## Powerful in arthritis

## Kind to patients

Courtesy of Westminster Hospital

Naprosyn is a powerful non-steroidal anti-inflammatory agent with analgesic properties, for the treatment of rheumatoid arthritis, osteo-arthritis and ankylosing spondylitis. Naprosyn significantly reduces morning stiffness, relieves painful joints, increases mobility and improves grip strength. Naprosyn is well tolerated.

### NAPROSYN round-the-clock action in rheumatoid and osteo-arthritis

#### Prescribing Information

Presentation: NAPROSYN (naproxen) is a new and unique non-steroidal anti-inflammatory agent, developed by Syntex Research. It is unrelated to salicylates, the corticosteroid hormones, or to other anti-inflammatory compounds now in use. It is presented as a yellow half-scored tablet containing 250mg of naproxen, inscribed NAPROSYN on one side, and SYNTEX on the other.

Indications: NAPROSYN is indicated for the treatment of rheumatoid arthritis, osteo-arthritis (degenerative arthritis) and ankylosing spondylitis.

NAPROSYN has been shown to have striking anti-inflammatory properties when tested in classical animal test systems. In addition, it has marked analgesic and anti-pyretic actions. It exhibits its anti-inflammatory effect even in adrenalectomised animals, indicating that its action is not mediated through the pituitary-adrenal axis. It inhibits prostaglandin synthetase, as do other non-steroidal anti-inflammatory agents. As with other agents, however, the exact mechanism of its anti-inflammatory action is not known.

Dosage and Administration: The recommended starting dose (and usual maintenance dose) of NAPROSYN is 250mg twice daily, usually given with the morning meal and about 12 hours later. Dosage adjustment within the range of 375mg to 750mg daily, maintaining twice-daily administration, may be required for long-term maintenance.

As safety and efficacy studies in children are not yet complete, the product is currently not recommended for use in children under 16 years of age.

Contra-indications: There are no known absolute contra-indications.

Special Precautions and Warnings: NAPROSYN has been found to be well tolerated by patients exhibiting dyspepsia with other similar agents. Nonetheless episodes of gastro-intestinal bleeding have been reported in patients with NAPROSYN therapy. NAPROSYN should be given under close supervision to patients with a history of gastro-intestinal disease.

Due to the high plasma protein binding of NAPROSYN patients simultaneously receiving hydantoins, anti-coagulants or a highly protein-bound sulphonamide should be observed for signs of overdosage.

Occasional skin rashes and angio-oedema have been reported. Patients who have exhibited aspirin hypersensitivity in the past (usually as the angio-oedema/asthma

syndrome) may exhibit the same phenomenon on NAPROSYN. The following additional occurrences have been reported with NAPROSYN but a causal relationship to NAPROSYN has not been established: abdominal discomfort, epigastric distress, headache, inability to concentrate, insomnia, thrombocytopenia, tinnitus, vertigo.

Sporadic abnormalities in laboratory tests (e.g. liver function tests) have occurred in patients on NAPROSYN therapy but no definite trend was seen in any test indicating toxicity.

Teratology studies in rats and rabbits, at dose levels equivalent on a human multiple basis to those which have produced foetal abnormality with certain other non-steroidal anti-inflammatory agents, e.g. aspirin, have not produced evidence of foetal damage with NAPROSYN. As with other drugs of this type NAPROSYN produces delay in parturition in animals. The relevance of this finding to human patients is unknown. However, good medical practice indicates minimal drug usage in pregnancy, and use of this class of therapeutic agents requires cautious balancing of possible benefits against potential risks to the mother and foetus.

Overdosage: Should a patient ingest a large number of NAPROSYN tablets accidentally or purposefully, the stomach may be emptied and usual supportive measures employed. Animal studies indicate that the prompt administration of activated charcoal in adequate amounts would tend to reduce markedly the absorption of the drug.

Pharmaceutical Precautions: Protect from light.

Legal Category: To be supplied on prescription only.

Package Quantities: NAPROSYN is supplied in canisters of 250 tablets. (N.H.S. Price £17.50).

