

# Three Unique Anticholinergics

*with exceptional therapeutic characteristics*

## PIPTAL

(Pipenzolate methobromide)

**For Peptic Ulcer**

Piptal decreases acid secretion, suppresses abnormal gastric motility and relieves the pain of peptic ulcer.

It is unusually well-tolerated, even when administered over long periods.

## DACTIL

(Piperidolate hydrochloride)

**For Gastro-duodenal Spasm**

Dactil selectively relieves pain due to upper gastro-intestinal spasm usually within ten minutes. Indications include abdominal cramps as in gastro-duodenal spasm, as well as biliary spasm, hiatus hernia, cardiospasm, pylorospasm, post-gastrectomy syndrome and regional ileitis.

## CANTIL

(Mepenzolate bromide)

**For the Colon**

Cantil effectively relieves pain due to colonic spasm in irritable colon, spastic colitis and diverticulitis. It counteracts colonic hypermotility in acute and chronic non-specific diarrhoeas, mucous colitis and ulcerative colitis.

**SIDE EFFECTS** have only rarely been observed. The selective actions of all three products—*fully supported by extensive clinical trials*—have been found to provide a high degree of therapeutic efficacy with almost complete freedom from the side effects commonly attributable to anticholinergic drugs.

**CONTRA-INDICATIONS**—Piptal, Dactil and Cantil are contra-indicated in glaucoma and should be used with caution in prostatic hypertrophy.

**For efficient conception control  
with minimum physiological disturbance**

The low dosage regimen of Feminor Sequential closely parallels the body's normal pattern of hormone production. To inhibit ovulation it employs an oestrogen alone for the first fifteen days – with the addition of a progestogen for the last five days to establish a normal secretory endometrium. The total amount of hormone taken is limited to that necessary for effective inhibition of ovulation. Thus there is minimum physiological disturbance and a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain.

Feminor Sequential is presented in wallets containing one month's supply of 20 foiled tablets: 15 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.075 mg, norethynodrel 5.0 mg.

## The problem of the dirty mouth

Even in 1967 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

**The first  
penicillin  
clinically  
effective  
against  
Pseudomonas  
pyocyanea**

Beecham's have now added Pyopen to their range of injectable semi-synthetic penicillins. Not only is it effective against *Ps. pyocyanea* (*Ps. aeruginosa*), but it is also highly active against *E. coli* and *Proteus* spp. including many strains of *Pr. vulgaris*, *Pr.morganii* and *Pr. rettgeri*, insensitive to other antibiotics.

Being a penicillin, Pyopen can be given if

necessary in high dosages without fear of toxicity.<sup>1</sup>

Pyopen is remarkably free from toxic effects and can be administered in sufficient dosages to obtain concentrations in the serum which are inhibitory to typical strains of *Ps. pyocyanea*, and the drug is also excreted in high concentration in the urine.<sup>2</sup>

#### INDICATIONS AND DOSAGE

**Urinary Tract Infections:** Pyopen achieves high urinary levels, which, together with its bactericidal action against *Ps. pyocyanea*, *Proteus* spp. (including many strains resistant to other antibiotics), and *E. coli*, make it particularly suitable for the treatment of urinary tract infections.<sup>3</sup>

**Dosage:** 1 g. 6-hourly by intramuscular injection, for 5-10 days.

**Infected Burns:** Pyopen reduces or eliminates *Ps. pyocyanea* from burns, and prevents further invasion by this organism. It is recommended for prophylactic treatment of high-risk patients.<sup>4</sup>

**Dosage:** Prophylactic dosage: 1 g. 6-hourly by intramuscular injection, for five days.

**Severe Systemic Infections and Septicaemia:** Pyopen's low toxicity allows large intramuscular or intravenous dosage to be used to achieve the necessary high blood levels.<sup>5</sup>

**Dosage:** 12-30 g. daily by intravenous injection or infusion. Higher blood levels can be achieved by simultaneous administration of probenecid.

**Other indications:** Dosage will depend on the site of infection and the sensitivity of the infecting organism.\*

**Paediatric Dosage:** Dependent upon weight and age of child. A suitable daily dosage, depending upon site and organism involved, should lie between 100 and 300 mg. per kilogram body weight.\*

**Contra-indications:** Penicillin allergy. N.B. Pyopen has no activity against penicillinase-producing staphylococci.

**Side-effects:** Some pain may be experienced at the site of injection, otherwise as for injectable penicillins.

**Availability:** Each vial contains 1 g. carbenicillin as the disodium salt for injection.

# Nausea and vomiting are effectively controlled by Maxolon

- ☐ Maxolon rapidly controls vomiting, whether due to local or blood-borne irritants.
- ☐ Maxolon may be given orally or by injection, according to the condition of the patient.
- ☐ Maxolon does not sedate at the recommended dose.
- ☐ Maxolon neither affects gastric secretions nor causes dryness of the mouth.

