**During the past 50 years, modern pharmacology has given medicine more drugs than in the past 5000 years.**

This is the result of scientific research, the yardstick used to measure the importance of a pharmaceutical company. The activity of Lepetit research-workers, starting way back in 1903 with the preparation of Almateine (tetramethylenhematoxylin), which was patented in the United States and other countries, is confirmed by over 1,700 patents granted throughout the world since 1945, by 2,800 pending applications and by over 800 published papers.

In recent years, the Lepetit Research Laboratories discovered and developed a completely new family of natural and semi-synthetic antibiotics, the rifamycins, including rifamycin SV (Rifocin®), rifamide (Rifocin® M) and rifampicin, the first orally active rifamycin.

## STANDARD The height of the crossbar

The Rugby Union was founded on January 28th, 1871, forty-eight years after William Webb Ellis 'first took the ball in his arms and ran with it.' Mr. A. Rutter of Blackheath was the first president, and two months later the first Rugby International took place, between England and Scotland. (Scotland won.) It is the Rugby Union, of course, who lay down the law today, including the size of the goal posts, each of which must exceed 11 ft. from the ground, placed 18 ft. 6 in. from inside to inside of the posts, with a crossbar 10 ft. from the ground.

## STANDARD The Transvasin therapy for rheumatic symptoms

Patients suffering from rheumatic lesions obtain rapid relief with this well-proven and economical medication. The esters of nicotinic, salicylic and p-aminobenzoic acids penetrate the skin and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a valuable adjuvant in the treatment of osteo and rheumatoid arthritis.

There's a very good  
reason why this  
IUD is being  
well accepted

It's not rejected

The crucial word in any talk concerning IUD's is not efficacy, but *acceptance*. A small number of women spontaneously extrude the IUD or have to have it removed. But the unique shape of the SAF-T-COIL ensures maximum *in utero* retention. Once inserted, the SAF-T-COIL assumes its distinctive configuration, conforming closely to the shape of the uterine cavity. Rejection is extremely unlikely.

Because of its presentation the SAF-T-COIL is introduced more easily and more quickly than any other device; placement is smooth and non-irritating. No sterilisation or assembly is required. Each sterile, peel package contains the integral unit of coil and insertion plunger.

Protracted illness, whether self-limiting or terminal, is frequently accompanied by anxiety and depression. Many patients so affected benefit from treatment aimed at allaying the symptoms of their anxiety-depressive state.

'Tryptizol', a well-established antidepressant with additional tranquillising properties, has proved of considerable value in relieving the distressing symptoms of the anxiety-depressive condition. The patient becomes calmer and mood is lifted. Sleep and appetite improve, and preoccupation with the illness gives way to more normal interests.

# CONSIDER NOW

## summer-long protection against HAY FEVER with

# D-VAC Pollens 3 dose course

regd.

D-VAC Pollens, Bencard emulsified 'depot' vaccine for 'classical' hay fever and pollen asthma, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

**Primary Course:** designed for patients who have not received pollen vaccine treatment in the last five years or whose seasonal symptoms are severe, and for children (aged 8-14 years).

**Advanced Course:** designed for patients aged 15 years and over who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose given in February or early March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

## TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order **before 31st December**—quoting the course required (Primary or Advanced), the patient's name, and the date on which it is intended to administer the first dose: this date should fall **between 12th February and 9th March, 1968.**

Late orders will be met if possible up to 20th January, but in these cases first doses cannot be supplied for administration before 19th February.

The three doses of the course will be despatched separately at 4-week intervals to arrive in good time for administration, without need for further prescription or order.

(D-VAC Pollens is not available outside the U.K.)

