Logical alternative

'Kefzol' i.m. (cefazolin sodium) – greater effect than any single penicillin.

Gram-positive: wider range of activity against Gram-positive organisms, including penicillinase producers.

Gram-negative: active against Gram-negative organisms, especially those increasingly resistant to penicillins, such as *E. coli*, *Klebsiella* and *P. mirabilis*.

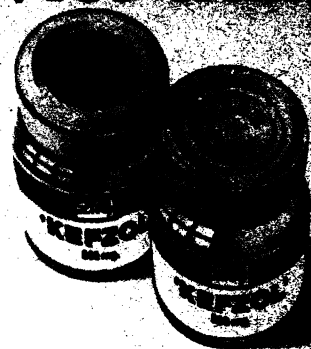

i.m. to the penicillins

Low toxicity: low incidence of side effects. Well tolerated.

Indications: hospital infections of the respiratory tract, urinary tract, skin, soft tissue, bones and joints and in obstetrics and gynaecology, due to susceptible organisms.

More convenient: effective in a simple twice daily dose of 500mg.

**The kind of power
you need in arthritis.**

Prescribing Information

Presentation: NAPROSYN (naproxen) is a non-steroidal anti-inflammatory agent, developed by Syntex Research. It is unrelated to salicylates or the corticosteroid hormones. It is presented as a yellow half-scored tablet containing 250 mg of naproxen, inscribed NAPROSYN on one side, and SYNTEX on the other.

Indications: NAPROSYN is indicated for the treatment of rheumatoid arthritis, osteoarthritis (degenerative arthritis) and ankylosing spondylitis.

NAPROSYN has been shown to have striking anti-inflammatory properties when tested in classical animal test systems. In addition, it has marked analgesic and anti-pyretic actions. It exhibits its anti-inflammatory effect even in adrenalectomised animals, indicating that its action is not mediated through the pituitary-adrenal axis. It inhibits prostaglandin synthetase, as do other non-steroidal anti-inflammatory agents. As with other agents, however, the exact mechanism of its anti-inflammatory action is not known.

Dosage and Administration: The recommended starting dose (and usual maintenance dose) of NAPROSYN is 250 mg twice daily, usually given with the morning meal and about 12 hours later. Dosage adjustment within the range of 375 mg to 750 mg daily, maintaining twice-daily administration, may be required for long-term maintenance.

As safety and efficacy studies in children are not yet complete, the product is currently not recommended for use in children under 16 years of age.

Contra-indications: There are no known absolute contra-indications.

Special Precautions and Warnings: NAPROSYN has been found to be well tolerated by patients exhibiting dyspepsia with other similar agents. Nonetheless, episodes of gastro-intestinal bleeding have been reported in patients with NAPROSYN therapy. NAPROSYN should be given under close supervision to patients with a history of gastro-intestinal disease.

Due to the high plasma protein binding of NAPROSYN, patients simultaneously receiving hydantoins, anti-coagulants or a highly protein-bound sulphonamide should be observed for signs of over-dosage.

Occasional skin rashes and angio-oedema have been reported. Patients who have exhibited aspirin hypersensitivity in the past (usually as the angio-oedema/asthma syndrome) may exhibit the same phenomenon on NAPROSYN. The following additional occurrences have been reported with NAPROSYN but a causal relationship to NAPROSYN has not been established: abdominal discomfort, epigastric

distress, headache, inability to concentrate, insomnia, thrombocytopenia, tinnitus, vertigo.

Sporadic abnormalities in laboratory tests (e.g. liver function tests) have occurred in patients on NAPROSYN therapy but no definite trend was seen in any test indicating toxicity.

Mild peripheral oedema has been observed in a few patients receiving NAPROSYN. Although sodium retention has not been reported in metabolic studies, it is possible that patients with questionable or compromised cardiac function may be at greater risk when taking NAPROSYN.

Teratology studies in rats and rabbits, at dose levels equivalent on a human multiple basis to those which have produced foetal abnormality with certain other non-steroidal anti-inflammatory agents, e.g. aspirin, have not produced evidence of foetal damage with NAPROSYN. As with other drugs of this type, NAPROSYN produces delay in parturition in animals. The relevance of this finding to human patients is unknown. However, good medical practice indicates minimal drug usage in pregnancy, and use of this class of therapeutic agent requires cautious balancing of possible benefits against potential risks to the mother and foetus.

