'Periactin' induces a marked improvement in the appetite of many patients. The resulting weight gain is due only to the increased food intake—there is no disturbance of endocrine function, no evidence of fluid retention.

'Periactin' does not reproduce the effects of 'tonics', haematinics or vitamins. 'Periactin' acts promptly, and its dosage is simple.

'Periactin' will be invaluable for many of those situations in which patients, adults and children, require food and yet have no appetite for it.

## When you prescribe elastic stockings

## Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

### Scholl 'Soft Grip' for conditions requiring 'Elastic Yarn Standard Weight'.

Worn under normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support around the leg with plenty of comfortable 'give' lengthwise.

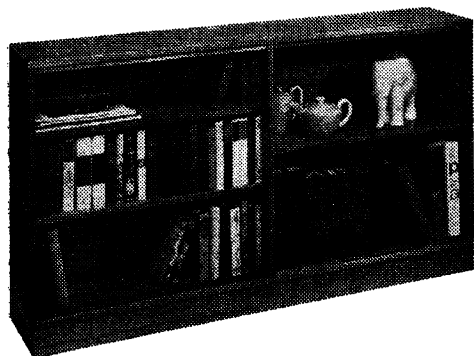

### Scholl 'Nylastik' for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn instead of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

## the first broad-spectrum, bactericidal chemotherapeutic agent

### Discovered by Wellcome Research

Trimethoprim is a synthetic antibacterial compound, discovered and developed by Wellcome Research. It is a potent inhibitor of dihydro-folic acid reductase – an enzyme which plays a vital role in bacterial purine synthesis. Trimethoprim thus effectively blocks production of DNA in the bacterial cell.

### Unique bactericidal action

Acting alone, at low concentration, trimethoprim inhibits the growth of a wide range of bacteria. When it is combined with a sulphonamide there is a strong mutual potentiation, giving a bactericidal effect. As the sulphonamide blocks an earlier stage in bacterial purine synthesis the total bactericidal effect may be described as 'sequential double blockade'. This unique mode of action minimises the possibility of bacterial resistance developing.

### Broad-spectrum activity

The combination of trimethoprim and sulphonamide exerts its bactericidal action across a wide spectrum of organisms and is much more effective than either agent alone. Its range of action compares favourably with that of the broad-spectrum penicillins.

### The 'Septrin' formula

The most suitable sulphonamide for use with trimethoprim is sulphamethoxazole because it is absorbed, and excreted, at approximately the same rate. The optimum ratio of dosage is 1:5. Each 'Septrin' tablet therefore contains trimethoprim 80 mg., sulphamethoxazole 400 mg.

- ☐ bactericidal to a wide spectrum of common pathogenic organisms, both Gram-positive and Gram-negative
- ☐ effective against particularly troublesome pathogens – *Proteus* species, *E. coli* and *H. influenzae*
- ☐ quickly reaches high tissue concentrations, especially in lung and kidney, after oral administration
- ☐ rapid and almost complete absorption from the gut avoids disturbance of intestinal flora
- ☐ well tolerated by the patient – no significant toxic effects have been observed
- ☐ effective against penicillinase-producing organisms – no cross-resistance with other antibacterial drugs has been reported
- ☐ can be used in the penicillin-hypersensitive patient
- ☐ unlikely to allow development of bacterial resistance – because of its unique mode of action

# Prescribing Information

# SEPTRIN

## Sensitive organisms

'Septrin' is active against the following pathogenic bacteria :  
Gram-positive : *Streptococcus pneumoniae*, *Staphylococcus aureus*, *Streptococcus pyogenes*.  
Gram-negative : *Haemophilus influenzae*, *Klebsiella pneumoniae*, *Klebsiella aerogenes*, *Proteus* species, *Escherichia coli*, *Neisseria gonorrhoea*, *Salmonella* species, *Shigella* species, *Bordetella pertussis*, *Vibrio cholera*.  
Bacterial resistance to 'Septrin' is unknown. Its effectiveness is unimpaired against bacteria resistant to other chemotherapeutic agents or antibiotics.