Further information. In addition to the excellent therapeutic efficacy demonstrated by NAPROSYN in comparative clinical trials, good tolerance has been demonstrated, even in patients exhibiting multiple intolerance to other commonly used non-steroidal anti-inflammatory agents.

Product Licence Number PL/0286/0031B (NAPROSYN is a registered trade mark).

*And now a logical development—  
new for the control of nasal symptoms  
in allergic rhinitis*

## **Beconase NASAL SPRAY**

- ☐ Provides fully effective control of nasal symptoms
- ☐ Employs a convenient and accurate drug delivery system
- ☐ Is free from the risk of systemic steroid side effects
- ☐ Reduces or obviates the need for antihistamines or topical vasoconstrictors and can eliminate the burden of sedative side effects and rebound congestion
- ☐ Consequently improves the quality of life for the patient with seasonal or perennial allergic rhinitis

Allergic rhinitis whether seasonal or perennial is a prevalent disease problem affecting a large number of people. Current drug treatments in the form of oral antihistamines and topically applied vasoconstrictor solutions are often not fully effective or are associated with a high incidence of unwanted side effects notably drowsiness and rebound congestion.

Oral or parenteral corticosteroid preparations are the most effective treatments for allergic rhinitis but, as in asthma, clinicians are reluctant to prescribe them because of the serious systemic side effects that may occur.

Beclomethasone dipropionate administered by metered-dose aerosol is now known to be as effective in asthma as systemic corticosteroids without causing their side effects. Administered intranasally as Beconase Nasal Spray it has been shown to be extremely effective in the control of seasonal and perennial allergic rhinitis again without causing the systemic side effects commonly occurring with corticosteroids.

"The effect of a daily dose of 400 mcg beclomethasone dipropionate aerosol intranasally has been investigated in a double-blind cross-over trial in 29 patients with hay fever. The effect on nasal symptoms was so pronounced in 25 patients that further symptomatic treatment was unnecessary."

(*Brit. med. J.*, 1973, 4, 464)

### **PRESCRIBING INFORMATION**

**Indications.** Beconase is indicated for the prophylaxis and treatment of perennial and seasonal allergic rhinitis, including hay fever.

**Dosage and Clinical Use.** The recommended maximum dosage is one application into each nostril, four times daily. Not for use in children.

Beconase is only for intranasal use. Other treatment may sometimes be necessary to control eye symptoms.

The effect of Beconase is not immediate and this should be explained to the patient. Full therapeutic benefit requires regular therapy.

**Side Effects.** No major side effects attributable to Beconase have been reported but occasionally sneezing attacks have followed immediately after use of the aerosol.

**Contra-Indications.** There are no specific contra-indications to the use of Beconase.

**Precautions.** Infections of the nasal passages and paranasal sinuses should be appropriately treated but do not constitute a specific contra-indication to treatment with Beconase.

Care must be taken while transferring patients from systemic steroid treatment to Beconase if there is any reason to suppose that their adrenal function is impaired.

