

# Three Unique Anticholinergics

*with exceptional therapeutic characteristics*

## PIPTAL

(Pipenzolate methobromide)

**For Peptic Ulcer**

Piptal decreases acid secretion, suppresses abnormal gastric motility and relieves the pain of peptic ulcer.

It is unusually well-tolerated, even when administered over long periods.

## DACTIL

(Piperidolate hydrochloride)

**For Gastro-duodenal Spasm**

Dactil selectively relieves pain due to upper gastro-intestinal spasm usually within ten minutes. Indications include abdominal cramps as in gastro-duodenal spasm, as well as biliary spasm, hiatus hernia, cardiospasm, pylorospasm, post-gastrectomy syndrome and regional ileitis.

## CANTIL

(Mepenzolate bromide)

**For the Colon**

Cantil effectively relieves pain due to colonic spasm in irritable colon, spastic colitis and diverticulitis. It counteracts colonic hypermotility in acute and chronic non-specific diarrhoeas, mucous colitis and ulcerative colitis.

**SIDE EFFECTS** have only rarely been observed. The selective actions of all three products—fully supported by extensive clinical trials—have been found to provide a high degree of therapeutic efficacy with almost complete freedom from the side effects commonly attributable to anticholinergic drugs.

**CONTRA-INDICATIONS**—Piptal, Dactil and Cantil are contra-indicated in glaucoma and should be used with caution in prostatic hypertrophy.

**For efficient conception control  
with minimum physiological disturbance**

The low dosage regimen of Feminor Sequential closely parallels the body's normal pattern of hormone production. To inhibit ovulation it employs an oestrogen alone for the first fifteen days - with the addition of a progestogen for the last five days to establish a normal secretory endometrium. The total amount of hormone taken is limited to that necessary for effective inhibition of ovulation. Thus there is minimum physiological disturbance and a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain.

Feminor Sequential is presented in wallets containing one month's supply of 20 foiled tablets: 15 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.075 mg, norethynodrel 5.0 mg.

## MEGACLOR SYRUP

(clomocycline)

Of all the tetracycline syrups available today Megaclor is the most soluble, ensuring rapid and effective absorption. Its combination of high anti-bacterial activity (particularly against staphylococci, streptococci and pneumococci) with minimal risk of undesirable side reactions makes Megaclor the ideal broad-spectrum antibiotic for children. Moreover, the use of Megaclor reduces the incidence of deposition in developing bone and teeth.

**Megaclor Syrup** contains 85 mg. clomocycline in each 5 ml. teaspoonful (60 ml. bottles: 5/-d basic N.H.S. Price).

**Megaclor Capsules** for adults each contain 170 mg. clomocycline.

# syrup

## why prescribe Broxil syrup?

### The first reason is acceptability.

Some patients find it difficult to swallow a tablet or capsule...some just naturally prefer a pleasant, easy-to-take syrup. For these patients there is fruit-flavoured Broxil syrup.

### The second reason is High Blood Levels.

Broxil syrup gives *reliable* blood levels, double those of oral penicillin V and five times those of oral penicillin G; which means there is more Broxil at the site of infection - and this is where it matters.

### AVAILABILITY

Broxil syrup is available in 60 ml. bottles. When dispensed, each 5 ml. teaspoonful contains 125 mg. phenethicillin as phenethicillin potassium B.P. Broxil is also available in Tablets, 125 and 250 mg. and Capsules, 125 and 250 mg.

**DOSAGE:** Children 62.5-125 mg., and Adults 125-250 mg., four times a day.

**Prophylactic:** Children 62.5-125 mg., and Adults 125 mg., twice a day.

**CONTRA-INDICATION:** Penicillin allergy.

**SIDE EFFECTS:** Mild nausea or diarrhoea may occasionally be encountered.

## as surely as problems promote insomnia **'Tuinal'** promotes sleep

Whatever the insomnia problem 'Tuinal' will give your patient a good night's sleep. 'Tuinal' promotes sleep so surely because it is a balanced combination of two hypnotics—one to give prompt onset, one to ensure that sleep lasts the whole night through.