#### Indications:

##### **Nausea and vomiting due to:**

Gastro-intestinal disorders.

Intolerance to essential drugs.

Malignant disease.

Uraemic conditions.

Post-operative conditions.

Deep X-ray or Cobalt therapy.

N.B. Maxolon is not so effective in vomiting of labyrinthine origin such as travel sickness, vertigo and Ménière's disease.

**Contra-indications:** Although animal tests in several mammalian species have shown no teratogenic effects, Maxolon, like all new drugs,

is not recommended during the early weeks of pregnancy.

**Precaution:** As both Maxolon and the phenothiazines may occasionally cause benign transient dystonia, care should be exercised in the event of both drugs being prescribed concurrently.

## Betnovate-N Tulle\* is designed to succeed in difficult exudative dermatoses

\* now prescribable on EC 10 except in Northern Ireland and Scotland

"Betnovate-N Tulle is regarded as a highly and often dramatically effective means of treating gravitational eczema of the leg and ulceration associated with it."†

Betnovate-N Tulle is a wide-mesh cotton dressing impregnated with a bland ointment base containing 0.1% betamethasone 17-valerate with 0.5% neomycin sulphate.

The tulle gives prolonged contact between the medication and the lesion and at the same time allows easy drainage of the exudate with reduced eschar formation. The dressings may be easily changed without discomfort to the patient and without disturbing the newly healed areas. Thus

Betnovate-N Tulle brings some of the more difficult and resistant exudative dermatoses within the already wide scope of the Betnovate range.

## Johnny went into hiding q.i.d. until the doctor prescribed 'Ilosone' Suspension

'Ilosone' excels in paediatric infections. But the flavour of the suspension (although important to Johnny) is only one of the reasons why it works so well. Against gram-positive cocci 'Ilosone' is much more active than, for example, the tetracyclines – and it will not discolour teeth or deposit in bone. Thus for infections such as tonsillitis, pharyngitis, pneumonia, otitis media and acute bronchitis – 'Ilosone' Suspension is a first-line treatment.

the chance is, they will be neither logical nor beneficial. For instance, Ferrograd-Folic will hardly be one of them, despite the fact that she may vitally need the iron and folic acid it contains.

Today, the place of effective oral iron in the management of pregnancy is unquestioned. Not so widely appreciated is the fact that folic acid is also vital. *One in three* women have been shown to have disturbance of folate metabolism during pregnancy.<sup>1-3</sup> At worst, this may lead to megaloblastic anaemia,<sup>1,4</sup> which is associated with obstetric abnormalities, among the more important of which are premature labour, prematurity and consequent higher neonatal death rate.<sup>5,6</sup>

## did the general's charm leave out the measles?

Wearing the General's amulet was an act of faith and no doubt a failure in certain circumstances. Nutritional supplements provide a sound foundation for fitness.

The extravagant demands on nutrition imposed by growth in childhood make patients from that age-group particularly susceptible to the effects of malnutrition and acute infections, which make a tremendous nutritional impact. The balance must be restored. A quick return to a voracious appetite when the episode has been controlled may restore the balance but; more often than not the edge remains blunted and intake falls below the optimum. Thus a vicious circle may be set up.

When the child is well, an adequate vitamin supplement regularly given may be the best insurance against the extraordinary nutritional strains imposed by infections and other illnesses. Adequate vitamin B complex in the recovery phase may provoke appetite and speed rehabilitation—physical, psychological and nutritional. The ideal supplements for the purpose are

# 2 weeks

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin.

It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

*Pharmaceutical Journal* (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

*British Medical Journal* (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

*British Medical Journal* (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

*"If the antiseptic is to be of any value at all it must not only kill organisms that are dry and probably embedded in films of some kind but it must act rapidly before it is removed by evaporation, gravity or washing".*  
(*"Efficiency of Antiseptics When Acting on Dried Organisms"* BRIT. MED. J. 1963, i, 499)

