## Cardiovascular Disease in the Tropics

Edited by A. G. Shaper, M. S. R. Hutt, Z. Fejfar

Cardiovascular disease is a major problem in many developing and tropical countries and this collection of essays by 36 members of the *International Society of Cardiology* draws attention to the fascinating and complex situation in the tropical world. The book presents the present state of knowledge regarding many conditions previously thought to be peculiar to the temperate and developed countries and also deals with those disorders peculiar to the tropical situation. The differences in geographic distribution and natural history of many cardiovascular problems between temperate and tropical countries provide unique opportunities for research into the nature of these problems. The book is intended not only for doctors and students in tropical countries but for cardiologists, physicians, pathologists and epidemiologists everywhere, who are concerned with the international problem of cardiovascular disease. It provides an up-to-date review suitable both for clinical and epidemiological work and for further research into these disorders.

## Medicine in a Tropical Environment

Edited by A. G. Shaper, J. W. Kibukamusoke, M. S. R. Hutt

*Medicine in a Tropical Environment* is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. The book should stimulate the interest of students, doctors, and non-medical scientists in trying to solve some of the problems raised in almost every chapter. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

# 'Orudis' in arthritis

## Optimal efficacy and tolerance now further confirmed by two new studies

### Activity equal to that of phenylbutazone

"... in 47 patients with osteoarthritis of the hip, it has been shown that there is little to choose in efficacy between ketoprofen ['Orudis'] 200mg daily and phenylbutazone 300mg daily ... Side-effects were mild..."<sup>1</sup>

Comparative clinical studies with indomethacin<sup>3</sup> and ibuprofen<sup>4</sup> have already shown that 'Orudis' affords both significant therapeutic effect and low toxicity in the treatment of arthritis.

1 *Rheumatol. and Rehabil.* (in press), 1974

2 *Scand. J. Rheumatol.*, (in press), 1974

### Tolerance markedly superior to that of aspirin

"... a trial with gastroscopic examinations has allowed the adoption of the hypothesis that the new anti-inflammatory product ketoprofen ['Orudis'] is better tolerated by the gastric mucosa than acetylsalicylic acid..."<sup>2</sup>

The latest comparisons with two further widely prescribed agents provide additional cogent evidence of its ability to meet the criteria for optimal drug management.

# When menstruation occurs do young girls want your help?

**Your requests  
for 28,000  
charts  
indicate they do.**

Adolescence is nowhere near as frightening when young girls are prepared for it. And preparing them for menstruation is simplified when you use the illustrated charts and booklets provided free by Tampax Limited. The coloured charts, prepared by R. L. Dickinson, M.D., graphically help them to understand the changes taking place in their bodies. These charts are laminated in plastic for permanence and suitable for grease pencil marking and erasure. The booklets – one for beginning menstruants, the other for older girls – tell them what menstruation is – and how easily they can adjust to it normally and naturally.

In just five years, more than 28,000 charts and 400,000 booklets have been requested by doctors and nurses to prepare youngsters for menstruation – and to help dispel the fears that made them think of menstruation as the "curse".

The Tampax tampon embodies a number of distinctive features to provide the utmost in menstrual protection. Designed for intravaginal use, it is softly compressed for efficient absorption and maximum comfort. It's placed in correct position hygienically by means of a satin-smooth container-applicator, prelubricated to facilitate insertion. It expands in three dimensions for complete protection. Its removal cord is chain stitched, for safety, to the entire length of the tampon. Both tampon and applicator are readily disposable in the toilet.

Because Tampax tampons are worn internally, there's no irritation, no chafing, no embarrassing menstrual odour. And for sports-active girls, particularly swimmers, tampons are a must.

