# A word in your ear!

Too often the elderly accept deafness as part of growing old – too often their deafness is simply excessive ear wax. Ear wax is still the commonest cause of deafness.<sup>1</sup>

A course of Cerumol will quickly loosen the wax, allowing it to be syringed away, if necessary, easily and safely.<sup>2</sup>

After 25 years of use in general practice, Cerumol is still the most widely prescribed ear wax preparation in the UK.

## Why forbid the patient coffee?

**Thanks to H-A-G Decaffeinated Coffee even in cases of Insomnia, Palpitations, Disorders of the Heart and Circulation, Excitability, Gastritis and Peptic Ulcer, Gallstones, certain Diseases of the Liver the patient need not forego his favourite beverage.**

\* THE H-A-G DECAFFEINATING PROCESS. Swelling the green beans by steam pressure enlarges the pores and exposes the maximum surface to the highly volatile caffeine solvent (not trichlorethylene) which is flushed through the beans, carrying the caffeine with it. The surplus solvent is removed by a final steam flushing. The beans are then roasted in the normal way.

**USE OF ANTIBIOTICS**

Second Edition

A. Kucers, MB, BS, FRACP

The goal of this book as presented in the Preface is to provide a concise, systematic description of currently used antibiotics. It achieves this by applying basic principles of clinical pharmacology to the selection and administration of antimicrobial agents. The first edition was extensively reviewed and strongly recommended for students of infectious diseases and all clinicians interested in the intelligent use of antimicrobial drugs.

**DIVERTICULAR DISEASE OF THE COLON—**

A Deficiency Disease of the Western Civilisation

Neil S. Painter, MS(London), FRCS(England), FACS, D.Obst, MRCOG

The author of this book, who was largely responsible for elucidating the pathogenesis of the disease, describes its epidemiology, relates its history and discusses its medical treatment and the surgery of its complications. He presents evidence, based on the geographical distribution of diverticulosis and on fifteen years spent studying the condition, that diverticulosis is caused by the removal of plant and especially cereal fibre from our modern over-refined diet.

Though written primarily for physicians and surgeons, this book should also be read by dieticians, epidemiologists, nutritionists, research workers and by family doctors who are responsible for the day to day management of the condition.

Every year over 5000 British and 100 000 Americans suffer a head injury which will be followed by traumatic epilepsy. Identification of patients at risk is essential if they are to be properly advised, if anticonvulsants are to be prescribed on a rational basis and if legal recompense is to take account of this disabling complication.

The first edition is already widely used and accepted by neurologists in medico-legal practice.

The volume therefore provides facilities for several learning and teaching activities. It provides teachers in anaesthesia with a wide spectrum of subject matter which they can use to stimulate discussion as tutorials. Initial discussion points are already provided and form a basis from which the teacher can further develop and broaden his teaching.

# SURGERY OF VIOLENCE

ISBN 0 7279 0004 8

Injuries caused by explosive weapons may suddenly present a doctor with urgent, unfamiliar problems in the treatment of the victims. The recent experience of surgeons and physicians at the Royal Victoria Hospital, Belfast, has been drawn upon to provide advice on some important aspects of the surgery of violence.

First published as a series of articles in the *British Medical Journal* during February and March this year, they are now collated into a book. Among the subjects the authors discuss are wounds of trunk and limbs, blast injuries of the ear, intensive care, and disaster planning. In addition the book includes a bibliography of 30 recent papers on traumatic surgery written by members of the staff of the Royal Victoria Hospital.

# APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or sex.

## HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the BMA, an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).