**Dettol meets these two important provisions of  
rapidity of action and compatibility with soap**

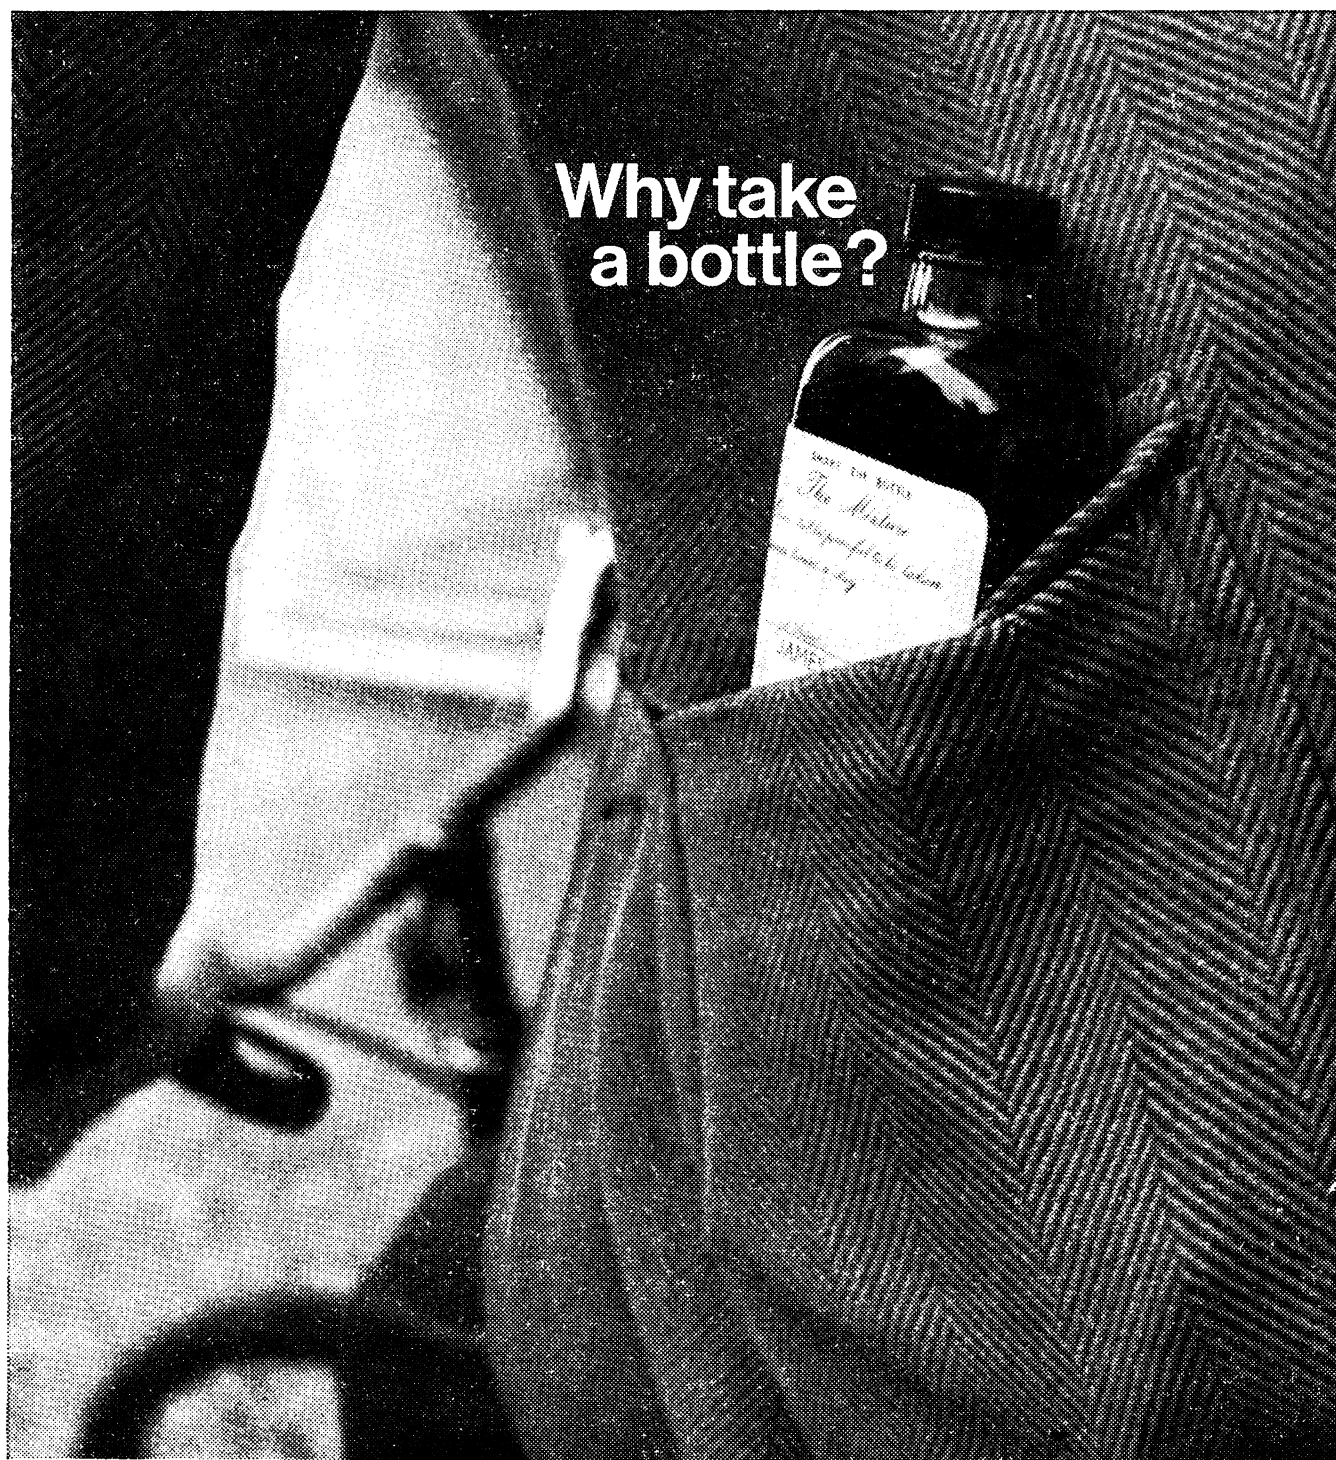

1. Rapidity of Action. Dettol kills Staph. aureus including phage type 80, 81, and Ps. pyocyanea in less than 2½ minutes (vide BRIT. MED. J., 1963 i, 498)

2. Compatibility with Soap. 'Unlike the other antiseptics Dettol appeared to have its efficiency increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism.' — ("ANTISEPTICS IN MIDWIFERY" BRIT. MED. J., 1956, ii, 202)

Dettol is non-poisonous and is well-tolerated. Its efficiency is well maintained in the presence of organic materials and it is stable in solution.

Why take  
a bottle?

when a  
teaspoonful of  
**Pholtex**  
can give cough  
relief for 8 to 10 hours

No need for frequent doses . . . no bulky bottle to carry around . . . a good night's sleep or a good day's work undisturbed by coughing . . . these are the advantages of *Pholtex* for your patient. Each 4 ml. teaspoonful of *Pholtex* contains Pholcodine B.P. 