

## SURGICAL ROOTS & BRANCHES

**Sir Reginald Murley**

When Sir Reginald Murley became president of the Royal College of Surgeons in July 1977 he was described in the *Daily Telegraph* as a "redoubtable standard bearer" and as "one of the dwindling number of old style 'surgical characters'". In *Surgical Roots & Branches* he gives a lively account of the development of this character.

UK £14.95 (BMA Members £13.95);

Abroad £18.50 (BMA Members £17.50)

## FESTINA LENTE – A PSYCHIATRIC ODYSSEY

**Henry R Rollin**

Henry Rollin insists that *Festina Lente* is "in no way an autobiography. I prefer to regard it essentially as an history of psychiatry during the past half century as seen by one who has been witness to and played some small part in the shaping of events."

UK £14.95 (BMA Members £13.95);

Abroad £17.50 (BMA Members £16.50)

## NOT A PROPER DOCTOR

**David Sinclair**

Sinclair was intent on a career in surgery when he graduated from St Andrew's University but fate, mainly in the shape of the second world war, decreed otherwise. As Professor Sinclair looks back at his varied life, there are moments of joy, sadness and regret, but throughout a central core of humour and compassion.

UK £14.95 (BMA Members £13.95);

Abroad £18.50 (BMA Members £17.50)

## NOT A MOMENT TO LOSE

**Sir David Smithers**

Sir David Smithers believes that "one should aspire to be a realist, but retain a sense of wonder, a rationalist who is prepared to jump to conclusions, and a critical visionary who remains sensible of the humour of the human situation."

UK £14.95 (BMA Members £13.95);

Abroad £17.50 (BMA Members £16.50)

## ONE MAN'S MEDICINE

**Archie Cochrane with Max Blythe**

The autobiography of Professor Archie Cochrane, who was one of Britain's most influential thinkers on health care and the quality of health services. His 30 years' association with the Rhondda Fach – and his work there on reducing the suffering inflicted on whole communities by pneumoconiosis – is almost legendary.

UK £14.95 (BMA Members £13.95);

Abroad £19.00 (BMA Members £18.00)

## REAP A DESTINY – DIVAGATIONS OF A TAOIST

**Douglas Swinscow**

Former deputy editor of the *BMJ*, the late Douglas Swinscow was also a world authority on lichens. A painstaking scientist and a lover of the arts, a philosopher who nevertheless thrived in a military role, these memoirs look back at the events and choices that have shaped his life and character.

UK £14.95 (BMA Members £13.95);

Abroad £17.50 (BMA Members £16.50)

# ABC FROM THE BMJ

"Value judgments about food are being made all the time—they are nearly always subjective and usually wrong." A Stewart Truswell, Boden professor of human nutrition at the University of Sydney, separates fact from fallacy in the *ABC of Nutrition*. This fully revised and updated edition offers the general medical reader a refreshingly down to earth review of all aspects of nutrition—from anorexia to obesity, infant feeding to dietary guides for the elderly—and will be invaluable for doctors and other medical professionals wishing to advise patients about their eating habits.

#### Review of the first edition

"Truswell . . . has written the introductory textbook for students of nutrition at any level . . . All physicians, medical students, nurses, nursing students, dieticians, dietician students, and those interested in nutrition education should have a copy of this book."

*American Journal of Clinical Nutrition*

#### Second edition March 1992

Paperback • ISBN 0 7279 0315 2 • 120 pages

UK £8.95; Abroad £10.50 (BMA members £8.45 or £10.00)

Healthy women with normal pregnancies need little formal care; those at risk of damage to their own or their baby's health need the best of scientific medicine. The aim of antenatal care is to distinguish between these two groups, giving those who need it the full range of diagnostic and therapeutic measures while avoiding unnecessary intervention in those whose pregnancy proceeds normally. In the *ABC of Antenatal Care* Geoffrey Chamberlain, professor and chairman of the department of obstetrics and gynaecology at St George's Hospital Medical School, London, outlines the practicalities of routine antenatal care and the management of the major medical problems that may arise. Originally published as a series of articles in the *BMJ*, this manual discusses with common sense and humour the background to current practice and indicates how it could be improved in the 1990s.

#### Chapters include

- Normal antenatal management • Detection and management of congenital abnormalities • Work in pregnancy
- Medical problems in pregnancy • Preterm labour

#### January 1992

Paperback • ISBN 0 7279 0313 6 • 96 pages

UK £9.95; Abroad £12.00 (BMA members £8.95 or £11.00)

# Are the ills of middle and later life rooted in our early development?

*Based on an original embroidery by Dean Design*

During the past few years a series of articles, mostly from the Medical Research Council's Environmental Epidemiology Unit at the University of Southampton, has been published in leading medical journals. They set out the evidence that certain adult diseases, including coronary heart disease, stroke and diabetes originate in impaired development during fetal life and infancy. Because of the obvious implications for prevention of some of the commonest diseases in Western society, they have attracted international attention. In this book, Professor David Barker, Director of the Unit, has selected 31 articles that he considers seminal and a comprehensive guide to the development of this important topic. Professor Roger Robinson's introduction summarises and interprets the evidence for non-epidemiologists.

The first chapters describe the origins of the hypothesis in geographical studies in England and Wales. These are followed by a series of studies of men and women in middle and late life whose early growth was recorded at the time. In those who have died, cause of death can be related to early growth. Examination of the living has allowed blood pressure, blood lipid and insulin concentrations, and other measurements to be related to different patterns of early growth. Together, the findings show that early development affects the risk of coronary heart disease, stroke, obstructive lung disease and diabetes at least as strongly as obesity, smoking and other aspects of adult life style.

***Fetal and Infant Origins of Adult Disease*** brings together in one volume a body of work that cannot be ignored

Hardback • Illustrations • Tables • 368 pages • ISBN 0-7279-0743-3
