ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

Ferromyn-S gives 30% better iron absorption

SO?

So your patients make a faster recovery without increased dosage or increased side-effects.

Most oral iron treatments will get your patients better eventually. But only Ferromyn-S has an iron salt combined with free succinic acid, which research has shown, pushes up the absorption rate by 30%* – without increases in dosage or side-effects*.

Because the body absorbs more iron, patients respond to treatment sooner with quicker regeneration of the haemoglobin, faster repletion of tissue and storage iron. When you prescribe Ferromyn-S for your anaemic patients you are giving them all the benefits of the latest research on iron metabolism.

Ferromyn-S combines the maximum therapeutic effect

with the minimum side-effects at a cost of less than 2d. per day. What more could a Doctor – or patient – ask?

Ferromyn-S with Folic Acid is also available; each tablet contains 100 mcg Folic Acid, thus, at a dose of one tab.t.d.s. the recognised optimum daily dose of 300 mcg is prescribed.

A NEW ORAL GEL WITH STRIKING ANALGESIC AND ANTISEPTIC PROPERTIES

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly

bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases, where a bacterial element is superimposed on the original infection, Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

FORMULA: Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

INDICATIONS: Herpes labialis, gingivitis, oral ulcerations, cheilosis, denture sores, infant teething disorders.

PRESENTATION: Bonjela is available in 10 g. tubes at a basic N.H.S. cost of 2/8½d. per tube.

active

is Broxil more active?

The simple answer is 'yes'.

The clinical effectiveness of an antibiotic depends on in vitro activity, its mode of action and the concentration of the antibiotic achieved at the site of infection.

How does Broxil measure up to these criteria?

Firstly, it is active against the most common pathogens—streptococci, pneumococci and staphylococci, including 'mildly resistant staphylococci'.

Secondly, Broxil is bactericidal, killing the organisms instead of merely inhibiting their growth.

Finally, Broxil is *reliably* absorbed, giving blood levels twice those of an equivalent dose of penicillin V. This means more antibiotic at the site of infection and greater penetration to inaccessible sites.

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.).

Tablets, 125 and 250mg.; Capsules, 125 and 250mg.

For children, adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62·5—125mg. and

Adults 125—250mg., four times a day.

Prophylactic: Children 62·5—125mg. and

Adults 125mg., twice a day.

CONTRA-INDICATION: Penicillin allergy.

SIDE EFFECTS: As with other oral penicillins.

The case for using Penbritin

Regd.

in Acute Pharyngitis and Tonsillitis

Upper respiratory infections respond more quickly to Penbritin than to tetracycline¹. . . a significant advantage when nearly 50% of patients attending surgery want treatment for these conditions, as a recent General Practice survey has shown.²

Clinical cure with Penbritin is surer, as well as faster. Penbritin actually kills the vast majority of bacteria that cause these infections. About one third of β -haemolytic streptococci causing disease in man, however, are now insensitive to tetracycline³, and this organism is the most frequent cause of acute pharyngitis and tonsillitis.

Penbritin is also the safer broad spectrum antibiotic for children and during pregnancy, as it has no permanent or dangerous side effects*. There are two pleasant syrups, appreciated by all age groups—125 mg./5 ml. for

the child, and 250 mg./5 ml. for the adult or more severely ill child.

Penbritin is equally effective in other respiratory tract infections including:

Sinusitis · Laryngitis · Bronchitis · Pneumonia.

*** Contra-indication:** Penicillin allergy.

Side-effects: As with other Penicillins.

N.B. Penbritin is not effective against penicillin-resistant staphylococci.

One THEO-NAR tablet gives double support

...8 hour relief of bronchospasm and irritant cough

Theo-nar is a special immediate-plus-delayed release tablet presentation which greatly enhances the therapeutic action of its two constituents – theophylline to relieve bronchospasm and noscapine to suppress exhausting, unproductive cough. In particular Theo-nar allows administration of a really effective dose of theophylline – giving profound bronchodilation without the high incidence of gastro-intestinal side effects sometimes associated with oral theophylline therapy.*

With Theo-nar there is no peak-and-valley effect in blood levels of the medicaments. Two or three tablets are thus sufficient to keep the patient symptom-free throughout the night and day – and the need for steroid therapy is reduced or eliminated.*

* Clinical Trials Journal, 1966, 4 : 51.

Presentation Each Theo-nar tablet contains 200 mg theophylline and 30 mg noscapine processed to provide immediate release of 100 mg theophylline and 15 mg noscapine, and delayed release after four hours of 100 mg theophylline and 15 mg noscapine.

