

When depression and  
anxiety walk together...

## 'Surmontil'

the M&B antidepressant with  
psychosedative properties

Treatment of depression alone frequently leads to aggravation of underlying anxiety or agitation. The intrinsic double action of 'Surmontil' as antidepressant and anxiolytic obviates the need for supplementary medication in these cases.

At the same time, the central sedative activity of 'Surmontil' helps to restore normal sleep patterns.

Available as tablets containing 25 mg. trimipramine and injection solution. 12.5 mg. per ml. also 10 mg. tablets for children, mild cases and to facilitate dosage adjustment.

# The over-anxious patient needs your sympathy... and the calming effect of **BENVIL**

Your reassurance, understanding and encouragement play an absolutely vital part in the treatment of any patient you feel is emotionally distraught. To help you *keep* your patients relaxed, calm and attuned to the realities of life you may wish to prescribe Benvil.

In cases of acute anxiety and tension, Benvil relaxes, calms, and restores a feeling of well-being. And it does this without over-sedation, which means that patients can successfully go about their daily work – an important aid to readjustment.

Moreover, reports on Benvil suggest that it is free from dependence.

**Benvil is available as a new, smaller blue capsule containing 250 mg. tybamate in an original pack of 50.**

**Dosage:** One capsule 3 or 4 times a day. For elderly patients it is recommended that therapy be started on the lower dosage. The dosage can be increased if necessary to a maximum of eight capsules in 24 hours to suit the individual concerned.

**Precautions:** Side effects are mild and infrequent at the normal dosage. In the aged, hypotensive effects are possible at higher doses. If drowsiness or mild dizziness occur, the patient should avoid activities requiring optimal alertness. If symptoms of hypersensitivity occur, treatment should be stopped and appropriate symptomatic therapy given.

Consumption of alcohol or concurrent administration of other psychotropic agents (e.g. phenothiazines, monoamine oxidase inhibitors) may have an additive effect. The customary precautions should be taken in administering Benvil to patients with a history of drug

allergies, blood dyscrasias, hepatic or renal disease. There has been no evidence to suggest development of tolerance or dependence with Benvil: in common with other psychotropic agents however, it is advisable to give Benvil cautiously to addiction-prone subjects and to withdraw therapy slowly after prolonged use. Although animal tests suggest freedom from teratogenic effects, Benvil cannot at present be recommended during the early weeks of pregnancy.

of sputum

tablets and elixir

A feltwork of fibres is responsible for the thick, sticky sputum characteristic of the bronchitic.<sup>1</sup>

Bisolvon alone solves the problem for the patient with non-purulent sputum by:

- I. disrupting this feltwork of fibres
- II. reducing sputum stickiness
- III. promoting the flow of easily expectorated sputum
- IV. decreasing sputum volume after a few days' treatment

**Composition** Bisolvon is N-cyclohexyl - N - methyl - (2-amino -3, 5-dibrombenzyl) -amine hydrochloride  
**Pharmacology** In animal experiments Bisolvon stimulates increased secretion of fluid by mucous glands of the respiratory tract and it also breaks down the feltwork of acid mucopolysaccharide fibres which are responsible for the viscosity of non-infected bronchitic sputum.<sup>2</sup>

**Clinical Effects** When given orally Bisolvon's effect becomes apparent to the patient within 2-3 days by an increased production of thin, easily expectorated sputum. As treatment progresses sputum volume decreases without an increase in viscosity, and with continued ease of expectoration.

**Indications** Acute and chronic bronchitis and other conditions where tenacious sputum is a problem.

**Contra-indications** There are no absolute contra-indications, but caution should be observed when

administering Bisolvon to patients with gastric ulceration.

**Precaution** When a patient under treatment for tuberculosis is receiving Bisolvon, sputum cultures for tubercle bacilli should be continued for at least three months before a negative result is assumed.

**Side-effects** Mild gastro-intestinal side-effects may occasionally occur. In a small number of patients a transient rise in serum transaminase levels may be seen, but these should fall again as treatment with Bisolvon continues.

**Dosage** Adults: 8 mg. three times daily. Children age 5 to 10: 4 mg. four times daily. Children under 5: 4 mg. twice daily.