Overdosage: Should a patient ingest a large number of NAPROSYN tablets accidentally or purposefully, the stomach may be emptied and usual supportive measures employed. Animal studies indicate that the prompt administration of activated charcoal in adequate amounts would tend to reduce markedly the absorption of the drug.

Pharmaceutical Precautions: Protect from light.

Legal Category: To be supplied on prescription only.

Package Quantities: NAPROSYN is supplied in canisters of 250 tablets. (N.H.S. cost – 14p per day.)

Further Information: In addition to the excellent therapeutic efficacy demonstrated by NAPROSYN in comparative clinical trials, good tolerance has been demonstrated, even in patients exhibiting multiple intolerance to other commonly used non-steroidal anti-inflammatory agents.

Product Licence Number PL/0286/0031B.

Measurement of reversibility of bronchospasm...

**THE AIRMED PNEUMOCONE
IS THE ANSWER!**

VENTOLIN SETS A HIGHER STANDARD IN BRONCHODILATOR THERAPY

"...salbutamol (Ventolin) is at present the drug against which all newer bronchodilator drugs must be compared."

(*Practitioner*, 1973, 211, 801)

EFFECTIVENESS. Measurement of the effectiveness of a bronchodilator drug in reversing airways obstruction can be achieved with such simple instruments as the Wright Peak Flow Meter or the more recently introduced Peak Flow Gauge. The illustration shows the Peak Flow Gauge in use.

A large number of clinical trials has clearly demonstrated again and again that Ventolin is more effective than other bronchodilators such as isoprenaline and orciprenaline, whilst more recent trials against newer bronchodilator drugs have failed to reveal any significant advantages over Ventolin in this respect.

SELECTIVITY. The high degree of selectivity of Ventolin for bronchial muscle, with therapeutic doses

having no discernible effect on the heart, has been an outstanding feature of the clinical trials. In consequence, Ventolin is still the only adrenergic bronchodilator which is indicated for asthmatic or chronic bronchitic patients who also have any form of heart disease or hypertension.

A LONG DURATION OF ACTION. In the clinical trials in which the duration of action has been investigated it has been clearly shown that Ventolin, whether given by inhalation or orally, has a duration of at least four hours and usually of 6 to 7 hours.

The availability of Ventolin Spandets means that the patient with nocturnal bronchospasm can be sure of effective bronchodilatation all through the night.

VENTOLIN "...the most widely used bronchodilator drug..." (*Brit. med. J.*, 1973, 4, 448)

Available in a wide range of preparations to suit each individual need.

Ventolin Inhaler — for metered-dose aerosol bronchodilator therapy.

Ventolin Tablets 2mg and 4mg — for routine oral bronchodilator therapy.

Ventolin Syrup — fruit-flavoured for ready acceptability by children.

Ventolin Spandets — sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.

Ventolin Inhaler contains salbutamol BP. All the oral preparations of Ventolin contain salbutamol BP as sulphate.

INTRODUCING LANOXIN-125

To give more flexibility of dosage, LANOXIN-125* (0.125mg digoxin) tablets have been introduced in addition to the 0.25mg tablet, 0.0625mg PG tablet, PG Elixir and Injection.

The Consistent Digoxin

"Reports from several countries have shown wide variation in absorption between different brands of tablets and even between different batches of the same brand."¹

The one word that controls—reliably—the amount of digoxin you wish your patients to receive is LANOXIN.* LANOXIN presents digoxin of consistent bioavailability,² both tablet-to-tablet and batch-to-batch.

The consistent release of digoxin from LANOXIN helps you ensure that the degree of digitalisation does not vary from dose to dose.

Minimise the risks to your digitalised patients, particularly when they leave hospital:

BEFORE GAVISCON

Hardly a trace of night-time reflux heartburn

AFTER GAVISCON

Reflux of gastric contents into the oesophagus tends to occur more readily at night when the patient is lying asleep. This leads to night-time heartburn and disturbed sleep.

By protecting the oesophageal mucosa from reflux attack Gaviscon relieves night-time heartburn as no other preparation can.