## Pharmacology

Absorption by the oral route is rapid, significant plasma levels are obtained within an hour. Peak levels are reached between two and four hours and are maintained over a period of seven hours. Detectable amounts have been found after 24 hours. Tissue concentrations of trimethoprim are higher than the corresponding plasma levels, the lungs and kidneys showing especially high concentrations. Levels in secretions exceed the corresponding plasma concentrations, the only exception being the cerebro-spinal fluid and even there an effective antibacterial concentration is reached.  
40-50% of the ingested trimethoprim is excreted in the urine within 24 hours on normal fluid intake. Sulphamethoxazole is mainly excreted in the urine, 60% in the acetylated form.

## Toxicity

In mice and rats the minimal lethal dose of trimethoprim is approximately 1000 mg./kg. orally and is not increased by addition of the sulphonamide. In chronic toxicity studies of 'Septrin', weight gain and haemopoiesis were depressed at near lethal doses.  
A distinct teratogenic effect was found with excessive oral doses (minimal 160 mg./kg trimethoprim) in rats but not in rabbits; the effect was countered by administration of folates. Neither trimethoprim nor sulphamethoxazole possess any significant pharmacodynamic activities in animals or man.

## Indications

The broad-spectrum, bactericidal action of 'Septrin' is valuable in Gram-positive, Gram-negative and mixed infections. It is effective against penicillinase-producing organisms and can be given to patients who are hypersensitive to penicillin. A successful clinical response has been demonstrated in the following conditions:

**Respiratory tract** — acute and chronic bronchitis, bronchiectasis, empyema, lung abscess, lobar and broncho-pneumonia. 'Septrin' is particularly active against *Haemophilus influenzae*.

**Urinary tract infections** — including urethritis, cystitis, pyelitis, chronic pyelonephritis, prostatitis and gonococcal urethritis. 'Septrin' is notably effective against Gram-negative organisms, especially *Proteus*.

**Septicaemia** — particularly striking successes have been shown in septicaemias due to problem organisms resistant to other antibacterials.

## Dosage

Adults and Children over 12 years : Two tablets twice daily. In severe infections a loading dose of four tablets is recommended except in cases with renal failure — see below. In overwhelming infections and septicaemias three tablets twice daily or two tablets three times a day may be given.

Children 6-12 years : Half the adult dose, usually one tablet twice daily.

In cases with marked renal impairment, reduced or more widely spaced dosage is recommended. A satisfactory urine output should be ensured. Ideally, in such patients, dosage should be controlled by regular estimations of blood levels (methods are available on request).

In acute infections 'Septrin' should be given for at least five days or until symptoms have been absent for 24-48 hours. In acute urinary tract infections many authorities advise that treatment should continue for at least 10-14 days because of the danger of sub-clinical or low grade chronic pyelonephritis persisting and leading to permanent renal impairment and its sequelae. In chronic infections the duration of treatment will depend upon response.

Adverse effects have not been reported in long-term prophylactic administration.

## Side-effects and precautions

With 'Septrin' in the recommended dosage no serious side-effects have been reported.

Malaise, nausea and vomiting have occurred with trimethoprim alone, but only when the daily dose exceeded 1 G. which is three times that included in the average recommended dosage. These reactions appear to be of central origin. Rashes have occurred in a few cases. No undesirable haematological effects have been observed in short-term treatment with 'Septrin'. After prolonged administration, some minor biochemical changes and also morphological evidence of alterations in folate metabolism were noted in the granulocytes. However, these changes had no practical implications and with cessation of the drug there was prompt return to pre-treatment levels in all these cases.

The usual caution in prescribing any drug for women of child-bearing age should be exercised with 'Septrin'. The drug should not be given during pregnancy.