Whether your patients have trouble getting off to sleep or whether they waken too early, 'Tuinal' is the ideal all-rounder. Moreover, you may prescribe 'Tuinal' with confidence because extensive clinical

experience has confirmed its safety at the recommended dosage level. Within 30 minutes of taking 'Tuinal' your patients can safely pigeon-hole tonight's problems until the morning.

in a new  
five-day size**

**and new  
film-coated tablets

**In strep. throats,  
two new five day  
bottles make sure**

Penicillin is the drug of choice in beta-haemolytic streptococcal infections.<sup>1,2,3</sup> In practice penicillin G is as effective as the more expensive penicillin V.<sup>4</sup> Ten days penicillin therapy is necessary to produce the bacteriological clearance so essential in preventing sequelae such as rheumatic fever and glomerulonephritis.<sup>5,6</sup> For any other penicillin-sensitive infection, five days therapy is the minimum.<sup>7</sup> Thus Crystapen G Syrup now provides the right preparation (now in two strengths—125mg/5ml and 250mg/5ml) in the right bottle size at the right price—the new five day bottle costs little more than three day bottles.

**New tablets  
cost less**

Printed and easy to identify, small, film-coated and easy to swallow, new Crystapen G Tablets have one other advantage. They cost less than any previous Crystapen G Tablets—in 125 mg and 250 mg strengths.

## Crystapen G oral preparations

**Soluble penicillin for systemic therapy  
by mouth**

### Description

Crystapen G Syrups:—granules which, on reconstitution with water, produce flavoured syrups containing potassium penicillin G. Crystapen G Tablets:—potassium penicillin G tablets (film-coated or plain).

### Mode of action

Given orally, soluble penicillin G is well absorbed when taken on an empty stomach and produces better blood levels than some insoluble forms of penicillin. Penicillin G is the most active antibiotic in vitro against the common penicillin-sensitive organisms.

### Indications

Penicillin-susceptible infections, e.g., those due to beta-haemolytic streptococci, pneumococci and susceptible staphylococci. Prophylaxis before and after surgery and dental extractions. To prevent subacute bacterial endocarditis in patients with rheumatic heart disease.

### Side effects

Occasionally patients experience diarrhoea. Sensitivity reactions such as

urticarial rash are uncommon, and anaphylaxis is very rare. The latter demands immediate resuscitative measures, including injection of adrenaline and use of an intravenous corticosteroid.

### Dosage

Infants: 62.5 mg to 125 mg (100,000 to 200,000 units). Children: 125 mg to 250 mg (200,000 to 400,000 units). Adults: 250 mg (400,000 units), or more. Doses should be given four times a day before meals, or more frequently if need arises. In patients with beta-haemolytic streptococcal infection it is always advisable to continue treatment for ten days to prevent bacteriological relapse and complications such as rheumatic fever or acute nephritis. N.B.—In serious and overwhelming infections when rapid control is essential, injections of sodium penicillin G (Crystapen) initially are advantageous.

### Dispensing note

Crystapen G Syrups are prepared by adding 60 ml (2 fl oz) of water slowly, and shaking until the granules dissolve.

### Storage

Crystapen G Tablets: store below 25°C (77°F) in a dry place, but not in a refrigerator. Crystapen G Syrups: when prepared as directed, must be used within five days if kept at room temperature (below 20°C) or within fourteen days if kept in a refrigerator. Dry granules maintain potency for two years, if stored below 25°C.

### Legal restriction

To be supplied on prescription only (Therapeutic Substances Act: Part II).

# When a complete wound dressing is required you can rely on **Neobacrin Tulle\***

Neobacrin Tulle is a non-adherent wound dressing impregnated with neomycin and bacitracin. Together these antibiotics are bactericidal against an exceptionally wide range of gram-positive and gram-negative organisms. Neomycin and bacitracin rarely sensitise the tissues and the protective tulle promotes healing without adhering to granulating surfaces. Particularly impressive is the simplicity of application, the absence of pain and any tearing of new skin when the dressing is removed, and the effectiveness of Neobacrin against penicillin-resistant staphylococci. Abrasions, scalds, burns, minor crush injuries, ulcers, colostomy and minor surgical wounds can all be protected safely and simply with Neobacrin Tulle.

# CONSIDER NOW

## summer-long protection against HAY FEVER with

# D-VAC Pollens 3 dose course

Regd.

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

**Primary Course:** designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

**Advanced Course:** designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

## TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order **before 31st December**—quoting the course required (Primary or Advanced), the patient's name, and the date on which it is intended to administer the first dose: this date should fall **between 12th February and 9th March, 1968.**

Late orders will be met if possible up to 20th January, but in these cases first doses cannot be supplied for administration before 19th February.

The three doses of the course will be despatched separately at 4-week intervals to arrive in good time for administration, without need for further prescription or order.

(D-VAC Pollens is not available outside the U.K.)

The frenzied fight for breath through obstructed airways, the telephone call in the night requesting immediate treatment—such emergency situations are reduced when you prescribe Tedral SA (sustained action) tablets. One tablet twice a day helps to prevent bronchospasm, and increases vital capacity. Your patients are freed from worry about exacerbations and the simple dosage reduces the risk of missed medication.