In a recent trial* intraoesophageal pH traces recorded over a continuous fifteen hour period, including the hours of sleep, showed:

"...that both the number of reflux episodes and the percentage time during which intraoesophageal pH is in the acid range are significantly reduced by Gaviscon but not by antacids or by placebo"

Myopia Medicorum

Symptoms: Persistent unwillingness to think seriously about the possibility of your being disabled by sickness or accident and the need to take out insurance against the consequent loss of income you would suffer.

The Treatment

Ask yourself one question. How long could you pay your bills if you couldn't work at all. A month? Three months? A year? If you haven't got round to safeguarding your income yet, act now.

Non-cancellable sickness and accident insurance from the Medical Sickness Society could replace a high proportion of your income if you were too ill to work. And it would go on paying you until you were back earning again. Even if the worst happened and you could never work again, it would pay you until you reached retirement age. Premiums are modest, and once you are accepted, the Society cannot cancel the insurance or

increase your premium because of long or frequent claims.

The Medical Sickness Society is a mutual society providing protection for doctors and dentists only. All the directors are either doctors or dentists. This specialisation gives the Society a deep insight into the medical profession's financial needs, and helps to provide a personal and continuous service. The Society's premium rates are very competitive, even with policies that do not share in profits, and all our profits go to policyholders.

DALMANE

A new and powerful treatment for insomnia

Getting to sleep

Clinical trials¹⁻³ have shown that Dalmane cuts the time taken to get to sleep by half: reducing it from an average of 36.2 to 13.9 minutes in one trial¹ and from 63.4 to 27 minutes in another.²

Staying asleep

Trials^{1,2,4} have shown that Dalmane patients enjoy a longer night's sleep with fewer nocturnal awakenings. Dalmane has increased the average night's sleep by 65 minutes⁵ and 93.3 minutes⁶ and in a third trial to an average of over 8 hours.¹

Patient preference

The low incidence of side-effects such as hangover with Dalmane is undoubtedly one reason why many patients prefer it.⁷ In one study⁸ Dalmane produced exactly the same incidence of hangover as placebo.

Safety

Dalmane, a non-barbiturate, has a high mean lethal dose in mice and rats,⁹ suggesting that overdosage would be unlikely to present undue problems of management or threat to life. Human toxicity studies¹⁰ in which healthy men were given large doses of Dalmane for some time confirmed that it is well tolerated.

This is what we call practising medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first eighteen months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta, Gibraltar and Mauritius, with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Hong Kong and Singapore. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £4,099, rising to £4,249 after four years.

On the other hand, if you are older (up to the age of forty) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £5,161, rising to £5,658.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to Surgeon Commander L.C. Banks, R.N., (724BU10) Department of the Medical Director General (Naval), Empress State Building, Fulham, London SW6.

CINQUE PORTS VOCATIONAL TRAINING SCHEME

Applications are invited for one trainee post in this scheme which is based on the towns of Dover and Deal. Medical institutions include a District General Hospital, a General Practitioner Hospital and a new multi-group Health Centre.

The initial and closing periods of the three-year scheme will be spent in General Practice and there will be four six-month Senior House Officer posts in the hospital — in Medicine/Geriatrics, Paediatrics/Dermatology, Obstetrics/Gynaecology, and Psychiatry. The last of these will include a good deal of work within the community.

A day release scheme operates which includes participation in a continuing course at the Kent Postgraduate Medical Centre at Canterbury. This Centre, and the scheme itself, have close links with the Health Service Research Unit at the University of Kent.

Throughout the three year period each trainee will be in continuous touch with his own General Practitioner. The post in Obstetrics/Gynaecology and Paediatrics are recognized for the Membership and Diploma of the Royal College of Obstetricians and Gynaecologists and Diploma in Child Health respectively. Fluidity within the organisation will allow an alternative post such as Anaesthesia. Trainees will be encouraged to sit for the Membership of the Royal College of General Practitioners.