Glaxo brief

The most successful topical steroid **Betnovate** now costs even less

All Betnovate preparations with the exception of Scalp Application and Betnovate-N Tulle are reduced in price by an average of 11½%. For less cost than most other branded topical steroids you can now prescribe the most successful – Betnovate. The superiority of Betnovate (betamethasone 17-valerate) was first shown in the largest dermatological trial ever held¹ and has since been amply confirmed in hospital and general practice. Not only does Betnovate often succeed when other topical steroids fail but it also achieves a better and faster clearance in relatively responsive conditions.^{2,3} The scope of Betnovate is wide but the cost of success is now very small.

As they do not adhere to granulating surfaces, dressings may be changed easily and painlessly without damage to newly healed tissues. Betnovate-N, containing betamethasone 17-valerate and neomycin, is a rapidly acting anti-inflammatory and anti-infective ointment. Neobacrin, a broad spectrum antibiotic ointment, contains neomycin and bacitracin. Together these antibiotics are bactericidal against an exceptionally wide range of gram-positive and gram-negative organisms. Betnovate-N and Neobacrin Tulle are even more useful now they are prescribable on the Drug Tariff.

To all the other advantages
of betamethasone
Betnesol adds solubility

Normally, corticosteroids are not very soluble resulting in uneven absorption and inconsistent therapeutic response. This is why the complete solubility of Betnesol (betamethasone disodium phosphate) is so important. Dropped into a glass of water Betnesol Tablets dissolve to form a particle-free solution which is easy to drink even during an attack of asthma – and there are no solid steroid particles to irritate the stomach. Betamethasone is one of the most potent steroids available today yet has a low incidence of side effects. Even during long-term therapy, as in rheumatoid arthritis, betamethasone is unlikely to cause oedema and hypertension and has negligible effect on potassium balance. Just as soluble aspirin is the modern way to prescribe aspirin so Betnesol is the modern way to prescribe oral steroids.

New adult strength
Crystapen G Syrup gives
patients the penicillin
they need

Penicillin-sensitive infections in adults and older children who cannot or will not swallow tablets can now be conveniently treated with the new strength Crystapen G Syrup. In each 100 ml bottle there is sufficient syrup for five days' continuous therapy. Each 5 ml of new strength Crystapen G Syrup contains 250 mg penicillin G – clinically just as effective as the more expensive penicillin V.¹ Indeed the new five-day bottle costs little more than a three-day bottle of equivalent strength penicillin V.

In strep. throats two new five-day bottles of **Crystapen G Syrup** make sure

The superiority of ten days' penicillin therapy for strep. throats and at least five days for any other penicillin-sensitive infection is well known. This is why the 125 mg/5 ml and the new 250 mg/5 ml Crystapen G Syrups are now available in new five day (100 ml) bottles. Thus patients with strep. throats need two bottles and those with most other penicillin-sensitive infections need one bottle. For patients able to swallow penicillin tablets the new redesigned Crystapen G Tablets are ideal. Redesigned Crystapen G Tablets (125 mg and 250 mg penicillin G) are now film-coated with the name and strength printed on to make them easily identifiable. Tasteless and easy to swallow, the new tablets offer a higher level of patient acceptability. Whenever your patient needs oral penicillin prescribe Crystapen G by name — it's the penicillin for today.

Description

Crystapen G Syrups — granules which dissolve in water to produce flavoured syrups containing potassium penicillin G.
Crystapen G Tablets — potassium penicillin G tablets (film-coated or plain). They are printed with the product name and strength.

Mode of action

Given orally, soluble penicillin G is well absorbed when taken on an empty stomach and produces better blood levels than some insoluble forms of penicillin. Penicillin G is the most active antibiotic in vitro against the common penicillin-sensitive organisms.

Indications

Penicillin-susceptible infections, e.g., those due to beta-haemolytic streptococci, pneumococci and susceptible staphylococci.
Prophylaxis before and after surgery and dental extractions to prevent subacute bacterial endocarditis in patients with rheumatic heart disease.

Side effects

Occasionally patients experience diarrhoea.
Sensitivity reactions such as urticarial rash are uncommon, and anaphylaxis is very rare. The latter demands immediate resuscitative measures, including injection of adrenaline and use of an intravenous corticosteroid.

