**Convinced!**  
 Anginal patients are *convinced*  
 of the improvement brought  
 about in their condition by  
 Synadrin 60. During 12 months  
 treatment they suffered  
 fewer attacks, less pain.  
 Earlier clinical studies<sup>1,2,3,4,5</sup>  
 have been strikingly confirmed  
 by British papers published  
 in the last few months.<sup>6,7</sup>  
 Try Synadrin 60 in your angina  
 patients.

# Who's afraid of

# Mycoplasma?

Does it exist? Do you ever come across it – except in the journals? Is it a genuine cause for concern or merely a fashion fad of little consequence? Many are sceptical! Since the organism is so difficult to identify early on and is recognised in such a small proportion of patients – why even consider it? On the other hand the increasing amount of published evidence now associating Mycoplasma with various infections, pneumonia,<sup>1,2</sup> bronchitis,<sup>3</sup> even non specific urethritis,<sup>4</sup> makes one aware that at least some consideration must be given to the question.

## Whatever your answer Ledermycin gives the coverage

Broad enough to cope with both the 'ordinary' and the 'extraordinary' infections, ranging from pneumococcus to Mycoplasma.

Simple in dosage to facilitate patient's adherence to dosage schedule – eg 300 mg b.d.

Effective – so that both doctor and patient may be confident of good results.

# A case for 'Neulactil'

The antisocial adolescent. The problem child. The difficult geriatric patient. Each a specific type of behaviour disturbance, calling for specific management methods.

Sedatives and tranquillizers can help, but more valuable still are compounds with greater specificity of action, particularly in controlling such symptoms as impulsiveness and aggressive tendencies. 'Neulactil' is such a compound.

'Neulactil' has been shown to be highly effective in the control of disordered behaviour in juvenile, adolescent and elderly patients, whether it is of the neurotic type, or associated with psychotic illness.

"The manufacturer's claims that this drug is a potent neuroleptic are justified."

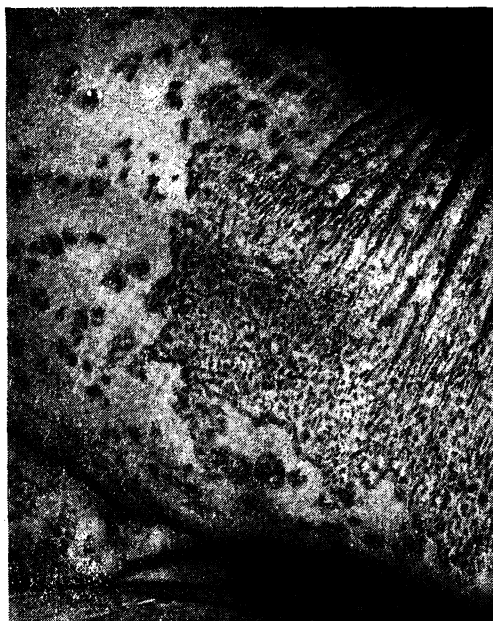

*S. Afr. med. J.* **41**, 995, 1967.

# 2 weeks

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

*Pharmaceutical Journal* (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

*British Medical Journal* (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

*British Medical Journal* (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

*British Journal of Dermatology* (1967) 79, 491

**Psoriasis case history.** Male patient aged 72 years with widespread chronic psoriasis admitted to hospital 18th October, 1966. Exolan Cream prescribed for application twice daily. Psoriasis practically clear; patient discharged 1st November, 1966.

Exolan is the only specific treatment for Psoriasis which has been given an A.2. classification by the Standing Joint Committee on the Classification of Proprietary Preparations. (A.2.: "A preparation of a single therapeutically active drug which has been shown to the Committee's satisfaction to have an acceptable degree of efficacy in relation to its toxicity and therapeutic indications and which in the light of alternative available preparations can be recommended for use.") Exolan is entirely a product of British research.

# VARICOSITY?

## She'll willingly take your advice if it means wearing fashionable Burson Lightweights

A woman's psychological need for fashion often makes her reluctant to accept your advice to wear elastic stockings. Burson Lightweights have been specially created to provide the answer.

