## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1, 2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3, 4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

# blood levels

## Why use Broxil?

Broxil gives blood levels *double* those of oral penicillin V and *five times* those of oral penicillin G.

The advantages of these high blood levels are:

More effective bactericidal concentrations of Broxil at the site of infection; the higher the blood levels, the higher the tissue levels.

More effective control of organisms with high M.I.C.'s outside the range of other oral penicillins—organisms such as mildly resistant staphylococci.

Poor absorbers, e.g. debilitated patients, the very young and the old, should be able to absorb sufficient Broxil to make it effective in fighting the infection.

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.) Tablets, 125 and 250mg.; Capsules, 125 and 250mg.

For children adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62.5–125mg. and

Adults 125–250mg., four times a day.

Prophylactic: Children 62.5–125mg. and Adults 125mg., twice a day.

CONTRA-INDICATION: Penicillin allergy.

SIDE EFFECTS: As with other oral penicillins.

## Betnovate-N Tulle\* is designed to succeed in difficult exudative dermatoses

\*now prescribable on EC 10 except in Northern Ireland and Scotland

"Betnovate-N Tulle is regarded as a highly and often dramatically effective means of treating gravitational eczema of the leg and ulceration associated with it."†

Betnovate-N Tulle is a wide-mesh cotton dressing impregnated with a bland ointment base containing 0.1% betamethasone 17-valerate with 0.5% neomycin sulphate.

The tulle gives prolonged contact between the medication and the lesion and at the same time allows easy drainage of the exudate with reduced eschar formation. The dressings may be easily changed without discomfort to the patient and without disturbing the newly healed areas. Thus

Betnovate-N Tulle brings some of the more difficult and resistant exudative dermatoses within the already wide scope of the Betnovate range.

# Why Penbritin is so powerful against bronchitis

Many organisms, including pneumococci, streptococci, *H. influenzae* and staphylococci can cause the different types of bronchitis. It is therefore imperative to use an antibiotic which is active against **all** of them, because in General Practice treatment often has to begin before the causative organism can be identified. Penbritin's activity covers all the penicillin-sensitive Gram-positive organisms, and Gram-negative organisms as well.

Penbritin is bactericidal. Unlike most other broad-spectrum antibiotics which merely inhibit the growth of the offending organisms, Penbritin **kills** them. This is a positive advantage in the treatment of any patient – and virtually essential when treating young children, the old and those whose natural defences are inadequate.

Penbritin has all the safety of a penicillin. It is free from dangerous or permanent side-effects\*. . . of special interest in the treatment of children.

Penbritin's broad spectrum, bactericidal action

and comparative safety – and the fact that its success in bronchitis is endorsed by many world references – establish it as a powerful force in the fight against bronchitis.

Penbritin is also highly effective in other respiratory tract infections including: Sinusitis Pharyngitis · Laryngitis · Tonsillitis · Pneumonia.

**Availability:** Penbritin (ampicillin B.P.)  
Paediatric Tablets containing 125 mg.  
Capsules 250 and 500 mg.  
Syrup 125 mg./5 ml. teaspoonful.  
Syrup Forte 250 mg./5 ml. teaspoonful.  
I.M. Injections 100 mg., 250 mg., 500 mg.

**Dosage:**  
Children under 2 years: 62.5–125 mg. four times daily, before meals.  
2–10 years: 125–250 mg. four times daily, before meals.  
Adults: 250 mg. four times daily, before meals.

In severe infections these doses may be increased or Penbritin may be given by injection.

