

Advanced Paediatric Life Support

The Practical Approach

THE PRACTICAL GUIDE TO THE EMERGENCY CARE OF CHILDREN

Advanced Paediatric Life Support: The Practical Approach gives detailed, easy to follow directions on management during the crucial first hour of care in all common emergencies in children. The book is divided into sections on:

- Basic and advanced life support
- Management of the seriously ill child
- Management of the seriously injured child
- Practical procedures

Written by paediatricians, paediatric surgeons, specialists in accident and emergency medicine, and anaesthetists, the book is an integral component of the Advanced Paediatric Life Support course, which aims to raise the standard of the emergency care of children. It will help all doctors, nurses, and paramedics to deal confidently with seriously ill and injured children.

The ABC of Child Abuse

Second Edition

Edited by Roy Meadow

The *ABC of Child Abuse* gives clear guidance on how to recognise the different forms of child abuse, and advises on what to do when you suspect or confirm it.

This second edition has been completely updated to include:

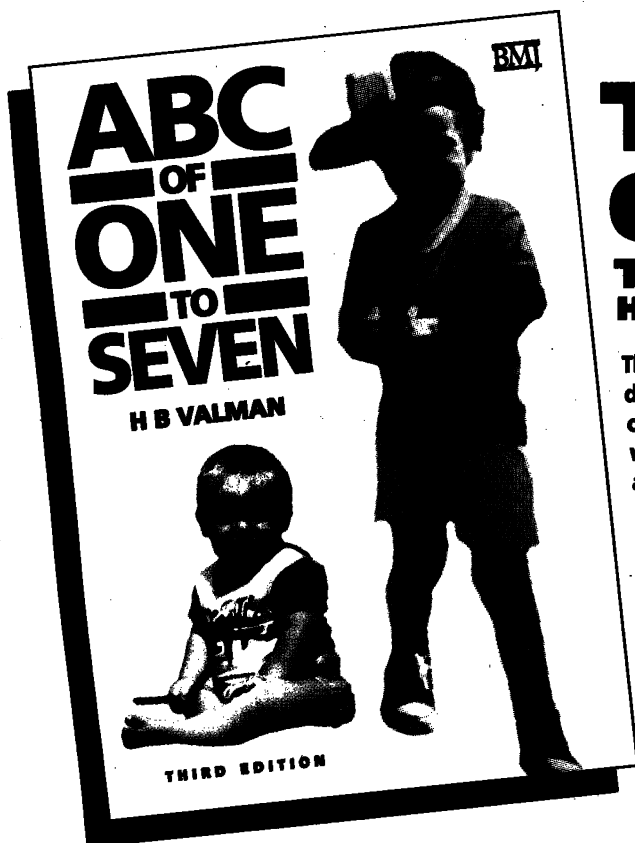

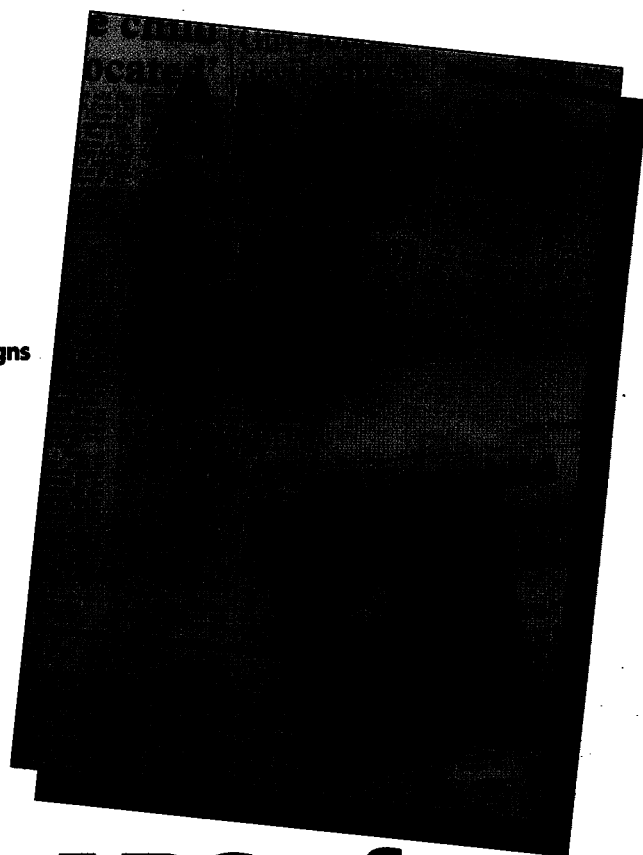

- New information about the sensitivity and specificity of diagnostic signs
- New chapters on ophthalmological presentations and on the role of social services
- New information relating to the role of child psychiatry and the function of case conferences to reflect current practice and the implications of the Children Act
- The effect of the new laws on legislation and the role of health professionals in preparing reports and presenting evidence in courts.