**Availability** Tablets, 8 mg.; packs of 20 and 250. Elixir, 4 mg. in 5 ml. (with 17.5 mg. chloroform); packs of 200 ml. and 1-litre.

# Who's afraid of

# Mycoplasma?

Does it exist? Do you ever come across it – except in the journals? Is it a genuine cause for concern or merely a fashion fad of little consequence? Many are sceptical! Since the organism is so difficult to identify early on and is recognised in such a small proportion of patients – why even consider it? On the other hand the increasing amount of published evidence now associating Mycoplasma with various infections, pneumonia,<sup>1,2</sup> bronchitis,<sup>3</sup> even non specific urethritis,<sup>4</sup> makes one aware that at least some consideration must be given to the question.

## Whatever your answer Ledermycin gives the coverage

Broad enough to cope with both the 'ordinary' and the 'extraordinary' infections, ranging from pneumococcus to Mycoplasma.

Simple in dosage to facilitate patient's adherence to dosage schedule –  
eg 300 mg b.d.

Effective – so that both doctor and patient may be confident of good results.

# BACTRIM<sup>†</sup> ROCHE

*a major discovery  
in the control of infection*

**Bactrim Roche:** is highly effective in acute exacerbations of chronic bronchitis. It has an ultra-wide spectrum of activity and its dual action gives it great bactericidal potency, especially against *Haemophilus influenzae* the most important pathogen in chronic bronchitis.

Bactrim Roche produces its highly potent bactericidal activity from the potentiating action of its two components – sulphamethoxazole and trimethoprim. A leading article in the British Medical Journal on 18 May 1968 drew attention to the important therapeutic potential of this bactericidal synergy.

In a trial<sup>1</sup> Bactrim Roche\* rapidly cleared purulent sputum and produced marked clinical improvement in every one of a group of 50 chronic bronchitics, where treatment with one or more antibiotics had already failed.

1. Proc. V int. Congr. Chemother., 1967 I, 293. \*The formulation used in this trial was slightly different from that which was subsequently found to produce the best results and which has now been adopted.

# THE EVIDENCE...

A recent article\* gives a guide to the choice of the appropriate oral contraceptive for the individual patient. The observation is made that potency cannot be inferred from milligram dosage. It is also stated that most of the side-effects experienced with oral contraceptives are related to the oestrogen/progestogen balance of the compound and it classifies Lyndiol 2.5 centrally between the most strongly progestogenic and the most strongly oestrogenic oral contraceptives. It is these facts which constitute the basis of Organon's claim that Lyndiol 2.5 is a truly low-dose oral contraceptive and is a truly well-balanced preparation.

\*'Today's Drugs'.  
Brit.med.J., 1, 690 (1968)

Further support for the suitability of Lyndiol 2.5 in the majority of patients comes from the first randomised double-blind crossover trial conducted on a number of oral contraceptives\*\*. The study, which made detailed comparisons between 4 leading oral contraceptives in 1673 cycles of therapy, and which confirmed that Lyndiol 2.5 has only minimal side-effects, is a further aid to the selection of a suitable oral contraceptive.

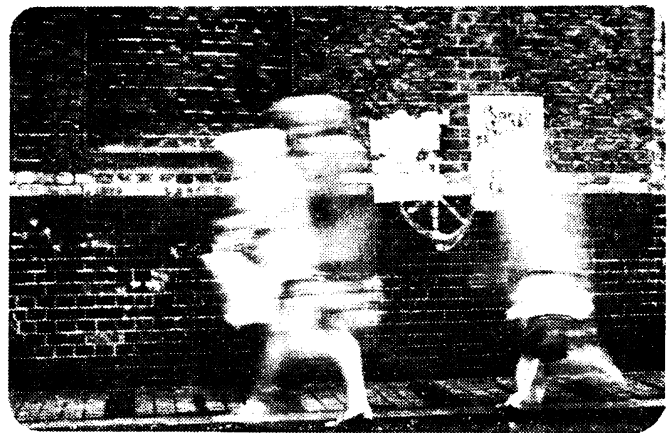

\*\*Acta Obst. Gynec. Scand.,  
46, Suppl. 8 (1967)