The post will begin on 1st January, 1975. Further details of the scheme and application forms can be obtained from the Postgraduate Tutor at Buckland Hospital, Dover. Telephone enquiries can be made to Mrs. Howd, Dept. 20, number 20/524. Closing date for applications 1st November, 1974. (33564) 21

SENIOR REGISTRAR
IN ANAESTHETICS
 in the Department of Anaesthetics at the
 Swindon Group of Hospitals and subsequently
 at the Nuffield Department of Anaesthetics,
 Oxford.
 Applicants should be in possession of the
 F.F.A.R.C.S.
 The appointment is a rotating one based
 initially at the Princess Margaret Hospital,
 Swindon, a modern hospital of 524 beds,
 catering for most types of surgery, and
 including Intensive Care. Whilst at Swindon,
 experience in anaesthesia for Neurosurgery
 will be afforded by a regular day release to the
 Department at Oxford. There are excellent
 library facilities at Princess Margaret
 Hospital, and time can be allocated for any
 special study or research.

A maximum of two years will be spent at
 Swindon before moving to Oxford. The
 Nuffield Department of Anaesthetics is
 actively concerned with undergraduate and
 postgraduate teaching, running courses for
 both the Primary and Final F.F.A.R.C.S.
 examinations, and Senior Registrars are
 expected to assist with this and other
 teaching. The Department is also actively
 engaged in research, in which Senior
 Registrars may participate. Attendance at
 postgraduate meetings and courses is
 encouraged.

The content of the appointment as a whole
 will include those aspects of training
 considered desirable for Higher Specialist
 Training, and approval for this purpose has
 now been granted by the Faculty of
 Anaesthetists.

The unit, which functions along therapeutic community lines, comprises out-patient department, day hospital and 54 in-patient beds. Post offers good experience in general psychiatry in a modern unit and training medical staff are encouraged to make full use of training facilities within the hospital and on appropriate courses.

Applications to Assistant Secretary (Staffing), Hillingdon Hospital, by 1st October, 1974. (33627) 84-8

OXFORDSHIRE AREA HEALTH AUTHORITY
(Teaching)

OXFORD UNIVERSITY DEPARTMENT OF PSYCHIATRY

Applications are invited for places in a 3½ year training scheme in Psychiatry arranged jointly between the Oxfordshire Area Health Authority (Teaching), Isis Group of Hospitals (Littlemore and Warneford Hospitals, and the Park Hospital for children), Boroughcourt Hospital, the Elms Clinic, Banbury, and the Oxford University Department of Psychiatry. The Scheme ensures comprehensive training and experience to meet the requirements for higher qualifications in psychiatry.

Appointments will commence as S.H.O. with the opportunity of progressing to Registrar. Candidates with previous experience in Psychiatry may be appointed for less than 3½ years. The starting date will be December, 1974/February, 1975. Single/married accommodation may be available for this non-resident post.

Applications, on forms, available from the Administrative Assistant, Department of Psychiatry, Warneford Hospital, Oxford, should be returned no later than 7th October, 1974. (33656) 84-8

Registrar in Psychiatry

South Shields General Hospital

The successful candidate will join a team of two Consultants, one Registrar, two Senior House Officers and two Clinical Assistants and will work in a newly built Acute Psychiatric Unit of 34 beds, at the General Hospital.

Ample opportunity for wide experience in acute general psychiatry, including out-patient clinical work, psychotherapeutic and relaxation therapy techniques.

There are day patient facilities and close liaison is maintained with the Psycho-geriatric Unit and with other departments of the General Hospital. Good library facilities. Weekly seminars. Active Postgraduate Centre.

The post is accredited, under Category 1, for the full course of psychiatric training for the M.R.C.Psych. and day release is granted to attend this course at Newcastle University.

Resident post; married accommodation will be available. Application forms may be obtained from the Area Personnel Officer, South Tyneside Area Health Authority, Newcastle Road, Simonside, South Shields NE34 9PA. (Closing date 10 days from the appearance of this advertisement).

SOUTH TYNESIDE AREA HEALTH AUTHORITY

(25776) 84-6

HAMPSHIRE AREA HEALTH AUTHORITY (Teaching) Southampton and S.W. Hampshire District

Applications are invited for the post of **SENIOR HOUSE OFFICER IN PSYCHIATRY OF THE ELDERLY** (non-resident)

at the Moorgreen Hospital, Southampton, which forms part of the Southampton Teaching Hospital.

This post which is available from mid-November, would be suitable for a Medical Practitioner aiming at a career in General Practice where the problem of Psychiatric disturbance in the elderly, occupies a substantial part of one's time. The clinical duties will be with in-patients and day-patients of the Psychogeriatric Unit at Moorgreen Hospital.