"It is a well written and concise but comprehensive review, running the entire gamut of medical, legal and sociologic issues in child abuse."

ISBN 0 7279 0764 6 88 pages October 1993

Price: £12.95; Overseas £15.00 (BMA members £11.95; £14.00)

The ABC of One to Seven

Third Edition
H.B. Valman

The *ABC of One to Seven* has become the standard guide to the diseases, emotional problems, and developmental disorders of early childhood. This third edition has been extensively revised in accordance with current recommended practice and the Children Act, and there is a new chapter on audit in primary care. It's practical approach enables it to be used as a ready "how to do it" by general practitioners, medical students, vocational trainees, nurses, and midwives.

"The great merit of this book is that the common paediatric problems as they present to a general practitioner or a hospital clinic are dealt with by an experienced paediatrician who is also an experienced writer."

ABC OF SLEEP DISORDERS

Edited by
Colin M Shapiro

Everyone knows the importance of a good night's sleep - when our sleep routine is disrupted we are unable to perform effectively. As many as one in seven people in the West have a long term sleep disorder. The general and specific effects of disorders such as insomnia and sleep apnoea present an enormous problem for society.

The *ABC of Sleep Disorders* describes what is known about sleep and sleep disorders. It will help doctors recognise the presence of a sleep related problem; investigate the cause; and offer practical management.

TOPICS INCLUDE:

- Function of sleep
- Insomnia
- Daytime sleepiness
- Sleep apnoea
- Circadian rhythms
- Dreams and medical illness
- Medicolegal aspects.

The importance of sleep disorders is being increasingly recognised by doctors and governments. Better treatment and advice will improve the physical, psychological, and social wellbeing of many people.

Here is a comprehensive guide to the subject that will be invaluable to GPs, hospital doctors, psychiatrists, medical students, and anyone who needs to know about the causes and effects of disrupted sleep.

Medical Screening: The Way Forward

26 January 1994

Queen Elizabeth II Conference Centre, Broad Sanctuary, Westminster, London SW1P 3EE

Medical screening provides many opportunities for the prevention of disease and handicap. What can it offer and what are its limitations?

Based on several case studies *Medical Screening: The Way Forward*, organised jointly by the *BMJ* and the *Journal of Medical Screening* is a one day conference to be held on January 26 1994 in London to examine the medical, scientific, ethical, social, psychological and economic aspects of screening. There will be ample time for discussion.

At the conference an important new publication, *Journal of Medical*

Screening, will be launched, to cover all aspects of medical screening and to advance the science of the discipline.

The conference fee is £125.00 inclusive of VAT, lunch and refreshments and the *Journal's* supplement (to be published after the meeting).

A year's personal subscription to *Journal of Medical Screening* is £52.

As a special offer delegates who both attend the meeting and subscribe to the journal can save on both, and pay only £150.

SETTING THE SCENE

Chair: Professor Nicholas Wald, Wolfson Institute for Preventive Medicine, St Bartholomew's Hospital, and Editor, *Journal of Medical Screening*

Scope for screening. Dr Leon Gordis, Department of Epidemiology, Johns Hopkins University, USA

The act of graduating does not automatically make a student able to doctor.

Student BMJ also has sections on student life - discussing how to survive financially as well as emotionally. The journal bridges the gap between being a medical student and becoming a doctor, providing at the same time a guided introduction into the world of scientific papers and argument.

- How to use an ophthalmoscope
- How to do a vaginal examination
- Essentials of managing fractures
- Heart murmurs made simple
- How to fill in a death certificate
- Surviving away from home
- A guide to managing money
- What its like studying medicine in Romania
- Understanding Angiography
- My career - tropical medicine, psychiatry
- What the best books are in gynaecology
