NAPROSYN

Powerful in arthritis

Courtesy of Westminster Hospital

What is Naprosyn? Naproxen – a new non-hormonal anti-inflammatory agent with analgesic properties, indicated for the treatment of rheumatoid arthritis, osteo-arthritis and ankylosing spondylitis.

How powerful is it? Double-blind cross-over trials have shown 500 mg Naprosyn to be significantly superior to placebo and equivalent in clinical efficacy to 4 g aspirin and 150 mg indomethacin in rheumatoid arthritis; and to 100 mg indomethacin in osteo-arthritis. Open studies have shown that Naprosyn is highly effective in ankylosing spondylitis.

How does Naprosyn help the arthritic patient? The long half-life of 12–15 hours means that one 250 mg Naprosyn tablet in the morning and one in the evening is sufficient in most patients to provide sustained relief throughout the day and night. Morning stiffness and painful joints are relieved, and mobility and grip strength improved.

How is Naprosyn "kind to patients"? It is extremely well tolerated. Side-effects are less frequent on 500 mg Naprosyn than on 4 g aspirin and 100 mg and 150 mg indomethacin. Some studies have shown that the incidence of side-effects is not significantly different to that exhibited on placebo. Gastric disturbances, in particular, are rarely seen with Naprosyn. Objective tests such as gastroscopy have shown

Kind to patients

that Naprosyn causes minimal irritation to the gastric mucosa. Not least, patients find the twice daily dosage regimen more convenient. **How safe is it?** Doses of up to 3½ times the recommended dosage of Naprosyn (500 mg) have been administered to human subjects with no adverse reactions occurring.

Can Naprosyn be taken on an empty stomach? Yes. In a number of clinical trials Naprosyn was given on a fasting stomach without adverse effects being reported. Furthermore, absorption is not significantly affected by the presence of food or alkali.

At what stage should Naprosyn be used? Since Naprosyn is at least as effective as 4 g aspirin and 150 mg indomethacin, and has a remarkably low incidence of side-effects, it may be considered either as first line treatment or as an alternative for patients with chronic disease who are developing tolerance to, or are exhibiting side-effects on, other anti-arthritic drugs.

Are there any contra-indications? There are no known contra-indications although caution should be exercised during pregnancy.

Technical literature, symposia proceedings and full bibliography are available on request.

Beecham announce **BRIZIN**

a new treatment for Parkinsonism

Full details in the post to you now

In the past, the appearance of unpleasant side-effects has prevented many Parkinson patients from receiving anticholinergics at the most effective dosage.

Now Brizin offers these patients a chance of greater benefit. Clinical trials have shown that Brizin's effectiveness in controlling rigidity, tremor and akinesia is comparable to that of benzhexol. However, with Brizin the incidence and severity of dry mouth and psychotoxic effects such as hallucinations and confusion are markedly reduced.

To help you to assess Brizin we are sending you the full facts and clinical trial results, together with a clinical sample offer. We are sure that you will appreciate the kinder relief which Brizin offers to your Parkinson patients.

Dosage The usual adult dosage is 1 tablet (50mg) three or four times daily.

Side-effects Peripheral anticholinergic side-effects such as constipation, blurred vision and gastro-intestinal upsets may occur in some patients.

Precautions Brizin is not recommended in the first trimester of pregnancy. Administer with caution to patients with glaucoma or prostate hypertrophy.

Further information is available on request.

An important announcement for all doctors prescribing **Erythroped[®]**

As from October 1st all three strengths of Erythroped will be increased.

For children 0-2 years **Erythroped P.I.** is increased to 125mg./5ml.

For the 2-8 year olds **Erythroped** has been increased to 250mg./5ml.

And for those over 8 years old
Erythroped Forte has been increased to 500mg./5ml.

What this means in practical terms is that no longer do you have to consider whether to prescribe 4 or 6 times daily. Simply select the product by name according to age of patient and write it q.d.s.

Another advantage is that the new 500mg. Erythroped Forte is now eminently suitable for Geriatrics or any other adult who finds it difficult to swallow tablets.