This is part of a Community orientated service for the City of Southampton, and the trainee would be offered ample opportunity for involvement in home assessment etc. There are close links with the Department of Geriatric Medicine, whose day hospital is adjacent to the Psychogeriatric unit.

There is a very well developed Postgraduate Training Scheme for General Practice in the Wessex Region, based in Southampton, with which the trainee might wish to be involved. The post would also be useful for someone considering training in Psychiatry or in Geriatrics, and attendance at Day Release Courses for the D.P.M., M.R.C.Psych., or M.R.C.P., would be encouraged.

Further information may be obtained from Dr. C. Godber, Consultant Psychiatrist, Moorgreen Hospital, West End, Southampton. (Telephone: 0703/2258).

Application forms are obtainable from the Secretary, Medical Staffing Office, Southampton District Hospitals, 119, Tremona Road, Shirley, Southampton, to whom they should be returned as soon as possible. (25804) 84-8

PETERBOROUGH HEALTH DISTRICT

RESIDENT SENIOR HOUSE OFFICER
for the Day Centre at Peterborough District Hospital, with secondment to Fulbourn Hospital, Cambridge. Applications are invited from registered General Practitioners for the above appointment at the Psychiatric Day Centre for Peterborough District Hospital. The latter is a modern (1968) 600 bed unit serving the growing City of Peterborough, the psychiatric services for which are expanding, and this hospital will include a psychiatric ward later this year. This is a joint appointment with sessions at the Day Centre in Fulbourn Hospital, Cambridge not only for experience, but training. The Clinical Tutor at Fulbourn organises comprehensive courses for the D.P.M. and M.R.C.Psych. examinations, and all facilities are available including study time for students in the Cambridge Postgraduate Medical School. Experience will also be obtained at Addenbrooke's Hospital Psychiatric Out-patient Department. Residential accommodation is available for single, and usually for married staff at Peterborough. The post becomes available on 22nd October, 1974.

Applications, giving names of 2 referees, should be sent to the Hospital Secretary, Peterborough District Hospital, Thorpe Road, Peterborough. (25818) 84-8

Post of:

**District Community
Physician**

(Southern District)

Salary £5,433 to £7,947

Applications for the above are invited from suitably qualified medical practitioners in England and Wales.

The Warwickshire Area Health Authority serves a population of nearly half a million people in one of the finest counties in England. The Southern District, population 220,000, contains the pleasant towns of Stratford-upon-Avon, Warwick, Leamington Spa and Kenilworth, in which there is both heavy and light industry. It is served by a group of hospitals where the specialist services have been developed to a high degree and includes a Psychiatric Hospital with exceptionally good facilities for rehabilitation, a Children's Psychiatric Hospital and a hospital for the younger chronic sick. The area is served by four hospitals for the mentally handicapped, which are administered by the Northern District. A District General Hospital development has been planned at Warwick and should have started in the current financial year.

There is also a high standard of General Practice in the District, many of the Practices operating from good purpose built accommodation. The District would provide extremely good all round experience to a Community Physician anxious to further his career in Community Medicine. The Area Health Authority delegates much authority to District Management Teams giving districts a high degree of autonomy within agreed policies and budgets. Two Specialists in Community Medicine have been appointed at Area level and will provide the District Community Physician with a Consultant service in their specialties.

There will be every opportunity for the doctor appointed to develop any special interest and he will be a member of the Area Division of Community Medicine which will develop and initiate a progressive policy for the Area and encourage research and postgraduate training in Community Medicine.

Candidates should have good experience of at least one branch of the National Health Service or of academic medicine and will be expected to show some achievements in their career up to date.

The Area Medical Officer, Dr. Keith Young (Tel: Warwick 46211) would welcome visits and further enquiries from prospective candidates.

Applicants are asked to forward a summary of education, experience and publications and giving the names of two referees to the Area Personnel Officer, Warwickshire Area Health Authority, Cape Road, Warwick CV34 4RJ by 2nd October, 1974. (33598) 110

GOVERNMENTAL

Senior Medical Officer

£9,200+

Senior Medical Officers of the Medical Advisory Service are responsible for the surveillance of the health of civil servants and certain other similar groups; they assess future work capacity in cases of prolonged sickness absence; they advise management about staff whose current work performance may be otherwise affected by ill-health; they also offer guidance when occupational health hazards are present.