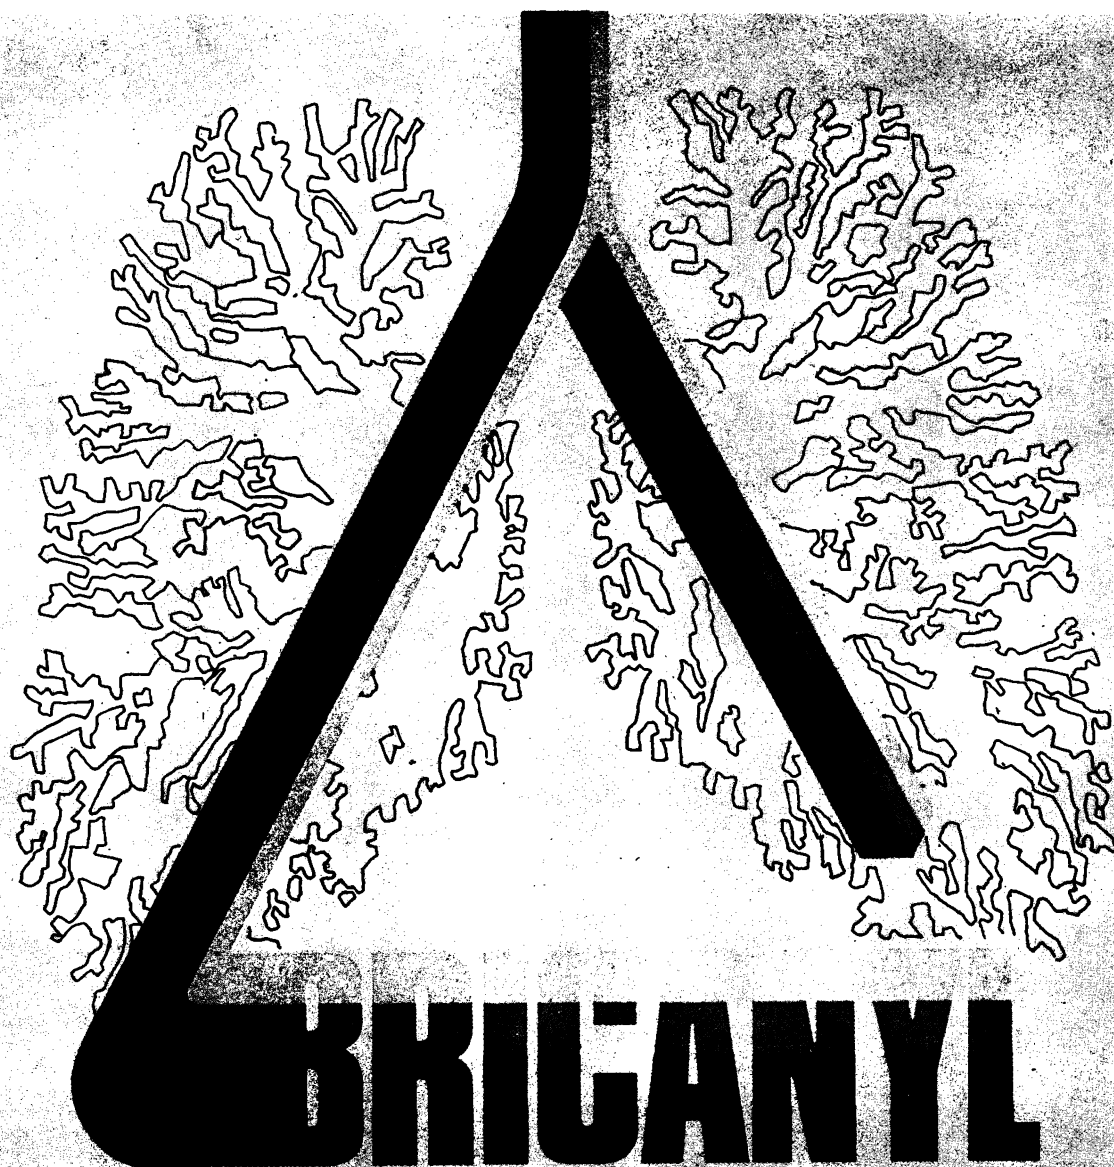

Unnecessary administration of drugs during the first trimester of pregnancy is undesirable.

**Presentation.** Beconase is a metered-dose aerosol which delivers 50 mcg of beclomethasone dipropionate BP per actuation into a specially designed nasal applicator. Each canister of Beconase provides 200 sprays.

To give more flexibility of dosage, LANOXIN-125\* (0.125mg digoxin) tablets have been introduced in addition to the 0.25mg tablet, 0.0625mg PG tablet, PG Elixir and Injection.

## The Consistent Digoxin

"Reports from several countries have shown wide variation in absorption between different brands of tablets and even between different batches of the same brand."<sup>1</sup>

The one word that controls—reliably—the amount of digoxin you wish your patients to receive is LANOXIN.\* LANOXIN presents digoxin of consistent bioavailability,<sup>2</sup> both tablet-to-tablet and batch-to-batch.