'Septrin' is contra-indicated in patients known to be sensitive to sulphonamides.

Care is needed in patients with marked renal impairment (See under Dosage).

## Presentation

# Who's afraid of

# Mycoplasma?

Does it exist? Do you ever come across it – except in the journals? Is it a genuine cause for concern or merely a fashion fad of little consequence? Many are sceptical! Since the organism is so difficult to identify early on and is recognised in such a small proportion of patients – why even consider it? On the other hand the increasing amount of published evidence now associating Mycoplasma with various infections, pneumonia,<sup>1,2</sup> bronchitis,<sup>3</sup> even non specific urethritis,<sup>4</sup> makes one aware that at least some consideration must be given to the question.

## Whatever your answer Ledermycin gives the coverage

Broad enough to cope with both the 'ordinary' and the 'extraordinary' infections, ranging from pneumococcus to Mycoplasma.

Simple in dosage to facilitate patient's adherence to dosage schedule – eg 300 mg b.d.

# Stamp out hay fever with D-VAC Pollens vaccine

## 3 injections

that is all that is required for a hay fever free summer. D-VAC Pollens is a 'depot' desensitising vaccine for the treatment of hay fever and pollen asthma. This short course of injections alleviates the symptoms by building up the patient's resistance to airborne grass pollens which circulate between May and July. The doses are easy to administer and are prepacked in special disposable syringes. Using the procedure outlined opposite will ensure that D-VAC Pollens is given at the best possible time.

## Highly effective

D-VAC Pollens has been used in clinical practice for five years following three years of extensive trials. Reported success rates have been as high as 80% of patients treated<sup>1,6</sup>. Patient acceptability has been high and the treatment is generally well tolerated<sup>1,5,6</sup>. For maximum long term benefit, D-VAC Pollens should be given for three successive years.

## Prescribe now:

D-VAC Pollens injections are made to order only. Each prescription should be for the whole course—either Primary or Advanced\*—and should state when the first injection is to be given (10th February—8th March). The three injections will be automatically despatched at four-week intervals to arrive a few days before they are required.

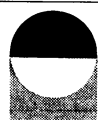

Prescriptions should be completed before 31st December.

# May & Baker sort out coughs.

## **'Vallex' for the "chesty" sort**

'Vallex' combines the sedative and local analgesic properties of Trimeprazine Tartrate ('Vallergan') with the bronchodilator effect of phenylpropanolamine and also contains guaiphenesin, ipecacuanha, sodium citrate, and citric acid. Whatever the cause of bronchial congestion, help your patients "get it off their chests" with 'Vallex'.

## **'Phensedyl' for the "hacking" sort**

'Phensedyl' has been carefully formulated as a specific treatment for dry, "hacking" coughs. It contains codeine, as an antitussive, promethazine ('Phenergan'), as a sedative and local analgesic, and ephedrine as a bronchodilator. 'Phensedyl' is available as linctus, and also as capsules, which contain noscapine instead of codeine.

## **'Tixylix' for the young sort**

Smaller people don't mean smaller coughs. But their coughs need gentler treatment. 'Tixylix' is gentle, effective and well-tolerated. Children like its pleasant cherry flavour. It contains pholcodine, an effective antitussive which does not cause constipation; phenylpropanolamine, similar in action to ephedrine, but without its stimulating effect; and promethazine ('Phenergan') as a central sedative, and as an analgesic to soothe sore and inflamed throats.

## In the U.K., one man in three over 35 dies from coronary heart disease

Patients especially at risk are  
younger men with angina pectoris, or those  
who have had a myocardial infarction.

For these and other coronary patients 'Atromid'-S 500 has become an established part of treatment. Over 10,000 such patients in the United Kingdom alone are now being treated with 'Atromid'-S.

Extensive long-term trials have demonstrated a marked reduction in serum lipids and correction of thrombogenic abnormalities. 'Atromid'-S

has also produced marked reduction of xanthomata and of the hard waxy deposits in exudative diabetic retinopathy. Treatment with 'Atromid'-S is extremely safe since side effects are minimal and infrequent.