Dosage

Infants: 62.5 mg to 125 mg (100,000 to 200,000 units).
Children: 125 mg to 250 mg (200,000 to 400,000 units).
Adults: 250 mg (400,000 units), or more.
Doses should be given four times a day before meals, or more frequently if need arises. In patients with beta-haemolytic streptococcal infection it is always advisable to continue treatment for ten days to prevent bacteriological relapse and complications such as rheumatic fever or acute nephritis.
N.B. — In serious and overwhelming infections when rapid control is essential, injections of sodium penicillin G (Crystapen) initially are advantageous.

Dispensing note

Crystapen G Syrups are prepared by adding 60 ml of water slowly, and shaking until the granules dissolve.

Storage

Crystapen G Tablets: store below 25°C (77°F) in a dry place, but not in a refrigerator.
Crystapen G Syrups: when prepared as directed, must be used within five days if kept at room temperature (below 20°C) or within fourteen days if kept in a refrigerator.
Dry granules maintain potency for two years if stored below 25°C.

ALCOHOL & ROAD TRAFFIC

PROCEEDINGS OF THE
THIRD INTERNATIONAL CONFERENCE
ON ALCOHOL AND ROAD TRAFFIC
HELD UNDER THE AUSPICES OF
THE *BRITISH MEDICAL ASSOCIATION* IN
SEPTEMBER 1962

AN IMPORTANT REFERENCE BOOK for police surgeons, lawyers, forensic scientists, police officers, criminologists, doctors, sociologists, psychologists, insurance offices, analytical chemists and others whose work brings them into contact with the problem of alcohol and road traffic.

In September 1962, the world's leading authorities met together in London to discuss problems of alcohol and road traffic. The 56 papers which were presented at this conference, the subsequent discussions, and the reports of nine special working parties set up to discuss particular issues, have been collected together in these proceedings to form the most comprehensive and authoritative statement available on this important and topical subject.

The proceedings contain the most up-to-date information on the relation of alcohol, tranquillizers and other drugs to road accidents, the role of alcoholism, the most recent chemical methods of detection including breath analysis, A.D.H. and gas chromatography, police procedure with drinking drivers, and presentation of evidence in courts of law.

READING AND DISTRICT HOSPITAL**MANAGEMENT COMMITTEE****Reading Area Accident and Orthopaedic
Service**

A vacancy will occur shortly in the above service at Battle Hospital, Reading, for a

SENIOR HOUSE OFFICER

This unit is the only accident service for a population of 400,000, and the bulk of the work consists of major trauma, although there is also a small amount of "cold" orthopaedics. The successful candidate will be part of a "team" whose duties will be divided between the wards, operating theatres and the accident reception department. The latter is newly built and very well equipped, including resuscitation rooms and two operating theatres.

The post offers extremely good experience in the management of acute trauma, and there are good facilities for postgraduate study. The post is recognized for the F.R.C.S.

A modern flat is probably available.

Written applications, giving two referees, to the Hospital Secretary, Battle Hospital, Oxford Road, Reading. (12781)

FIVE SENIOR HOUSE OFFICER

posts in the accident and emergency department which will fall vacant on February 1, 1968. The department is in the charge of a full-time Consultant Surgeon, and all emergency cases are admitted through the department, which is responsible for the initial resuscitation of such cases. The department is equipped with apparatus for cardiac monitoring, positive pressure ventilation, blood gas analysis, and blood volume computation with radioactive isotopes, as well as 300 image intensifiers and a Berman F.B. locator.

The hospital has 428 beds, is the base hospital for the group and therefore has a large volume of acute cases in all specialties. It is being extensively re-developed by a major capital building programme. A new intensive care unit will be in operation early in 1968.

There is a close connection with the teaching hospital at Cardiff, 10 miles to the west, and there is an extensive postgraduate education programme with a very good library at the hospital. A new postgraduate centre has been built to which will enhance further the facilities at present available. The appointments give ample opportunity to the holders to avail themselves of these facilities.

Successful candidates will be expected to be resident on the nights on which they are on first call, which will on average be one night in five. At other times the posts are either resident or non-resident, and those who wish to be non-resident will be given every assistance to find suitable accommodation. There is a certain amount of married accommodation available in the control of the Hospital Management Committee.

Applications, giving full particulars, and names and addresses of two referees, to Group Secretary, 64 Cardiff Road, Newport, Mon. (25508)

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staphylococci and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Icthyol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

... in varicose ulcers, burns, pressure sores,
trophic ulcers, etc.
... experience has shown that **ASERBINE**
is a true desloughing agent which
does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

Active Ingredients	In 100 G. cream	In 500 ml. solution
Malic Acid Ester of propylene glycol	160 mg.	5.25 G.
Malic Acid	250 mg.	7.65 G.
Benzoic Acid	25 mg.	0.75 G.
Salicylic Acid	5 mg.	0.15 G.

anything you can do

I can do better

Plenty of antacid preparations work, but there will always be the patient who fails to respond satisfactorily to standard therapy. Possibly he experiences side-effects, diarrhoea maybe, or perhaps his white chalky mixture is so unattractive that he "forgets" to take it.