The consistent release of digoxin from LANOXIN helps you ensure that the degree of digitalisation does not vary from dose to dose.

# 'Orudis' in arthritis

## Optimal efficacy and tolerance now further confirmed by two new studies

### Activity equal to that of phenylbutazone

"... in 47 patients with osteoarthritis of the hip, it has been shown that there is little to choose in efficacy between ketoprofen ['Orudis'] 200mg daily and phenylbutazone 300mg daily ... Side-effects were mild..."<sup>1</sup>

Comparative clinical studies with indomethacin<sup>3</sup> and ibuprofen<sup>4</sup> have already shown that 'Orudis' affords both significant therapeutic effect and low toxicity in the treatment of arthritis.

### Tolerance markedly superior to that of aspirin

"... a trial with gastroscopic examinations has allowed the adoption of the hypothesis that the new anti-inflammatory product ketoprofen ['Orudis'] is better tolerated by the gastric mucosa than acetylsalicylic acid..."<sup>2</sup>

The latest comparisons with two further widely prescribed agents provide additional cogent evidence of its ability to meet the criteria for optimal drug management.

## **The pressure problem**

**Raised intra-colonic pressure** due to excessive segmentation. This leads to the formation of diverticula when pressure builds up in an occluded segment.

**Raised intra-abdominal pressure** due to straining to evacuate the resulting concentrated stools. This may lead to the formation of haemorrhoids when pressure on the pelvic diaphragm occludes the venous return from the haemorrhoidal plexus.

## A NEW PERSPECTIVE IN MODERN SURGERY The 'URSK-7' ultrasonic apparatus

Designed in the Soviet Union, the "URSK-7" apparatus eliminates the need to introduce into bone and soft tissue any type of metal structure that necessitates further surgery for its removal.

It also enables welding of transplants to be carried out, reproduces bone tissue from bone fractions to fill up cavities in bone, and performs fine plastic surgery. The use of this apparatus ensures quick and efficient connection of bone fragments. When used for ultrasonic bone cutting there is also the added advantages of minimum traumatism and the ability to reach places difficult of access. The "URSK-7" has proven particularly invaluable for surgery on children.

## Are asthmatic attacks ruining her lungs?

Asthmatic attacks can damage lungs.

Sometimes the bronchioles lose their elasticity, the ability to expel phlegm is impaired and there is increased risk of infection.

Sometimes the alveoli themselves may suffer damage.

Aerosol bronchodilators can help, but only when the attack is under way, and there may already be damage.

Only Intal prevents the attack and eliminates these problems.

With Intal, there is no danger of side effects, no risk of misuse and no diminution of therapeutic effect.

# Some patients stay on barbiturates until the day they die

Every day in Britain three patients die after deliberately taking overdoses of barbiturates – a total of over 1,000 every year<sup>1</sup>

Virtually all of these patients could have been transferred to Mogadon, which is much safer<sup>2</sup> but just as effective against insomnia<sup>3</sup>

The patients may still have tried to kill themselves. But with Mogadon few, if any, would have succeeded

### CORONARY HEART DISEASE, THE MYOCARDIUM AND THE CARDIAC CELL: RECENT ADVANCES

will be held on

11th, 12th and 13th December 1974

at

The Royal College of Physicians, London

The aim of the Symposium is to present the very latest and the controversial aspects of coronary heart disease, the myocardium and the cardiac cell. Contributions will be by experts in their own fields and there will be maximum opportunity for free and informed discussion, including panels.

Topics will include the pathogenesis and immunology of coronary heart disease, its treatment by drugs, diet and the control of risk factors, studies of cardiac function by non-invasive and invasive techniques, including particularly coronary arteriography, the present position of exercise testing, cardiac metabolism and cellular biology, and the application of methods in nuclear medicine involving isotope techniques. The present position and future prospects of both elective and emergency cardiac surgery in coronary heart disease will be fully considered in the light of the natural history of the disease, its precise diagnosis, and the evaluation of myocardial function, with emphasis on current results, and of alternative treatment. All aspects of coronary care will be debated in a special session devoted to the report of the Joint Working Party of the Royal College of Physicians of London and the British Cardiac Society.

