COLORECTAL DISEASES

Edited by D J Jones, M H Irving

This practical guide covers all aspects of coloproctology, describing the signs, diagnosis and treatment of the various disorders from constipation to Crohn's disease and life threatening cancers.

Fully illustrated in colour, it provides the essential knowledge to make a diagnosis, initiate appropriate treatment or referral, and the background information necessary to understand the patient's management. It will be a valuable guide for all doctors without a specialist training in coloproctology and for gastroenterologists, physicians and surgeons in training.

ISBN 0 7279 0755 7 116 pages 1993

UK £12.95; Overseas £15.00

Hardcover £11.95; Paperback £4.00

THE UNACCEPTABLE FACE OF SCIENCE

Fraud exists, both in academic medical research and in drug trials in general practice. This important new book sets out the evidence, reviewing events since 1975 when the first notorious case of fraud became public knowledge.

The problem is viewed from many perspectives, with contributions from a general practitioner, head of an academic unit, contract research company director, statistician, editor and lawyer. Together, their information provides a compelling account of the extent to which fraud and misconduct have been and continue to be practised in medicine.

Contents include:

- Fraud in general practice
- Statistical aspects of detection
- The British Pharmaceutical Industry's response
- Legal aspects
- The French scene
- The Danish scene
- Data audits in trials and their implications for misconduct (USA)
- Fraud and the editor

Fraud and Misconduct in Medical Research is a valuable practical text for all researchers – and ultimately anyone who practises medicine.

Student BMJ also has sections on student life - discussing how to survive financially as well as emotionally. The journal bridges the gap between being a medical student and becoming a doctor, providing at the same time a guided introduction into the world of scientific papers and argument.

- How to use an ophthalmoscope
- How to do a vaginal examination
- Essentials of managing fractures
- Heart murmurs made simple
- How to fill in a death certificate
- Surviving away from home
- A guide to managing money
- What its like studying medicine in Romania
- Understanding Angiography
- My career - tropical medicine, psychiatry
- What the best books are in gynaecology