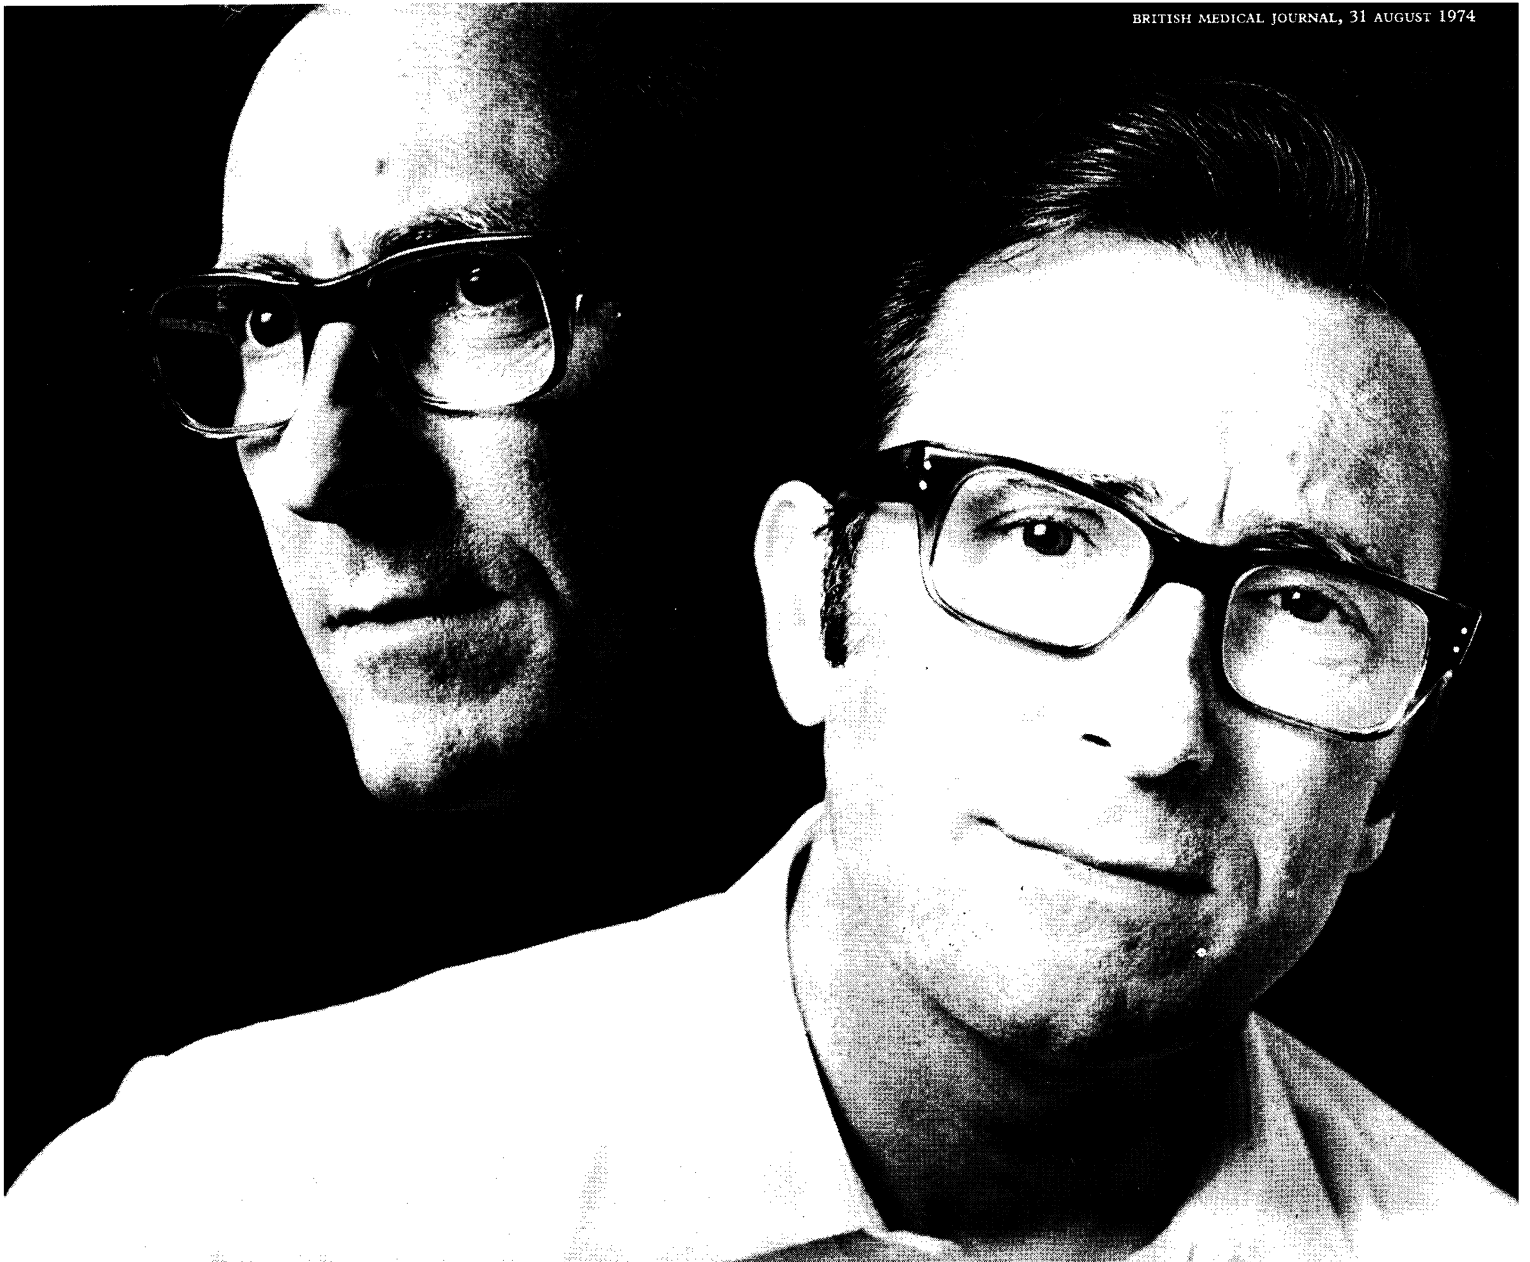

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

Please order your charts and booklets by writing to the address below.

# Uncle Jim is Cousin Fred

When lack of concentration appears in old age, the problem is often likely to be of organic origin. In particular, the patient may even confuse 'who is who' in her family—as well as suffer simpler lapses of short-term memory. Lucidril can end this confusion by an action that does not depend on improving the blood supply to the brain.

Lucidril gets the deteriorating brain

working again. Firstly, it stimulates the metabolism of the brain, probably through different pathways. Secondly, it removes the lipofuscin pigments which are a concomitant of old age and which may impair cellular metabolism.

Lucidril thus improves mental function; as a recent clinical paper has pointed out:

"These preliminary results (with

Lucidril) are encouraging, because they indicate that the intellectual impairment exhibited by such patients may be reversible, even when the underlying causes are presumably of an organic nature, such as cerebral arteriosclerosis."

Most therapeutic agents work well in urinary tract infections, and Amoxil is no exception.

But, quite apart from its effectiveness, Amoxil is a better routine because it has six other virtues with which no other treatment can fully compare.

**1. Patient-proof** Amoxil is taken t.d.s. – breakfast, teatime and bedtime – and the patient doesn't have to remember to take it on an empty stomach.

**2. Economical** Apart from the antibacterial sulphenamides, Amoxil is the cheapest antibiotic for

urinary tract infections.

**3. Safety** Penicillin safety allows you to prescribe with confidence in pregnancy or where pregnancy would be a disquieting possibility (there are more than 10 million women of child-bearing age in the United Kingdom).

**4. Better tolerated** A remarkably low incidence of side-effects with less rash and diarrhoea than ampicillin.

# AMOXIL

# better routine

5. Bactericidal Amoxil eradicates bacteria, rather than merely inhibiting their growth.

6. Effective concentrations – in the blood, urine, kidney and tissue ensure rapid resolution of infection.