The new 500 mg. capsule adds considerably to the ease of administration.

## Lincocin penetrates

an experimental demonstration of  
Lincocin penetration

Forty minutes prior to undergoing tonsillectomy, a child weighing 29.1 kg. received a single i.m. injection of 10 mg./kg. lincomycin hydrochloride (base equivalent). A sample of the patient's tonsil tissue was placed on a Petri dish in which the agar had previously been seeded with a pathogenic strain of *Streptococcus haemolyticus*. After incubation, a photograph was taken. The clear zone demonstrates that Lincocin penetrated the human tonsillar tissue in a concentration sufficient to inhibit the growth of the pathogenic inoculum. ## In the elderly, the special problems of constipation...

Constipation in the elderly can present special problems of treatment. Weakened abdominal muscles . . . the dangers inherent in straining . . . refusal to co-operate . . . the presence of pain, to which anal fissures or haemorrhoids may contribute . . . the need for enemas and suppositories . . . the risk of faecal impaction, with consequent manual removal . . .

Clinical trials have shown the distinctive value of *Dorbanex* in the treatment of the elderly patient. In a recent trial in a geriatric ward<sup>1</sup>, *Dorbanex* achieved 23% more bowel openings than did standardised senna, and 61% more than miscellaneous laxatives. The stool formation "allowed easy defaecation without an increase in faecal incontinence". Suppositories were needed only five times during 644 patient-days of treatment, and side-effects were negligible and transient.

"*Dorbanex* was readily accepted by all patients, even those with some degree of senile dementia to whom the administration of other medicaments has proved difficult"<sup>2</sup>. In this trial *Dorbanex* achieved an average of more than one bowel opening every day—an increase of more than 50% over the openings achieved by standard aperients. No patient complained of griping, whereas other medicaments had caused several such complaints. No suppositories were needed, and in 360 patient-days of treatment only one manual removal was performed.

*Dorbanex* can simplify management of the patient posing these problems by providing comfortable, reliable and trouble-free evacuation. *Dorbanex* produces a soft but well-formed stool without griping or other unpleasant side-effects, reduces the need for enemas and suppositories, helps to prevent faecal impaction, and makes defaecation easier without increasing faecal incontinence.

## ...have a straightforward solution

Now available in three forms—as capsules and in two strengths of liquid—*Dorbanex* provides in one preparation a balanced treatment for constipation. By softening the stool and stimulating peristalsis, *Dorbanex* prepares the way for pain-free evacuation.

1. *Practitioner* (1966) 196: 703. 2. *Brit. Hosp. J. & S. S. Review* (1966) 77: 727.

Composition *Dorbanex* is available in three forms—as capsules and in two strengths of liquid. **DORBANEX CAPSULES**: each capsule contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **DORBANEX LIQUID**: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **DORBANEX FORTE**: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 75 mg., poloxalkol 1000 mg. **Doseage DORBANEX CAPSULES**: Adults, one or two capsules. Children, one capsule. **DORBANEX LIQUID**: Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery: two to four teaspoonfuls or two to four capsules. **DORBANEX FORTE**: one teaspoonful, or as directed by the physician. Treatment should be taken

at bedtime. **Contra-indications** In common with other gastro-intestinal evacuants, *Dorbanex* should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. **Side-effects** Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients. **Basic NHS Prices** *Dorbanex* Capsules: bottles of 30 capsules 8/8; bottles of 300 capsules 78/-; *Dorbanex* Liquid: bottles of 60 ml. 4/-; bottles of 500 ml. 30/-; *Dorbanex* Forte: bottles of 60 ml. 6/-; bottles of 500 ml. 45/- Additional information on request.

Protracted illness, whether self-limiting or terminal, is frequently accompanied by anxiety and depression. Many patients so affected benefit from treatment aimed at allaying the symptoms of their anxiety-depressive state.

