Who's afraid of

Mycoplasma?

Does it exist? Do you ever come across it except in the journals? Is it a genuine cause for concern or merely a fashion fad of little consequence? Many are sceptical! Since the organism is so difficult to identify early on and is recognised in such a small proportion of patients — why even consider it? On the other hand the increasing amount of published evidence now associating Mycoplasma with various infections, pneumonia,^{1,2} bronchitis,³ even non specific urethritis,⁴ makes one aware that at least some consideration must be given to the question.

Whatever your answer Ledermycin gives the coverage

Broad enough to cope with both the 'ordinary' and the 'extraordinary' infections, ranging from pneumococcus to Mycoplasma.

Simple in dosage to facilitate patient's adherence to dosage schedule — eg 300 mg b.d.

Effective — so that both doctor and patient may be confident of good results.

CONFIDENCE COMES FROM SUCCESS

In the treatment of Gram-positive infections – particularly those occurring in children or in the elderly – the reliability of an antibiotic is of prime importance. The success of Broxil inspires confidence. Not only is the syrup presentation pleasant to take but high bactericidal blood levels are achieved in the shortest possible time. Thus the infection is swiftly brought under control.

Broxil's effectiveness lies partially in its flexibility of dosage – this can be related to the severity of the infection without fear of side-effects.

Broxil Syrup is now available in 100 ml. bottles for a five day course of therapy.

INDICATIONS:

Tonsillitis, Pharyngitis, Otitis Media, Strep. Throats, Acute Bronchitis, and infections due to sensitive organisms where a syrup preparation is more acceptable than tablets or capsules.

AVAILABILITY:

Syrup (125 mg./5 ml.) 100 ml. bottles 9/–. 60 ml. bottles 5/10. Tablets (125 and 250 mg.) and capsules (250 mg.) are also available.

DOSAGE:

Children 62.5-125 mg. ($\frac{1}{2}$ -1 teaspoonful) four times

daily, $\frac{1}{2}$ hour before meals. Adults: 125-250 mg. (1-2 teaspoonfuls) four times daily, $\frac{1}{2}$ hour before meals. In severe infections the dosage may be safely increased.

CONTRA-INDICATION:

Penicillin allergy.

SIDE-EFFECTS:

Side-effects are typical of oral penicillins, being rare and mild in nature.

A morning's surgery brings a lot of Crystapen G patients

How many patients needing antibiotics do you see in a morning? Whatever the number, there is a strong case for using penicillin. It is still the drug of choice in so many infections. An established penicillin in a modern form is Crystapen G (penicillin G)—one you can rely on in the treatment of strep. throats for example.¹ And Crystapen G is as effective clinically as penicillin V.²

When your patients need oral penicillin, you can rely on Crystapen G.

A UNIQUE ORAL GEL WITH STRIKING ANALGESIC AND ANTISEPTIC PROPERTIES

Bonjela has been shown in formal American trials to bring rapid relief from pain in 90% of all cases of oral ulceration, herpes labialis, gingivitis and denture sores. By rapid relief is meant marked alleviation of pain within 2-3 minutes.

Bonjela also promotes healing whenever the aetiology is partly or wholly

bacterial. Some ulceration originates from endocrinal, viral or fungal causes which may require other forms of treatment.

Even in these cases where a bacterial element is superimposed on the original infection, Bonjela will reduce the severity of the infection and rapid relief from pain will be obtained.

FORMULA: Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

INDICATIONS: Herpes labialis, gingivitis, oral ulcerations, cheilosis, denture sores, infant teething disorders.

More pain-free days

In angina pectoris, Inderal protects the heart from the oxygen-wasting effects of emotion and effort.

The unique action of 'Inderal' represents a revolutionary new concept of long-term relief of angina, rather than just the treatment of the condition as and when it arises.

Through adrenergic beta-receptor blockade, 'Inderal' protects the heart from the action of adrenaline. There is a slowing of the heart-rate and

reduction in the oxygen needs of the myocardium.

The results: more pain-free days; increased effort tolerance. Inderal is the only treatment to have been proved consistently in double-blind clinical trials. Tests also show it to be effective in very severe cases of angina (unlike other forms of angina therapy).

URELIM

for the treatment of gout

"Few people realise how common a disease is gout. The incidence in the United Kingdom and the U.S.A. is at least 4 to 5 per cent. Some authors have suggested that the incidence is decreasing but it seems more likely that it is the suspicion of the disease and not the disease itself which is diminishing".*

Urelim is considered by many to be the uricosuric agent of choice for the long term treatment of gout, since it has proved to be a reliable and economical preparation of low toxicity.

Each Urelim tablet contains 0.5g ethebenecid.

major metabolic activity in obesity proved by British research...

Obese patients develop a block to muscle glucose uptake causing a diversion of ingested carbohydrate to adipose tissue. Fenfluramine is the first drug to have been shown to correct this metabolic defect. By restoring metabolic equi-

librium fenfluramine re-activates muscle glucose uptake and diverts the ingested carbohydrate away from adipose tissue. Thus weight loss is encouraged. It is probable that the known very effective, non-cns hunger regulation of Ponderax is mediated

through the metabolic action. Glycoliptic agents act to restore equilibrium where an imbalance exists between the tissues in glucose and/or lipid metabolism. Ponderax is the first such agent and marks a really significant advance in treating obesity.

...PONDERAX[®] FENFLURAMINE ***is the first glycoliptic agent***

"...fenfluramine does in fact mimic the metabolic pattern seen in lean subjects who have greater muscle glucose uptake than fat persons."

Lancet, (1968) ii, 109

***Ponderax also very effectively
regulates hunger without stimulation***