# a first-class prescription for a sick Doctor

It is commonly said that good doctors are bad patients. And more than three-quarters of a century's experience with the medical and dental professions has convinced us that the statement is very often true. A sick doctor is nearly always a worried doctor. Not because of the nature of his illness, but because of the loss of income it may entail.

But we have a specific for this kind of thing. By taking a Sickness and Accident Insurance with us, a doctor can be certain of receiving a substantial part of his normal income whenever he is incapacitated by illness or accident. Further, there is absolutely no limit to the number of claims he may make up to the age of 65.

This is just one example of the many policies we have designed specially for doctors and dentists. And since the Society is wholly owned by the policy holders all the profits belong to them and are distributed by bonus declaration every three years.

If *you* are eligible to join the Society you should be sharing these profits. So why not write to us for further details? There are separate brochures for Sickness and Accident; Educational; Life; Personal Pension; Family Income; Provision for Estate Duty; Car Hire Purchase.

We shall be pleased to send one or more of these at your request. When writing quote ref: No. 001.

# Lyndiol 2.5

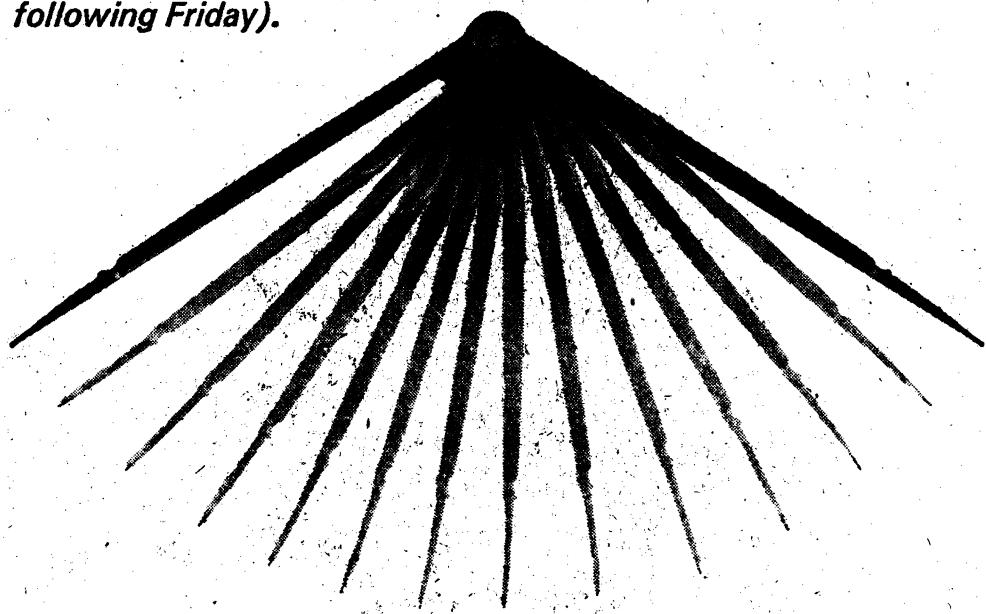

## is only marginally better than other oral contraceptives...

The physician, trained to make rational choices, faces a problem when he comes to The Pill, for he knows that as far as the combined oral contraceptives are concerned all are virtually 100% effective.

He looks then for other significant differences. First of these is the incidence of side-effects. (*The latest data from the F.P.A. show that Lyndiol 2.5 is substantially free from side-effects*).

Price is another factor, especially as the acceptability of the oral contraceptive idea spreads down the socio-economic scale to those families who perhaps need contraception most and can afford it least. (*Lyndiol 2.5 offers the most reasonable price-to-patient*).

And he considers patient reliability—which dosage scheme will be easiest to follow? (*Lyndiol 2.5's 'fixed day' routine means simply that if a patient starts on, say, a Friday, she finishes three weeks later on a Friday and begins her new course on the following Friday*).

## ...you may well ask how wide is a margin?

**SUBJECT**  
MENTAL CRUELTY

WHEN FRANCES WAS NINE her widowed father remarried. Her stepmother took an immediate dislike to Frances, and in fact kept her from seeing her father (who lived in the same house) for nearly a year. Frances was sent to bed at 6 p.m. and had to do her homework by torchlight. She was not allowed to join in outside activities at home or at school, and was not taken on holidays with the family. Many people don't realize that cruelty to children is not necessarily physical. Every year the NSPCC deals with thousands of cases of what we call mental cruelty - cases like Frances's - and tries to help families solve their problems together, removing children from their parents only when all else has failed. Frances' case was one of the exceptions. Frances wanted to be sent away, and a sympathetic headmaster helped our Inspector H. to get her admitted to a Boarding Grammar School. Now Frances is 14, and has a chance for a happy future.