## A morning's surgery brings a lot of Crystapen G patients

How many patients needing antibiotics do you see in a morning? Whatever the number, there is a strong case for using penicillin. It is still the drug of choice in so many infections. # why

# so many hypertensive patients do well on Aldomet®

Methyldopa BP

- 'Aldomet' offers smooth and even control of blood pressure when the dosage has been established.
- 'Aldomet' usually reduces lying as well as standing blood pressure.
- 'Aldomet' causes much less postural hypotension than other powerful antihypertensive agents.
- 'Aldomet' rarely causes exertional hypotension.
- The dosage of 'Aldomet' is simple, flexible and easily established.

Supplied as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and, for emergency use, as an injection. Detailed information is available to physicians on request.

In a trial comparing three antihypertensive agents, it was shown that, '... in the patients who could take adequate doses methyldopa provided the best control of blood pressure, with the lowest levels of blood pressure when the patient was supine.'

# ESBATAL

brand

bethanidine sulphate

A recent 2½-year study<sup>1</sup> has confirmed that 'Esbatal' (bethanidine sulphate) provides a more acceptable form of therapy for the patient than other antihypertensive drugs in current use. Control of blood pressure was achieved with 'Esbatal' in about three-quarters of the hypertensive patients treated—and side-effects were rare.<sup>1</sup> In comparing 'Esbatal' with guanethidine and methyldopa the authors considered that 'Esbatal' was to be preferred for beginning treatment in any new hypertensive patient.<sup>1</sup> Better acceptance of 'Esbatal' by the patient, again compared with guanethidine and methyldopa, was also demonstrated in another trial where 'Esbatal' scored the highest rating for patient preference.<sup>2</sup>

# Influenza - New Strain

## Flugen HK immunises against influenza caused by virus A2 Hong Kong

### Why is Flugén HK necessary?

The clinically important influenza viruses are type A and type B. Most of the population have some immunity against the English strains but the viruses constantly undergo antigenic change and when an extensive shift occurs, existing antibodies give no protection against the changed strain. In August, 1968, it was confirmed that the A2 viruses isolated in Hong Kong showed a marked antigenic shift from all other A2 strains. Thus a virus exists against which the population has little or no immunity and FLUGEN HK has been formulated specifically to give protection against the new virus.

### Are Multivalent Vaccines still required?

**FLUGEN HK will protect against the A2 Hong Kong virus only.** Multivalent vaccines are therefore essential for protection against the endemic influenza viruses and against the A2 Tokyo virus. For total protection against influenza this winter, immunisation with both vaccines is indicated.

### Will administration of two vaccines be a problem?

Immunisation in late autumn gives protection before and during the period when influenza is prevalent, but both multivalent and monovalent vaccines may be given at any time considered suitable or necessary. Administration of one vaccine does not preclude concurrent or subsequent immunisation with the other.

### Availability

**'Because of its wide antibacterial action and relative freedom from toxic manifestations, nitrofurantoin ["Furadantin"] should be considered for the treatment of patients with urinary infections when treatment is begun before the sensitivity of the infecting organism is known'\*.**

We can add 4 more reasons! Broad-spectrum action essentially confined to the urinary tract — no clinical problem of acquired drug-resistance in over a decade of widespread use — no risk of cross-sensitization to prejudice future therapy — and no disturbance of intestinal flora.

**PRONDOL\*** (iprindole, Wyeth) will change your outlook on anti-depressant therapy too. You see PRONDOL not only acts quickly to bring effective relief, it acts comfortably – there are few of the distressing side-effects which so often used to accompany anti-depressant treatment. Your patients thus get more tolerable treatment and you can anticipate greater reliability. As one investigator concluded: "... iprindole (PRONDOL) is a therapeutically effective anti-depressant with an exceptionally low incidence of side reactions ..." (Clin. Trials J. (1968) 5:927)

# Hydroderm<sup>®</sup> simply treats 'skins'

Many common skin conditions respond quickly to treatment with 'Hydroderm' Ointment.