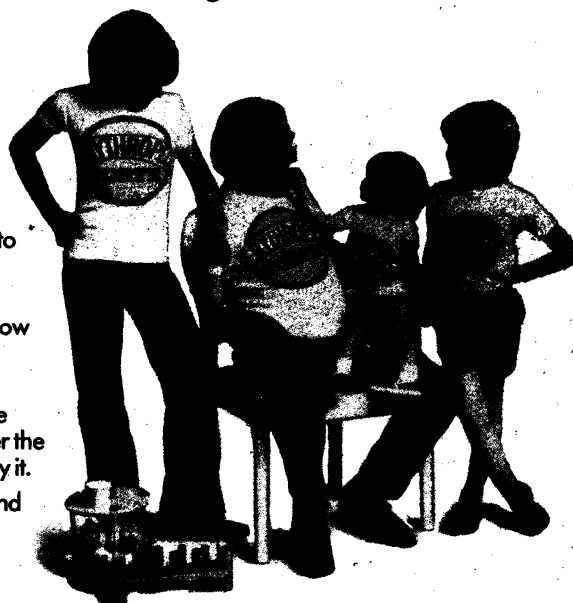

During October the Medicines Commission are allowing both the new and the old strength Erythroped to run side by side, however the new strength product will be dispensed against scripts that specify it.

Your Abbott representative will be able to answer any queries and will be able to tell you more about new strength Erythroped.

Psoriasis

After 8 days' treatment with clobetasol propionate

When the next patient presents with a psoriasis or eczema requiring a more effective steroid than has so far been available, take the opportunity to assess the merits of Dermovate yourself.

Dermovate contains clobetasol propionate, a new Glaxo steroid that has been the subject of clinical trials in over 1,100 referred patients with these conditions.

In psoriasis, a notably stringent test of topical steroid efficacy, thorough comparison with the modern steroids suggested Dermovate superior.

Dermovate also proved second to none in various other stubborn, inflammatory dermatoses.

So next time psoriasis or a recalcitrant eczema looks like becoming a clinical problem, why not put Dermovate to the test?

A sample and detailed information are available on request from:

Erythroped is the easy antibiotic. Easy for you to prescribe. Easy for parents to give. Easy for children—and old people—to take.

Erythroped is made in 3 strengths for 3 different age groups—the only children's antibiotic that is. We've increased the three strengths, so now Erythroped is even more effective. Simply prescribe them by name, according to the age of the child, q.i.d.

And the delicious cherry taste of Erythroped will ensure that all the treatment you prescribe gets taken.

You know exactly where you are with Erythroped. It's the antibiotic that makes life easier for everyone.

FALSE ALARM!

A person often experiences anxiety when it can serve no useful purpose. A signal originates in the amygdala (orange spot) and is transmitted into the body via the hypothalamus (red spot) and autonomic nervous system. In such cases, anxiety becomes a problem causing many difficult and unpleasant symptoms.

Nobrium relieves anxiety by a precise action on the amygdala—the source of anxiety. It also acts specifically on the hypothalamus to damp the transmission of anxiety into the body. The precise action is highly effective—relieving over 80% of patients—and causes few side-effects² as other parts of the brain are virtually unaffected.

There may be more to his insomnia than sleepless nights

'Tryptizol' can help to relieve the anxiety-depression that disturbs sleep.

Insomnia is one of the most frequent presenting symptoms of the anxiety-depressive syndrome. In addition to its antidepressant action, 'Tryptizol' has a rapidly apparent anti-anxiety effect. It can quickly relieve the sleep disturbance associated with depression, usually obviating the need for hypnotics. While the patient is encouraged by this early improvement, 'Tryptizol' can effectively treat other distressing symptoms of the illness, such as agitation, anorexia, lack of interest, and lowered mood.

Tryptizol[®]

Amitriptyline hydrochloride/MSD

a single solution to a dual problem

'Tryptizol' is supplied as tablets containing 10 mg, 25 mg, and 50 mg amitriptyline hydrochloride/MSD. The 50 mg tablet is especially convenient when a relatively large dose is prescribed at bedtime. 'Tryptizol' is also available as a syrup, and as an injection. Detailed information is available to physicians on request. R denotes registered trademark.

The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which

are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

Prothiaden quickly breaks the web of depressive illness

Rarely does one encounter a depressed patient who does not also show definite signs of anxiety. A common problem for the prescriber. Tranquillizer? Anti-depressant? Or both?

Prothiaden is the anti-depressant that not only treats depression, but also quickly relieves the anxiety so often a feature of depressive illness.

Fast-acting, exceptionally well tolerated, with Prothiaden your depressed patient is soon having a lot more 'good' days than bad ones.

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

Brit J Clin Pract (1970) 23, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

Brit J Clin Pract (1970) 23, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

Brit J Clin Pract (1970) 23, 161

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."

Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of O—(β -hydroxyethyl)—rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

Long established as the standard tranquillizing agent for a wide range of major psychoses, 'Largactil' is also a fitting therapeutic answer to the more minor neurotic and emotional disturbances so frequently encountered in general practice.

In particular, clinical experience over the years has amply demonstrated its efficacy in restoring calm and perspective wherever anxiety, tension or agitation hold sway. Its availability in a wide range of presentations means that treatment can in every case be precisely tailored to the needs of the patient and there are no significant side-effects or problems of addiction in recommended dosage.

When upper respiratory bacterial infection keeps a child from school, the gaps in his education tend to snowball. He can soon find himself falling behind.

That's why he needs 'Eskacef', fast.

'Eskacef' acts quickly, is strongly bactericidal, has high tissue penetration, and extremely low toxicity. Nephrotoxicity has not proved a problem, even in children. So you can hit the infection hard in the beginning, giving the child the best possible chance of recovery in the shortest possible time. 'Eskacef', paediatric suspension has a pleasant fruity flavour.

THE GLAXO VOLUME 25th Anniversary Lecture

PROFESSOR W. S. PEART, F.R.S., M.D., F.R.C.P., Director, the Medical Unit, St Mary's Hospital, Paddington, will speak on the subject "MEDICAL RESEARCH IS TOO IMPORTANT TO BE LEFT TO THE RESEARCHERS!" in the Main Lecture Theatre, the Royal Institution, Albemarle Street, London, on Thursday, 18th October, 1973 at 6.30 p.m. The lecture will mark the 25th anniversary of the founding of The Glaxo Volume.

PROFESSOR PEART will examine the postulate that the responsibility for the direction of medical research has shifted so far from the individual that development now depends on the creation of a bureaucratic superstructure which is the real "growth industry". He will inspect such topics as the historical development of ideas and their application; the conflict between the university as a centre of ideas or a technical shop; public accountability and the demands of society on medical and other researchers; and the role of the scientist-politician in the delicate balance between medical research and science and organisations, especially Government, that have a directional capacity.

ADMISSION BY TICKET (available from The Editor, The Glaxo Volume, 891 Greenford Road, Greenford, Middlesex, UB6 0HE) or at the door. (Coffee will be served at 6 p.m.). (28678) 4

COMMERCIAL APPOINTMENTS (See also p.xx)

Medical Management

UK & Overseas

from £6000+car

We seek two physicians with broad clinical experience and a strong sense of medical purpose—to take up a new challenge contributing directly to medical progress on an international scale.

The work will entail the medical management of a range of therapeutic products researched and developed by a well-known and respected ethical pharmaceutical company. The scope is far-ranging and varied, and includes:

- liaison with research scientists to plan the medical development of potential new therapeutic agents.
- organisation and critical assessment of medical trials conducted mainly in the UK, but also overseas (notably in Canada, South Africa, Australia, New Zealand and Scandinavia).
- careful evaluation of published papers and other reports on specific groups of medicines.
- supplying data to the department's information bank on these products, including details of any adverse reactions or side-effects.
- exercising medical judgement in relation to marketing and promotional activities.
- attendance at conferences and symposia to keep at the forefront of medical knowledge in the relevant product fields.
- lecturing to non-medical personnel on the medical aspects of the products.

Applicants should be within the age range 28–45 and possess a broad clinical and therapeutic knowledge, an alert mind, a positive attitude towards responsibility, challenge and hard work, and a successful career record to date. Knowledge of another European language, previous involvement in medical trials, or management experience in a group practice would be advantageous, but by no means essential.

The starting salary is likely to be around £6000 but could be substantially more for candidates of outstanding merit. Other major benefits include a car, free BUPA membership, free life, accident and disability insurances, contributory superannuation scheme, and generous financial assistance with relocation.

The successful candidates will work in pleasant offices at the Company's modern headquarters in outer London.

Please write in complete confidence for an application form, or phone if you would like to discuss the positions further:

and The Wessex
Regional Hospital Board**

Applications are invited for the post of
**SENIOR REGISTRAR
IN ANAESTHETICS**

in the Department of Anaesthetics at the Portsmouth Group of Hospitals and subsequently at the Nuffield Department of Anaesthetics, Oxford.

The appointment is a rotating one, initially at Portsmouth (where a maximum of two years may be spent) and subsequently at the United Oxford Hospitals, and is non-resident.

Applicants should be in possession of the F.F.A.R.C.S.