Undetectable in wear, they are truly acceptable to the most fashion-conscious woman—yet are completely effective in relieving the pain and discomfort of a mild varicose condition and are approved by the N.H.S.

Made of alternating strands of strong, supple elastic with strands of sheer nylon, Burson Lightweights combine strength and resilience with stretch in **both** directions. Horizontal stretch eases the pressure of distended veins; vertical stretch aids the natural flow of blood

back to the heart. Available under N.H.S. (on the EC 10 form) in six normal stocking sizes scientifically adjusted to fit all leg shapes, they come in a pleasing shade.

Thus, in specifying Burson Lightweights when prescribing for mild varicosity, you will ensure your patient's relief from discomfort—whilst preserving her confidence and femininity.

# AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone', your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

## To lessen the fear of mutilation . . . arrange for Prosthesis before mastectomy

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen—for women, men, children—you will find Spencer Supports demonstrably superior.

to the problem  
of sputum

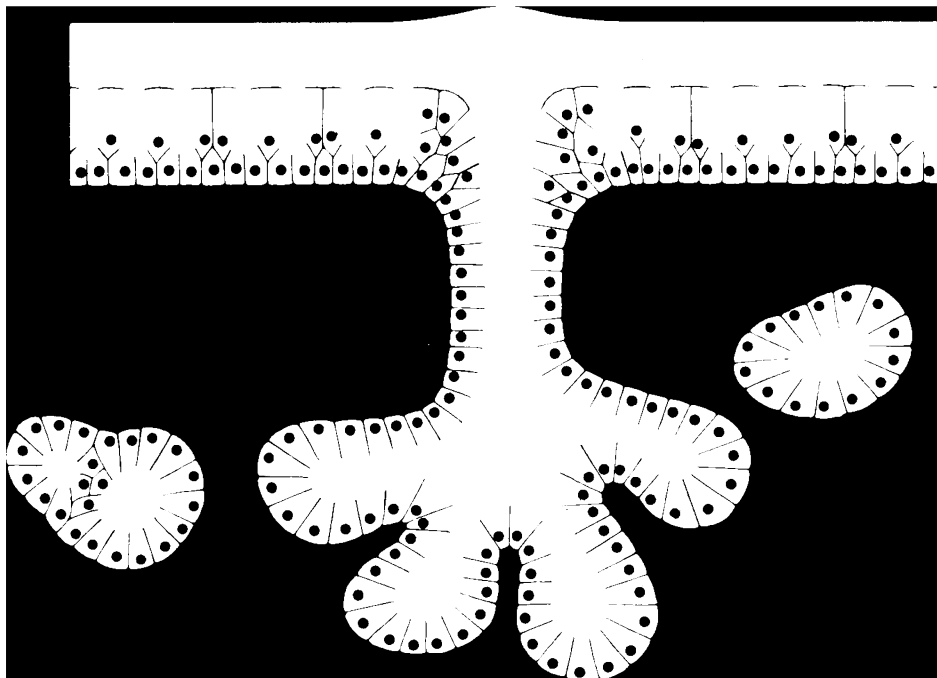

**mobilises mucus**  
**mobilises the bronchitic**

tablets and elixir

A feltwork of fibres is responsible for the thick, sticky sputum characteristic of the bronchitic.<sup>1</sup>

Bisolvon alone solves the problem for the patient with non-purulent sputum by:

- I. disrupting this feltwork of fibres
- II. reducing sputum stickiness
- III. promoting the flow of easily expectorated sputum
- IV. decreasing sputum volume after a few days' treatment

**Composition** Bisolvon is N-cyclohexyl - N - methyl - (2-amino - 3, 5-dibromobenzyl) - amine hydrochloride

**Pharmacology** In animal experiments Bisolvon stimulates increased secretion of fluid by mucous glands of the respiratory tract and it also breaks down the feltwork of acid mucopolysaccharide fibres which are responsible for the viscosity of non-infected bronchitic sputum.<sup>2</sup>

**Clinical Effects** When given orally Bisolvon's effect becomes apparent to the patient within 2-3 days by an increased production of thin, easily expectorated sputum. As treatment progresses sputum volume decreases without an increase in viscosity, and with continued ease of expectoration.