# INTRODUCING LANOXIN-125

To give more flexibility of dosage, LANOXIN-125\* (0.125mg digoxin) tablets have been introduced in addition to the 0.25mg tablet, 0.0625mg PG tablet, PG Elixir and Injection.

## The Consistent Digoxin

"Reports from several countries have shown wide variation in absorption between different brands of tablets and even between different batches of the same brand."<sup>1</sup>

The one word that controls—reliably—the amount of digoxin you wish your patients to receive is LANOXIN.\* LANOXIN presents digoxin of consistent bioavailability,<sup>2</sup> both tablet-to-tablet and batch-to-batch.

The consistent release of digoxin from LANOXIN helps you ensure that the degree of digitalisation does not vary from dose to dose.

Minimise the risks to your digitalised patients, particularly when they leave hospital:

## MULTIPHASIC HEALTH TESTING THE 'CURE-ALL' FOR ADMINISTRATIVE BOTTLENECKS?

On the 23/24th September we are running a two-day intensive educational course on Multiphasic Health Testing (MHT).

The course is designed to help Doctors, administrators and management level personnel in hospitals to get to grips with this extremely important development in information gathering and retrieval systems. It will also prove invaluable to engineers and scientists involved in the development of health care systems.

The course deals with the basics of MHT. How it streamlines automated medical examinations. Makes greater use of your paramedical staff. And gives you *accurate* information on patients in a fraction of the time it's taking now.

On course completion you will be conversant with the terminology of MHT, and be familiar with the various types of systems and equipment currently available.

Your course lecturer is J. PETER WEIL, President and Founder of the American Health Corporation. He was responsible for the design of the American Health Corporation system, as well as for the operation of the Health

Maintenance Centre. Currently, Mr Weil is the Financial Officer of the American Health Corporation, and in charge of Systems Development, Systems Sales and Facility Management Activity.