'Tryptizol', a well-established antidepressant with additional tranquillising properties, has proved of considerable value in relieving the distressing symptoms of the anxiety-depressive condition. The patient becomes calmer and mood is lifted. Sleep and appetite improve, and preoccupation with the illness gives way to more normal interests.

# BAD LEGS?

## Tired heavy aching legs

Before 'bad legs' become an ugly problem—**PAROVEN®**

All the early symptoms of venous insufficiency—tired, heavy, aching legs, skin disorders, and night cramps—respond to PAROVEN therapy. [1-3]

PAROVEN, containing trihydroxyethylrutoside, reduces the increased capillary permeability which "is at the bottom of the majority of the complications of varicose disorders". [4]

### Indications

Conditions associated with lower limb venous insufficiency.

Tired, heavy, aching legs. Night cramps. Skin disorders.

Superficial thrombophlebitis.

Varicose states.

### Dosage

1 tablet 3 or 4 times a day.

Maintenance dosage [as little as one tablet a day] may be adjusted to patients' needs.

### Packages

Tablets of 250 mg. hydroxyethylrutosides [not less than 45% troxerutin]. Tins of 20-100 tablets.

Women... can't help it

## 'Saluric' can in premenstrual tension with oedema

Women suffering from premenstrual tension with oedema cannot avoid the tiresome and inevitable signs and symptoms of this common condition, which may last for 7 to 10 days every month, prior to the menses. Because many of the distressing symptoms may be directly related to fluid retention, effective diuresis usually brings prompt relief.

'Saluric' can relieve swelling of the ankles, breast engorgement, and fullness of the abdomen. It may well help to alleviate the concomitant irritability and nervousness. 'Saluric' has been proved by 10 years of clinical experience to be a dependable diuretic which can be used month after month to control premenstrual tension with oedema.

Each tablet of 'Saluric' contains 500 mg chlorothiazide BP. Detailed information is available to physicians on request.

# Whoever heard of a Burton Doctor Suit?

Nobody.

But we have a suit that will suit him to perfection. The Burton Director Suit.

Now although this suit started out without a name it started *with* a director.

With our managing director, no less.

His idea: a ready-to-wear suit tailored to the highest bespoke standards. The kind of suit which he himself would be happy to wear at his most important meetings. (Incidentally, he's very particular about his clothes.)

So in due course, the Burton Director Suit was born. And named. And

applauded by doctors, architects, barristers, bankers . . . hundreds upon hundreds of professional men.

Indeed, people who know a lot about clothes reckon there's nothing to touch the Burton Director Suit at anywhere near the price.

(Two-piece from 22 guineas. Three-piece from 26 guineas.)

For the record: each suit is cut by hand from Pure New Wool cloth; then put together, piece by piece, so that it looks, feels and behaves like a costly bespoke suit. And it comes in an infinite number of fittings. Now because so much individual attention goes into these suits, supplies are limited to selected Burton branches. For a check-list see your nearest branch.

And remember.

You don't have to be a director to wear a Burton Director Suit.

You just look like one.

(You don't have to be a director to wear a Burton Director Suit, you just look like one.)

# Why a doctor needs a special sort of help when he's sick.

Some people can get by on National Insurance Benefit when they're sick.

As a doctor you haven't a chance. Commitments, such as your surgery, would cripple your income. And you know better than anyone that the worries of keeping your family on a watered-down budget would retard your recovery.

That's why it's so wise to insure against sickness. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. Write to us today. Together we'll find the policy that will work hardest for you.

Do it now. Turning the page could mean turning your back on a worry-free future.

"Open" area, retiring practitioner, male. List at present approximately 3,290. Immediate surgery premises not available. Health Centre premises will be available in approximately three years' time.