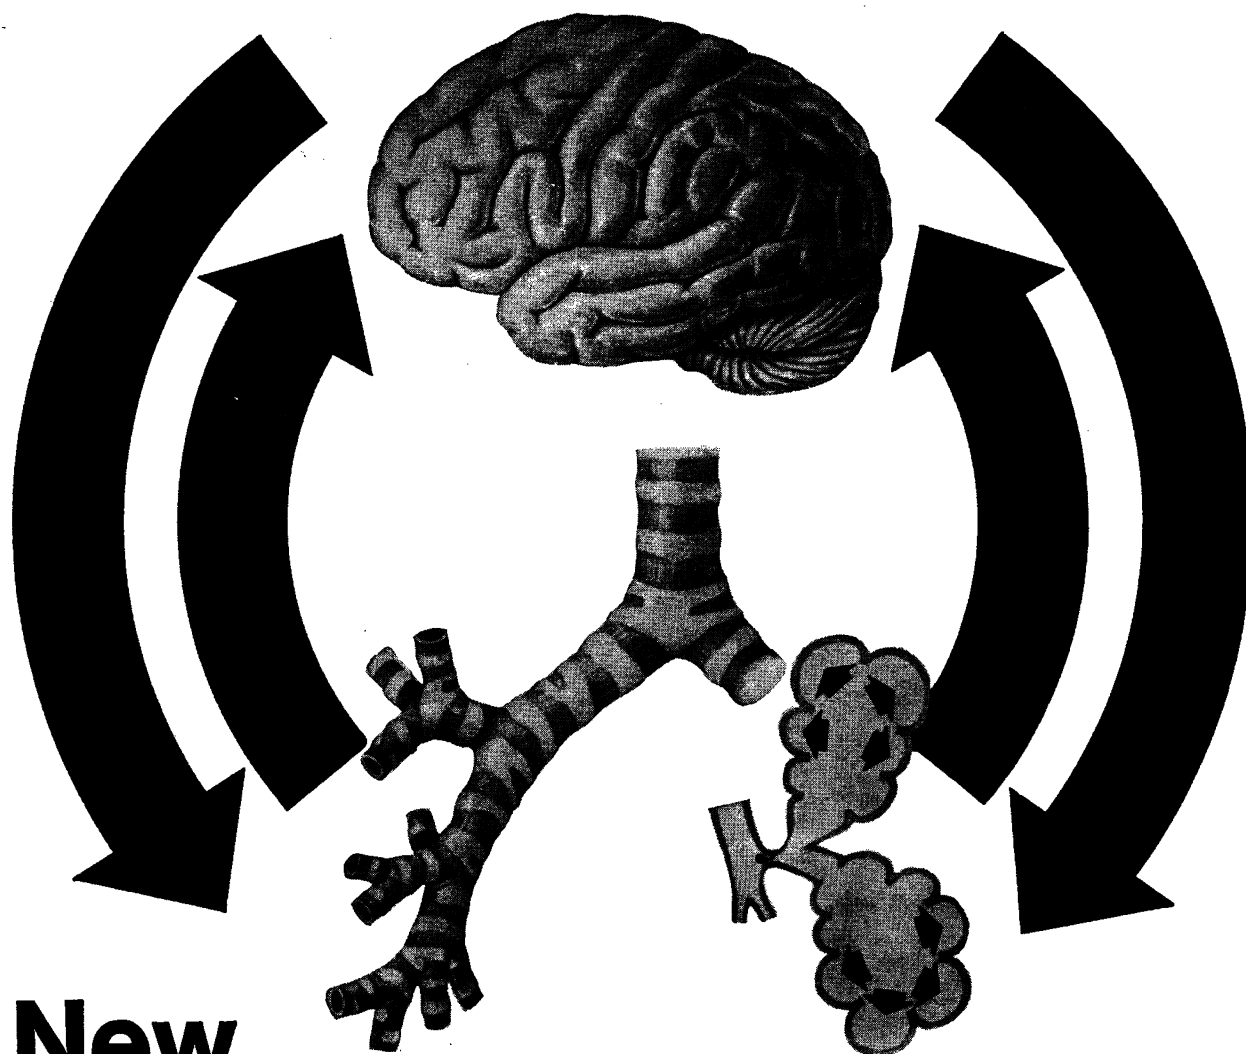

\* Contra-indication: Penicillin allergy. Side-effects: As with other penicillins.