Currently the American Health Corporation, which was created by six of America's leading corporations, is operating two medical examination centres, and is developing a major Paediatric and Adult Medical Centre for Jersey City. The American Health Corporation is both an operator and supplier of medical systems.

Mr. Weil attended the University of Connecticut and has a BSc in Electrical Engineering and an MSc in Electrical Engineering.

For registration details please contact: Bob Millar on 01-930 7344 for registration information and course fee.

# University of Birmingham and West Midlands Regional Health Authority Vocational Training Schemes for General Practice

There are several places available to  
suitable applicants for three year  
vocational training in general practice  
(two years in hospital and one year in  
practice).

Schemes have been carefully organised  
throughout the region (which includes  
Herefordshire, Shropshire, Staffordshire,  
Warwickshire and Worcestershire) and  
there is a central coordinating point in  
Birmingham to ensure some flexibility,  
total suitability and acceptance of all  
posts for MRCPG, DCH DOBstRCOG  
and other examinations.

Additionally care will be taken in  
providing a comprehensive training  
involving all specialties and including  
regional and local meetings during the  
two hospital years. Close contact with  
local GP trainers will be arranged by  
clinical tutors and RCGP tutors  
throughout the three years. During the  
years training in a teaching practice a  
half day release course is provided for all  
trainees during the three University  
terms. Some adjustment in the three year  
period may be allowed for previous  
experience.

Posts at SHO level. Vacancies being  
filled shortly.

Applications naming two referees,  
stating age, sex, qualifications, previous  
experience and aspirations in the content  
of the course and area or hospital groups  
of preference to the Clinical Tutor in the  
appropriate Postgraduate Centre or to  
the Regional Adviser in General Practice,  
146, Hagley Road, Birmingham B16 9PA  
as soon as possible.

UNIVERSITY OF NOTTINGHAM  
Medical School

Applications are invited from registered medical practitioners for the post of MEDICAL RESEARCH FELLOW in the Department of Therapeutics (Professor M.J.S. Langman). The successful applicant for this post, which is supported by the Nuffield Foundation, will work on the mechanisms of metabolic handling of clinically important drugs. There will be ample opportunity to work for a higher degree by thesis within the new departmental laboratories established at the City Hospital, Nottingham, which can be visited by arrangement (Nottingham 603268). The successful applicant will also participate in the general clinical work and teaching of the Unit.

Initial salary will be within the University Clinical Lecturer scale between £3,117 and £3,582 per annum, according to qualifications and experience, with membership of F.S.S.U.

For further details and an application form, please write to the Senior Assistant Registrar, Medical School, University of Nottingham, University Park, Nottingham NG7 2RD, to whom applications should be returned by the 16th September, 1974. (24905) 25

## CLINICAL INTERVIEW PROJECT

## RESEARCH OFFICER

Applications are invited from registered medical practitioners for the post of Research Officer in a 3 year project to study clinical and behavioural aspects of doctor-patient encounters.

The person appointed will lead a small team which will also include a social scientist, a technician and a full-time secretary. He will be responsible to a steering group from the Departments of General Practice, Education and Audio-Visual Aids. He will develop and implement a research policy, collaborate with other clinicians in hospital and general practice and be concerned with day-to-day operation of the project.

Applications will be considered from doctors who have completed or are about to complete vocational training for general practice or those in other relevant clinical disciplines who have behavioural as well as clinical interests.

Salary is in the range of £3,900—£4,300 with F.S.S.U. Further particulars may be obtained from Professor J. Knox, Department of General Practice, The University of Dundee, and applications should be submitted by 31st October, 1974. (25084) 25

UNIVERSITY OF NOTTINGHAM  
Medical SchoolTWO SENIOR LECTURESHIPS  
IN LECTURESHIPS

will be vacant in the Department of Human Morphology as from 1st October, 1974. One of these posts arises as the result of the promotion of the present incumbent to a Chair in another centre; the other arises as a result of the planned expansion of the Medical School which will increase its student intake from October, 1975.

The Department moves into the new Medical School/University Hospital complex during the academic year 1974/75. New accommodation has been designed to take account of and facilitate teaching and research in modern functional and applied, including living, anatomy. The Department is primarily concerned with the training of medical undergraduates and postgraduates. In addition, courses are provided for various groups of medical ancillary workers.

Research is currently proceeding in fields of neurology, endocrinology, skeletal growth and developmental disorders, histochemistry, tissue culture, haemo-lymphoid system and cell kinetics with special reference to the alimentary tract. All aspects of anatomy, ranging from cell structure to topographical, including neuro-anatomy and embryology are taught as components of integrated-system courses, or as a basis for physical examination and disorders of man. Successful applicants would be expected to contribute in the fields of teaching and research.