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes in a pleasantly-flavoured thixotropic vehicle. Dosage is one teaspoonful two to three times daily—for children, half to full adult dosage according to age. Basic NHS cost: 2 fl. oz. 5/-; 20 fl. oz. 47/4.

## MORSEP

formerly  
**MORHUSEPT**

### *Germicidal Cream*

Morhusept has received many appreciative comments for its efficacy in the prevention and control of napkin rash.

However, the name has been criticised as being difficult to pronounce so we have changed it to MORSEP . . . a name to remember.

MORSEP combines the antiseptic and germicidal efficiency of cetrimide with the healing properties of cod liver oil in a non-greasy perfumed cream.

# Codis

**when pain is severe**

Codis tablets provide soluble aspirin together with codeine and phenacetin. Absorption is rapid and there is less likelihood of gastric irritation during prolonged periods of administration.

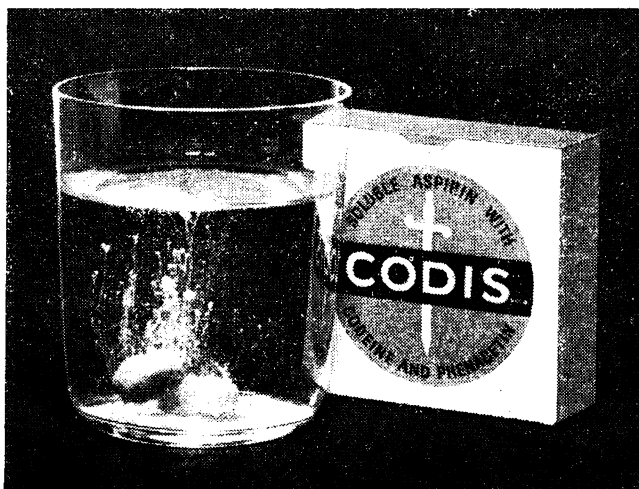

In addition to the rapid analgesic and anti-inflammatory action of soluble aspirin and phenacetin, the codeine component exerts a gentle sedative effect often helpful in those cases of mild insomnia associated with pain.