## Beyond The Pill... Mixogen...

**as dramatically successful in preventing menopausal distress  
as are the oral contraceptives in family planning.**

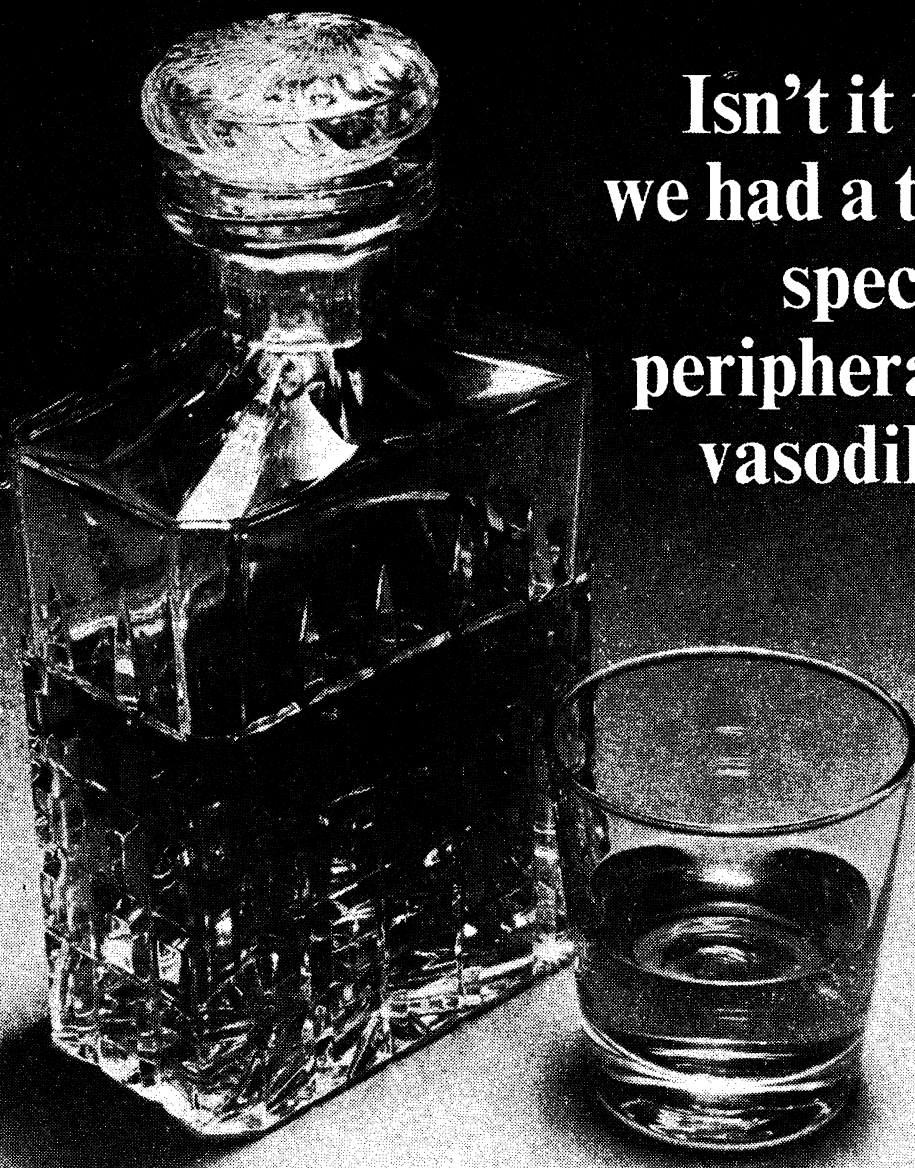

The woman who uses an oral contraceptive during her later potential child-bearing years need not fear menopausal problems. But for those not 'on the Pill' when reaching the menopause, a hormone problem remains. *At the menopause three out of four women require hormone replacement.* Mixogen fulfils their need. The preparation, a finely balanced combination of oestrogen and androgen, acts synergistically to ensure complete relief of all menopausal symptoms. And it does so without recourse to sedatives which—apart from other considerations—fail to deal with the underlying cause of the symptoms.

Isn't it time  
we had a truly  
specific  
peripheral  
vasodilator?