The NSPCC is a service - unfortunately a very necessary one - on call round the clock, seven days a week. But it can only continue to help children like Frances with the support of private donations and legacies.

UNIVERSITY OF EXETER  
Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on January 10, 1968. These courses are held three times a year, starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under Section 48 of the N.H.S. Act (1946). These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£60 for students from outside the United Kingdom). Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, the University, Exeter, Devonshire. (13568)

## COMMERCIAL APPOINTMENTS

## MERCK SHARP &amp; DOHME

## Assistant to the Medical Director

Because of continuing expansion our Medical Division requires an additional registered Medical Practitioner, male or female, as an Assistant to the Medical Director to be based at our Hoddesdon head office, eighteen miles north of London.

The person appointed will assist his or her colleagues in providing a service to the profession and to the Company.

There are three main aspects of the post :

- providing skilled advice on all technical and promotional literature
- dealing with medical queries posed by the profession
- participating in the training of medical representatives.

Because we place considerable importance on the accuracy and integrity of our professional literature and the quality of our representation, a doctor with an interest in writing or teaching would find this post of particular interest. Although initially this is a junior vacancy there is considerable scope for development in an international Company with an impressive background in therapeutic medicine.

The conditions of employment are competitive and the starting salary will take full account of experience and qualifications although no previous first-hand knowledge of the pharmaceutical industry is necessary.

Applications, which will be treated in strict confidence, should be addressed to the Personnel Manager, Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire.

## ZAMBIA FLYING DOCTOR SERVICE

Based on Ndola in the Copperbelt this service operates to remote areas of Zambia, using professionally flown twin-engined aircraft and a ground radio network. Each airstrip clinic is visited regularly several times a week.

Applications are invited from doctors.

**Duties:** 1. To carry out regular clinics at Bush airstrips. This is much the greater portion of the work.  
2. To accompany the aircraft on emergency patient evacuation flights.  
3. To give assistance and advice over the radio network when appropriate.

Seriously ill patients with medical complaints are treated at the clinics where there is provision for their accommodation. Patients with serious surgical diagnoses are flown to hospital so that the doctors with the service are not required to do major surgery. Of the patients attending the clinics 49% are children.

**Research:** This is an essential part of the service and funds are available for this purpose. The opportunities are great as the service operates in areas which have not previously had any medical facilities.

**Terms:** Six-month appointments with return air fare for one person paid by the service. Salary of £1,000 for the six months period paid in six equal monthly instalments of approximately £166. Fully furnished accommodation provided in Ndola at economic rates.

A second return fare could be loaned to applicant and deducted from salary. Fourteen days holiday. The posts may interest doctors who have just finished their pre-registration year, or more senior people who would like the opportunity to do some work and research in Zambia, possibly on the basis of leave of absence from their existing U.K. appointments.

Anyone interested is asked to write to:

Dr. James Lawless,  
Flying Doctor Service,  
P.O. Box 1856, NDOLA,  
Zambia.

Interviews will be arranged in Britain or Zambia. (H.5149)

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*"In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy."*

## Safe, Simple, Effective

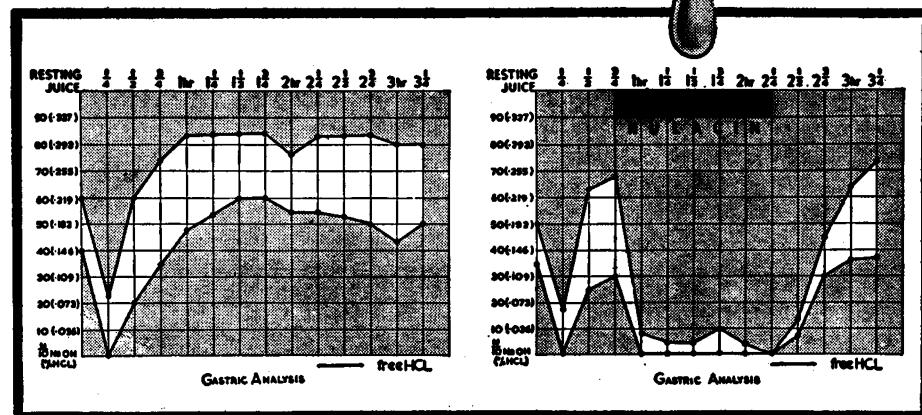

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