Senior Medical Officers work in liaison with a network of some 2,000 local Medical Officers of the Medical Service, as well as with General Practitioners and hospital consultants throughout the country. There will be opportunities for clinical practice in this work, and it is intended that epidemiological studies should be developed in association with academic and hospital departments.

MEDICAL OFFICERS ADEN

The British Petroleum Company have vacancies for Medical Officers (male and female) to join the team employed at Aden Refinery, in the Peoples' Democratic Republic of Southern Yemen. The company provides a comprehensive health service at the Refinery for all employees and their dependants, and maintains a 130-bed hospital.

Candidates must be registered with the General Medical Council, and have a minimum of two years varied professional experience, preferably including obstetrics and anaesthetics. Previous overseas experience would be valuable, but is not essential.

Starting salary will depend on age and experience, but it is unlikely that total emoluments will be less than the equivalent of £8,500 per annum. Tours are of one year's duration, renewable by agreement, and are followed by two months' paid leave. Staff may opt to take local mid-tour leave of up to 14 days if desired. Working and living quarters are fully air-conditioned and good social amenities are available.

Applications giving brief details of background qualifications and experience should be sent, quoting reference AM.907, to: The Manager, Central Recruitment, The British Petroleum Company Limited, Britannic House, Moor Lane, London EC2Y 9BU. (25723) 118

GUYANA BAUXITE COMPANY LIMITED LINDEN GUYANA

Vacancies for

MEDICAL OFFICERS

We need a Medical Officer/Anaesthetist and a General Medical Practitioner for our 120-bed acute general hospital located in the town of Linden, Guyana and providing medical care for our employees and for the community of 40,000.

The position of Medical Officer/Anaesthetist is suitable for a registered medical practitioner who has had all-round general practice experience in addition to at least one year's experience in the field of anaesthesiology. The successful applicant will be expected to administer anaesthesia to both cold and emergency cases and to perform general medical and obstetrical duties. The successful applicants will work under the general direction of the Chief Medical Officer and along with the other doctors participate in the further development of the services available at the hospital.

Salaries and fringe benefits are attractive. Benefits include six weeks annual vacation with passages for employee and family, furnished housing at low rental, schooling local and overseas, medical facilities, tax free gratuity.

If you are interested in any of these appointments please write submitting a curriculum vitae to:

Harmogen offers her 'the menopause' without tears

The dramatic decline in oestrogen production during the menopause has been held responsible for the many symptoms which cause a woman so much physical and mental distress—insomnia, nocturnal sweating, nervousness, headaches and ‘hot flushes’—all the symptoms that mean tears are never far away. Currently these conditions are treated independently but Harmogen is specifically formulated to re-establish oestrogen levels during the menopausal syndrome and alleviate not one but all conditions.

If declining oestrogen levels cause menopausal problems, oestrogen replacement therapy must surely be indicated.

IN PAIN, INFLAMED, IMMOBILE-

INDOCID[®]

Six merits of 'Indocid'

Analgesic

'Indocid' can relieve arthritic pain—promptly and effectively. Natural movement is encouraged. By night, the patient can relax and sleep more easily; and during the day, the physical and psychological benefits of reduced pain are considerable.

Anti-inflammatory

The powerful anti-inflammatory properties of 'Indocid' have been recognised for many years. Some patients respond so well to the reduction of inflammation and swelling that they are able to perform everyday tasks previously seen as impracticable.

Mobility

By relieving pain, swelling and inflammation, 'Indocid' encourages the patient to attempt more natural movement. 'Indocid' is often an important part of the management of the patient incapacitated by rheumatoid arthritis or osteoarthritis.

Efficacy

'Indocid' is established as a major antirheumatic agent. Relief of pain, reduction of inflammation, and the progressive increase in mobility—even in some who are severely disabled—enables many to enjoy a more active life.

Reliability

Many years of clinical use have proved the qualities of 'Indocid'.

Versatility

'Indocid' has proved valuable against a variety of arthritic conditions, and the number of formulations allow easy dosage adjustment to meet the need of the individual patient.

'Indocid' is indicated in the active stages of—

Rheumatoid arthritis

Osteoarthritis

Ankylosing spondylitis

Gout

Certain acute musculoskeletal disorders

In the day and night control of a variety of arthritic conditions
