Health Service for a Senior Regional Medical Officer in the London Telecommunications

35

The OHS has an establishment for 27 full-time doctors and 53 nurses, with many part-time doctors. Of these, 3 full-time doctors, 10 nurses and 5 part-time doctors are at present employed in the Region. The person appointed will be required to lead and motivate this team, advising as required on clinical and environmental health matters for about 55,000 staff. A sound knowledge of, and experience in, occupational health is essential. He should have initiative, a capacity for leadership, a mature personality, and should be able to form and maintain good relationships with staff at all levels. The possession of a DIH would be an advantage. Direct line responsibility is to the Regional Director, with professional responsibility to the Principal Medical Officer and Chief Medical Officer in Post Office Headquarters.

The starting salary will depend on experience and qualifications but will be within the range £6300 - £7750. For a leaflet giving details of the organisation, objectives and responsibilities of the occupational health service and an application form, please write or telephone (by reversing the call charge if you wish), quoting reference AM.701, to:

Miss L. Murden, Post Office Central Headquarters, 23 Howland Street. London W1P 6HQ. (01-631 2368).

The Post Office.

WEST MIDDLESEX HOSPITAL Isleworth, Middlesex

# **Deputy Area Medical Officers**

The Board are seeking able young doctors who are interested in making a career in occupational medicine. They should preferably be under thirty-five years of age and have some experience in one or more of the following specialities - chest diseases, casualty surgery, dermatology, community or occupational medicine.

The range of occupational hazards in the coal industry is wide and it is the Board's firm policy to improve progressively the working environment. The doctor's role in this work is a challenging one calling for competence both in clinical and preventive medicine. The Board's Medical Service is closely associated with the Institute of Occupational Medicine in Edinburgh, in the setting up of which the Board played the leading part.

Full training in occupational medicine will be given. In addition to close personal supervision of training within the mining industry programmed to meet individual needs, the Board will arrange for short study periods in other industries totalling one month in each of the first three years. It would be expected that candidates should obtain the Diploma in Industrial Health or some higher qualification in two years from appointment.

The appointment will be based on the Lancashire/Staffs. coalfield. The salary on appointment would probably be between £4,000 and £4,500 depending on age and experience, but the range extends up to £5,500. Promotion is based on ability.

Please write, quoting ref. AM.32, to the National Coal Board, Director of Staff Administration, Room 202, Hobart House, Grosvenor Place, London, SW1X 7AE.

This is a non-resident post of specialties are provided in conjunction the University of Sheffield and there is a formal teaching programme for the F.F.R. Applications of programme for the F.F.R.

# Radiological Services

The National Coal Board recognises the problem posed by dust exposure in coal mines and has intensive programmes on dust control, dust measurement and medical supervision. The medical programme includes periodic chest radiographs of all miners. Mobile and static X-ray units operate from bases in six coalfields; some 80,000 chest films are taken each year. In addition, work is undertaken for other industries with a potential dust problem, e.g. asbestos, pottery, foundry. It is planned to extend the medical programme and a young doctor is sought to join the present team of five in charge of these radiological services. He would in the first instance be employed in Yorkshire.

Applicants should have had experience in chest diseases or radiology and should have an interest in both. Training will be given in the radiological interpretation of industrial pulmonary disease. Association with local hospital services for chest diseases is encouraged. There is ample opportunity for research both in the clinical and epidemiological fields. Close liaison is, of course, maintained with the other doctors in the Board's Medical Service and there is opportunity for experience in the field of occupational health in general.

It is unlikely that the starting salary would be less than £4,500 per annum. The maximum of the range for this post is £5,500 but rises to £6,500 when full experience is gained.

Please write quoting ref. AM.31 to the National Coal Board, Director of Staff Administration, Room 202, Hobart House, Grosvenor Place, London, SW1X 7AE.