Each tablet of Alupent-Sed contains:  
20 mg. of orciprenaline sulphate  
20 mg. of amylobarbitone.

This combination ensures that the patient receives the optimum dose of Alupent to relieve the wheezing and sufficient sedation to relieve anxiety.

### Dosage:

Adult—1 tablet of Alupent-Sed four times daily.

Children 6–12 years— $\frac{1}{2}$  tablet Alupent-Sed 3–4 times daily.

### Contra-indications:

Alupent-Sed should not be given to patients with thyrotoxicosis. Alupent-Sed should not be given to patients who have a known idiosyncrasy to barbiturates, or a condition in which barbiturates are contra-indicated.

### Caution:

In view of the known interaction between sympathomimetic amines and monoamine oxidase inhibitors, care should be exercised if it is proposed to administer an MAO inhibitor concurrently with Alupent-Sed.

## A NEW ORAL GEL WITH STRIKING ANALGESIC AND ANTISEPTIC PROPERTIES

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly

bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases where a bacterial element is superimposed on the original infection Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

**FORMULA:** Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

**INDICATIONS:** Herpes labialis, gingivitis, oral ulcerations, cheilosis, denture sores, infant teething disorders.

**PRESENTATION:** Bonjela is available in 10 g. tubes at a basic N.H.S. cost of 2/8½d. per tube.

**For efficient conception control  
with minimum physiological disturbance**

The low dosage regimen of Feminor Sequential closely parallels the body's normal pattern of hormone production. To inhibit ovulation it employs an oestrogen alone for the first fifteen days - with the addition of a progestogen for the last five days to establish a normal secretory endometrium. The total amount of hormone taken is limited to that necessary for effective inhibition of ovulation. Thus there is minimum physiological disturbance and a marked reduction in side effects such as breakthrough bleeding, breast discomfort and weight gain.

Feminor Sequential is presented in wallets containing one month's supply of 20 foiled tablets: 15 pink tablets containing mestranol 0.1 mg, 5 white tablets containing mestranol 0.075 mg, norethynodrel 5.0 mg.

# private treatment today

In this space BUPA reports from time to time on matters which may be of interest to those concerned with private treatment in this country. BUPA's own interest is clear and declared; we believe a strong private sector in medicine to be an essential corollary to a successful public sector. Alone among the provident associations, we are sponsoring (through Nuffield Nursing Homes Trust) the creation of new and expanded facilities for private treatment.

## BUPA Group Schemes

BUPA Group Schemes continue to provide the main impetus to the Association's growth, with 70% of new enrolments coming through groups.

There are now 7,824 companies and professional or trade associations in Britain who protect their staffs or members through BUPA, an increase of over 700 in last year.

## BUPA'S General Manager Visits Australia

Mr. E. D. Roberts, General Manager of BUPA went to Australia in October to study health services in that country.

During a three week programme arranged by the Australian Health Authorities, Mr. Roberts met Health Ministers and officials, health insurance organisations, doctors and hospital authorities.

Mr. Roberts is a member of the international committee formed to draw up a constitution for an International Federation of Voluntary Health Insurance Organisations. This draft constitution will be submitted to the Second International Conference on Voluntary Health Insurance which is to be held in Sydney in April 1968.

## Nuffield Nursing Home Trust's Annual Report

It was revealed at the Trust's tenth Annual General Meeting that a revenue deficit of £42,295 had been incurred during the year, despite receipts from the Trust's twelve homes being up by more than £150,000 on the previous year.

This deficit was largely due to the fact that the Trust, because of the Government's prices and incomes policy, felt unable to increase charges at its homes until the latter part of the year, even though costs had risen substantially. However, it does underline the fact that, even with large sums donated to the Trust out of BUPA's investment income, the financing of present and future projects is a task which will need the support of all interested in private treatment.

At present N.N.H.T. has seven projects in hand and the completion of these homes will increase the number of beds administered by the Trust from 417 to 649.