**Indications** Acute and chronic bronchitis and other conditions where tenacious sputum is a problem.

**Contra-indications** There are no absolute contra-indications, but caution should be observed when

administering Bisolvon to patients with gastric ulceration.

**Precaution** When a patient under treatment for tuberculosis is receiving Bisolvon, sputum cultures for tubercle bacilli should be continued for at least three months before a negative result is assumed.

**Side-effects** Mild gastro-intestinal side-effects may occasionally occur. In a small number of patients a transient rise in serum transaminase levels may be seen, but these should fall again as treatment with Bisolvon continues.

**Dosage** Adults: 8 mg. three times daily. Children age 5 to 10: 4 mg. four times daily. Children under 5: 4 mg. twice daily.

**Availability** Tablets, 8 mg.; packs of 20 and 250. Elixir, 4 mg. in 5 ml. (with 17.5 mg. chloroform); packs of 200 ml. and 1-litre.

# For sustained benefit in hypertension

## Ismelin<sup>®</sup>

guanethidine sulphate BP

C I B A

## Holds blood pressure levels constant

## often just two tablets daily

### Prescribing notes

Initial dosage — two 10mg tablets daily. Frequent adjustment is unnecessary during stabilisation; intervals between consultations may be up to one month. Should 20mg daily prove insufficient, increase daily dosage by 10mg. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be adequately controlled and free from hypertensive symptoms on a daily dosage of 40mg or less.

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture or violent exertion, and if morning faintness on rising persists, to reduce the daily dosage by one 10mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add  $\frac{1}{2}$ gr. codeine phosphate t.d.s.

Failure of ejaculation has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any anti-hypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic pressor action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered concurrently.

10 and 25mg tablets of guanethidine sulphate BP in 100's and 500's. Basic NHS price 100 x 10mg : 27s 8d

## More pain-free days

In angina pectoris, Inderal protects the heart from the oxygen-wasting effects of emotion and effort.

The unique action of 'Inderal' represents a revolutionary new concept of long-term relief of angina, rather than just the treatment of the condition as and when it arises.

Through adrenergic beta-receptor blockade, 'Inderal' protects the heart from the action of adrenaline. There is a slowing of the heart-rate and