Speakers will include members of the staffs of both organisations and invited speakers from the United Kingdom and overseas. The symposium has been arranged by Professor John Goodwin and Dr. Lawson McDonald.

**SYMPOSIUM ON  
THE MODERN TREATMENT  
OF STROKE**

The Stroke Unit, Lightburn Hospital, Glasgow  
24th and 25th October, 1974

How do you treat a stroke?

What methods of examination are worthwhile?

How do you evaluate language deficit?

Can strokes be prevented?

What do you do about the blood pressure?

Should you use anticoagulants, or vasodilators?

Does rehabilitation achieve anything?

Is speech therapy any good?

Has electronics anything to offer?

How do you prevent relapses?

Do the patients ever recover?

What happens to them after they leave hospital?

Do we need a stroke service?

Shouldn't we all be doing something about it?

These are some of the questions to be dealt with at the Symposium. The discussions will be led by the medical staff at the Unit, the non-medical members of the rehabilitation team, and distinguished visiting experts. Presentation will be by clinical demonstration, panel discussion and face-to-face interview, and audience participation will be strongly encouraged.

The course has been approved for General Practitioners under Section 63 of the Health Services and Public Health Act, 1968. For others the course fee is £10.

## GENERAL PRACTICE TRAINING POSTS

### UNIVERSITY OF BRISTOL

#### VOCATIONAL TRAINING FOR GENERAL PRACTICE

Applications are invited for a three year traineeship in Vocational Training for General Practice, consisting of two years hospital and elective training and one year traineeship in an approved practice.

After a short period of orientation of not more than three months in the training practice, trainees will start hospital appointments at S.H.O. level in a Bristol hospital; six months each in Medicine and Obstetrics with Gynaecology are offered, followed by two three-month periods in Paediatrics and Geriatrics. The remaining six month period in hospital will be partly or wholly elective, when opportunities will be given to gain experience in special hospital, and other, departments. The trainee will complete the year in practice before or after this elective period. There will be a half-day release course during University term time throughout the three years, which will contain a special extended course in Psychiatry.

The period of orientation should start in December 1974 and the first hospital appointments will start on 1st February, 1975.

Applications from suitably qualified practitioners should give details of previous experience, the names and addresses of two referees, and quote a date when they would anticipate being able to start the preliminary orientation period in practice. Applications should be sent before 31st August, 1974.

It may be possible also to assist practitioners wishing to complete requirements for vocational training, who have already in part fulfilled the necessary criteria. The course is recognized for the Vocational Training Allowance and by the R.C.G.P. for their membership examination.

Applications and requests for further information should be sent to: The Adviser in General Practice, Medical Postgraduate Department, 21 Woodland Road, Bristol BS8 1TE. (23600) 21

## COMMERCIAL APPOINTMENTS

# Opportunities in Clinical Research c.£6000-£6500+car

One of the world's leading ethical pharmaceutical companies, with a strong research base in the UK and a wide range of new and established therapeutic products, is expanding its clinical research programme. There are currently opportunities for two registered medical practitioners who may be at quite different stages of their own personal and career development.

These are key opportunities as the successful candidates will work in close association with research scientists in many other disciplines, and will make a real contribution to the planning and management of specific research projects.

They will have particular responsibility for maintaining close liaison with physicians and research workers outside the company, for planning, initiating and coordinating clinical trials in different centres, and for evaluating and presenting the results. Publication of research findings and attendance at medical meetings is encouraged.

The candidates we seek may currently be:  
in hospital work at the registrar or senior registrar level  
or in an academic appointment  
or in a progressive general practice  
or already within the pharmaceutical industry.

They may be male or female, and any age between 28 and 45. They must, however, be keenly interested in therapeutics and in a

career within the pharmaceutical industry. In addition, each will possess an active and keen mind, a flair for lucid expression, a positive attitude towards responsibility, challenge and hard work, and a successful career record to date. A higher qualification would be particularly advantageous, but is not essential.

