

# PUBLISHING GROUP

# Journal of Medical Ethics

EDITOR: RAANAN GILLON

The **Journal of Medical Ethics** is a leading international journal in the field of medical ethics. It publishes interdisciplinary articles on ethical aspects of health care.

Contributions to the journal originate in many countries and disciplines, and all undergo rigorous assessment. In addition to publishing original articles it provides a forum for reasoned debate on ethical issues.

Case conferences, editorials, book reviews, correspondence and news and notes are also included. Occasional series focus on teaching medical ethics experiences of medico - moral dilemmas ("At the Coalface") and medical ethics in literature.

**Student rates are available,  
please contact the Publisher.**

## **FORTHCOMING PAPERS:**

- **Bioethics in Europe**  
*Povl Riis, Octari Quitana and Judge C. Byk*
- **Debate: A Critique of using age to ration health care**  
*Roger W. Hunt with a response from Daniel Callahan*
- **After bioethics and towards virtue**  
*Peter D. Toon*
- **Ethics of research with psychiatric patients**  
*Bill Fullford*
- **Appropriate care of the newborn: ethical dilemmas**  
*Peter M. Dunn*
- **Postmortem procedures in the emergency department using the recently dead to practise and teach**  
*Kenneth V. Isserson*

# **BASIC MOLECULAR AND CELL BIOLOGY**

The study of disease at the molecular and cellular level is revolutionising medicine. Already spectacular progress has been made in identifying the genes involved in some diseases and in understanding cancer pathogenesis, opening up exciting new possibilities for treatment. In *Basic Molecular and Cell Biology* leaders in the field explain the techniques of molecular and cell biology, which are being applied in specialties as far apart as cardiology and diabetes, and describe their implications for medicine. It will enable doctors, students, and researchers to gain a basic understanding of the subject and some insight into the way in which the medical sciences will be moving over the next few years.

This second edition has been extensively updated and expanded, with four new chapters added.

## **CONTENTS INCLUDE:**

- **Molecular and cell biology in clinical medicine: introduction**  
David Weatherall
- **The polymerase chain reaction: a tool for molecular medicine**  
A F Markham
- **Gene regulation**  
David S Latchman
- **Genes and cancer**  
Richard G Vile, Myra O McClure, Jonathan N Weber
- **An introduction to cells**  
Lewis Wolpert
- **The cell nucleus**  
R A Laskey
- **Sorting signals and cellular membranes**  
Graham Warren

Second Edition 1993 UK £8.95; Overseas £11.00 (BMA Members £8.45; £10.50)

# A Gift

**doctors as ideal party guests  
being propositioned by a patient  
making your own gunpowder  
appointments committees  
hospital architecture  
breast implants  
trees  
the royal touch**

Each week in the BMJ the regular columnists of the "Soundings" page - two general practitioners, three hospital doctors, three journalists - expound wittily, passionately, or forcefully on matters relating to medicine and the world at large. This selection brings together a choice of contributions from a year's "Soundings" by Trisha Greenhalgh, Julie Welch, Bernard Dixon, Colin Douglas, James Owen Drife, George Dunea, Tony Smith, and David Widgery.

Highly personal and eloquently expressed, these opinion pieces will entertain, inform, and exasperate you by turns.

# Advanced Paediatric Life Support

## *The Practical Approach*

### **THE PRACTICAL GUIDE TO THE EMERGENCY CARE OF CHILDREN**

*Advanced Paediatric Life Support: The Practical Approach* gives detailed, easy to follow directions on management during the crucial first hour of care in all common emergencies in children. The book is divided into sections on:

- Basic and advanced life support
- Management of the seriously ill child
- Management of the seriously injured child
- Practical procedures

Written by paediatricians, paediatric surgeons, specialists in accident and emergency medicine, and anaesthetists, the book is an integral component of the Advanced Paediatric Life Support course, which aims to raise the standard of the emergency care of children. It will help all doctors, nurses, and paramedics to deal confidently with seriously ill and injured children.

ISBN 0 7279 07921 300 pages 1993  
UK £19.95 Overseas £23.00 (BMA members £18.95; £22.00)

### ALSO AVAILABLE FROM THE BMJ

#### **ABC of Major Trauma**

Edited by David Skinner, Peter Driscoll, Richard Earlam

"an authoritative and comprehensive text that is crammed with current information...this is an excellent book which makes a major contribution to trauma care in the UK..." **BASICS**

# What's wrong with medical education?

Many medical graduates are unprepared for the realities of being a doctor. After five years of absorbing factual information, their creative thinking and problem solving skills are poor. Something is wrong with the way students are being taught.

In *Medical Education* Stella Lowry has put together the current views from the

profession, the GMC's recent review, and a national consensus inquiry by the King's Fund. She examines issues such as:

- Selecting and assessing students
- Changing curricula
- Improving the quality of teaching
- Reorganising the preregistration year

The arguments and proposals for improvement are explained clearly, enabling all those involved in teaching medicine – virtually all doctors – to contribute to the debates. The book also provides a valuable insight, for teachers and students alike, into the way forward for medical education.

# **What do we really know about editorial peer review in scientific publication?**

## **Something, but not enough.**

- We know that peer review is widely used, but how widely?
- We know that peer review suffers from bias and conflicts of interest, but what biases and conflicts really matter? And how do we get rid of them?
- We fear that peer review suppresses innovation, but to what extent?
- We know that peer review has existed for years without scientific proof of its worth, but will it hold up under the same rigor and scrutiny we demand of science itself?

To answer many of these questions, editors, scientists, and scholars will gather to present and discuss research findings at the Second International Congress on Peer Review in Biomedical Publication, September 9-11, 1993, at the Fairmont Hotel in Chicago, Illinois.

## **The Second International Congress on Peer Review in Biomedical Publication**

**September 9-11, 1993 Chicago, Illinois**

### **Topics will include**

- The mechanisms of peer review and editorial decision making in different journals, including blind review
- The relationships between authors, editors, and reviewers, and how each is educated, selected, and evaluated
- Allocation of responsibility for published material and the meaning of authorship
- Quality assurance and standards for reviewers and editors
- Breakdowns, weaknesses, and biases in the system
- Conflicts of interests
- Fraud and scientific misconduct
- Peer review of grant proposals

The subject of the Congress is biomedical publication, but scholars in other disciplines are urged to participate, so that we may examine editorial peer review in the context of the overall scientific enterprise.