'Hydroderm' contains hydrocortisone, with neomycin and bacitracin for broad antibacterial cover when susceptible infection is present or anticipated.

Supplied as a one-strength, one-base formulation for easy prescribing, 'Hydroderm' often provides the simple answer to many common skin conditions seen in general practice.

'Hydroderm' Ointment contains, in each gram, 10 mg hydrocortisone, 5 mg neomycin sulphate and 1,000 units zinc bacitracin, in tubes of 5 G and 15 G.

# When migraine threatens

## CAFERGOT suppositories act swiftly - and surely

"Ergotamine suppositories are second only to the injections in therapeutic effectiveness because the rate of absorption of ergotamine from the rectum is relatively constant."\*  
Cafergot Suppositories abort the migraine attack in over 80% of cases. They are the most consistently reliable ergotamine dosage form which the patient can administer.  
Cafergot Suppositories are of special value when the headache is associated with nausea and vomiting, or when the patient awakens with an attack.

Each Cafergot Suppository contains Ergotamine Tartrate B.P. 2 mg., Caffeine B.P. 100 mg., total alkaloids of belladonna leaf 0.25 mg. and isobutylallyl barbituric acid 100 mg. In boxes of 6 and 30.

## An aid to oral hygiene

Maintenance of oral hygiene during the post-operative period, especially among geriatric patients, is obviously essential. But at the same time this can prove to be somewhat time-consuming for the nursing staff.

However, recent experience in a London hospital has shown that the patient can help to provide his own nursing care, with the minimum of effort.

This experience covers patients who are fed intravenously and post-operative cases who find normal eating and drinking difficult. These patients often exhibit signs of mouth infection very quickly, and treatment for this can often cause considerable discomfort.

A more pleasant treatment is possible in many cases, for it has been found that giving the patient chewing gum promotes salivary gland activity. Patients are encouraged to chew gum at two-hourly periods, and this treatment frequently allays the symptoms and produces a considerable improvement in the condition of the tongue and mucosa. Quite striking results have been noted after carrying out this treatment for a 24-hour period.

# Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else's. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That's why it's so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. So write today. Together we'll find the policy which will work hardest for you.

Do it now.

## More pain-free days

In angina pectoris, Inderal protects the heart from the oxygen-wasting effects of emotion and effort.

The unique action of 'Inderal' represents a revolutionary new concept of long-term relief of angina, rather than just the treatment of the condition as and when it arises.

Through adrenergic beta-receptor blockade, 'Inderal' protects the heart from the action of adrenaline. There is a slowing of the heart-rate and

reduction in the oxygen needs of the myocardium.

**The results: more pain-free days; increased effort tolerance.** Inderal is the only treatment to have been proved consistently in double-blind clinical trials. Tests also show it to be effective in very severe cases of angina (unlike other forms of angina therapy).

We shall be glad to send you further information on request.

**UNIVERSITY OF EXETER  
Postgraduate Medical Institute**

A full-time postgraduate course lasting 10 weeks will begin on January 15, 1969. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under Section 48 of the N.H.S. Act (1946). These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom). Further particulars and application forms for these courses are obtainable from the Director, The Post-Graduate Medical Institute, The University, Exeter, Devonshire.

LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE  
DEPARTMENT OF PUBLIC HEALTH  
(Director—Professor J. N. Morris, D.Sc., F.R.C.P., D.P.H.)****M.SC. SOCIAL MEDICINE**

An Academic Course leading to the degree of Master of Science in Social Medicine in the Faculty of Medicine of the University of London will start on September 29, 1969 and extend over two calendar years. The Course is designed to provide professional training for doctors wishing to specialize in social medicine and to follow careers in either:

**MEDICAL ADMINISTRATION AND COMMUNITY MEDICINE****TEACHING AND RESEARCH IN SOCIAL MEDICINE**

The training has been designed to enable the graduate to participate in the administration of medical services in any branch of the present National Health Service or in the new structure now being considered. Application has been made to the General Medical Council for approval of the course for the purposes of registration under Section 48 of the Medical Act, 1956.

