

The first live mumps vaccine.

Prevention of mumps is now possible with only one subcutaneous injection of 'Mumpsvax'. And if the pattern of antibody response to 'Mumpsvax' seen over the last six years persists, this will provide a basis for expectation that immunity will be permanent.

Side effects are uncommon, and soreness is unlikely at the injection site.

- * 'Mumpsvax' is presented as a single-dose vial with a disposable syringe.
- * 'Mumpsvax' induces protective antibodies in practically all non-immune recipients.
- * No significant side effects reported in studies which included more than 200 adult males.
- * Adequate antibody levels, with continuing protection against mumps, have persisted for six years without substantial decline in children vaccinated with 'Mumpsvax'.
- * There have been no reports of the transmission of mumps from vaccinated patients to susceptible contacts.

To help avoid the discomfort, the inconvenience—and the possibility of complications

MUMPSVAX®

Mumps Virus Vaccine, Live, MSD Jeryl Lynn Strain

'Mumpsvax' is supplied in a single-dose pack containing one 0.5 ml vial of lyophilised vaccine and one disposable syringe containing diluent. More detailed information is available to physicians on request.

This is what we call practising medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first eighteen months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta, Gibraltar and Mauritius, with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Hong Kong and Singapore. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £4,099, rising to £4,249 after four years.

On the other hand, if you are older (up to the age of forty) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £5,161, rising to £5,658.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to Surgeon Commander L.C. Banks, R.N., (724BU9) Department of the Medical Director General (Naval), Empress State Building, Fulham, London SW6.

Osternilk Complete Formula for contented doctors, nurses and mothers.

Osternilk Complete Formula, our new low-solute milk-food for babies, has now become the fastest growing baby milk-food in the country.

Clinical trials have clearly shown that babies on this Osternilk are 'more contented'; they get more prolonged satisfaction between feeds, suffer less from regurgitation and severe wind and are less likely to have loose stools. Also, there is a considerable decrease in napkin rash.

Doctors have been quick to recognise the advantages of the new formula. The lower phosphorus content virtually eliminates the risk of hypocalcaemia and possible neonatal tetany. The low solute content reduces the chance of hypernatraemic dehydration. And the inclusion of carbohydrate as maltodextrin helps to overcome the problems of lactose intolerance.