In addition to a starting remuneration level of about £6,000 to £6,500 (or even more for an exceptional candidate), there are many additional benefits. These include a Company car, free life assurance, generous pension scheme, a pleasant geographical location in Southern England, and extensive financial assistance towards removal and re-establishment costs.

## SENIOR HOUSE OFFICER

in the Psychiatric Division of the Basingstoke District Hospital.

Many young doctors looking for a house job early in their careers would shy away from psychiatry, but it could be a good idea, particularly if you want to enter general practice.

Surveys of the workload in general practice have shown that up to 30% of patients consulting their practitioners have primary psychiatric problems and that in another 30% emotional difficulties are a prominent secondary factor.

So why not consider working for your D.P.M. or M.R.C.Psych. at a modern psychiatric hospital with a big new District General Hospital in its grounds? Set in the beautiful Hampshire countryside on the outskirts of Basingstoke New Town (2 miles) it is served by a frequent bus service, an excellent fast train service to Waterloo (45 minutes) and is only 50 miles to London on the new M3 motorway.

Besides general clinical psychiatry the hospital (1,100 beds) has a variety of interesting special units: Alcoholic, Mother and Baby, Psychiatric Intensive Care plus a rapidly expanding Community Psychiatric Nursing Service. It shares an active Postgraduate Education Centre with the District General Hospital, runs regular weekly Case Conferences and grants generous Study Leave to doctors attending the Wessex School of Psychiatry for the courses in the D.P.M. and M.R.C.Psych. The hospital also has its own Social Club and besides the usual varied sporting activities boasts an excellent nine-hole Golf Course whilst Basingstoke itself has one of the best sports centres in the country.

Resident posts with single or married accommodation available. Application forms can be obtained from Personnel Department, 'Uplands', Aldermaston Road, Basingstoke, Hants. Tel: 29908. (23542) 84-8

# DUBAI ARABIAN GULF

Dubai is a thriving port and commercial centre at the southern end of the Arabian Gulf. The medical services provided by the Government are developing rapidly: the Rashid Hospital (393 beds) opened in 1973 and is expanding its facilities. In 1974, 5 new primary care clinics are to be opened, providing both preventive and curative medicine for the surrounding population. Doctors working in the clinics will have access to laboratory, X-ray and other investigative facilities. A postgraduate medical education programme is under way and there is a small library.

Applications are invited for the undermentioned posts:—

## CONSULTANT PSYCHIATRIST

**Qualification:** M.R.C.Psych. or equivalent.

**Language:** Fluency in Arabic is essential.

**Duties:** To be head of the new acute psychiatric unit and to advise on the development of the psychiatric services.

## CONSULTANT/SPECIALIST E.N.T. SURGEON

**Qualifications:** F.R.C.S. or equivalent. If no appointment is made in the Consultant grade, an appointment may be made in the lesser grade, for which the F.R.C.S. will still be required, but less experience will be acceptable.

M2X/720926/BG

## SPECIALIST PAEDICTRICIAN

**Requirements:** D.C.H. plus 5 years experience in paediatrics. The post involves duties in the paediatric and neonatal units, and in an outpatient clinic. Knowledge of Arabic is desirable.

## MEDICAL OFFICER — DUBAI DEFENCE FORCE

A Medical Officer is required for Dubai Defence Force. He will act as a Regimental Medical Officer and will be responsible to the Commander for health and hygiene in the Force. The applicant should be fluent in Arabic: he should have had some military experience in addition to his medical experience. The conditions otherwise are similar to "Medical Officers" below.

## MEDICAL OFFICERS (MALE AND FEMALE)

Medical Officers normally work in the outpatient clinic where they see a wide variety of acute and chronic disease,

both physical and mental. They have access to diagnostic facilities in the hospitals, and to specialists for advice. The work load is very reasonable and allows ample time for a good standard of primary medical care. Off-duty is generous: there is time for study.