Both centres offer experience in Intensive Care and Thoracic Surgical anaesthesia in addition to general anaesthesia, and analgesia, and anaesthesia for the other surgical specialties. Neurosurgical anaesthesia and the other specialised aspects of anaesthesia will be included during the period at Oxford. There is a pain clinic at both centres and specialised renal work at Portsmouth.

The Nuffield Department of Anaesthetics is actively concerned with undergraduate and postgraduate teaching, running courses for both the Primary and Fellowship examinations and Senior Registrars are expected to assist with these and other teaching. The Department is actively engaged in research with which Senior Registrars may also be involved. Attendance at postgraduate meetings and courses is encouraged.

The content of the appointment as a whole will include those aspects of training recommended by the Faculty of Anaesthetists as being desirable for Higher Specialist Training.

The appointment falls vacant early in 1974. Candidates are invited to visit the respective hospitals by appointment.

ABERDEEN PSYCHIATRIC HOSPITALS

SENIOR HOUSE OFFICER/REGISTRAR

Applications are invited for posts of Senior House Officer/Registrar vacancies existing at both levels in the Training Scheme. On the satisfactory conclusion of a year as Senior House Officer, promotion to Registrar grade is usual. In co-operation with the University Department of Mental Health, courses of instruction for postgraduate qualifications in psychiatry are available and training in psychotherapeutic techniques can be arranged. Holders of the D.P.M. or equivalent may apply for participation, on a part-time basis. In the formal training programme for the Aberdeen University Diploma in Psychotherapy, instruction in Behaviour Therapy is also available and there are excellent medical library and research facilities. During the tenure of the Senior House Officer/Registrar post, rotation and secondment are arranged, primarily for training purposes.

Clinical duties are organized on the basis of teams led by consultants. The post is non-resident but will require occasional night duty in one of the units. The Group includes two Mental Hospitals, the Royal Cornhill and Kingseat, each providing comprehensive in-patient psychiatric services, the Regional Out-patient Centre (The Ross Clinic) providing consultative and emergency services, and a day hospital for adults with training and community orientation. Other special services within the Group include a Half-Way House, with Day Centre, an Industrial Therapy Unit in the Community and a Geriatric Day Hospital and a Domiciliary Treatment Service.

KING EDWARD MEMORIAL HOSPITAL FOR WOMEN Western Australia

CLINICAL PATHOLOGIST

Applications are invited from registered medical practitioners with an appropriate postgraduate qualification for the position of Clinical Pathologist.

The Hospital is the teaching hospital in Obstetrics and Gynaecology for the Medical School of Western Australia and also specialises in Neonatal Paediatrics. It is the major hospital in this State for the training of midwives and is situated 3 miles from the centre of Perth.

The Department of Pathology occupies a spacious and separate modern building which has well-equipped divisions of Biochemistry, Haematology, Serology, Microbiology, Cytopathology, Histopathology and Steroid Chemistry, all of which are under the overall control of the Director of Laboratory Services whose main interests are in Histopathology and Cytopathology.

It is intended that the appointee will take responsibility for, and be mainly concerned with, the modern development of the divisions of Biochemistry, Haematology and Serology for which he must have special qualification. Participation in other areas of his interest would be welcomed.

Salary will be paid within the range of \$11,738 to \$19,255, with the commencing point dependent upon qualifications and experience. Further particulars can be obtained by writing to the Director of Laboratory Services.

Applications, giving full personal particulars, qualifications, experience, names and addresses of three referees, and enclosing a recent photograph, close with the undersigned on Monday, 5th November, 1973. R. L. Hutchinson, Administrator, 374 Bagot Road, Subiaco, Western Australia 6008. (28756)

S.H.O. Appointments

£5400

Roan Consolidated Mines in Zambia offers attractive one-year SHO appointments to doctors who have completed at least their pre-registration year.

The appointments will provide excellent experience in well equipped hospitals, with good opportunities for training in general and tropical medicine, paediatrics, surgery or anaesthetics. Such experience will be gained in a professionally stimulating and congenial atmosphere with all the advantages of a superb climate and outdoor recreation.

The curative medical services which RCM provides for its employees and their dependants are based on modern hospitals at three main centres on the copperbelt of Zambia. The medical staff consists of 30 doctors, including those with higher qualifications working and teaching in their specialised fields.

