Journal of Medical Screening

Editor: Nicholas Wald

Wolfson Institute of Preventive Medicine

Associate Editors include:

J Chamberlain (UK), N E Day (UK), J E Haddow (US), M Law (UK)

Journal of Medical Screening is a new quarterly journal to be launched in January 1994 by the BMJ Publishing Group to cover all aspects of medical screening and advance the science of the discipline. The journal aims to bring together specialist groups conducting screening research and establish a liaison with health authorities and policy developers. The philosophy of the journal is that screening should be about the prevention of disability and disease, not simply the early detection of disease as an end in itself.

SUBMISSION

Papers should be submitted to:

Professor Nicholas Wald

Wolfson Institute of Preventive Medicine

Medical College of St. Bartholomew's Hospital

Charterhouse Square, London EC1M 6BQ, United Kingdom

Tel: 44 71 982 6269 Fax: 44 71 982 6272

The Journal Aims to Cover:

Principles and theory of medical screening

Research into screening methodology

Development of new screening tests and their quantitative evaluation

All aspects of public health as they relate to screening, including epidemiology, randomised trials, quantitative observational studies, demonstration projects and economic evaluations

Ethical and psychological issues

Management issues

Policy and strategy

Books from the American College of Physicians

COMMON DIAGNOSTIC TESTS: USE AND INTERPRETATION

Second edition (1990)

Harold C Sox Jr, MD, FACP

The second edition of this guide contains revised and updated chapters from the first edition and completely new chapters on diagnostic reasoning, thyroid function tests, and glycemic tests. Among the tests covered are routine chest radiographs, blood cultures, carcinoembryonic antigen tests, and throat cultures, and rapid tests for diagnosis of *A. streptococcal* pharyngitis.

ISBN 0 943126 15 0 400 pages

Price: Inland £19.95; BMA members £17.95

DRUG PRESCRIBING IN RENAL FAILURE: DOSING GUIDELINES FOR ADULTS

Second Edition (1990)

William M Bennett, George R Aronoff, Thomas A Golper, Gail Morrison, Irwin Singer, D Craig Brater

Biochemical and physiologic factors for determining drug dosage in patients with renal failure are presented in easy to read tables. Text and tables detail bioavailability distribution, metabolism, renal excretion, pharmacokinetics, dosimetry, therapeutic monitoring and adverse reactions. The guidelines are organised by drug category. Major categories include: anti-microbial agents; anti-hypertensive and cardiovascular agents; sedatives, hypnotics, and drugs used in psychiatry and analgesics.

ISBN 0 943126 16 9 150 pages

Price: Inland £10.95; BMA members £9.95

DIAGNOSTIC STRATEGIES FOR COMMON MEDICAL PROBLEMS (1991)

Edited by Robert J Panzer, MD, Edgar R Black, MD, Paul F Griner, MD

This book details the logical evaluative steps for interpreting diagnostic information about various common diseases and conditions. In the opening chapters the principles and application of quantitative decision making are outlined. Subsequent chapters discuss these diagnostic techniques in relation to 49 specific medical problems, including acute pancreatitis, coronary artery disease, hyperthyroidism, and erythrocytosis, among others.

ISBN 0 943126 20 7 550 pages

Price: Inland £22.00; BMA members £20.00

A MANUAL FOR ASSESSING HEALTH PRACTICES AND DESIGNING PRACTICE POLICIES: THE EXPLICIT APPROACH (1992)

David M Eddy, MD, PhD

The pioneering manual provides a scientifically based method for assessing health practices and establishing practice guide-lines. It helps physicians deal with one of the more difficult aspects of medical practice: determining what to do at a particular clinical moment, and how to do it. The manual reviews how to collect, interpret, and combine evidence; compare the benefits of procedures with the harms; use subjective and objective methods to compare health outcomes with costs; and compile the information to implement a policy.

ISBN 0 943126 18 5 100 pages

Price: Inland £18.95; BMA members £17.95

GUIDE FOR ADULT IMMUNIZATION

Second edition (1990)

Approved by the American College of Physicians

This guide is an indispensable reference for those concerned with the immunisation needs of adults and adolescents. The second edition has an expanded section on travel, a completely revised chapter on immunocompromised adults (including those with HIV infection), and updated material on the efficacy of influenza and hepatitis B vaccines. The guide focuses on such factors as age, occupation, lifestyle, environmental risk, and compromised hosts, any one of which may call for special vaccines. With tables, appendixes and an index, plus an expanded bibliography, the Guide is a convenient reference for the busy practitioner.

ISBN 0 943126 12 6 190 pages

Price: Inland £9.95; BMA members £8.95

COMMON SCREENING TESTS (1992)

Edited by David M Eddy, MD, PhD

A concise guide to the appropriate use of screening procedures. It covers the resting ECG; serum cholesterol and triglycerides as cardiac risk factors; exercise stress testing; and screening for hypertension, diabetes mellitus, colorectal cancer, lung cancer, cervical cancer, breast cancer, and osteoporosis.

ISBN 0 943126 19 3 200 pages

Price: Inland £22.00; BMA members £20.00

PROVIDING QUALITY: A CHALLENGE TO CLINICAL PRACTICE

Edited by Norbert Goldfield, MD, PhD

Nash, MD, MBA

Quality assurance has become a major issue in health care. Nine chapters by prominent medical experts critically discuss case-mix and quality-of-care measures, information systems as quality measures, and the relationships between quality assurance programmes and malpractice. Commentary reflecting the clinician's perspective follows each chapter.