The content of the Course will include the study of statistics and epidemiology, social and behavioural sciences and the principles of management and medical administration. It will aim to integrate the biological, social, and practical aspects of major issues in hygiene, preventive medicine and medical care. During the second year each student will be attached to an academic or service unit in order to gain experience in applying the relevant range of skills from epidemiology, operational research and behavioural science to policy, planning, management and evaluation of health services.

The Course will initially be limited to 12 students, who must be medically qualified and have had at least two years' clinical experience. A limited number of bursaries are available to suitable candidates. Further details and application forms may be obtained from the Registrar, London School of Hygiene and Tropical Medicine, Keppel Street (Gower Street), London W.C.1, to whom applications for admission should be addressed before March 1, 1969. **COMMERCIAL APPOINTMENTS—see also pp. xxx and xxxi****DEPUTY MEDICAL  
ADVISER**

Applications are invited for the appointment of a Deputy Medical Adviser with Astra-Hewlett Ltd., a subsidiary of the Astra organization of Sweden. Such registered medical practitioners should have had general medical experience with postgraduate training. The post will call for an interest in respiratory diseases and in clinical pharmacology. Whilst the major part of the work would be in England, an ability to speak a second language would ensure better liaison with medical colleagues in Europe. Responsibilities will be mainly concerned with the initiation and supervision of clinical trials. The applicants should be confident of their ability to work with senior clinicians of major medical centres. The appointment is based near London and initial briefing on the organization and research programme will be given in Sweden. A certain amount of travel will be required in Scandinavia, Europe, and the United Kingdom. A car will be provided and there is a generous pension scheme in operation. Salary by negotiation.

Application should be made to:  
The Managing Director,**ASTRA-HEWLETT LIMITED,**  
King George's Avenue, Watford, Herts.

# medical advisers

Due to the Company's future plans for increased participation in the international field of therapeutics it has become necessary to augment the Medical Department. Applications are therefore invited from medical practitioners to fill appointments as Medical Advisers to the Company.

As they will be expected to initiate and progress clinical trials on a world wide basis in clinics of international repute, candidates must have a sound clinical background, have initiative and be capable of discussing the medical aspects of the Company's products with leaders of the medical profession.

As well as being responsible for their clinical trials they will participate in the medical training of representatives, attend national and international medical meetings and symposia and fully contribute to the efficient daily running of the Medical Department.

The Company is based in Loughborough in Leicestershire, a non-industrial area with good educational facilities and pleasant residential areas. It is a member of the Fisons Group of Companies and Group Contributory Pension and other Welfare Schemes operate.

A Company car will be provided. There will be four weeks' holiday a year and salary will be negotiated according to experience.

Applications should be addressed to:

**The Personnel Manager (141),  
Fisons Pharmaceuticals  
Limited,  
12, Derby Road,  
Loughborough,**

## SPARE-TIME AUTHORSHIP

Can you interpret your own field of medicine for a lay reader—and make it alive and interesting?

We need qualified men and women as contributors to a new publication which will explore the whole field of human life—its growth and development, its social and medical problems, its treatments and therapies.

Naturally we should prefer people with writing experience, but do not let lack of experience deter you from inquiring.

For further details, please telephone Mr. Peter Way at

## Clinical Research

Expanding scientific effort requires additional staff to carry out associated clinical investigation of new drugs. Working in collaboration with the largest research unit in the pharmaceuticals industry in Britain (1968 Research budget £2.3m.) and the leading research centres at home and abroad, our doctors have demanding and responsible jobs, the values of which are reflected in the salaries negotiated.

Applicants, men or women, should have a minimum of two years' clinical experience. A higher qualification or B.Sc. would be an advantage.

The Medical Department is located with the research establishment in particularly pleasant semi-rural surroundings in East Cheshire. The attractive conditions of service, prospects and the assistance given to married men in moving home will be discussed at interview.

Applications, and informal enquiries from those who do not wish to commit themselves immediately to a formal application should be addressed to:

**J. Leak, Assistant Personnel Manager,  
IMPERIAL CHEMICAL INDUSTRIES LTD.,  
PHARMACEUTICALS DIVISION,  
Mersey, Alderley Park,

## INDUSTRIAL APPOINTMENTS

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers as approved by the Representative Body, which is available on request from the Secretary.

