

TRADEMARK

Nizoral

(ketoconazole)

Did you know

that in seborrhoeic dermatitis
a dominant role is played by
Pityrosporum yeasts?

And did you know

that *Pityrosporum* is exceptionally
sensitive to ketoconazole,
alias Nizoral?

If you do, you know why Nizoral *cream* is the right answer to
seborrhoeic dermatitis

Apply twice daily until a few days after remission of symptoms.

Indications: Nizoral *cream* is indicated for topical application in the treatment of dermatophyte infections of the skin, as well as in the treatment of cutaneous candidosis and tinea (pityriasis) versicolor. Nizoral *cream* is also indicated for the treatment of seborrhoeic dermatitis, a skin condition related with the presence of *Pityrosporum ovale*. **Precautions:** Irritation may occur when Nizoral *cream* is used immediately after prolonged treatment with topical corticosteroids. Therefore, it is recommended to continue applying the topical corticosteroid in the mornings and to apply Nizoral *cream* in the evenings, and to subsequently and gradually withdraw the corticosteroid over a period of 2-3 weeks.

As a health professional, you may find that children from ethnic minorities in Britain suffer from conditions that you have never encountered—such as diseases of genetic or nutritional origin and tropical or subtropical infestations. They, or their parents, may not speak enough English to be able to explain what is wrong and, in addition, cultural differences may impede understanding on both sides. What can be done? In *Child Health in a Multicultural Society* Dr John Black gives a brief introduction to the problems of ethnic minorities together with a detailed guide to the cultures of particular groups—Asian families, families from the Mediterranean and Aegean, Chinese and Vietnamese families, and Afro-Caribbean and African families—and the diseases to which they may be vulnerable. This new revised edition (previously entitled *The New Paediatrics*) is a valuable guide for doctors, nurses, and non-medical staff who want to ensure the best care for all patients.

Price: Inland £5.95; Abroad £7.00

BMA members: Inland £5.45; Abroad £6.50

Tilcotil®
works the whole
arthritic day.
Evenly.
24 hours long.

20 mg Tilcotil®,
regardless of when it's taken,
ensures active serum levels
for more than 24 hours.
That means: consistent efficacy,
better mobility and relief
of pain during the day
and at night – fewer
pain-induced sleep disturbances
and less morning stiffness.

Tilcotil® is well tolerated
for an antiarthritic agent,
even in long-term treatment
and in elderly patients.

Tilcotil®.
Because an arthritic's
treatment should last as long
as his day.

Tilcotil® is a Trade Mark