**Requirements:** Applicants should have broad general training and should have experience in general medicine, paediatrics or psychiatry. Knowledge of dermatology, E.N.T. or, in the case of female doctors — gynaecology, would be an asset. Preference will be given to those whose mother tongue is Arabic or those who have a working knowledge of spoken Arabic.

**Conditions:** 2 year contract renewable. Free housing with hard furnishings. Free air conditioning, electricity and water. Air passages at beginning and end of contract, and for leave, to place of domicile. Car allowance. There is no income tax in Dubai.

**Emoluments:** (£1 sterling — Dirhams 9.45 subject to fluctuation).

**Consultants:** Salary: DH 6,250 x 250(7) — 8500 per month. Leave: 56 days after 12 months service. M2X/720926/BG

**Specialists:** Salary: DH 5,200 x 250(7) — 6,600 per month. Leave: 42 days after 12 months service. M2X/720926

**Medical Officers:** Salary 3,600 x 200(7) — 5,000 per month. Leave: 42 days after 12 months service.

(Placing in all grades is according to qualifications and experience).

Application forms and further details may be obtained from Crown Agents, 4 Millbank, London SW1.

All other enquiries should be addressed to: Dr. A. L. Honeyman M.B., M.R.C.P., Director of Health and Medical Services, Post Box 4545, Dubai, Arabia Gulf.

Interviews will be held in London in August. (23911)118

**Medical  
Officer**

£5,700 — £6,800

**The National Diamond Mining Company  
(Sierra Leone) Limited**

The Company has two well-equipped hospitals serving a population of over 4,000 employees and their families. The Medical Officer will be required to work in all of the hospital departments.

The ability to do emergency surgery is essential.

An interest in midwifery and anaesthetics is a decided advantage.

The conditions of work are excellent; rent free fully furnished accommodation (including cutlery, crockery, bedding, etc.), free medical attention (dependants are also covered under the B.U.P.A. scheme), and generous children's education allowance. Sporting amenities include tennis, squash, swimming, cricket, golf and rugby football.

The basic starting salary is negotiable but an inclusive commencing emolument within the range £5,700 — £6,800 is envisaged. Salaries are reviewed annually.

Tours of duty consist of 12 months followed by 12 weeks leave on full salary. Passages are paid for the doctor, his wife and children up to 18 years of age.

Mr D. J. Beake, of Sierra Leone Selection Trust Limited, Mason's Avenue, London EC2V 5BU, (01-606 6000 Ext. 327), would be pleased to receive applications from interested doctors who are asked to give, in confidence, brief particulars of age, qualifications, experience and availability. ## NEW GEL

In dyspepsia, hiatus hernia, flatulence, the pain, discomfort and distress are all associated with drugs or food and its digestion.

Asilone means protection, Gel means palatability: the combination means fewer patient problems and fewer treatment problems. What better combination could there be?

# NEW-ASILONE® GEL

## extends the range of Asilone protection

Each 5ml contains the equivalent of polymethylsiloxane 125mg, aluminium hydroxide 420mg and magnesium oxide 70mg. Further information is available on request.

In vaginitis/vaginal discharge  
you want the right answer, right away

9 times out of 10  
we have the  
perfect  
arrangement

Nine times out of ten 'Flagyl Compak' is the "perfect arrangement" for immediately prescribable, highly successful treatment of vaginitis. Even when, clinically, the nature of the infection is unclear.

Immediately prescribable because nine times out of ten the probability is trichomoniasis, candidiasis or both<sup>1,2</sup>— and 'Flagyl Compak' supplies the answer to each. 'Flagyl' for "TV" Nystatin for "thrush." The two for the two together.

Highly successful because nine times out of ten 'Flagyl Compak' supplies a fully effective answer. Each agent has a cure rate of 98 per cent.<sup>3,4</sup> Both can produce cure in just one week.

In vaginitis, even when there's uncertainty, could anything be surer—right from the start?

Further information available on request  
'Flagyl' and 'Compak' are trade marks of May & Baker Ltd