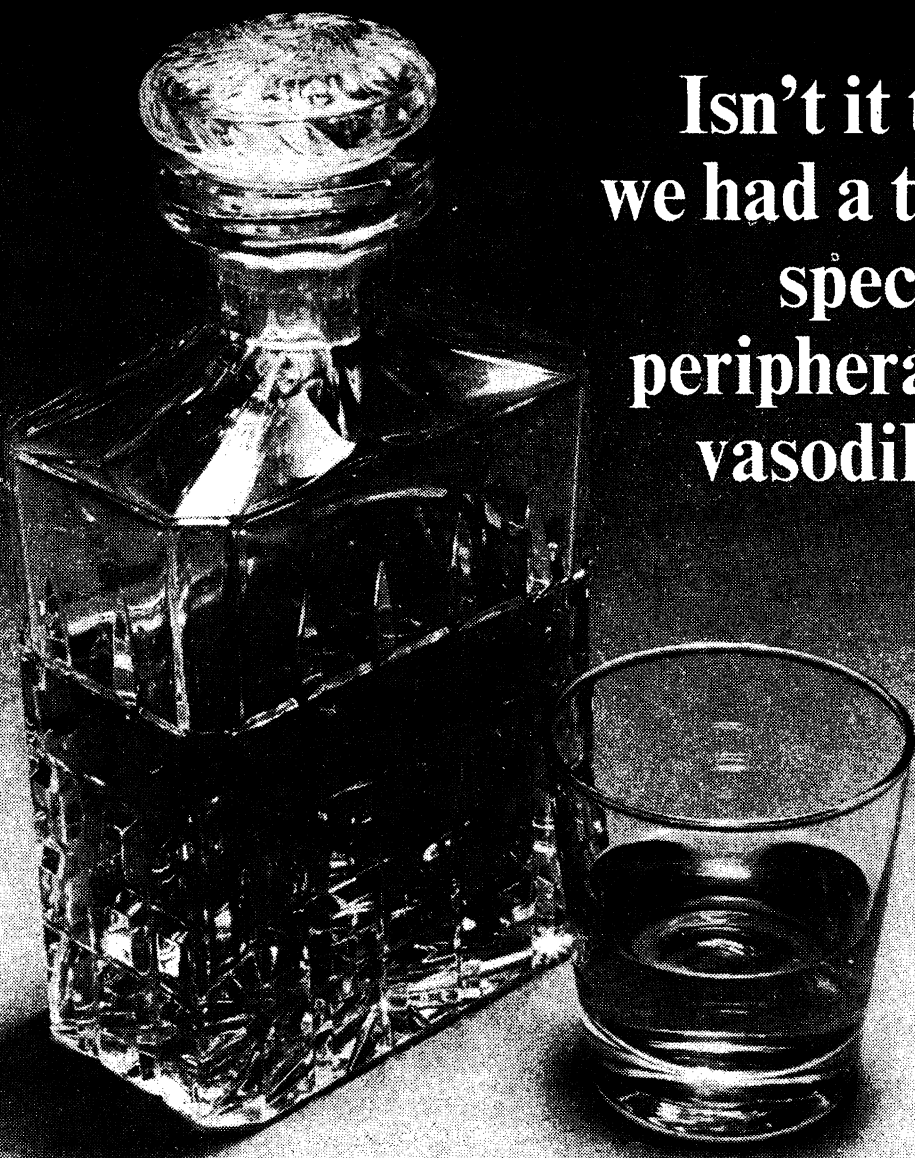

Codis tablets are pleasant to take and, being administered in water, are particularly suitable for invalids and the elderly.

Codis tablets are stable over long periods of time and are presented in protective moisture-proof foil.

Basic N.H.S. price: 500 tablets 25/-.

Isn't it time  
we had a truly  
specific  
peripheral  
vasodilator?

# Opilon

Such peripheral vascular disorders as Raynaud's phenomenon, chilblains, acrocyanosis or excessively cold hands and feet have always been difficult to treat decisively. Now the introduction of OPILON gives the physician specific therapy for such conditions – because OPILON blocks the vasoconstrictor effect of noradrenaline in the arterioles of the skin. Unlike other vasodilators, OPILON does not alter blood flow to skeletal muscle; and because it is solely an alpha-adrenergic receptor blocking agent it cannot directly affect the heart or general circulation. When skin ischaemia is the cause of the complaint, OPILON reliably restores circulation.