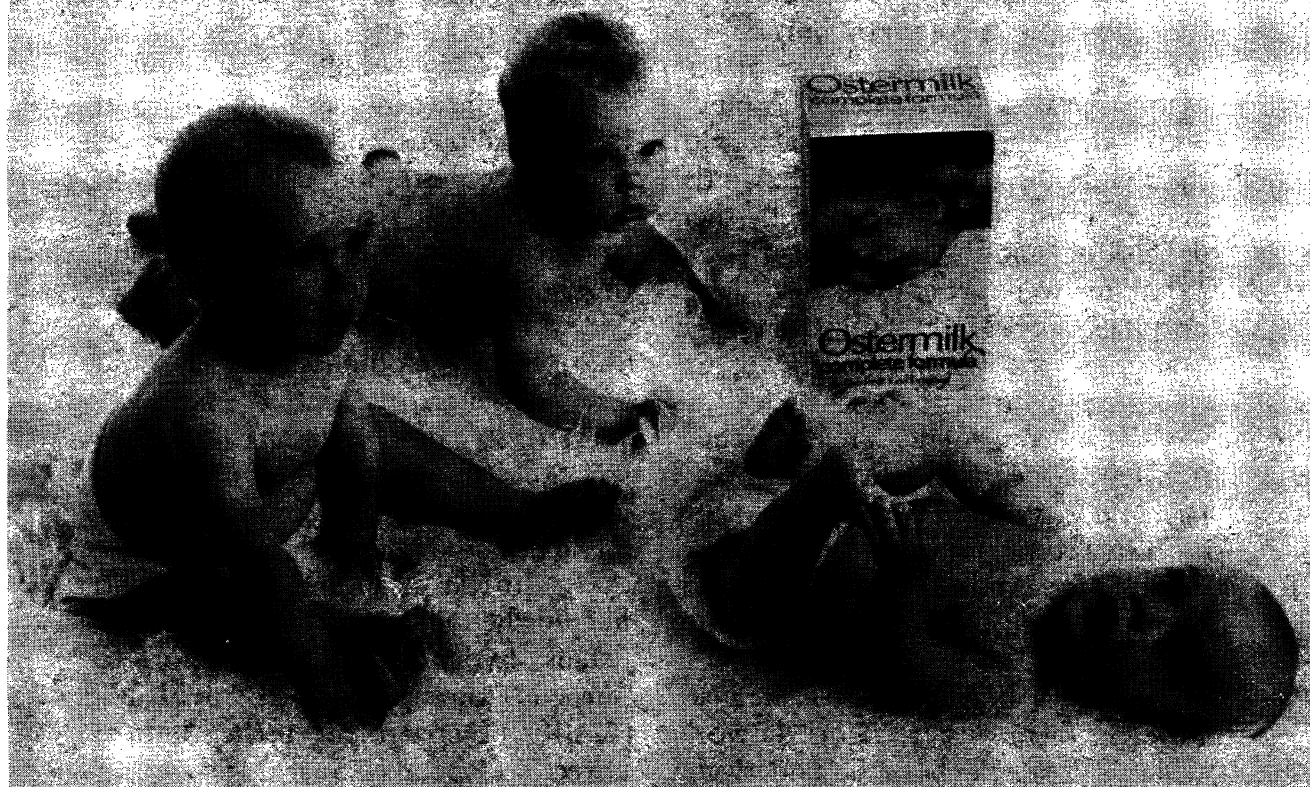

Nurses, too, benefit from the new formula as it is available for hospital use in its ready-prepared form.

Osternilk Ready-to-Feed milk-food for babies. This system provides individual sterilized feeds in disposable glass bottles. So nursing staff spend less time with preparation and are more free to care for mothers and babies.

Out of hospital, mother finds Osternilk Complete Formula, in its powder form, very quick and easy to prepare as it can be mixed in the bottle. She doesn't even have to add sugar. It really is complete.

We're sure that the increasing number of hospitals and mothers now using our new Osternilk will lead to many more contented babies. And a great deal of satisfaction, too, among all those concerned with infant feeding and care.

By the end of the day he'll know why you chose Nobrium.

Most people who need tranquillizers also need to work or run a home, so they should remain alert.

Nobrium can provide tranquillity without undue sedation. It has a specific, precise action on the amygdala which leaves most other parts of the brain virtually unaffected.

Nobrium "...is an anxiolytic agent to be given throughout the day,

particularly in the treatment of out-patients with duties in productive employment.... It is a medication with a strikingly low component of sedative action coming close to being the ideal anxiolytic for daytime use."

'Orudis' in arthritis

Optimal efficacy and tolerance now further confirmed by two new studies

Activity equal to that of phenylbutazone

"... in 47 patients with osteoarthritis of the hip, it has been shown that there is little to choose in efficacy between ketoprofen ['Orudis'] 200mg daily and phenylbutazone 300mg daily ... Side-effects were mild..."¹

Comparative clinical studies with indomethacin³ and ibuprofen⁴ have already shown that 'Orudis' affords both significant therapeutic effect and low toxicity in the treatment of arthritis.

1 *Rheumatol. and Rehabil.*, (in press), 1974

2 *Scand. J. Rheumatol.*, (in press), 1974

Tolerance markedly superior to that of aspirin

"... a trial with gastroscopic examinations has allowed the adoption of the hypothesis that the new anti-inflammatory product ketoprofen ['Orudis'] is better tolerated by the gastric mucosa than acetylsalicylic acid..."²

The latest comparisons with two further widely prescribed agents provide additional cogent evidence of its ability to meet the criteria for optimal drug management.

