

Heart Attacks – can they be predicted?

"The conclusion seems inescapable that the occurrence of a cardiovascular catastrophe in the hypertensive patient constitutes a medical failure rather than the first indication for treatment. Apparent medical trivia such as asymptomatic hypertension when accompanied by hypercholesterolaemia, impaired glucose tolerance, the cigarette habit or ECG abnormalities are responsible for the bulk of cardiovascular mortality. We must learn to diagnose cardiovascular disease on its way to happening, to recognise the hallmarks of increased vulnerability and to synthesize them into a composite risk estimate, and also how to deal with the cardiovascular disease precursors effectively."¹

"With a casual blood test for cholesterol and sugar, blood pressure determination, cigarette history and ECG examination, it is possible to identify a tenth of the asymptomatic population from which 25% of the coronary heart disease, 40% of the occlusive peripheral arterial disease, and 50% of the strokes and congestive failure will evolve."¹

"The Tell-Tale Heart", the title of Edgar Allan Poe's story has a second meaning for the general practitioner. The patient at risk to heart disease will often reveal this unwittingly by "Tell-Tale" signs.

First suspicions may be aroused by tobacco stained fingers, obesity, dyspnoea, raised blood pressure or a family history of heart disease. Glucose intolerance or an ECG abnormality may show at closer examination. Furthermore, a raised serum cholesterol level may also be found.

Each of the above factors significantly increases likelihood of C.H.D., the risk rising with the number of factors present.^{1,2}

A recent study proved the predictive use of these risk factors in a group of 5000 men. C.H.D. was twenty-nine times more common in the high risk group than in controls – smoking, raised cholesterol and raised blood pressure being the best predictors of C.H.D.²

Since medical opinion at present recommends reduction of these risk factors, moderation of smoking and eating habits may be advantageous. However, reduction of a major risk factor – raised serum cholesterol – is of prime importance and here therapy may be indicated with Secholex, a new palatable ion exchange gel. Taken alone, or with clofibrate, marked reductions in serum cholesterol are obtained.^{3,4,5}

The complete new range of home aids

The Sunshine Range makes home more comfortable. The Sunshine Range is a unique combination of specialised household products and domestic aids. It covers items as diverse

as suction held egg-cups, tin openers and tap-turners, wheelchairs and walking aids, commode chairs, toilet and bathroom aids.

"We must try to get one of these for grandfather"

Grandfather suffers from arthritis. This chair will help him sit down and get up so much more easily. Comfortable, firm, shaped upholstery, extended arms, and adjustable height—I'll replace that old lounge chair. It just can't be good for him.

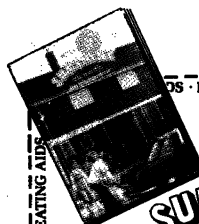

"This would be ideal for my sewing"

Or TV. dinners, writing, as a bed table, or even placed over a wheel chair. It's surprising how versatile an item can be! Adjustable in height, the top can be angled, and it is easily wiped clean.

"Now I've got these at home, too"

This tableware is designed for those with limited use of hands or arms and there are non-slip mats as well. The tray-table makes it easy to have my meals brought to me in bed. The legs just flip down and it makes an ideal bed-table, or even an occasional table.

In bronchitis Septrin b.d. leaves nothing to chance

Septrin has a powerful action against the pathogens likely to cause acute episodes of bronchitis; *H. influenzae*, the most troublesome organism, is highly sensitive.

Septrin has been shown to give better results than ampicillin¹ and tetracycline² with regard to:

- * Rapidity of resolution of symptoms.
- * Eradication of pathogens from sputum.
- * Conversion of purulent to mucoid sputum.

Gastric reflux does not stop at the oesophagus.
Like causing oesophagitis
And heartburn.
All the more reason for prescribing Gaviscon rather than simple antacids.
Gaviscon suppresses gastric reflux—simple antacids don't. Recent evidence confirms that Gaviscon reduces the number of reflux episodes as well as the time during which the lower oesophageal pH is acid.¹
And Gaviscon has the backing of more than ten years' clinical experience in the treatment of reflux heartburn.

APPOINTMENTS

Applicants for medical appointments are advised to check whether the post
advertised is included in the Important Notice and to scrutinize carefully the
remuneration and terms of service offered. Any member who is in doubt about
these terms in relation to B.M.A. agreements should consult the Secretary of the
Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive
term implying racial, national, or ethnic characteristics may be used in any
advertisement. Further, readers are advised not to apply for any appointment
which discriminates between applicants on grounds of creed or sex.

HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and
enclose (unless otherwise specified) one copy of each of three recent testimonials,
with a short statement of experience and appointments held. Applications should
be sent at once if no closing date is given: Canvassing disqualifies (Statutory
Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the
Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone
charges, removal allowances, study leave and other matters should be obtained
from the Hospital Secretary; or by B.M.A. members from the Secretary, British
Medical Association.

In particular, they will find full details of facilities provided in most hospitals in
the United Kingdom in the current edition of the *Hospital Gazetteer*. If such
details are not included members are advised to consult the Secretary of the
B.M.A.

Applicants requiring hospital married accommodation are strongly advised to
obtain, prior to interview, clarification in writing from the employing authority as
to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles
from a hospital. Advertisements for post-registration house officers, senior house
officers and registrars should state clearly whether the post is resident, i.e.
compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant
vacancy must be advertised as (a) part-time with the number of sessions clearly
stated, or (b) whole-time with the option of maximum part-time.

In the view of the B.M.A., an advertiser should not insist on possession of English
higher qualifications in preference to Scottish or Irish qualifications (or vice
versa).

Senior Pathologist

Huntingdon Research Centre is a contract research organisation working in the safety evaluation of pharmaceuticals, biologicals and agrochemicals. Although the work is sponsored by commercial contracts, there is a high scientific content in the overall research effort.

We need a veterinary or medical pathologist to join a multi-disciplinary team in a general toxicology area. Senior posts in this team are held by veterinarians and medical practitioners. You should be qualified in either the veterinary or medical professions and have had experience in comparative pathology, preferably in a research establishment, in industry or in an academic institution. Attendance at scientific meetings and the publication of scientific papers are encouraged.

Salary, career prospects and benefits are competitive with industry and are consistent with our position as part of a major international group. The location itself has many advantages: Huntingdon is situated in pleasant countryside and housing prices are among the lowest in Britain. At the same time, Cambridge, London and the Midlands are within easy reach by road and rail. You will be given help with relocation expenses.

SIR CHARLES GAIRDNER HOSPITAL
Perth Medical Centre
Perth, Western Australia

PSYCHIATRIST

Applications are invited from suitably qualified Psychiatrists for the post of full-time Psychiatrist — Specialist or Senior Specialist grade. The present establishment of the Department of Psychiatry consists of three Psychiatrists, two of whom are full-time University academic staff.

The Sir Charles Gairdner Hospital is the teaching hospital component of the Perth Medical Centre in an area adjoining the University of Western Australia. The Hospital, which is affiliated to the Medical School of the University of Western Australia, is being progressively expanded over the next five years from 500 to 1000 beds.

The Department of Psychiatry, including the University Department of Psychiatry is housed in a new purpose built facility within the main hospital complex, and is responsible for the care of 40 psychiatric in-patients, 30-35 day patients and a large out-patient clientele. Patients in all areas are generally referred directly either by general practitioners in the community or by physicians working in the teaching hospitals. The unit is organised along team lines, with at the present time 3 in-patient teams and a consultant day hospital team. The approach is essentially eclectic and involves close links between teaching and research and service work. Increasingly, a community programme is developing and much emphasis is placed on maintaining close contacts with the patients in their home and working environment. Apart from undergraduate teaching, the unit is recognised as a training centre for postgraduates in psychiatry and an active postgraduate teaching programme is currently underway.

Salary will be within the range \$18,358 to \$25,574 plus State Public Service Superannuation and travel allowance. New terms of service are currently being negotiated which will probably involve either the right of limited private practice or payment in lieu thereof.

Detailed written applications, including the names of three professional referees, a list of publications and a recent photograph, must reach the Medical Superintendent, Sir Charles Gairdner Hospital, Verdun Street, Shenton Park, W.A. 6008 by 31st October, 1975. More detailed information is available on request. (28245) 118

**THE SOUTH CANTERBURY
HOSPITAL, TIMARU**
Timaru Hospital, New Zealand
Department of Psychiatry

SPECIALIST PSYCHIATRIST (WHOLE-TIME)

Applications are invited from Registered Medical Practitioners possessing one of the recognised postgraduate qualifications in psychiatry for the above position at the Psychiatric Department, Timaru Hospital, South Canterbury, New Zealand.

The Unit in Timaru serves the city of Timaru and the surrounding districts. At present in addition to the Psychiatrist there is a Psychiatric Registrar, a Psychiatric Social Worker, a Clinical Psychologist and the appropriate nursing staff. A new psychiatric unit is being planned for this area and the appointee would help the present Psychiatrist in planning the service.