ISBN 0 943126 14 8 250 pages

Price: Inland £16.95; BMA members £15.95

ZEBRA CARDS: AN AID TO OBSCURE DIAGNOSIS (1989)

John G Sotos, MD

Recognising and diagnosing obscure problems in medicine is, at best, difficult. Zebra Cards is a study tool that gives physicians and students at all levels of clinical experience an alternative to poring over lengthy medical texts for arcane information. Presented with an item from a patient history, patient complaint, physical finding, or laboratory result, the clinicians are invited to consider alternative diagnoses. The reverse of each card gives a partial differential, and the single most surprising differential is briefly discussed.

Two hundred 3"x5" cards with an 88 page softcover manual.

ISBN 0 943126 13 4

Price: Inland £12.95; BMA members £11.95

HOSPITAL CLINICAL PRIVILEGES: GUIDELINES FOR PROCEDURES IN GASTROENTEROLOGY AND NEPHROLOGY (1988)

This book defines the "minimum criteria" for competent performance of eight procedures, four each in gastroenterology and nephrology. It is essential aid for anyone faced with the task of granting hospital clinical privileges. Each article discusses a specific procedure and defines training requirements and the level of competence needed to perform the procedure. Recommendations for when procedures should and should not be used as well as technical and cognitive criteria are given in tabular form.

Paperback

ISBN 0 943126 09 6 80 pages

TOBACCO CONTROL

AN INTERNATIONAL JOURNAL

Editor: Ronald M Davis

Tobacco Control is a quarterly scientific journal launched in 1992 by the BMJ Publishing Group to consider all aspects of tobacco prevention and control.

The Journal aims to study:

- The nature and extent of tobacco use worldwide
- The effect of tobacco use on health, the economy, the environment and society
- The efforts of the health community and health advocates to prevent and control tobacco use
- The activities of the tobacco industry and its allies to promote tobacco use

The editorial team includes regional editors from throughout the world, associate editors with expertise in special areas, and an editorial advisory board of leading tobacco researchers and tobacco control advocates.

Research Areas:

- Evaluation of smoking prevention and cessation programmes
- Tracking and evaluation of tobacco control policies and legislation
- Epidemiological and behavioural research on tobacco use
- Health effects of smoking, smoking cessation and smokeless tobacco use

Forthcoming and Recent Articles

- Reasons smokers give for stopping smoking: do they relate to success in stopping? — Elizabeth Gilpin, John P Pierce, Jerry Goodman, David Burns, Donald Shopland
- Smoking policies for public service vehicles in Oxfordshire, United Kingdom — Jennifer Mitchell, Monica Bolley
- Where teenagers get their cigarettes: a survey of the purchasing habits of 13-16 year olds in 12 US communities — K Michael Cummings, Eva Sciandra, Terry F Pechacek, Maria Orlando, William R Evans, for the COMMIT Research Group
- Clean indoor air legislation, taxation, and smoking behaviour in the United States: an ecological analysis — Seth L Emont, Won S Choi, Thomas E Novotny, Gary A Giovino
- Smoking in South Africa: the health and economic impact — David Yach, Li Mchanyike, Yusuf Saloojee

BLOOD, SWEAT, AND CHEERS

Sir Ian Fraser

Former president both of the Royal College of Surgeons of Ireland and of the British Medical Association, Sir Ian Fraser is eminent in his profession, but his book is not about being eminent, it is about life and its pleasures and pains, told with zest and humour and delightfully pictured in Ghislaine Howard's illustrations.

A NATURAL HISTORY OF EVERYDAY LIFE – A BIOGRAPHICAL GUIDE FOR WOULD-BE DOCTORS OF SOCIETY

Lord Taylor of Harlow

As doctor, politician, and administrator the late Lord Taylor was a key figure in the formative years of some varied institutions: the National Health Service, Harlow New Town, and the Memorial University of Newfoundland. These lively memoirs detail his career and his views on the origins of some of society's ills – and their cures

What do we really know about editorial peer review in scientific publication?

Something, but not enough.

- We know that peer review is widely used, but how widely?
- We know that peer review suffers from bias and conflicts of interest, but what biases and conflicts really matter? And how do we get rid of them?
- We fear that peer review suppresses innovation, but to what extent?
- We know that peer review has existed for years without scientific proof of its worth, but will it hold up under the same rigor and scrutiny we demand of science itself?

To answer many of these questions, editors, scientists, and scholars will gather to present and discuss research findings at the Second International Congress on Peer Review in Biomedical Publication, September 9-11, 1993, at the Fairmont Hotel in Chicago, Illinois.

The Second International Congress on Peer Review in Biomedical Publication

September 9-11, 1993 Chicago, Illinois

Topics will include

- The mechanisms of peer review and editorial decision making in different journals, including blind review
- The relationships between authors, editors, and reviewers, and how each is educated, selected, and evaluated
- Allocation of responsibility for published material and the meaning of authorship
- Quality assurance and standards for reviewers and editors
- Breakdowns, weaknesses, and biases in the system
- Conflicts of interests
- Fraud and scientific misconduct
- Peer review of grant proposals

The subject of the Congress is biomedical publication, but scholars in other disciplines are urged to participate, so that we may examine editorial peer review in the context of the overall scientific enterprise.