Salary will depend on experience and

qualifications but total emoluments including bonus and gratuity will not be less than the equivalent of £5,400 p.a. — at current rates of exchange. Contracts exceeding one year are optional or initial contract may be extended by agreement. Benefits will include ■ return passages ■ baggage allowance ■ tax free settling-in allowance ■ low rental housing ■ use of company vehicle ■ paid leave which accrues at the rate of 55 days per annum and, where applicable ■ tax free children's education and travel allowances.

Immediate interviews are offered but because of documentation procedures it will be about four months before the men appointed will take up their duties in Zambia.

Please telephone 01-606 8800, ext. 303, or write in the first instance giving concise details of qualifications and experience and indicate field or fields of clinical interest, quoting reference AM.726, to:

MUCODYNE[®] IS MUCODYNAMIC

Electrophoretic pattern of mucus typical of chronic bronchitis — sialomucin content is low

Same patient after 10 days treatment with Mucodyne — proportion of sialomucins is greatly increased.

reverses pathological changes in mucus composition.

One of the reasons mucus becomes sticky is that under pathological conditions the relative proportions of such constituents as sialomucins are altered. One of the reasons MUCODYNE is so effective in clearing mucus congestion is that it can reverse these changes. By achieving this and also reducing inflammation in the respiratory mucosa, MUCODYNE is able to remove sticky mucus 4 days faster* than bromhexine. This mucodynamic approach to the problem of chest trouble thus brings your patient relief much earlier than would have otherwise been expected.

**reduces hyperplasia of the respiratory mucosa.

Otitis media isn't child's play

It needs effective treatment
—and quickly.

Otherwise chronic otitis media, with deafness and continual discharge, can be the legacy in later life.

Ceporex Syrup containing cephalixin, a broad spectrum antibiotic with a success rate of 94% in acute otitis media,* is the treatment to choose.

Cephalexin destroys most of the organisms which cause otitis media, including *H. influenzae*, the pathogen most commonly encountered in young children.

And children experience the very minimum of distressing side effects with Ceporex Syrup—the safe answer to a troublesome condition.

Ceporex Syrup overcomes otitis media

Are your bronchodilators getting through to the patient?

Intal is well established as a highly effective treatment for allergic asthma in the young.

But what about the late-onset patient with obstructive airways disease?

Once an asthmatic attack has started, an aerosol bronchodilator may not give adequate relief. It may only reach part of the lung, resulting in hyperventilation where it's least needed and little or no effect in the obstructed area.

Can Intal prevent this situation arising?

Clinical studies^{1,2} show that a surprisingly high proportion of patients over 40 benefit from Intal, even where there is no clearly defined allergic component.

Stemetil

"... a tranquillizer of
distinct value ..."¹

Prompt, positive restoration of calm without drowsiness or any dulling of mental powers. For the worried patient who must continue to cope with daily routine 'Stemetil'* brings significant benefits indeed.

As a highly efficient tranquillizer with well-known antinauseant properties too, 'Stemetil' rapidly breaks the stranglehold of anxiety, fear and tension and provides immediate control of associated physical symptoms.^{1,2}

As an anxiolytic that calms and relaxes with no adverse effects on alertness or thinking powers,³ 'Stemetil' successfully relieves an incapacitating condition without producing incapacitation of a different kind.

'Stemetil' is effective in low dosages, causes few, if any, problems of tolerance and carries no risk of habituation. It makes good economic sense too, treatment costing on average just 2p per day.

Any similarity between Burinex and other diuretics is purely beneficial (and so are the differences.)

Different in Chemistry

Burinex* is a new chemical entity, being derived from metanilamide; it is quite distinct from any available diuretic. Despite careful search by such techniques as autoradiography, it has not been possible to detect any metabolite in the human.

Different in Pharmacology

Burinex differs in pharmacological potency, with a dose about one-fortieth that of any other short-acting diuretic. After oral administration, diuresis normally begins at 30 minutes – "peaks" at 90 minutes and is largely complete within three hours.

Beneficial in Effect

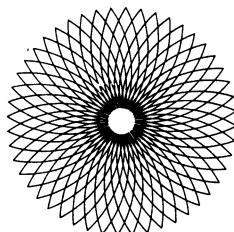

Burinex has been shown to be of value in clinical practice, not only for the seriously ill patient where a rapid diuresis is required but also for maintenance, where the predictable effect can be utilised to fit the patient's domestic circumstances and work routine. During long term treatment Burinex has proved to be very well tolerated.

Beneficial in Price

The price of Burinex is significantly less than any comparable diuretic. The long term use of Burinex would therefore represent a considerable saving in cost.