# FOLIC ACID DEFICIENCY and ANAEMIA OF PREGNANCY

*Introducing*

## FOLEX-350

CONTAINING FOLIC ACID 350 MICROGRAMS IN EACH TABLET

DOSE

### ONE TABLET DAILY THROUGHOUT PREGNANCY

It is now known beyond doubt that megaloblastic anaemia of pregnancy is caused by deficiency of folic acid.

From the very excellent results obtained over the years by the prophylactic use of folic acid and iron given orally from the beginning of pregnancy it is becoming more and more generally accepted that anaemia of pregnancy can be prevented. The question of the optimum dose of folic acid has not been easy to establish but recent work\* suggests that not less than 300 mcg. and not more than 400 mcg. daily can be considered adequate.

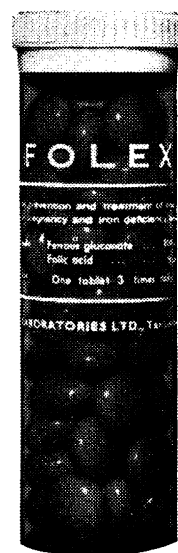

In the light of this knowledge Folex-350 containing 350 mcg. of folic acid and 300 mg. of ferrous gluconate has been introduced.

## Lincocin penetrates Lincocin works - quickly

### Lincocin penetrates... experimentally demonstrated in human tissue

Forty minutes prior to undergoing tonsillectomy, a child weighing 64 lb. received a single i.m. injection of 5 mg./lb. lincomycin hydrochloride (base equivalent). A sample of the patient's tonsil tissue was placed on a petri dish in which the agar had previously been seeded with a pathogenic strain of *Streptococcus hæmolyticus*. After incubation, the adjacent photograph was taken. The clear zone demonstrates that Lincocin penetrated the human tonsil tissue in a concentration sufficient to inhibit the growth of the pathogenic inoculum. (The small white dots appearing at one end of the tissue sample

were identified in subsequent studies as colonies of non-pathogenic *Neisseria catarrhalis*.)

# The only sensible alternative to Haelan Ointment

(life size)

## ...Haelan Cream

When prescribing for steroid-responsive skin conditions your choice is simple. Both preparations offer strictly practical advantages:

—the proven steroid, *flurandrenolone*, in a sufficient concentration to obtain rapid response without undue risk of adverse

effects due to absorption.\*

—a 60 gramme tube, ensuring regular and adequate treatment without the need for repeat prescriptions.\*

# One THEO-NAR tablet gives double support

## ...8 hour relief of bronchospasm and irritant cough

Theo-nar is a special immediate-plus-delayed release tablet presentation which greatly enhances the therapeutic action of its two constituents – theophylline to relieve bronchospasm and noscapine to suppress exhausting, unproductive cough. In particular Theo-nar allows administration of a really effective dose of theophylline – giving profound bronchodilation without the high incidence of gastro-intestinal side effects sometimes associated with oral theophylline therapy.\*

With Theo-nar there is no peak-and-valley effect in blood levels of the medicaments. Two or three tablets are thus sufficient to keep the patient symptom-free throughout the night and day – and the need for steroid therapy is reduced or eliminated.\*

\* Clinical Trials Journal, 1966, 4 : 51.

**Presentation** Each Theo-nar tablet contains 200 mg theophylline and 30 mg noscapine processed to provide immediate release of 100 mg theophylline and 15 mg noscapine, and delayed release after four hours of 100 mg theophylline and 15 mg noscapine.

# Cedilanid

Cedilanid is rapidly absorbed from the gastrointestinal tract and reaches rapidly to the various tissues giving rapid onset and relatively short duration of action.

## **safety**

Because Cedilanid is so rapidly eliminated from the body, the toxic effects of overdosage are short-lived.

## **versatility**

Cedilanid is an all-purpose cardiac glycoside, as valuable for rapid control of supra-ventricular paroxysmal tachycardia as for routine use in congestive heart failure.