# Industrial Medical Officers

The Air Corporations Joint Medical Service provides a comprehensive Occupational Health Service for BEA and BOAC and includes groups dealing with Industrial Medicine, Aviation Medicine, and the care of Overseas staff.

Vacancies now exist for two Industrial Medical Officers who will be based at Heathrow Airport.

- 1 The first of these two appointments will be a replacement for an experienced industrial physician. For this post a DPH and/or DIH is highly desirable, with good industrial or service experience. The age range preferred is 30–45 years.
- 2 The second appointment is a newly established post suitable for a younger man seeking to make a whole time career in occupational health. This post will also entail duties (in the UK) in connection with the overseas staff medical service. Possession of a DPH and/or DIH will be an advantage but is not essential and the preferred age is up to 35 years.

Candidates must be medically registered in the United Kingdom.

Salaries will be within the BMA Medical Officer scale and the starting points will be fixed according to age, qualifications and experience. There is an excellent contributory pension scheme and opportunities exist for overseas holiday air travel.

Closing date Friday, 22 November, 1968.

Write giving details of age, experience and qualifications to:—

The following appointment as Appointed Factory Doctor is vacant: Long Melford, in the County of Suffolk. Applications, which should be received by November 16, 1968, should be sent to H.M. Chief Inspector of Factories, Baynards House, Chestow Place, Westbourne Grove, London W.2. (13289)

SPECIAL  
APPOINTMENTSTHE UNITED LIVERPOOL HOSPITALS  
HOSPITAL COMPUTER STUDY GROUP

The Board of Governors wishes to appoint a doctor, a nurse and a hospital administrator to three new posts:

One post: Graded Senior Systems Analyst. Salary scale £2,079, rising by five increments to £2,552 per annum.

Two posts: Graded Systems Analyst. Salary scale £1,559, rising by five increments to £1,937 per annum.

The successful applicants will form a study group to work in conjunction with an established team of computer scientists currently working under a Nuffield Provincial Hospitals Trust grant.

The study group will evaluate procedures and practices in clinical, nursing and administrative areas, and will advise on the extent to which computer applications would be worth while. The study will not be concerned initially with problems of diagnosis and will concentrate on the implications of current practice in connection with communications within the new general teaching hospital of 830 beds now under construction, and for which a computer is expected to be delivered in 1972.

Each member of the study group will be encouraged to publish his work.

Appointments are initially for three years, but proposals for secondment for shorter periods will be sympathetically considered.

Further particulars from the Secretary, 80 Rodney Street, Liverpool L1 9AP. Closing date for applications November 20, 1968. (H.5717)

**SALARY SCALES OF HOSPITAL MEDICAL STAFF**

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

**HOUSE OFFICERS:** Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration.  
Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**SENIOR HOUSE OFFICERS:** £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

**REGISTRARS:** £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRARS:** £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of three shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANTS:** £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

PROVINCE OF  
NEWFOUNDLAND***Medical  
Director***GENERAL HOSPITAL,  
ST. JOHN'S, NFLD.,  
CANADA***A vacancy exists*

at the General Hospital, St. John's, for a Medical Director. Minimum requirements are that the applicant be fully registrable with the Newfoundland Medical Board to practice medicine in the province and have had a period of formal training as well as experience in hospital administration.

The General Hospital, with a complement of 350 beds and extensive out-patient and emergency services, is the main referral hospital for the province. An expansion of present facilities is anticipated in the near future and the Medical Director will be involved in the planning of new construction. The hospital operates and is affiliated with teaching programmes of many groups of professional and para-medical health workers, including affiliation with Memorial University of Newfoundland, Dalhousie University in Halifax and McGill University in Montreal.

St. John's is one of the oldest cities in North America and is a thriving capital of between ninety and one hundred thousand people. It is a seaport, the oldest parts of the city are picturesque and historical and the newer sections compare with modern residential areas anywhere. Memorial University, with an enrolment of over 6,000 students and presently planning a new medical school and health sciences centre, is situated in St. John's and offers opportunities for study through its extension programmes.