Applicants should either be medical graduates or graduates in veterinary medicine or biological sciences, with experience in medical or veterinary anatomy or related fields, such as cytochemistry. The Department has close links with a number of clinical units and disciplines and chances for collaborative work are very good. A number of posts in the Department are joint ones with clinical disciplines.

Salary will be within the appropriate scale with membership of F.S.S.U. The starting salary will be dependent on qualifications and experience.

Application forms and information on conditions of service may be obtained from the Senior Assistant Registrar, The Medical School, University of Nottingham, Nottingham NG7 2RD. Further information on the Department and its current and planned future activities may be obtained from Professor R. E. Coupland at the same address. (24926) 25

UNIVERSITY OF LIVERPOOL  
Department of Medicine

Applications are invited for the post of LECTURER IN GENERAL PRACTICE (Special Appointment) in the Department of Medicine.

The initial salary will be within the range £4,044—£5,337 per annum, according to qualifications and experience. General Practitioners who have been "Vocationally trained" may apply for an additional payment at the rate of £400 per annum from the N.H.S. Car and telephone expenses will also be allowed.

Applications, together with the names of three referees, should be received not later than 20th September, 1974, by the Registrar, The University, P.O. Box 147, Liverpool L69 3BX, from whom further particulars may be obtained. Quote ref. RV/BMJ/276192. (25051) 25

## OCCUPATIONAL HEALTH

## Director of Clinical Research

## Home Counties

to £10,000+

We seek a physician with good clinical research experience within the pharmaceutical industry to take up a senior appointment with one of the largest and best regarded health care companies operating in the UK. The position arises due to promotion within the international organisation.

The successful candidate will have responsibility for clinical trials on all products under development or already on the market in the UK. He will have a team of three to six physicians reporting to him, backed by an appropriate paramedical support staff. He will not have responsibility for technical training of representatives, screening of proposed promotional literature or other marketing service functions, apart from clinical trials on established products.

Applicants should be within the approximate age range 35-45 and have several years' experience in the UK pharmaceutical industry. This should have been gained within the clinical research rather than marketing services environment, and ideally be backed by an MRCP, MD or comparable qualification. Personal qualities should include proven managerial expertise or clear leadership potential, integrity, energy and a well-rounded personality.

The starting remuneration level is unlikely to be less than £9000, and it could well exceed £10,000 for a man of particular suitability. The position also carries a company car, and the other usual benefits. Tenure of a Clinical Assistantship is encouraged.

Removal expenses are generous and include a financial subsidy option to ensure that the successful candidate will obtain the full current market value for his present house if he has to move home to take up his new appointment.

Studies in several fields of clinical pharmacology,  
in particular absorption from the gastro-intestinal  
tract, are centred in a new purpose-built six-bed  
unit at West Middlesex Hospital where this man, as  
Beecham Research Fellow, will become a key  
member of the small energetic medical team. There  
are excellent ancillary and laboratory facilities  
available both at the hospital and at the Beecham  
fundamental research unit near Dorking in Surrey.

Candidates need not have research experience  
but should already have gained the M.R.C.P. The  
job offers an intensive training in research methods  
in the human pharmacology of new drugs and an  
opportunity for the Fellow to pursue an original  
line of study.

# DALMANE

## A new and powerful treatment for insomnia

### Getting to sleep

Clinical trials<sup>1-3</sup> have shown that Dalmane cuts the time taken to get to sleep by half: reducing it from an average of 36.2 to 13.9 minutes in one trial<sup>1</sup> and from 63.4 to 27 minutes in another.<sup>2</sup>

### Staying asleep

Trials<sup>1,2,4</sup> have shown that Dalmane patients enjoy a longer night's sleep with fewer nocturnal awakenings. Dalmane has increased the average night's sleep by 65 minutes<sup>5</sup> and 93.3 minutes<sup>6</sup> and in a third trial to an average of over 8 hours.<sup>1</sup>

### Patient preference

The low incidence of side-effects such as hangover with Dalmane is undoubtedly one reason why many patients prefer it.<sup>7</sup> In one study<sup>8</sup> Dalmane produced exactly the same incidence of hangover as placebo.

### Safety

Dalmane, a non-barbiturate, has a high mean lethal dose in mice and rats,<sup>9</sup> suggesting that overdosage would be unlikely to present undue problems of management or threat to life. Human toxicity studies<sup>10</sup> in which healthy men were given large doses of Dalmane for some time confirmed that it is well tolerated.