**Cedilanid: particularly for patients who cannot tolerate digoxin or other digitalis preparations**

Tablets of 0.25 mg. lanatoside C; oral solution containing 1 mg. lanatoside C per ml.; ampoules containing 0.4 mg. deslanoside in 2 ml.

## Why pay the cost of poor absorption?

Tetralsal is almost totally absorbed in the upper intestinal tract. The absence of unabsorbed residues in the lower gut greatly reduces the risk of monilial overgrowth, nausea, vomiting and diarrhoea.

Tetralsal is available as capsules containing 204 mg lymecycline (150 mg tetracycline base). Full medical information on request.

## She will appreciate the convenience of Candeptin Vaginal Tablets, a new extension of the specific treatment for monilial vaginitis

Rapid symptomatic relief<sup>1</sup> and decisive resolution of infection<sup>2</sup> are the proven results of Candeptin vaginal ointment in the treatment of monilial vaginitis caused by *Candida albicans*. Now Candeptin vaginal tablets provide the same effective fungicidal treatment (candicidin), in a more convenient form. They are "... easier to use, and appear more suited to obstetrical patients, in whom an applicator might be contra-indicated".<sup>3</sup>

### IN THE LABORATORY

candicidin has been shown<sup>4</sup> to inhibit *Candida albicans* at 0.5 mcg/ml even after two days' incubation. Under the same circumstances nystatin had to be used at 5 mcg/ml to achieve inhibition.

### IN CLINICAL PRACTICE

Candeptin gives equally remarkable results. Out of 312 women treated, both pregnant and non-pregnant, 255 were cured after one course of treatment. A further 33 responded to a second course giving an overall success rate of 93%.

# Breathe a sigh of relief...

## now your bronchitic patient can breathe easily

Ardinex brings rapid and prolonged relief from three main features of bronchial asthma and chronic bronchitis—bronchospasm, tenacious sputum and anxiety.

**BRONCHOSPASM** — relieved by the proven bronchodilator, ephedrine hydrochloride.

**ANXIETY** — the apprehension often associated with bronchospasm is alleviated by methaqualone hydrochloride, a non-barbiturate sedative that causes neither respiratory nor cardiac depression.

**SPUTUM** — the tenacity of viscid sputum is reduced by guaiphenesin, an expectorant that increases the water content and volume of lung secretions.

*Each Ardinex capsule contains Ephedrine Hydrochloride B.P. 30 mg.,  
Guaiphenesin 50 mg. and Methaqualone Hydrochloride 50 mg.*

pay the tow!**

Firestone Town & Country is the *only* drive-wheel tyre backed by a pay-the-tow guarantee.

Its tough, angled tread bars are uniquely designed to give that vital grip on wet, slippery roads.

And the guts to take you through mud, deep slush and heavy snow. Starting, cornering, stopping are all surer and safer. Deeper tread pattern gives increased mileage. And a quiet, smooth ride. Fit Firestone Town & Country—and beat winter! *Special treads available for studding.*

## **Guarantee**

Any purchaser of two new Firestone Town & Country tyres will be reimbursed for towing charges up to £5 if:

1. The Firestone Town & Country tyres fitted to the drive-wheels of the purchaser's car or light van fail to provide traction through mud, slush or snow during the 18 months following the purchase date.
2. The claim arises solely through lack of traction.

# Ferromyn-S gives 30% better iron absorption

## SO?

**So your patients make a faster recovery without increased dosage or increased side-effects.**

Most oral iron treatments will get your patients better eventually. But only Ferromyn-S has an iron salt combined with free succinic acid, which research has shown, pushes up the absorption rate by 30%\* - without increases in dosage or side-effects\*.

Because the body absorbs more iron, patients respond to treatment sooner with quicker regeneration of the haemoglobin, faster repletion of tissue and storage iron. When you prescribe Ferromyn-S for your anaemic patients you are giving them all the benefits of the latest research on iron metabolism.

Ferromyn-S combines the maximum therapeutic effect

with the minimum side-effects at a cost of less than 2d. per day. What more could a Doctor - or patient - ask?