# PAROVEN®

# improves capillary flow

# Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with

meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of  $O-(\beta$ -hydroxyethyl)—rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

Further information is available on request. Zyma (UK) Ltd Godalming Surrey

Paroven is known as Venoruton in certain overseas markets

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

Brit J Clin Pract (1970) 23, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

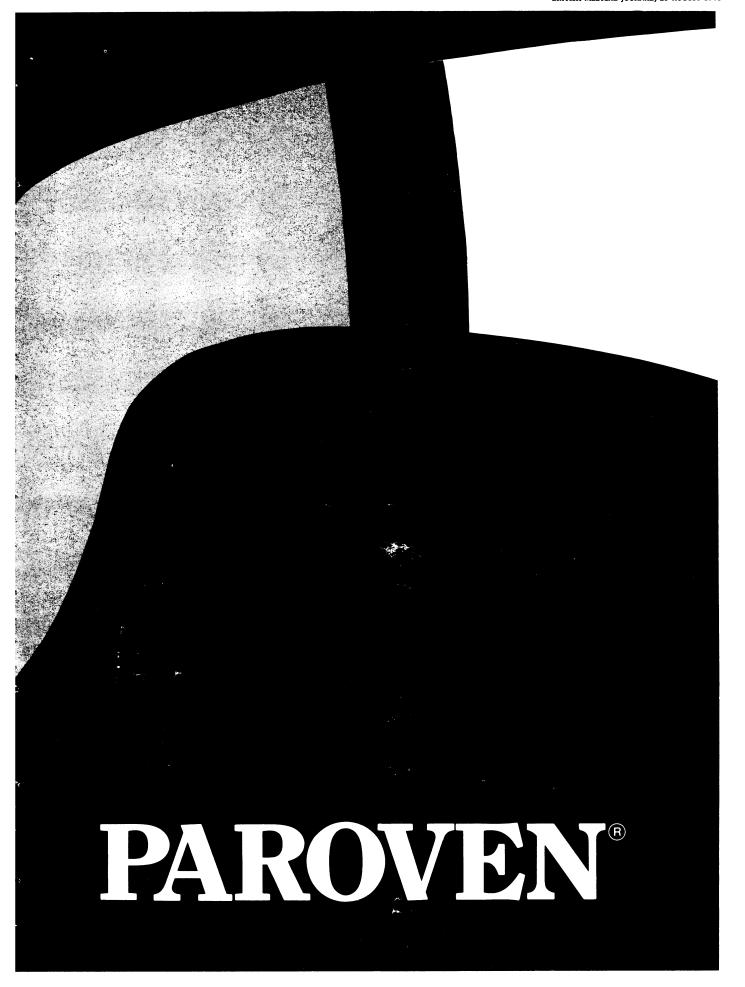

Brit J Clin Pract (1970) 23, 161

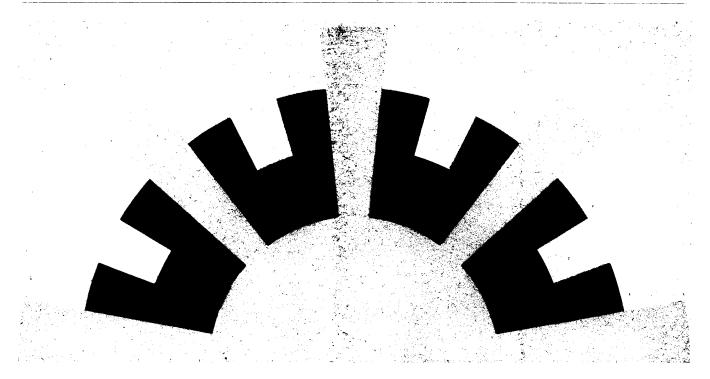

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

Brit J Clin Pract (1970) 23, 161

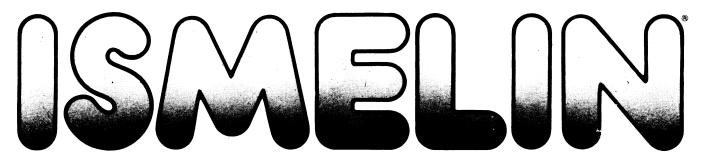

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."

Brit med J (1971) 2, 138
