

We are proud to announce the biggest and best ever edition of . . .

MARTINDALE

The Extra Pharmacopoeia

30th edition, 1993

The universally acclaimed source
of drug information

Prepared by the editorial staff of the Royal Pharmaceutical
Society of Great Britain and edited by Dr James E. F. Reynolds

The highly acclaimed Martindale contains up-to-date, concise and authoritative information on drugs and medicines that are used throughout the world. It is written for practising pharmacists and physicians and for all those involved in the use of drugs and medicines.

Features of the new edition include:

- a massive new and extensive section describing 46,000 proprietary medicines.
- an increase in the number of referenced reviews.
- a shift to a more clinical emphasis.
- the usual period between editions has been shortened in order to meet the need for up-to-date information.

'The book is without equal anywhere in the world as a reference source on current drug usage.'

The Pharmaceutical Journal
25th January 1989

CONTENTS

PREFACE

Provides terms of reference and table of contents; abbreviations; contracted names for ions and groups; dissociation constants; atomic weights.