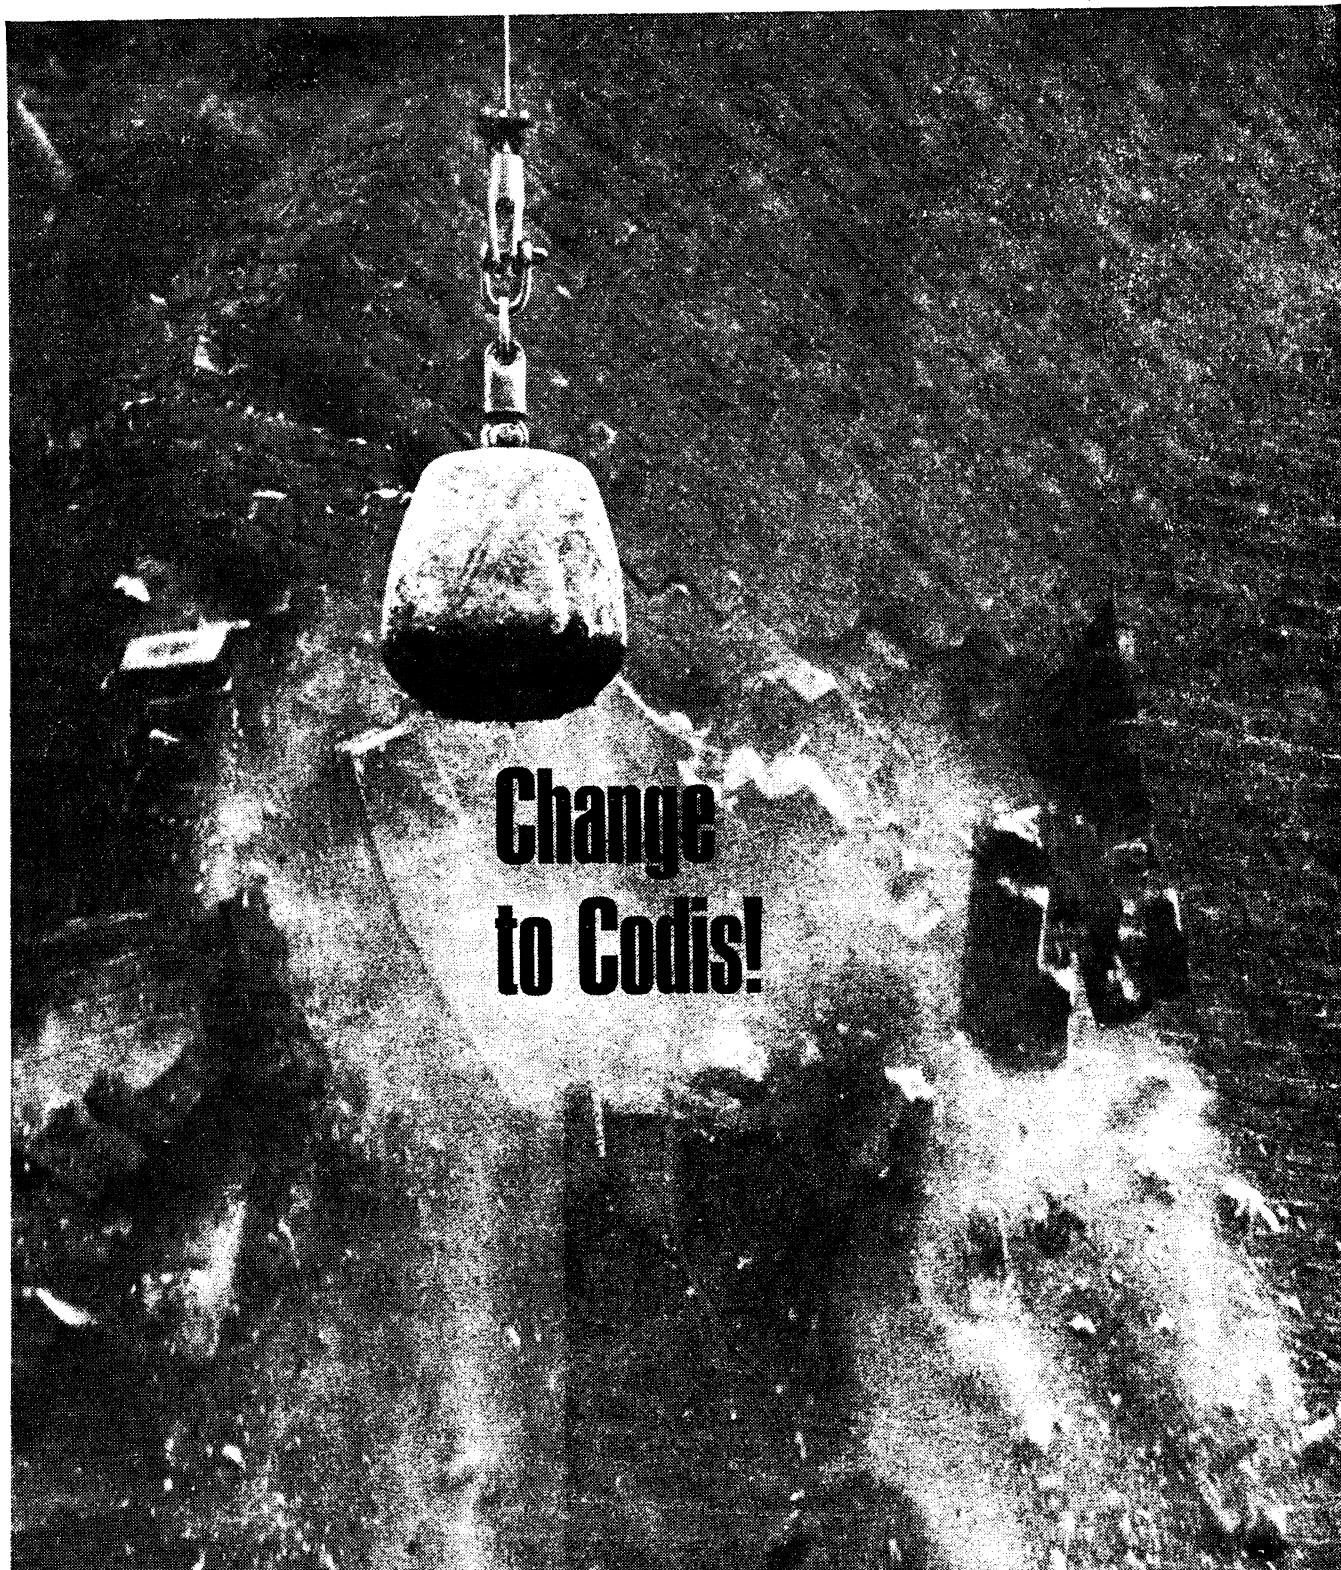

reduction in the oxygen needs of the myocardium.

**The results: more pain-free days; increased effort tolerance.** Inderal is the only treatment to have been proved consistently in double-blind clinical trials. Tests also show it to be effective in very severe cases of angina (unlike other forms of angina therapy).

We shall be glad to send you further information on request.

# BAD LEGS?

## Tired heavy aching legs

Before 'bad legs'  
become an ugly  
problem—  
**PAROVEN®**

All the early symptoms of venous insufficiency—tired, heavy, aching legs, skin disorders, and night cramps—respond to PAROVEN therapy. [1-3]

PAROVEN, containing trihydroxyethylrutoside, reduces the increased capillary permeability which "is at the bottom of the majority of the complications of varicose disorders". [4]

### Indications

Conditions associated with lower limb venous insufficiency.

Tired, heavy, aching legs. Night cramps. Skin disorders.

Superficial thrombophlebitis.

Varicose states.

### Dosage

1 tablet 3 or 4 times a day.

Maintenance dosage [as little as one tablet a day] may be adjusted to patients' needs.

### Packages

Tablets of 250 mg. hydroxyethylrutosides [not less than 45% troxerutin]. Tins of 20-100 tablets.

# What makes your antacid patients Prodexin patients?

**FAST RELIEF FROM  
DISCOMFORT—  
SUSTAINED ACTION**

PRODEXIN TABLETS WORK FAST to relieve the sharp and sudden pain of dyspepsia; relief begins within two minutes of placing the tablet on the tongue.

PRODEXIN TABLETS WORK STEADILY to relieve prolonged recurring pain in peptic ulceration or pregnancy heartburn. The antacid action of aluminium glycinate lasts for several hours and it has high buffering capacity, holding the pH of the gastric contents within the desirable 3 to 5 range.

The small, pleasant tasting Prodexin tablet can either be dissolved slowly in the mouth to simulate drip therapy or chewed for extra-rapid relief.

No significant side-effects have been encountered.

## Baby Bunter?

A lot of babies are well-covered rather than well-fed.

Between meal 'treats' spring immediately to mind. But you would probably agree, that there is often too much emphasis on starchy foods at mealtimes—particularly at breakfast and tea.

Yet the 77 varieties of Heinz Strained and Junior Foods make it easy for any mother to give her baby a balanced diet of meats,

vegetables, fruits, eggs, fish and cheese.