The appointment will be of specialist status in terms of Hospital Service Determination Medical Officers' and the salary will be within the scale \$13,332 to \$17,777. The commencing rate will be determined by the Director-General of Health according to qualifications and experience and advancement within the scale will be automatic.

Assistance with transport expenses is available up to the limits approved by the Department of Health.

Conditions of Appointment and application forms are available from the Superintendent-in-Chief, Timaru Hospital, P.O. Box 503, Timaru or from the undersigned.

Applications close on 30th November, 1975 should be addressed to The Secretary, South Canterbury Hospital Board, P.O. Box 88, Timaru, New Zealand. (28061) 118

International Medicine

**Europe
based**

**Age
28 to 35**

**£11,000 to
£15,000+**

This is an appointment that will appeal to a young doctor seeking real scope for personal initiative within a truly international context. It offers:

- **Travel for up to 30% of the time - mainly in Europe, but also overseas.**
- **Strong intellectual interest and challenge within a research environment.**
- **The chance to make a direct personal contribution to medical progress.**
- **An attractive salary, well cushioned against high taxation and inflation.**
- **The opportunity to become fluent in another major European language.**
- **More free time for family and outside pursuits.**

The position is a new and wide-ranging one within the International Division of a young-minded and highly successful pharmaceutical company in Germany. The company is allied to one of Europe's largest research-based organisations, and has grown ten-fold over the last ten years.

The post

The successful candidate's prime role will be to act as adviser and co-ordinator for the company's expanding clinical research programmes in the major European countries *outside* Germany. It will be his job to plan, initiate and evaluate clinical studies on new medicines under development, and to direct and control ongoing medical studies on products already on the market. These activities will involve him in close liaison with health and drug registration authorities throughout Europe.

In addition, the physician appointed will be an important member of the company's international management team. His advice on medical matters will be sought by other managers, giving him the opportunity for a wider involvement in the many and varied activities of the company.

The requirements

Applicants should be physicians in their late 20's or early 30's. They should have *either* existing experience in the pharmaceutical industry *or* an up-to-date knowledge of therapeutic medicine backed by several years' successful postgraduate achievement in a hospital, academic or progressive GP environment. Intellectual horizons, potential and enthusiasm are more important than specific experience to date, as any necessary training will be given. However, a specialist interest in cardiovascular medicine would be particularly appropriate.

Existing knowledge of German is not important as English is the major language for communication within the Group and "crash course" tuition facilities are available for both husband and wife.

The benefits

The position commands an attractive salary with good opportunities for progression. Other benefits include 5-7 weeks' holiday, non-contributory pension, interest-free loan facilities and generous financial assistance with relocation.

If you are seeking a chance to make fuller use of your abilities and experience, please write briefly or 'phone for an application form and more detailed information on the company, the country, the opportunity and the rewards. Your enquiry will be treated in complete confidence.

To him hypertension is no handicap

but you need his help with your treatment

Beta-Cardone reduces blood pressure simply by controlling cardiac output. Unlike some earlier hypotensive agents, Beta-Cardone leaves the patient free from side effects such as marked sedation, postural hypotension, sexual difficulties, nasal congestion and dry mouth. And, because your patient feels well during treatment, he is quite ready to co-operate with you and 'keep taking the tablets'.

Beta-Cardone: how safe, how simple?

1. Safety: Beta-Cardone has been thoroughly researched and clinically investigated since 1962 and well over 500 specific references report the findings of many workers in the field. Two studies have special significance: In one,¹ the administration of Beta-Cardone i.v. in acute coronary emergency produced no adverse effects. In the other,² no untoward effects

followed its use even in patients with chronic heart failure.

2. Simplicity: Beta-Cardone may be administered in twice daily dosage. It is equivalent to practolol in duration of action. In reduction of exercise tachycardia, both agents continued to produce a blockade of 20% after 24 hours.³

Urincontrol with Cetiprin 200 mg t.d.s.

"The unwitting passage of urine is one of the most serious social disasters which can afflict anyone".

Brit. med.J., 4, 727 (1970)

By increasing bladder holding capacity in the elderly patient, delaying the first desire to void and decreasing voiding pressure, Cetiprin helps to control urinary frequency and urinary incontinence. Cetiprin provides maintenance therapy for what may otherwise be a disastrous social condition.

Contraindications:
Whilst emeprium bromide is indicated in the early stages of prostatic enlargement with urinary frequency, it is contraindicated in later stages with flaccid bladder and large amounts of residual urine. Caution should be observed in patients with glaucoma or gastric retention. Rarely, dryness of the mouth is an unwanted effect.
