

# BASIC MOLECULAR AND CELL BIOLOGY

Second Edition 1993 UK £8.95; Overseas £11.00 (BMA Members £8.45; £10.50)

The study of disease at the molecular and cellular level is revolutionising medicine. Already spectacular progress has been made in identifying the genes involved in some diseases and in understanding cancer pathogenesis, opening up exciting new possibilities for treatment. In *Basic Molecular and Cell Biology* leaders in the field explain the techniques of molecular and cell biology, which are being applied in specialties as far apart as cardiology and diabetes, and describe their implications for medicine. It will enable doctors, students, and researchers to gain a basic understanding of the subject and some insight into the way in which the medical sciences will be moving over the next few years.

This second edition has been extensively updated and expanded, with four new chapters added.

#### CONTENTS INCLUDE:

- **Molecular and cell biology in clinical medicine: introduction**  
David Weatherall
- **The polymerase chain reaction: a tool for molecular medicine**  
A F Markham
- **Gene regulation**  
David S Latchman
- **Genes and cancer**  
Richard G Vile, Myra O McClure, Jonathan N Weber
- **An introduction to cells**  
Lewis Wolpert
- **The cell nucleus**  
R A Laskey
- **Sorting signals and cellular membranes**  
Graham Warren

**BMJ**  
PUBLISHING GROUP

## ORDER FORM

Available from: **British Medical Journal, P.O. Box 295, London WC1H 9TE, medical booksellers or the BMJ bookshop in BMA House**

Please send me \_\_\_\_\_ copy/ies of **Basic Molecular and Cell Biology**      **Membership No.** \_\_\_\_\_

**Name** \_\_\_\_\_  
(Print Clearly)

Cheque enclosed (made payable to British Medical Journal) £ \_\_\_\_\_

# ***What do we really know about editorial peer review in scientific publication?***

## **Something, but not enough.**

- We know that peer review is widely used, but how widely?
- We know that peer review suffers from bias and conflicts of interest, but what biases and conflicts really matter? And how do we get rid of them?
- We fear that peer review suppresses innovation, but to what extent?
- We know that peer review has existed for years without scientific proof of its worth, but will it hold up under the same rigor and scrutiny we demand of science itself?

To answer many of these questions, editors, scientists, and scholars will gather to present and discuss research findings at the Second International Congress on Peer Review in Biomedical Publication, September 9-11, 1993, at the Fairmont Hotel in Chicago, Illinois.

## **The Second International Congress on Peer Review in Biomedical Publication**

**September 9-11, 1993 Chicago, Illinois**

### **Topics will include**

- The mechanisms of peer review and editorial decision making in different journals, including blind review
- The relationships between authors, editors, and reviewers, and how each is educated, selected, and evaluated
- Allocation of responsibility for published material and the meaning of authorship
- Quality assurance and standards for reviewers and editors
- Breakdowns, weaknesses, and biases in the system
- Conflicts of interests
- Fraud and scientific misconduct
- Peer review of grant proposals

The subject of the Congress is biomedical publication, but scholars in other disciplines are urged to participate, so that we may examine editorial peer review in the context of the overall scientific enterprise.