# Opilon

Such peripheral vascular disorders as Raynaud's phenomenon, chilblains, acrocyanosis or excessively cold hands and feet have always been difficult to treat decisively. Now the introduction of OPILON gives the physician specific therapy for such conditions — because OPILON blocks the vasoconstrictor effect of noradrenaline in the arterioles of the skin. Unlike other vasodilators, OPILON does not alter blood flow to skeletal muscle; and because it is solely an alpha-adrenergic receptor blocking agent it cannot directly affect the heart or general circulation. When skin ischaemia is the cause of the complaint, OPILON reliably restores circulation.

OPILON is available as tablets of thymoxamine 40 mg., in bottles of 50 and 250. Basic NHS cost 18/- for 50 tablets, 84/- for 250 tablets. **Dosage:** One 40 mg. tablet four times a day, preferably at 8 a.m., 11 a.m., 2 p.m. and 5 p.m. **Side-effects:** Occasionally mild nausea, diarrhoea, vertigo, headache and facial flushing may be encountered. These are rare, however, and transient. No serious toxic effects have been reported and the development of tolerance has not been observed. **Contra-indications:** None is known. Full information and literature will gladly be sent on request.

## OPTIMUM VASODILATATION

'BRADILAN' is tetranicotinoylfructose, a new research development which provides effective, sustained vasodilatation by a direct action on the smooth muscle of peripheral arterial vessels.

## SUSTAINED ACTIVITY

In the alkaline region of the alimentary tract, 'BRADILAN' (coated tablets of 250 mg. tetranicotinoylfructose) is gradually and evenly hydrolysed to nicotinic acid which is absorbed to provide a continuous adequate level of activity over several hours.

## IMPROVED TOLERANCE

Despite the high activity level provided, eight published clinical trials on 'BRADILAN' stress the freedom, from nicotinic acid side effects (facial flushing, itching, headache, nausea), even at high dosage.

## Ultrasonic Techniques in Biology and Medicine

B. Brown, Ph.D., B.Sc., A.Inst.P. and D. Gordon, M.B., D.M.R.

This is the first book intended specifically for physicists and medical practitioners wishing to know how ultrasonic techniques are applied in medicine and biology. In many fields of medicine progress is only possible if there is the closest understanding of the problem as seen by the other half of the team. All the contributors to this book have been actively concerned in improving this collaboration, and though some differences of opinion may be disclosed, this is inevitable in such a rapidly growing subject. Clinicians are not advised to regard this book as their first approach to the subject but once they have mastered the basic introduction to ultrasonic physics, they will find it invaluable in extending their knowledge.

# HEALTH CENTRES & GROUP PRACTICES

Lord Cohen of Birkenhead writes the introduction to a booklet on Health Centres and Group Practices based on recent articles in the *B.M.J.*

"... a series of excellent articles. . . Any practitioner who is considering how he can improve his service to his patients and his own working conditions will find this a very useful book."

*Lancet* (1966), 1, 380.

"... a 'must' for any group contemplating new practice premises . . . should be equally valuable to the M.O.H. planning a new health centre."

*Brit. med. J.* (1966), 1, 221.

"These reports . . . provide an admirable summary of the position today. . . ."

*Practitioner* (1966), 196, 341.

New McGaw HAEMO-PAK®  
blood bag system...  
complete two-way design  
for easier drawing,  
safer administration

McGaw's new HAEMO-PAK® blood bag system with exclusive two-way design offers significant advantages in both drawing and administration of blood and blood components. Here are some of the key features:

## DRAWING

1. Twist-off tamper-proof needle protector provides a completely closed unit.
2. Finger-grip hub with bevel indicator arrow facilitates venipuncture.
3. Sharp, thinwall, hemorepellent phlebotomy needle gives faster gravity flow.
4. The needle is dry, therefore, causes no drag or burning sensation.

## ADMINISTRATION

5. Outlet ports are protected by sealed tamper-proof tear-off tab closures.
6. Heavyweight saddle construction prevents accidental puncture by recipient set spike.
7. Non-collapsible outlet ports allow for easy, trouble-free connection of set.
8. Inner diaphragm of bag forms additional barrier to contamination.
9. Taper-flow design of bag assures good flow pattern during administration.