Application form E.C.16A obtainable from The Clerk, Inner London Executive Council, Insurance House, Insurance Street, W.C.1. Completed applications to be received by the Council not later than 12 noon, Monday November 4, 1968. (H.5612)

#### LANCASHIRE EXECUTIVE COUNCIL (NATIONAL HEALTH SERVICE)

##### UPTON (WIDNES) OVERSPILL

##### DEVELOPMENT AREA

A vacancy exists for the first of five doctors who will be required to practise in the Western area of the above overspill estate, where it is proposed to erect a health centre to cater for a population of approximately 12,000 people of the planned community of 2,600 houses, 115 of which are already occupied.

Initially, the Widnes Corporation will make a house available for the incoming doctor at an economic rent for use as temporary living and surgery accommodation until such time as a health centre is erected. The vacancy could attract a special type "D" allowance (see E.C.N. 631) for a doctor with the necessary qualities and experience. For the purpose of a type "D" allowance, the experience expected is normally about ten years as a qualified doctor of which two years have been spent in hospital appointments and five in a busy general practice in the United Kingdom.

Further particulars may be obtained from the Clerk, Lancashire Executive Council, 42 West Cliff, Preston, PR1 8HQ, to whom application on Form E.C.16A should be forwarded, to arrive not later than November 9, 1968. (H.5629)

#### LEEDS-GREATER ROUNDHAY (OPEN AREA)

Applications are invited for a vacancy created by the amalgamation of two adjoining practices (total list approximately 3,250) of doctors resigning on December 31, 1968. Both surgeries may be available. Forms E.C.16A and further details obtainable from the Clerk, Leeds Executive Council, A.E.U. House, Bridge Street, Leeds 2, by whom completed forms must be received not later than Monday, November 11, 1968. (H.5630)

#### MIDDLESEX EXECUTIVE COUNCIL VACANCY-HENDON (BURNT OAK)

Applications invited for vacancy occasioned by death of male practitioner. List at present approximately 1,870. Open area.

Practice premises may be available for purchase. Apply on Form E.C.16A before November 2, 1968, to: The Clerk, Middlesex Executive Council, International Life House, Dept. S, 4th Floor, Olympic Way, Wembley, (H.563)

**APPOINTMENT OF DEPART-  
MENTAL MEDICAL OFFICERS**

Vacancies exist for full-time and part-time medical officers in the Department of Mental Health. Duties will be mainly concerned with child development clinics, the school health service and maternity services, although other general public health duties may be allocated by the Medical Officer of Health.

Facilities exist for in-service clinical training in the assessment of handicapped children. The borough has a purpose-built hearing clinic (audiology unit) and a new medical unit opened for the assessment and treatment of cerebral palsied and other physically handicapped children. Medical surveillance is provided by the department for handicapped children for four-day special schools in the borough for (i) deaf, with associated classes for partially hearing pupils in normal schools, (ii) physically handicapped, (iii) delicate/maladjusted and (iv) educationally subnormal pupils. The department also runs two junior training schools, two special care units and two adult training centres. Additionally, various training facilities are provided for medical students and post-graduate D.C.H. students. For some years the department has routinely accepted medical students from London teaching hospitals for visiting to the various units and services comprising the department of health.

Successful applicants will be placed on an appropriate point within the scale of £1,870 to £2,520 a year. A lump sum car allowance is payable. A "full-time" assisted D.P.H. course scheme is in operation in the borough, for whole-time officers only. The appointment is permanent, pensionable and subject to medical assessment. Whitley Council conditions apply. Preference will be given to candidates possessing either D.P.H. or D.C.H.

# CHRONIC BRONCHITIS-ASTHMA

## Your patient's nightmare?

He'll get continuous relief with high, sustained theophylline blood levels.

Choledyl—choline theophyllinate BP—is readily absorbed by mouth, producing therapeutically effective theophylline blood levels up to 75% higher than those obtainable with equivalent doses of aminophylline. Choledyl rarely causes gastric irritation.

