# Concise and comprehensive guides

for all medical

practitioners

## ABC OF AIDS Edited by Michael W Adler

The second edition of the ABC OF AIDS has been completely revised to give a clear picture of the present state of knowledge about the epidemic and current approaches to treatment. It also includes two new chapters, on HIV infection related to mis-use of drugs, and HIV infection in children.  
"...the single best concise source on aids."

*Journal of the American Academy of Dermatology*

"... this book can be strongly recommended to those who need a concise but comprehensive account of the problems of HIV and AIDS and current understanding of its management."

*International Journal of Epidemiology*

**2nd Edition**

UK £11.95; Abroad £13.50.

BMA members £10.95 or £12.50

## AIDS AND THE LUNG

Edited by David Mitchell, Ashley Woodcock

In *AIDS and the Lung* experts review the problems, emphasising practical points and providing up to date information on this rapidly changing subject. This is an indispensable handbook for respiratory physicians, especially those with limited experience of dealing with AIDS- and for everyone concerned with protective measures in bronchoscopy units and pulmonary function laboratories.

"This book is a beauty! ...it is interesting and it answered many questions on the respiratory consequences of AIDS... great value for all practitioners who deal with AIDS and the lung."

*The Medical Journal of Australia*

UK £8.95; Abroad £10.00.

BMA members £8.45 or £9.50

## ABC OF SEXUALLY TRANSMITTED DISEASES Michael W Adler

Doctors need to be aware that common clinical conditions such as rashes, vaginal discharge, and pelvic pain may have a sexual origin and in the second edition of the *ABC of Sexually Transmitted Diseases* Professor Michael Alder gives expert guidance on the diagnosis and management of these conditions.

"... an excellent basic book for the non-specialist, the medical student, and for nursing and paramedical staff associated with genitourinary medicine."

*Genitourinary Medicine*

"... an excellent starting point for the novice or an equally valuable reference for the experienced clinician. It is quick and easy to read..."

*Canadian Medical Association Journal*

# What's best for patients?

New drugs are continually being developed and knowledge about existing drugs is constantly expanding, so it is essential, but difficult, for doctors to keep up to date with the latest developments. *New Drugs* describes the most important therapeutic advances of the past decade and discusses the drugs that will be in common use in the 1990s. Completely revised and updated, this second edition has been expanded to include 11 additional chapters. Its coverage of practical aspects of drug use, avoidance of adverse reactions and interactions, and prescribing at extremes of age makes it an invaluable guide for busy practitioners who want to get the best out of the new drugs currently available.

**Chapters include:** Adverse reactions to drugs • Calcium antagonists • Diuretic treatment • Antiarrhythmic drugs • Insulin • Lipid lowering drugs • Antidepressant drugs • Centrally acting drugs • Controlling symptoms in advanced cancer

UK £14.95; Abroad £18.00 (BMA members £13.95 or £17.00)

Doctors do not always agree on what is the right treatment even for quite common conditions. Often definitive clinical trials have not been performed and no one knows for sure the best way to treat. *Controversies in Therapeutics* looks at some problems that arise in general practice. For each one it offers two different approaches; and Peter Rubin, professor of therapeutics and consultant physician at the University Hospital of Nottingham, provides an editorial comment on these which summarises the prevailing views and helps you to make up your own mind. Written by academic experts with everyday clinical experience, *Controversies in Therapeutics* is a must for all physicians and general practitioners—both those who think they know it all and those who know they don't.

**Chapters include:** Role of diet in treating atopic eczema • Risks of dependence on benzodiazepine drugs • Thrombolysis and the general practitioner • Depression in childhood • Theophylline in the management of airflow obstruction • Management of constipation

UK £9.95; Abroad £12.00 (BMA members £8.95 or £11.00)

# How is no longer a problem — but there's still which and why

The microcomputer revolution has made powerful machines and highly complex programs generally available. This means that users of statistical techniques need no longer be concerned with the arithmetical and algebraic details — the software will take care of all that. What is vital, however, is to understand the ideas and the basic principles of statistical analysis. In *Medical Statistics on Microcomputers* R A Brown and J Swanson Beck show how to get the best use out of microcomputers when analysing data, particularly in the pathology laboratory. They explain the rational basis of various widely applicable statistical methods and also indicate their limitations so that you can make an informed choice. Chapters include:

- Data handling
- Analysis of data from one or two groups
- Comparison of several groups
- Analysis of categorical data
- Statistical methods for diagnostic tests.

## Let the BMJ guide you through statistics:

**STATISTICS WITH CONFIDENCE** — Confidence intervals and statistical guidelines. Martin J Gardner, Douglas G Altman.

Many medical journals, including the *British Medical Journal*, now expect scientific papers submitted to them to contain confidence intervals when appropriate. Why? what are they? and how do you calculate them? *Statistics With Confidence* tells you. A clear explanation of the reasons for using confidence intervals is followed by detailed presentation of methods of calculation, including numerous worked examples and specially compiled tables. To make things even easier, a computer programme, Confidence Interval Analysis (CIA), for calculating confidence intervals, has been specially designed by Martin Gardner and details are available from the Publishing Department, *British Medical Journal* (or the American College of Physicians).

UK £8.95; Abroad £10.50; US\$24.00 BMA members £8.45 or £10.00 ACP members US\$19.00

**STATISTICS AT SQUARE ONE** — T D V Swinscow

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step by step instruction. Subjects covered include standard deviation,  $X^2$  tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation. Methods specially adapted to pocket calculators.