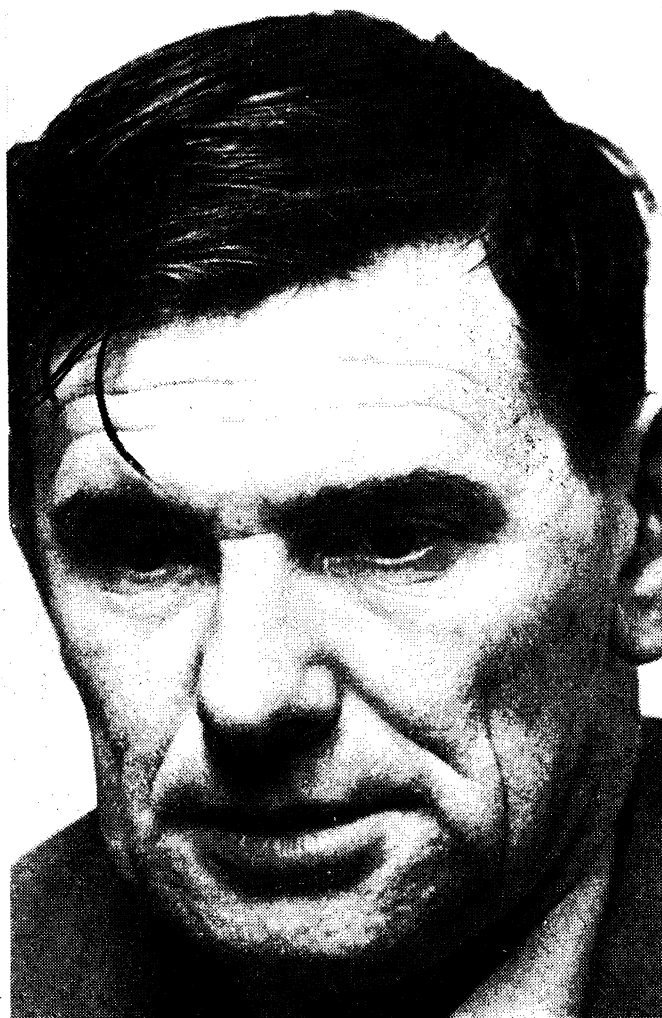

Last year special breakfast varieties were introduced. And, of course, any Heinz fruit variety is ideal for tea.

Heinz will gladly provide more information to help you to advise mothers. If you have any questions, write to the Baby Foods Information Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middx.

*Heinz Baby Foods are in both cans and jars, but cans cost less and offer more varieties.*

'Anxiety is frequently intermingled with depression ...'

*Clin. Trials J.*, 1965, 2, 317 (Nov)

When symptoms of anxiety and depression co-exist, the anxiety is usually easy to recognise, but the depressive state is often less obvious.

In anxiety-depressive conditions, 'Tryptizol', a well-established antidepressant with an intrinsic tranquillising action, has proved of considerable value. In many cases, the patient becomes calmer, mood is lifted, and sleep and appetite improve.

It is envisaged that the successful applicant will be employed 4/10 by the Hospital, 6/10 by the University.

Applicants should have an appropriate qualification in anaesthesia and special experience in paediatric anaesthesia. The successful applicant will be responsible for the organization and practice of paediatric anaesthesia within the hospital, and will be expected to carry out research and teaching within the department. Current research in the department is orientated to problems of the newborn, and opportunities exist of working closely with members of the department of obstetrics on foetal physiology. Two fully qualified paediatric surgeons occupy joint hospital-university appointments similar to that proposed for an anaesthetist.

**University salary ranges and benefits:** Salary and other benefits will be applied at 6/10 the rate for full-time staff. **Full-time salary scales:** Senior Lecturer \$A8,685-\$10,350, Lecturer \$A6,210-\$8,220, with superannuation on the F.S.S.U. basis and disability cover.

**Benefits:** Full travelling expenses for appointee and family; removal allowance; repatriation after three years' appointment if desired; initial subsidized housing; availability of loans for home purchase; study leave may be granted; limited right of private practice.

Further general information and details of application procedure are available from the Academic Registrar, Monash University, Wellington Road, Clayton, Victoria, 3168, Australia, or the Secretary-General, Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1. Inquiries about the department of paediatrics should be sent to Professor A. C. L. Clark, Monash University Department of Paediatrics, Queen Victoria Hospital, 172 Lonsdale Street, Melbourne.

Closing date: **January 31, 1969.**

The University reserves the right to make no appointment of to appoint by invitation. (13590)

**THE QUEEN VICTORIA MEMORIAL HOSPITAL**

172 Lonsdale Street, Melbourne,  
Victoria, Australia

Applications are invited from legally qualified medical practitioners holding appropriate postgraduate qualifications for appointment as

**PAEDIATRIC ANAESTHETIST (paid-sessional)**

The appointment will be on the basis of four sessions per week for 12 months, with the opportunity for annual renewal. Payment for each session will be within the Senior Specialist range of \$1,223 to \$1,323 (Aust.) per annum.