The Medical Director is responsible generally for the quality of patient care in all its aspects throughout the hospital complex. He will be directly responsible for the Hospital's involvement in intern and resident teaching programmes as well as other departments of the hospital.

QUEEN'S UNIVERSITY—PSYCHIATRY

The Department of Psychiatry, Queen's University (Professor T. J. Boag, Head of the Department) at Kingston, Ontario, offers comprehensive training in the specialty of psychiatry to those graduated from an approved medical school and having completed a year of internship. The programme is accredited by the Royal College of Physicians and Surgeons of Canada, to whose certification examination it leads. A basic two years of training in general psychiatry are offered comprising general hospital psychiatry (in-patients and out-patients), mental hospital psychiatry, and child psychiatry. The following years permit a choice of further training in such fields as general, administrative, and child psychiatry, student mental health, alcoholism and addictions, research, psychiatric teaching, etc. A comprehensive array of clinical and research facilities, conferences, seminars, and tutorships, a favourable student-to-teacher ratio, and an active interest in the philosophy of teaching and learning make this a dynamic and stimulating programme. Residency (registrarship) stipends range from \$4,720 to \$6,920. An additional bursary of \$1,500 per annum is also available to most residents. Some residents will be accepted into the career programme of the Ontario Mental Hospital Service at a stipend of approximately \$10,000. Teaching, research, and travelling fellowships are offered, ranging up to \$10,000 per annum. Interested applicants should contact Dr. W. E. Powles, Senior Psychiatrist-in-Charge of Postgraduate Education, Department of Psychiatry, Queen's University, Kingston, Ontario, Canada. (H.5646)

SIR CHARLES GAIRDNER HOSPITAL  
Woolston, Australia

ANAESTHETIST

Applications are invited from Specialist Anaesthetists for appointment to the post of full-time Staff Anaesthetist. The successful applicant will be responsible to the Physician Superintendent for the management of the anaesthetic service within the hospital. He will be required to assist in the organization of the anaesthetic services generally and establish liaison with the visiting anaesthetists and also to undertake some teaching of anaesthetics at graduate and undergraduate level.

The Sir Charles Gairdner Hospital is a 280-bed (including annexa) general teaching hospital associated with the Medical School of the University of Western Australia. Plans are being prepared to increase the bed capacity and associate services to develop the hospital into a fully functioning major general hospital which will form the nucleus of a large medical centre. The first block of 110 beds is due for completion in September, 1969.

The salary range is \$8,224, \$8,583, \$9,092, \$9,666, \$10,244 (at present under review). An initial sick leave grant of two weeks with pay is credited on appointment, and a further two weeks on full pay and one week on half pay is credited at the end of each year's service.

Five weeks' annual leave per annum is granted with no right to public holidays. Time off may be granted on public holidays by the Physician Superintendent depending upon the requirements of the hospital.

Three months' long service leave on full pay (or six months' on half pay) is granted after every seven years of service. Sea or air passage may be arranged. Applications should be sent to the Physician Superintendent, enclosing a recent photograph of the applicant, the names of three referees, full personal details and particulars of qualifications and experience, close on November 26, 1968.—A. F. T. Thompson, Administrator. (H.5698)

**ST. ANDREW'S HOSPITAL  
NORTHAMPTON**

President: Lieutenant-Colonel J. Chandos-Pole, O.B.E. Medical Director: James Harper, M.D., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in the acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, squash court and a library with an adjoining reading room.

**WANTAGE HOUSE**

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 3454 Northampton), who can be seen in London by appointment.

**OCTOBER 4—THE PROBLEM.** A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

**TWO WEEKS LATER—DESLOUGHING.** After treatment with Aserbine Cream to the ulcer and Aqueous Ichthol to the surrounding skin, complete desloughing has taken place.

**NOVEMBER 14—HEALING.** The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

## When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that **ASERBINE** is a true desloughing agent which does not affect living tissue

**Presentation:** Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

**Method of Application:** Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

<i>Aserbine is prepared from</i>	<i>100 G. cream</i>	<i>500 ml. solution</i>
Malic Acid	0.36%	2.25%
Benzoic Acid	0.024%	0.15%