Choledyl is available as tablets containing 100 mg or 200 mg choline theophyllinate BP, in bottles of 100 and 500, and as syrup containing 62.5 mg choline theophyllinate BP in each 5 ml dose, in bottles of 150 ml and 2 litres.

# ***major metabolic activity in obesity proved by British research...***

Obese patients develop a block to muscle glucose uptake causing a diversion of ingested carbohydrate to adipose tissue.

Fenfluramine is the first drug to have been shown to correct this metabolic defect.

By restoring metabolic equi-

librium fenfluramine re-activates muscle glucose uptake and diverts the ingested carbohydrate away from adipose tissue. Thus weight loss is encouraged. It is probable that the known very effective, non-cns hunger regulation of Ponderax is mediated

through the metabolic action. Glycoliptic agents act to restore equilibrium where an imbalance exists between the tissues in glucose and/or lipid metabolism. Ponderax is the first such agent and marks a really significant advance in treating obesity.

# a new fundamental approach to the problem of sputum

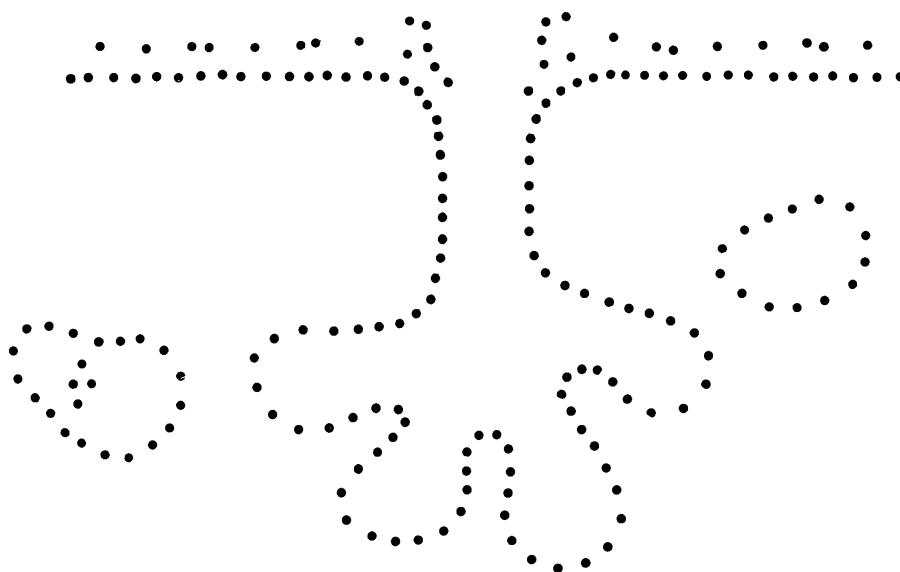

# mobilises mucus mobilises the bronchitic

tablets and elixir

A feltwork of fibres is responsible for the thick, sticky sputum characteristic of the bronchitic.<sup>1</sup>

Bisolvon alone solves the problem for the patient with non-purulent sputum by:

- I. disrupting this feltwork of fibres
- II. reducing sputum stickiness
- III. promoting the flow of easily expectorated sputum
- IV. decreasing sputum volume after a few days' treatment

**Composition** Bisolvon is N-cyclohexyl-N-methyl-(2-amino-3, 5-dibromobenzyl)-amine hydrochloride

**Pharmacology** In animal experiments Bisolvon stimulates increased secretion of fluid by mucous glands of the respiratory tract and it also breaks down the feltwork of acid mucopolysaccharide fibres which are responsible for the viscosity of non-infected bronchitic sputum.<sup>2</sup>

**Clinical Effects** When given orally Bisolvon's effect becomes apparent to the patient within 2-3 days by an increased production of thin, easily expectorated sputum. As treatment progresses sputum volume decreases without an increase in viscosity, and with continued ease of expectoration.