UK £3.95; Abroad £5.00; US\$13.00 BMA members £3.45 or £4.50 ACP members US\$11.00

**STATISTICS IN PRACTICE** — Sheila M Gore, Douglas G Altman

No doctor can afford to ignore statistics: most modern medical research uses statistics. This important and authoritative book provides clear information on designing studies, applying statistical techniques, and interpreting studies that use statistics. It can be easily understood by those with no statistical training and should be read by all those who want to keep abreast of new developments.

UK £8.95; Abroad £11.00; US\$23.00 BMA members £7.95 or £10.00 ACP members US\$19.00

**EPIDEMIOLOGY FOR THE UNINITIATED** — Geoffrey Rose, D J P Barker

Epidemiology has its own techniques of data collection and interpretation and its necessary jargon of technical terms, and in *Epidemiology For The Uninitiated* the authors guide the novice expertly through the theory and practical pitfalls. The second edition of this popular *BMJ* handbook has been revised to include further details of epidemiological methods and some of their more dramatic applications, such as the investigations on the Spanish cooking oil epidemic, and AIDS.

## SURGICAL ROOTS & BRANCHES

**Sir Reginald Murley**

When Sir Reginald Murley became president of the Royal College of Surgeons in July 1977 he was described in the *Daily Telegraph* as a "redoubtable standard bearer" and as "one of the dwindling number of old style 'surgical characters.'" In *Surgical Roots & Branches* he gives a lively account of the development of this character.

UK £14.95 (BMA Members £13.95);

Abroad £18.50 (BMA Members £17.50)

## FESTINA LENTE – A PSYCHIATRIC ODYSSEY

**Henry R Rollin**

Henry Rollin insists that *Festina Lente* is "in no way an autobiography. I prefer to regard it essentially as an history of psychiatry during the past half century as seen by one who has been witness to and played some small part in the shaping of events."

UK £14.95 (BMA Members £13.95);

Abroad £17.50 (BMA Members £16.50)

## NOT A PROPER DOCTOR

**David Sinclair**

Sinclair was intent on a career in surgery when he graduated from St Andrew's University but fate, mainly in the shape of the second world war, decreed otherwise. As Professor Sinclair looks back at his varied life, there are moments of joy, sadness and regret, but throughout a central core of humour and compassion.

UK £14.95 (BMA Members £13.95);

Abroad £18.50 (BMA Members £17.50)

## NOT A MOMENT TO LOSE

**Sir David Smithers**

Sir David Smithers believes that "one should aspire to be a realist, but retain a sense of wonder, a rationalist who is prepared to jump to conclusions, and a critical visionary who remains sensible of the humour of the human situation."

UK £14.95 (BMA Members £13.95);

Abroad £17.50 (BMA Members £16.50)

## ONE MAN'S MEDICINE

**Archie Cochrane with Max Blythe**

The autobiography of Professor Archie Cochrane, who was one of Britain's most influential thinkers on health care and the quality of health services. His 30 years' association with the Rhondda Fach – and his work there on reducing the suffering inflicted on whole communities by pneumoconiosis – is almost legendary.

UK £14.95 (BMA Members £13.95);

Abroad £19.00 (BMA Members £18.00)

## REAP A DESTINY – DIVAGATIONS OF A TAOIST

**Douglas Swinscow**

Former deputy editor of the *BMJ*, the late Douglas Swinscow was also a world authority on lichens. A painstaking scientist and a lover of the arts, a philosopher who nevertheless thrived in a military role, these memoirs look back at the events and choices that have shaped his life and character.

UK £14.95 (BMA Members £13.95);

# DON'T BE BEHIND THE TIMES!

## THE HEALTH DEBATE LIVE:

### 45 INTERVIEWS FOR LEADING FOR HEALTH

The BMA's document *Leading for Health: a BMA Agenda for Health*, encompasses often contrasting views and presents questions that need answering. What did people actually say in their interviews? With the interviewees permission, the BMJ has published the transcripts of their original comments. This collection provides a lively and provocative contribution to the health service debate.

ISBN 0 7279 0317 9 192 pages  
Price: UK £10.95; Abroad £13.00 (BMA members £9.95 or £12.00)

## THE FUTURE OF HEALTH CARE

The best way to provide health services is a subject that has to be tackled by governments and health professionals worldwide. The British government has been attempting this in its reforms of the NHS, and the BMA has produced its own "agenda for health". To give readers a better grasp of these issues the BMJ asked experts about the main topics on the agenda—such as rationing of care and funding of services—and to suggest action for the future.

ISBN 0 7279 0742 5 104 pages  
Price: UK £8.95; Abroad £10.00 (BMA members £8.45 or £9.50)

## AUDIT IN ACTION

From a minority interest to an integral part of good medical practice audit has come a long way. *Audit in Action* traces this development in a selection of articles originally published in the BMJ. The contributors are leaders in or experienced practitioners of audit. Covering audit both in hospitals and in general practice, this book is valuable reading for all those concerned to improve the quality of health care.

ISBN 0 7279 0317 9 xiv + 246 pages  
Price: UK £10.95; Abroad £13.00; (BMA members: £9.95 or £12.00)

## THE FUTURE OF GENERAL PRACTICE

General practitioners have recently had to cope with dramatic changes in their working conditions imposed on them by government policy. *The Future of General Practice* discusses what general practice should be and how it should be funded. The authors discuss topics at the heart of this debate, including research, audit, list sizes, fundholding, and general practitioners' educational needs.