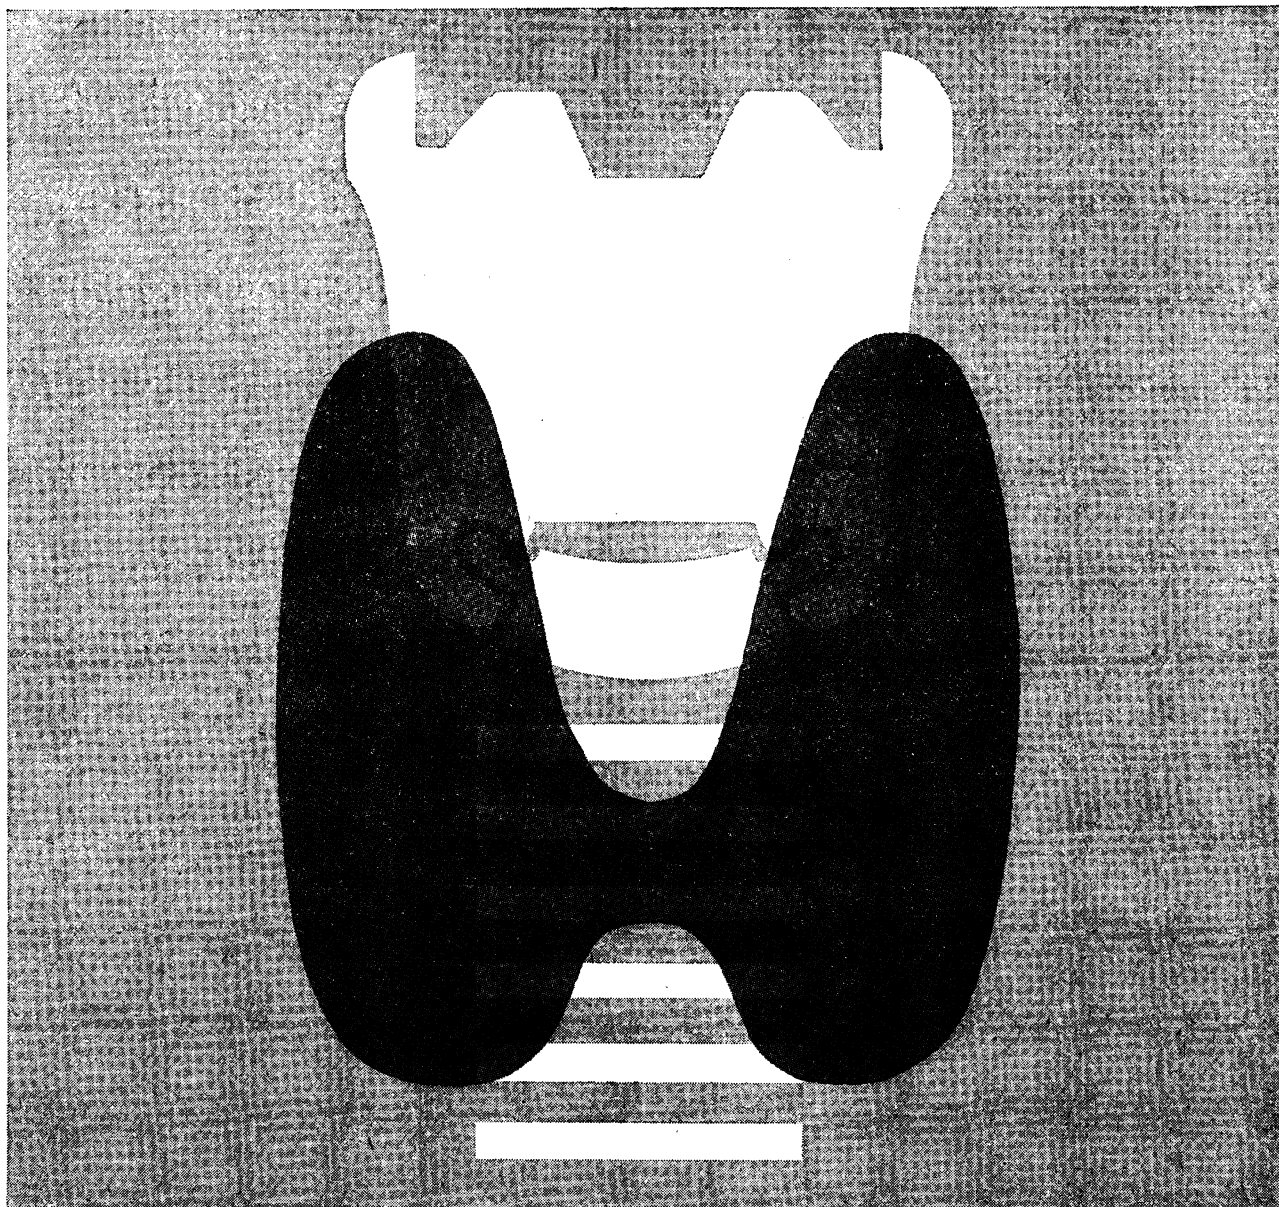

OPILON is available as tablets of thymoxamine 40 mg., in bottles of 50 and 250. Basic NHS cost 18/- for 50 tablets, 84/- for 250 tablets. **Dosage:** One 40 mg. tablet four times a day, preferably at 8 a.m., 11 a.m., 2 p.m. and 5 p.m. **Side-effects:** Occasionally mild nausea, diarrhoea, vertigo, headache and facial flushing may be encountered. These are rare, however, and transient. No serious toxic effects have been reported and the development of tolerance has not been observed. **Contra-indications:** None is known. Full information and literature will gladly be sent on request.

**To lessen the fear of mutilation . .  
arrange for Prosthesis before mastectomy**

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

**When you  
prescribe  
'Aventyl'  
for depression  
you take a load  
off two minds**

'Aventyl' comes promptly to the rescue of the patient beset by depressive symptoms. Published reports indicate that 'Aventyl' rapidly relieves black mood, lassitude, loss of appetite and sleep disturbance.

'Aventyl' reassures the doctor, too, because it is exceptionally free from the drawbacks of earlier psychostimulants. The side-effects of 'Aventyl', as reported in three years' widespread use, have rarely been troublesome.

Since the drug is not a MAO inhibitor, dietary supervision is not necessary.

# Chips for tea?

Not all babies are getting chips for tea—but many *are* growing up on a diet that relies too much on starchy foods.

Yet any mother can give her baby a balanced diet of meats, vegetables, fruits, eggs, fish and cheese, by using Heinz Strained and Junior Foods now available in seventy-five varieties.

In the last year, special breakfast varieties have been introduced. And the fruit varieties are ideal for tea-time use.

For further information about Heinz Strained and Junior Foods, please write to the Foods Science Advisory Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middlesex.

# MEGACLOR SYRUP

(clomocycline)

Of all the tetracycline syrups available today Megaclor is the most soluble, ensuring rapid and effective absorption. Its combination of high anti-bacterial activity (particularly against staphylococci, streptococci and pneumococci) with minimal risk of undesirable side reactions makes Megaclor the ideal broad-spectrum antibiotic for children. Moreover, the use of Megaclor reduces the incidence of deposition in developing bone and teeth.