**Indications** Acute and chronic bronchitis and other conditions where tenacious sputum is a problem.

**Contra-indications** There are no absolute contra-indications, but caution should be observed when

administering Bisolvon to patients with gastric ulceration.

**Precaution** When a patient under treatment for tuberculosis is receiving Bisolvon, sputum cultures for tubercle bacilli should be continued for at least three months before a negative result is assumed.

**Side-effects** Mild gastro-intestinal side-effects may occasionally occur. In a small number of patients a transient rise in serum transaminase levels may be seen, but these should fall again as treatment with Bisolvon continues.

**Dosage** Adults: 8 mg. three times daily. Children age 5 to 10: 4 mg. four times daily. Children under 5: 4 mg. twice daily.

**Availability** Tablets, 8 mg.; packs of 20 and 250. Elixir, 4 mg. in 5 ml. (with 17.5 mg. chloroform); packs of 200 ml. and 1-litre.

Bactrim Roche produces its highly potent bactericidal activity from the potentiating action of its two components – sulphamethoxazole and trimethoprim. A leading article in the British Medical Journal on 18 May 1968 drew attention to the important therapeutic potential of this bactericidal synergy.

In a trial<sup>1</sup> Bactrim Roche\* rapidly cleared purulent sputum and produced marked clinical improvement in every one of a group of 50 chronic bronchitics, where treatment with one or more antibiotics had already failed.

## The Need

### GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

**The Opportunity** Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

**The Advantages** Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

**Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

**Training Scheme for Recently Qualified Doctors** In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

NEW PLYMOUTH HOSPITAL  
New Zealand

PART-TIME RADIOLOGIST

Applications are invited from appropriately qualified medical practitioners for the post of Visiting Radiologist.

This is an honorary appointment to the existing establishment to cope with an expanding hospital radiological service in the province of Taranaki. The initial appointment will be for over 174 hours but not over 21 hours per week (six-tenths) with the right of private practice. The opportunity is available to the successful applicant to join an existing private radiological practice in New Plymouth, the present partners of which are already on the Taranaki Hospital Board's visiting staff.

The salary will be six-tenths of the basic salary scale for specialists (\$N.Z. 6,020 to \$8,100), the commencing rate depending upon length of experience in radiology, and promotion by progressive steps will be automatic. Advancement to a higher grading \$8,500 to \$9,400 will be subject to determination by the Grading Committee.

Conditions of appointment and further particulars are available from the New Zealand High Commissioner, London. Applicants are expected to complete the official application form, name at least two medical referees and indicate when duties could be commenced.

Applications close on December 16, 1968, with: The Secretary, P.O. Box 95, New Plymouth, New Zealand. (13133)

The programme is accredited by the Royal College of Physicians and Surgeons of Canada, to whose certification examination it leads. A basic two years of training in general psychiatry are offered comprising general hospital psychiatry (in-patients and out-patients), mental hospital psychiatry, and basic child psychiatry. The following years permit a choice of further training in such fields as general, administrative, and child psychiatry, student mental health, alcoholism and addictions, research, psychiatric teaching, etc. A comprehensive array of clinical and research facilities, conferences, seminars, and tutorships, a favourable student-to-teacher ratio, and an active interest in the philosophy of teaching and learning, make this a dynamic and stimulating programme.

Residency (registrarship) stipends range from \$4,720 to \$6,920. An additional bursary of \$1,500 per annum is also available to most residents. Some residents will be accepted into the graduate programme of the Ontario Mental Hospital Service at a stipend of approximately \$10,000. Teaching, research, and travelling fellowships are offered, ranging up to \$10,000 per annum.

Interested applicants should contact Dr. W. E. Powles, Senior Psychiatrist-in-Charge of Postgraduate Education, Department of Psychiatry, Queen's University, Kingston, Ontario, Canada. (H.5646)

# SAFE SIMPLE EFFECTIVE NULACIN

**EFFECTIVE**, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

**SIMPLE**, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

**SAFE**, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrins, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