Glymaxil is an antacid that is just that much better.

- ☐ It has no laxative effect.
- ☐ It relieves pain promptly and has been shown to be "significantly more effective" than aluminium hydroxide.
- ☐ It tastes refreshingly of peppermint—is clean and easy to take.
- ☐ Uniform doses and activity are assured because Glymaxil is a soluble antacid.

Beat winter hazards with **Firestone** *Town & Country*

**Guaranteed to go
through mud,
slush or snow,
or Firestone
pay the tow!**

Firestone Town & Country is the *only* drive-wheel tyre backed by a pay-the-tow guarantee.

Its tough, angled tread bars are uniquely designed to give that vital grip on wet, slippery roads.

And the guts to take you through mud, deep slush and heavy snow.

Starting, cornering, stopping are all surer and safer. Deeper tread pattern gives increased mileage.

And a quiet, smooth ride. Fit Firestone Town & Country—and beat winter! *Special treads available for studding.*

Guarantee

Any purchaser of two new Firestone Town & Country tyres will be reimbursed for towing charges up to £5 if:

1. The Firestone Town & Country tyres fitted to the drive-wheels of the purchaser's car or light van fail to provide traction through mud, slush or snow during the 18 months following the purchase date.
2. The claim arises solely through lack of traction.

Oversea—contd.**DEPARTMENT OF ANATOMY
UNIVERSITY OF ALBERTA**
Edmonton, Alberta, Canada

Applications are invited for two vacancies as **ASSISTANT PROFESSOR OF ANATOMY**. Preference will be given to applicants with some teaching and research experience and those with a medical degree. One position is to assist with and to take some course responsibility in the teaching of gross anatomy and embryology, the other in neuroanatomy and histology to medical and premedical students. The teaching laboratories are modern and fully equipped, and considerable emphasis is placed upon small group and television tutorial type teaching. The department is well equipped for most aspects of research. Fringe benefits include excellent local fishing, shooting and skiing. Successful applicants will be expected to take up their appointments on July 1, 1968, although other dates are negotiable. Salary will be in proportion to training and experience but will not be less than \$10,500 per annum, with some travel allowance. Applications should be received by March 20 and should include a full curriculum vitae, a recent photograph and the names of three referees, and should be addressed to the Head of the Department, Dr. T. S. Leeson. (H.5822)

ST. ANDREW'S HOSPITAL
NORTHAMPTON

President :
Lieutenant-Colonel J. Chandos-Pole, O.B.E.

Medical Director :
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both
male and female, suffering from nervous and
mental disorders, including alcoholism and
senile illness. The fees range from twenty
guineas per week. Private rooms with
special nurses can be provided, either in the
hospital or in one of the villas in the
grounds. The hospital is situated in 130
acres of pleasant grounds which provide all
recreational facilities. These include a nine-
hole golf course, sports ground, tennis
courts, etc. A recreation and occupation
centre, known as Gloucester House, has been
opened recently, which includes an occupa-
tional therapy department, a swimming pool,
a squash court and a library with an adjoining
reading room.

WANTAGE HOUSE

This is a separate reception unit to which
patients may be admitted. It is equipped
for the complete investigation of nervous and
mental disorders by the most modern
methods. All forms of treatment are avail-
able.

Charges for treatment at St. Andrew's are
allowable for benefit to British United Pro-
vident Association and Private Patients Plan
subscribers.

For terms and further particulars apply
to the Medical Director (Telephone No.
34354, Northampton), who can be seen in
London by appointment.

Why take
a bottle?

when a
teaspoonful of
Pholtex
can give cough
relief for 8 to 10 hours

No need for frequent doses... no bulky bottle to carry around... a good night's sleep or a good day's work undisturbed by coughing... these are the advantages of *Pholtex* for your patient. Each 4 ml. teaspoonful of *Pholtex* contains Pholcodine B.P. 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes in a pleasantly-flavoured thixotropic vehicle. Dosage is one teaspoonful two to three times daily—for children, half to full adult dosage according to age. Basic NHS cost: 2 fl. oz. 5/-; 20 fl. oz. 47/4. Additional information is available on request.
