

Journal of Medical Screening

Editor: Nicholas Wald
Wolfson Institute of Preventive Medicine

Associate Editors include:
J Chamberlain (UK), N E Day (UK), J E Haddow (US), M Law (UK)

Journal of Medical Screening is a new quarterly journal to be launched in January 1994 by the BMJ Publishing Group to cover all aspects of medical screening and advance the science of the discipline. The journal aims to bring together specialist groups conducting screening research and establish a liaison with health authorities and policy developers. The philosophy of the journal is that screening should be about the prevention of disability and disease, not simply the early detection of disease as an end in itself.

SUBMISSION

Papers should be submitted to:
Professor Nicholas Wald
Wolfson Institute of Preventive Medicine
Medical College of St. Bartholomew's Hospital
Charterhouse Square, London EC1M 6BQ, United Kingdom
Tel: 44 71 982 6269 Fax: 44 71 982 6272

Instructions to Authors may be obtained by returning the form below

The Journal Aims to Cover:

Principles and theory of medical screening

Research into screening methodology

Development of new screening tests and their quantitative evaluation

All aspects of public health as they relate to screening, including epidemiology, randomised trials, quantitative observational studies, demonstration projects and economic evaluations

Ethical and psychological issues

Management issues

Policy and strategy

What do we really know about editorial peer review in scientific publication?

Something, but not enough.

- We know that peer review is widely used, but how widely?
- We know that peer review suffers from bias and conflicts of interest, but what biases and conflicts really matter? And how do we get rid of them?
- We fear that peer review suppresses innovation, but to what extent?
- We know that peer review has existed for years without scientific proof of its worth, but will it hold up under the same rigor and scrutiny we demand of science itself?

To answer many of these questions, editors, scientists, and scholars will gather to present and discuss research findings at the Second International Congress on Peer Review in Biomedical Publication, September 9-11, 1993, at the Fairmont Hotel in Chicago, Illinois.

The Second International Congress on Peer Review in Biomedical Publication

September 9-11, 1993 Chicago, Illinois

Topics will include

- The mechanisms of peer review and editorial decision making in different journals, including blind review
- The relationships between authors, editors, and reviewers, and how each is educated, selected, and evaluated
- Allocation of responsibility for published material and the meaning of authorship
- Quality assurance and standards for reviewers and editors
- Breakdowns, weaknesses, and biases in the system
- Conflicts of interests
- Fraud and scientific misconduct
- Peer review of grant proposals

The subject of the Congress is biomedical publication, but scholars in other disciplines are urged to participate, so that we may examine editorial peer review in the context of the overall scientific enterprise.