DALMANE

A new and powerful treatment for insomnia

Getting to sleep

Clinical trials¹⁻³ have shown that Dalmane cuts the time taken to get to sleep by half; reducing it from an average of 36.2 to 13.9 minutes in one trial¹ and from 63.4 to 27 minutes in another.²

Staying asleep

Trials^{1,2,4} have shown that Dalmane patients enjoy a longer night's sleep with fewer nocturnal awakenings. Dalmane has increased the average night's sleep by 65 minutes⁵ and 93.3 minutes⁶ and in a third trial to an average of over 8 hours.¹

Patient preference

The low incidence of side-effects such as hangover with Dalmane is undoubtedly one reason why many patients prefer it.⁷ In one study⁸ Dalmane produced exactly the same incidence of hangover as placebo.

Safety

Dalmane, a non-barbiturate, has a high mean lethal dose in mice and rats,⁹ suggesting that overdosage would be unlikely to present undue problems of management or threat to life. Human toxicity studies¹⁰ in which healthy men were given large doses of Dalmane for some time confirmed that it is well tolerated.

Before one bad thing leads to another

Bacterial throat infections in children, but particularly in babies, can be a cause for anxiety to everyone concerned.

And you'll want to make sure that the treatment you prescribe will prevent the condition turning into something worse . . . such as otitis media, with a possible legacy of impaired hearing; or a chest infection.

Ceporex is an ideal antibiotic because studies have shown that cephalexin is more effective in streptococcal pharyngitis than penicillin V and

ampicillin¹, and its broad spectrum and rapid bactericidal action ensures excellent cover for possible complications. Fever quickly subsides, with relief of irritation, discomfort and pain.

Ceporex, with recorded success rates of 97% in tonsillitis/pharyngitis, 94% in acute otitis media and 92% in unspecified ENT infections² has minimal side effects and is outstandingly safe for babies.

PAROVEN[®]

improves capillary flow

Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with

meals or by slight adjustment of dosage. There are no known contra-indications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of O—(β -hydroxyethyl)—rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

Further information is
available on request.

Paroven is known as Venoruton in certain overseas markets

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

Brit J Clin Pract (1970) 23, 161

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

Brit J Clin Pract (1970) 23, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile."

Brit J Clin Pract (1970) 23, 161

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."

- More comprehensive relief.
Mucodyne creates conditions conducive to the removal of sticky mucus, by acting upon the fibrillar protein-polysaccharide network basic to pathologically viscous mucus. In so doing Mucodyne brings about a reduction in the size and number of mucus producing cells.
- More effective relief.
By restoring more normal conditions, Mucodyne removes sticky mucus without the problem of rebound secretion seen with expectorants.
- More rapid relief
Mucodyne removes sticky mucus fast—response is seen often within 48 hours.*

Fybogel

the new therapeutic solution for the treatment of pressure diseases of the large bowel

**DIVERTICULAR DISEASE
IRRITABLE/SPASTIC COLON
HAEMORRHOIDS
ANAL FISSURE**

These are the pressure diseases of the large bowel — a wide range of conditions with a common aetiological factor: low level of fibre in the diet.

The pressure problem

Raised intra-colonic pressure due to excessive segmentation. This leads to the formation of diverticula when pressure builds up in an occluded segment.

Raised intra-abdominal pressure due to straining to evacuate the resulting concentrated stools. This may lead to the formation of haemorrhoids when pressure on the pelvic diaphragm occludes the venous return from the haemorrhoidal plexus.

Fybogel — the natural solution

By providing a natural fibre regimen Fybogel treats the main cause of pressure diseases — a low level of dietary fibre. Fybogel is a controlled regimen, presented as granules in single dose sachets. The granules disperse in water to make a palatable drink.

Full information is available on request from:
Reckitt & Colman Pharmaceutical Division,
Hull HU8 7DS.
Each sachet contains 3.5g Ispaghula Husk BPC in an effervescent base.

Glaxo

Occupational
Health Doctor
ULVERSTON

Due to the retirement later this year of the Doctor at the company's Ulverston factory, we are seeking a replacement.

The Doctor is a member of the Management team and is responsible to the Factory Manager but has functional relationship on professional matters with the company's Chief Medical Officer who is situated at Greenford, Middlesex.