The HAEMO-PAK® system includes a complete line of single packs, double packs, triple packs, quadruple packs, plasmapheresis packs, transfer packs, and special packs. All are supplied sterile and non-pyrogenic. A Complete line of accessories is available. Ask your McGaw distributor for a demonstration.

## GENERAL PRACTICE

### NORTHERN IRELAND GENERAL HEALTH SERVICES BOARD

Applications are invited from general medical practitioners interested in setting up practice in the first sector of the new city of Craigavon, Co. A-magh. Two general practitioners are initially required, increasing probably to eight when the sector is completed.

Accommodation will be available in a building designed to house temporarily the general practitioners and the local authority services pending provision of a health centre.

Initial practice allowance (based on Type D for up to two years) will be paid and sessions will be arranged with the local authority and probably also in hospital. Applicants should preferably have been ten years qualified and should have considerable experience including hospital appointments and five years in general practice in the United Kingdom. Their names should be acceptable for inclusion in the obstetrics list.

Further particulars may be obtained from the Secretary, Northern Ireland General Health Services Board, 27 Adelaide Street, Belfast, BT2 5FH, to whom applications should be sent by letter stating qualifications, age, and experience, and to arrive not later than December 11, 1967. (H.5501)

## SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

**HOUSE OFFICERS:** Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration. Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**SENIOR HOUSE OFFICERS:** £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**REGISTRARS:** £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRARS:** £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANTS:** £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**CONSULTANTS:** £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

# Obstetrician/Gynaecologist for Zambia

Applications are invited from obstetricians/gynaecologists holding a higher degree or diploma in this speciality for the post of obstetrician/gynaecologist in the Medical Department of the Anglo American Corporation (Central Africa) Limited in Zambia, which provides a comprehensive medical service for its employees and dependants. The successful applicant will be stationed at Rhokana Corporation, Kitwe and will work primarily in these hospitals: a 340 bedded non-contributory (free) hospital, and a 70 bedded contributory (fee paying) hospital.

In addition his services will be available to the other group hospitals at Nchanga and Bancroft. The post is a new one, but the Medical Department already has specialist surgeons, specialist physicians, anaesthetist and pathologist.

The appointment can be on a three or five year contract basis, renewable. The basic starting salary will be dependent on experience and qualifications but will not be less than £4,200 per annum. In addition there are other benefits such as Christmas bonus, terminal gratuity or alternatively a contributory pension scheme. A car allowance is paid and an initial interest free loan is also available for the purchase of a car.

A rent-free house, partially furnished, is available. Passages will be paid on appointment and return on completion of service in the case of a three year contract, and every two and a half years in the case of a five year contract. There are generous leave conditions and educational allowances.

Full details will be provided on interview. Applications, giving fullest details, for interview should be sent to:

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

## Safe, Simple, Effective

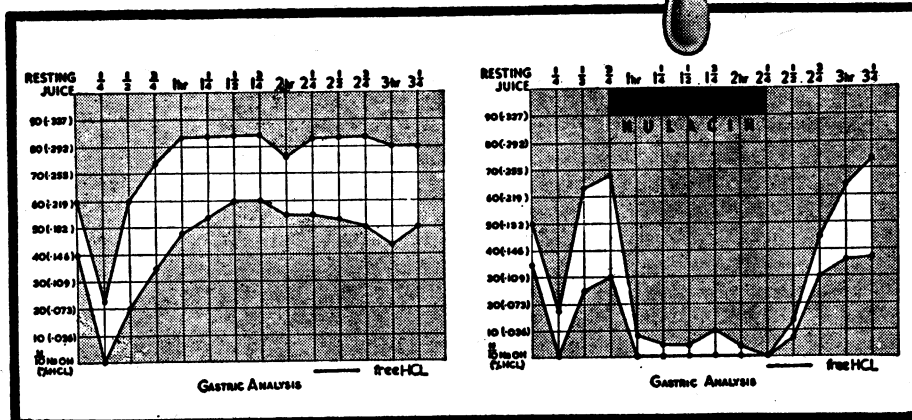

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