**PHARMAX LIMITED** Thames Road Crayford Kent

**Megaclor Syrup** contains 85 mg. clomocycline in each 5 ml. teaspoonful (60 ml. bottles: 5/-d basic N.H.S. Price).

**Megaclor Capsules** for adults each contain 170 mg. clomocycline.

**THE COLLEGE OF PATHOLOGISTS**  
16 Park Crescent,  
London W.1

The primary examination will be held during February/March, 1968. Two three-hour written papers will be held on Wednesday, February 14, and the practical examinations will be held during the week March 11 to 15. The written examination will be held in London and in other centres according to the number of candidates entered.

This examination is open to medical, dental, and veterinary candidates who hold qualifications approved by the college and who fulfil the training requirements for entry.

Applicants, who must have completed at least two years' full-time work in pathology, should obtain an entrance form from the Registrar, at the above address, and should return it not later than December 31, 1967.—T. Crawford, Registrar. (13892)

**UNIVERSITY OF EXETER**  
Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on January 10, 1968. These courses are held three times a year, starting in October, January, and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under Section 48 of the N.H.S. Act (1946). These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£60 for students from outside the United Kingdom). Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, the University, Exeter, Devonshire. (13568)

**REVIEWS FROM THE SCHOOLS 1968**

During 1968 the Royal College of Physicians will be holding a series of "Reviews from the Schools" at the College at which eight medical schools will present short reviews of work in progress to an audience mainly of Senior Registrars and Registrars.

The Schools which have accepted invitations and the dates arranged are:

January 24	Charing Cross Hospital
February 14	University of Birmingham
March 20	Guy's Hospital
May 22	University of Bristol
June 19	King's College Hospital
October 23	University of Leeds
November 20	The London Hospital
December 11	University of Liverpool

It is expected that the proceedings will be open at 9.30 a.m. and end about 5.30 p.m. There will be a fee of £2, including lunch, and the programme for each session will be published in the medical press and circulated to schools and hospitals about six weeks in advance.

Since the reviews are concerned with work in progress representatives of the press are not being invited, and it is particularly requested that no reports of any kind should be sent to the press.