A position as part-time Lecturer/Senior Lecturer in the Monash University Department of Paediatrics, which is situated in the hospital, is currently being advertised—see above. These two positions together could constitute full-time appointment within the hospital grounds.

The hospital has accommodation for 433 public patients—obstetrics and gynaecology, general and special surgery, and medicine; and including 129 beds and cots in the paediatric department. A 148-bed unit for private and intermediate patients adjoins the public section. 6,400 babies were born in the hospital in 1967.

Application forms are obtainable from the undersigned, with whom applications close on January 31, 1969. The successful applicant will be expected to commence as soon as possible. (A separate application to Monash University is necessary for the University appointment.)

Nell Stephenson,  
Manager. (13591)

### OXFORD REGIONAL HOSPITAL BOARD

Applications are invited for vacant posts in the Medical Department of the Board's Headquarters.

### 1. Principal Assistant Senior Medical Officer

(Salary scale: £2,825-£3,590 p.a.)

### 2. Assistant Senior Medical Officer

(Salary scale: £2,770-£3,430 p.a.)

### 3. Administrative Medical Officer (Trainee)

(Salary scale: Age 33 or over: £2,335-£2,770 p.a.)

Age 29-32: £2,105-£2,265 p.a.

Applicants for the Principal Assistant Senior Medical Officer post should have had previous experience in medical administration with a Regional Hospital Board. The successful applicant will be expected to assist in project team work concerned with capital planning and to be responsible to the S.A.M.O. for a section of the work of the department, depending on the appointee's own interests and experience. Applicants for the other posts need not have had previous experience with a Regional Hospital Board. They should have had a broadly based training in clinical medicine, preferably in more than one branch of the health service, and should be prepared to undergo training in community medicine and medical administration. These posts are likely to attract a registrar or senior registrar with an interest in operational research, management techniques or the application of management services, including the use of computers, in the future organization of hospital and health services.

Detailed applications (stating post sought) and quoting three referees should reach the Secretary to the Board, Old Road, Headington, Oxford, by 11th January, 1969.

## GOVERNMENTAL

### DEPARTMENT OF HEALTH AND SOCIAL SECURITY MEDICAL OFFICER (PSYCHIATRY)

One post in London for a registered medical practitioner (man or woman) aged at least 28.

**DUTIES:** The medical staff is concerned with all medical aspects of the planning and organization of the National Health Service and the health services of local authorities, and with liaison with the relevant professional activities outside the department. It is organized in special sections which give full scope for the application and acquisition of specialized knowledge and experience, but the individual medical officer is not necessarily restricted to one field, and movement between sections is common. The successful candidate will be attached initially to the medical section concerned with the administration of hospital and local authority psychiatric services. Opportunities for special studies, including study leave or secondment, may be available.

**QUALIFICATIONS:** Good postgraduate clinical experience in psychiatry essential; experience in child psychiatry desirable.

**STARTING SALARY** (Inner London) from January 1, 1969: £2,611 at age 28-£3,903 at 40 or over (possibly higher if at least 41). Scale maximum £4,405. Non-contributory pension. Promotion prospects.

**WRITE** to Civil Service Commission, Savile Row, London W1X 2AA, or telephone 01-734 6010, ext. 229 (after 4.30 p.m. 01-734 6464 "Ansafone" Service), for application form, quoting 7042/68/2. Closing date December 19, 1968.

# PRINCIPAL MEDICAL OFFICER (Mental Health)

The Principal Medical Officer will join the medical section which advises on all medical matters relating to mental health, including the reorganization of the mental health services. He or she will also advise on the management of the three special hospitals, and will be concerned with the selection of patients for admission, transfer and discharge. Some travelling away from London base will be involved.

Candidates (men or women) must be registered medical practitioners. Possession of a higher qualification in psychiatry or in medicine will be an advantage. Experience in clinical psychiatry, and in the organization of mental health services in the community or in the administration of a hospital for the mentally ill or subnormal or of a psychiatric unit, is essential. Candidates should normally have held a senior hospital or local health authority post.