Ferromyn-S with Folic Acid is also available; each tablet contains 100 mcg Folic Acid, thus, at a dose of one tab.t.d.s. the recognised optimum daily dose of 300 mcg is prescribed.

# THERE IS OPPORTUNITY FOR YOU IN YOUNG DYNAMIC CANADA

If you have a skill, trade or profession, the time is right, the mood is right for you and Canada to get together. Industrial production in Canada has more than doubled in the last 15 years and is still forging ahead. For years to come Canada will be a country of growth.

You will enjoy life in this young land of opportunity. Wages and salaries are high. Canadians enjoy one of the highest standards of living in the world.

Your children will have the best possible start in life—free secondary and primary education and every chance of going on to University or to a modern Technical Institute. You and your family will be protected too, by a social welfare programme: family allowances, hospital insurance, unemployment insurance and retirement pension.

Canadians are friendly, down-to-earth people—and remember—emigrating to Canada is not like going to the far corners of the globe, you are only six hours away by air, six days by sea.

**THE ABORTION ACT, 1967  
APPLICATIONS FOR APPROVAL OF  
PREMISES  
(Section 1 (3))**

The Abortion Act, 1967, requires that any treatment for the termination of pregnancy must be carried out (except in a case of extreme necessity) in a hospital vested in the Minister of Health or the Secretary of State for Scotland under the National Health Service Acts, or in a place for the time being approved for the purposes of Section 1 of the Act by the Minister or the Secretary of State. Treatment carried out otherwise than in such a hospital or approved place would constitute an offence under the law relating to abortion.

Proprietors of hospitals not vested in the Minister or the Secretary of State, registered nursing homes and other establishments wishing to apply for approval as places for treatment for the termination of pregnancy under Section 1 (3) of the Act, should apply immediately, and in any case not later than November 24, 1967, for a form of application, in the case of England or Wales to the Ministry of Health (Room A.414), Alexander Fleming House, Elephant and Castle, London S.E.1, and in the case of Scotland to the Scottish Home and Health Department (Room 313), York Buildings, Queen Street, Edinburgh 2. ST. ANDREW'S HOSPITAL  
NORTHAMPTON

President:

Lieutenant-Colonel J. Chandos-Pole, O.B.E.

Medical Director:

James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both  
male and female, suffering from nervous and  
mental disorders, including alcoholism and  
senile illnesses. The fees range from twenty  
guineas per week. Private rooms with  
special nurses can be provided, either in the  
hospital or in one of the villas in the  
grounds. The hospital is situated in 130  
acres of pleasant grounds which provide all  
recreational facilities. These include a nine-  
hole golf course, sports ground, tennis  
courts, etc. A recreation and occupation  
centre, known as Gloucester House, has been  
opened recently, which includes an occupa-  
tional therapy department, a swimming pool,  
a squash court and a library with an adjoining  
reading room.

## WANTAGE HOUSE

This is a separate reception unit which  
patients may be admitted. It is equipped  
for the complete investigation of nervous and  
mental disorders by the most modern  
methods. All forms of treatment are avail-  
able.

Charges for treatment at St. Andrew's are  
allowable for benefit to British United Pro-  
vident Association and Private Patients Plan  
subscribers.

For terms and further particulars apply  
to the Medical Director (Telephone No.  
34354 Northampton), who can be seen in  
London by appointment.

Why take  
a bottle?

when a  
teaspoonful of  
**Pholtex**  
can give cough  
relief for 8 to 10 hours

No need for frequent doses . . . no bulky bottle to carry around . . . a good night's sleep or a good day's work undisturbed by coughing . . . these are the advantages of *Pholtex* for your patient. Each 4 ml. teaspoonful of *Pholtex* contains Pholcodine B.P. 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes in a pleasantly-flavoured thixotropic vehicle. Dosage is one teaspoonful two to three times daily—for children, half to full adult dosage according to age. Basic NHS cost: 2 fl. oz. 5/-; 20 fl. oz. 47/4. Additional information is available on request.