Applications for tickets should be sent to:

The Registrar,

## *A Career in Zambia*

# **MEDICAL OFFICERS**

Vacancies, each on an initial contract basis of three years, exist on the copper and base metal mines of the Anglo American Corporation group in Zambia for:

**MEDICAL OFFICERS** (minimum salary £3,200 per annum). The vacancies are at Rhokana, Nchanga, Bancroft and Broken Hill. Duties, under the direction of each company's Chief Medical Officer, are of a general practice nature including hospital care of patients, obstetrics, anaesthetics and surgery. Salaries shown for these appointments are the minima and due regard will be given to qualifications and experience. Benefits include a car allowance with an initial interest-free loan for the purchase of a car, a 5% Christmas bonus, a minimum terminal gratuity of 5% per year of service, educational and travel allowances for children at secondary schools outside Zambia, partly fur-

nished married accommodation at moderate rentals, and free return passages to and from Zambia. Contracts can be for less than three years, and are renewable by mutual agreement. There are generous medical and leave conditions.

The work is varied and interesting. At an altitude of over 4,000 feet the climate of the Copperbelt—200 miles North of Lusaka—is temperate. There is the opportunity for an active community life with outstanding sporting and recreational facilities.

Hospitals of the group provide a comprehensive health service for employees and their dependants (both expatriate and indigenous members of the community). Over 30 Medical Officers working in diversified units of group practice including preventive and curative medicine are employed in modern well-equipped hospitals.

**RHOKANA CORPORATION** at Kitwe has a 70 bed contributory, fee-paying hospital and a 325 bed free hospital. There is a general diagnostic radiological service and pathological laboratory. TERRITORY OF PAPUA AND NEW  
GUINEA

Institute of Human Biology

Applications are invited for the positions of:

## DIRECTOR

and  
DEPUTY DIRECTOR  
of the INSTITUTE OF HUMAN  
BIOLOGY

An Institute of Human Biology will be established in Papua and New Guinea. The Council governing the Institute will have the following membership: four persons of high distinction and experience in Medical Science; the Director of Public Health; representatives from the University of Papua and New Guinea; Faculty Board of the Papuan Medical College; the House of Assembly, Goroka General Hospital and one resident of the territory to be appointed by the Administrator in Council. The Director of the Institute will be responsible to the Council for the control and management of the Institute.

The Institute will be located in the first instance at Madang on the north coast of New Guinea. In 1969 the Institute will move to Goroka in the Eastern Highlands District of New Guinea. Goroka is 5,400 ft. above sea level in a centre of a rapidly developing area with a population of over three-quarters of a million.

The objects of the Institute will be to conduct and foster research in (a) any branch or branches of medical science or biology; (b) anthropological and sociological aspects of health and ill health; (c) matters relating to public health generally. The Institute will be the centre of medical research in the territory and will play an important role in the International Biological programme.

The Director should be interested in some aspects of research relating to tropical medicine. A unique opportunity exists for the Director to undertake and supervise research in demography, human genetics, tropical physiology and the ecology of tropical disease. Administrative ability is important.

The Deputy Director will be responsible to the Director and will be required to undertake research in accord with the objects of the Institute and his particular interests. Preference will be given to applicants with research experience in Papua and New Guinea.

Conditions of employment will include annual leave, liberal sick leave entitlements, pension rights, sabbatical leave and housing at a reasonable rental. These conditions will be similar to those for academic staff of the University of Papua and New Guinea. Appointees will be required to take up office early in 1968.

Applications, together with the names of two referees, should be sent by December 31 to the Secretary, Council of the Institute of Human Biology, Box 2084, Port Moresby, Papua. (H.5370)

## NOTICES

**THE ABORTION ACT, 1967**  
**APPLICATIONS FOR APPROVAL OF**  
**PREMISES**  
(Section 1 (3))

The Abortion Act, 1967, requires that any treatment for the termination of pregnancy must be carried out (except in a case of extreme necessity) in a hospital vested in the Minister of Health or the Secretary of State for Scotland under the National Health Service Acts, or in a place for the time being approved for the purposes of Section 1 of the Act by the Minister or the Secretary of State. Treatment carried out otherwise than in such a hospital or approved place would constitute an offence under the law relating to abortion.

Proprietors of hospitals not vested in the Minister or the Secretary of State, registered nursing homes and other establishments wishing to apply for approval as places for treatment for the termination of pregnancy under Section 1 (3) of the Act, should apply immediately and in any case not later than November 24, 1967, for a form of application, in the case of England or Wales to the Ministry of Health (Room A.414), Alexander Fleming House, Elephant and Castle, London S.E.1, and in the case of Scotland to the Scottish Home and Health Department (Room 313), York Buildings, Queen Street, Edinburgh 2. (13836)