Salary: £5,205. Non-contributory pension.

Fuller details of this appointment may be obtained by writing to the Civil Service Commission, 23 Savile Row, London, W1X 2AA, or by telephoning 01-734 6010, Ext. 229 (01-734 6464 "Ansafone" service after 4.30 p.m.). At all times please quote 7045/AM1. Closing date 20th December 1968.

NEW SOUTH WALES INSTITUTE OF PSYCHIATRY

## Research Fellow in Psychiatry

A Research Fellowship of the New South Wales Institute of Psychiatry is offered to the successful applicant for the position of Research Psychiatrist to the "Human Ecology of the Arid Zone" project. The duration of the Fellowship is for one year with a possible renewal for a further year. The project affords an opportunity to undertake the first psychiatric epidemiological study of the sparsely populated regions of Australia and to determine the modifications of psychiatric services needed for such regions.

### Salary

The successful applicant will be entitled to a grant at the rate of \$A8,359 per annum.

### Qualifications

The applicant should be a registered medical practitioner and possess a qualification in Psychiatry.

### Duties

This is a challenging opportunity to carry out psychiatric research, to work towards a higher degree and to obtain unique experience in a field of vital importance for the development of health services in Australia.

The Research Psychiatrist will work in collaboration with a Social Psychologist already appointed, with the General Practitioners of the area and with the Directors of the project, Professor L. G. Kiloh, Professor of Psychiatry, University of New South Wales, Professor D. C. Maddison, Professor of Psychiatry, University of Sydney, Professor J. E. Cawte, Associate Professor of Psychiatry, University of New South Wales, and Dr. W. A. Barclay, Director of State Psychiatric Services, New South Wales, each of whom will visit the project to direct specific aspects.

The town of Cobar and its surrounding area in the west of New South Wales has been chosen as the region to be studied. This includes pastoral properties, a mining industry and an aboriginal population. Funds are available for transport by car and for approved visits to Sydney for consultation. A house is available on a rental basis.

Subject to certain conditions, the successful applicant will be eligible for:

- \* Payment of fares to Sydney
- \* Financial assistance towards removal and establishment expenses.

# why

# so many hypertensive patients do well on **Aldomet**®

Methyldopa BP

- 'Aldomet' offers smooth and even control of blood pressure when the dosage has been established.
- 'Aldomet' usually reduces lying as well as standing blood pressure.
- 'Aldomet' causes much less postural hypotension than other powerful antihypertensive agents.
- 'Aldomet' rarely causes exertional hypotension.
- The dosage of 'Aldomet' is simple, flexible and easily established.

Supplied as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and, for emergency use, as an injection. Detailed information is available to physicians on request.

In a trial comparing three antihypertensive agents, it was shown that, '... in the patients who could take adequate doses methyldopa provided the best control of blood pressure, with the lowest levels of blood pressure when the patient was supine.'

# BACTRIM<sup>†</sup> ROCHE

*a major discovery  
in the control of infection*

**Bactrim Roche:** is highly effective  
 in acute exacerbations  
of chronic bronchitis.  
It has an ultra-wide  
spectrum of activity  
and its dual action gives it great  
bactericidal potency, especially  
against *Haemophilus influenzae*  
the most important pathogen in  
chronic bronchitis.

Bactrim Roche produces its highly potent bactericidal activity from the potentiating action of its two components – sulphamethoxazole and trimethoprim. A leading article in the *British Medical Journal* on 18 May 1968 drew attention to the important therapeutic potential of this bactericidal synergy.

In a trial<sup>1</sup> Bactrim Roche\* rapidly cleared purulent sputum and produced marked clinical improvement in every one of a group of 50 chronic bronchitics, where treatment with one or more antibiotics had already failed.

1. Proc. V int. Congr. Chemother., 1967 I, 293. \*The formulation used in this trial was slightly different from that which was subsequently found to produce the best results and which has now been adopted.

<sup>†</sup> Bactrim is the trade mark for preparations containing sulphamethoxazole and trimethoprim.