The position offers a variety of interesting work where previous experience in occupational health would be an advantage. We are looking for a well qualified doctor prepared to work 5 part days per week; the hours are negotiable with a minimum of 20 hours. The position could possibly be combined with a hospital appointment locally. The position heads a well-established and equipped department and is staffed by a full-time qualified nursing staff and backed by a team of first-aiders.

The factory is a major antibiotic manufacturing plant operating; a full shifts system and employing a total staff of about 1800.

Salary in line with BMA Recommendations with annual review. The conditions of employment are commensurate with the standing of the company in the industry. Participation in the company's Pension Scheme may be arranged. Assistance with relocation expenses is available.

Ulverston is a pleasant market town situated just South of the Lake District National Park.

Interested persons should write with full details to: The Senior Personnel Officer, (EWM), Glaxo Laboratories Limited, Ulverston, Cumbria. (24781) 24

**Head of
Medical Division**

The continued growth and expansion of Allen & Hanburys Research Limited, which is a major subsidiary of Glaxo Holdings Limited, is such that a senior appointment is to be made in the Medical Division.

Reporting to the Medical Director, the man appointed will be responsible for a team of Doctors and Clinical Trials Officers involved with the evaluation of new compounds in man, including human and clinical pharmacology. Current research areas include bronchial asthma and joint disease, as well as the cardio-vascular system.

Applications for this post are invited from registered Medical Practitioners with considerable experience in general medicine; a higher medical qualification, with appropriate medico-scientific expertise would be advantageous.

Initial salary will be for negotiation, and will reflect the seniority of the appointment. In addition, a Company car will be provided, and fringe benefits are those normally associated with a major organisation. Assistance with costs of relocation are available if necessary.

Please write briefly in the first instance, quoting ref. 468/AM to:

Dr. D. M. Harris,
Medical Director,
Allen & Hanburys Research Ltd.,

UNIVERSITY OF NOTTINGHAM Medical School

TWO SENIOR LECTURESHIPS OR LECTURESHIPS

will be vacant in the Department of Human Morphology as from 1st October, 1974. One of these posts arises as the result of the promotion of the present incumbent to a Chair in another centre; the other arises as a result of the planned expansion of the Medical School which will increase its student intake from October, 1975.

The Department moves into the new Medical School/University Hospital complex during the academic year 1974/75. New accommodation has been designed to take account of and facilitate teaching and research in modern functional and applied, including living, anatomy. The Department is primarily concerned with the training of medical undergraduates and postgraduates. In addition, courses are provided for various groups of medical ancillary workers.

Research is currently proceeding in fields of neurology, endocrinology, skeletal growth and developmental disorders, histochemistry, tissue culture, haemo-lymphoid system and cell kinetics with special reference to the alimentary tract, A.A. and A.B. research, ranging from cell structure to topographical, including neuro-anatomy and embryology are taught as components of integrated-system courses, or as a basis for physical examination and disorders of man. Successful applicants will be expected to contribute in the fields of teaching and research.

Applicants should either be medical graduates or graduates in veterinary medicine or biological sciences, with experience in medical or veterinary anatomy or related fields, such as cytology, histology, etc. The Department has close links with a number of clinical units and disciplines and chances for collaborative work are very good. A number of posts in the Department are joint ones with clinical disciplines.

Salary will be within the appropriate scale with membership of F.S.S.U. The starting salary will be dependent on qualifications and experience.

Application forms and information on conditions of service may be obtained from the Senior Assistant Registrar, The Medical School, University of Nottingham, Nottingham NG7 2RD. Further information on the Department and its current and planned future activities may be obtained from Professor R. E. Coupland at the same address (24926)

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

Are asthmatic attacks ruining her lungs?

Asthmatic attacks can damage lungs.

Sometimes the bronchioles lose their elasticity, the ability to expel phlegm is impaired and there is increased risk of infection.

Sometimes the alveoli themselves may suffer damage.

Aerosol bronchodilators can help, but only when the attack is under way, and there may already be damage.

Only Intal prevents the attack and eliminates these problems.

With Intal, there is no danger of side effects, no risk of misuse and no diminution of therapeutic effect.

Put them on Intal.
Give them a fighting chance.
