BACTRIM[†] ROCHE

Bactrim Roche brings a new potency to the treatment of infections. Its unique dual, bactericidal action destroys bacteria by blocking two successive stages in bacterial metabolism.

Bactrim Roche produces its highly potent bactericidal activity from the potentiating action of its two components — trimethoprim and sulphamethoxazole. A leading article in the British Medical Journal on 18 May 1968 drew attention to the important therapeutic potential of this bactericidal synergy.

Bactrim Roche also improves the picture on side-effects. Gastrointestinal reactions are few. Superinfection, fungal overgrowth and tooth staining have not been reported.

Bactrim Roche: Brings to chronic bronchitis and other infections a new potency, a new simplicity, a new success.

BACTRIM[†] ROCHE

Throughout a wide range of infective conditions, the unique bactericidal action of Bactrim Roche gives it a new and important role. In addition to *H. influenzae*, for example, Bactrim Roche is particularly effective against *Proteus* species, problem pathogens in urinary tract infections.

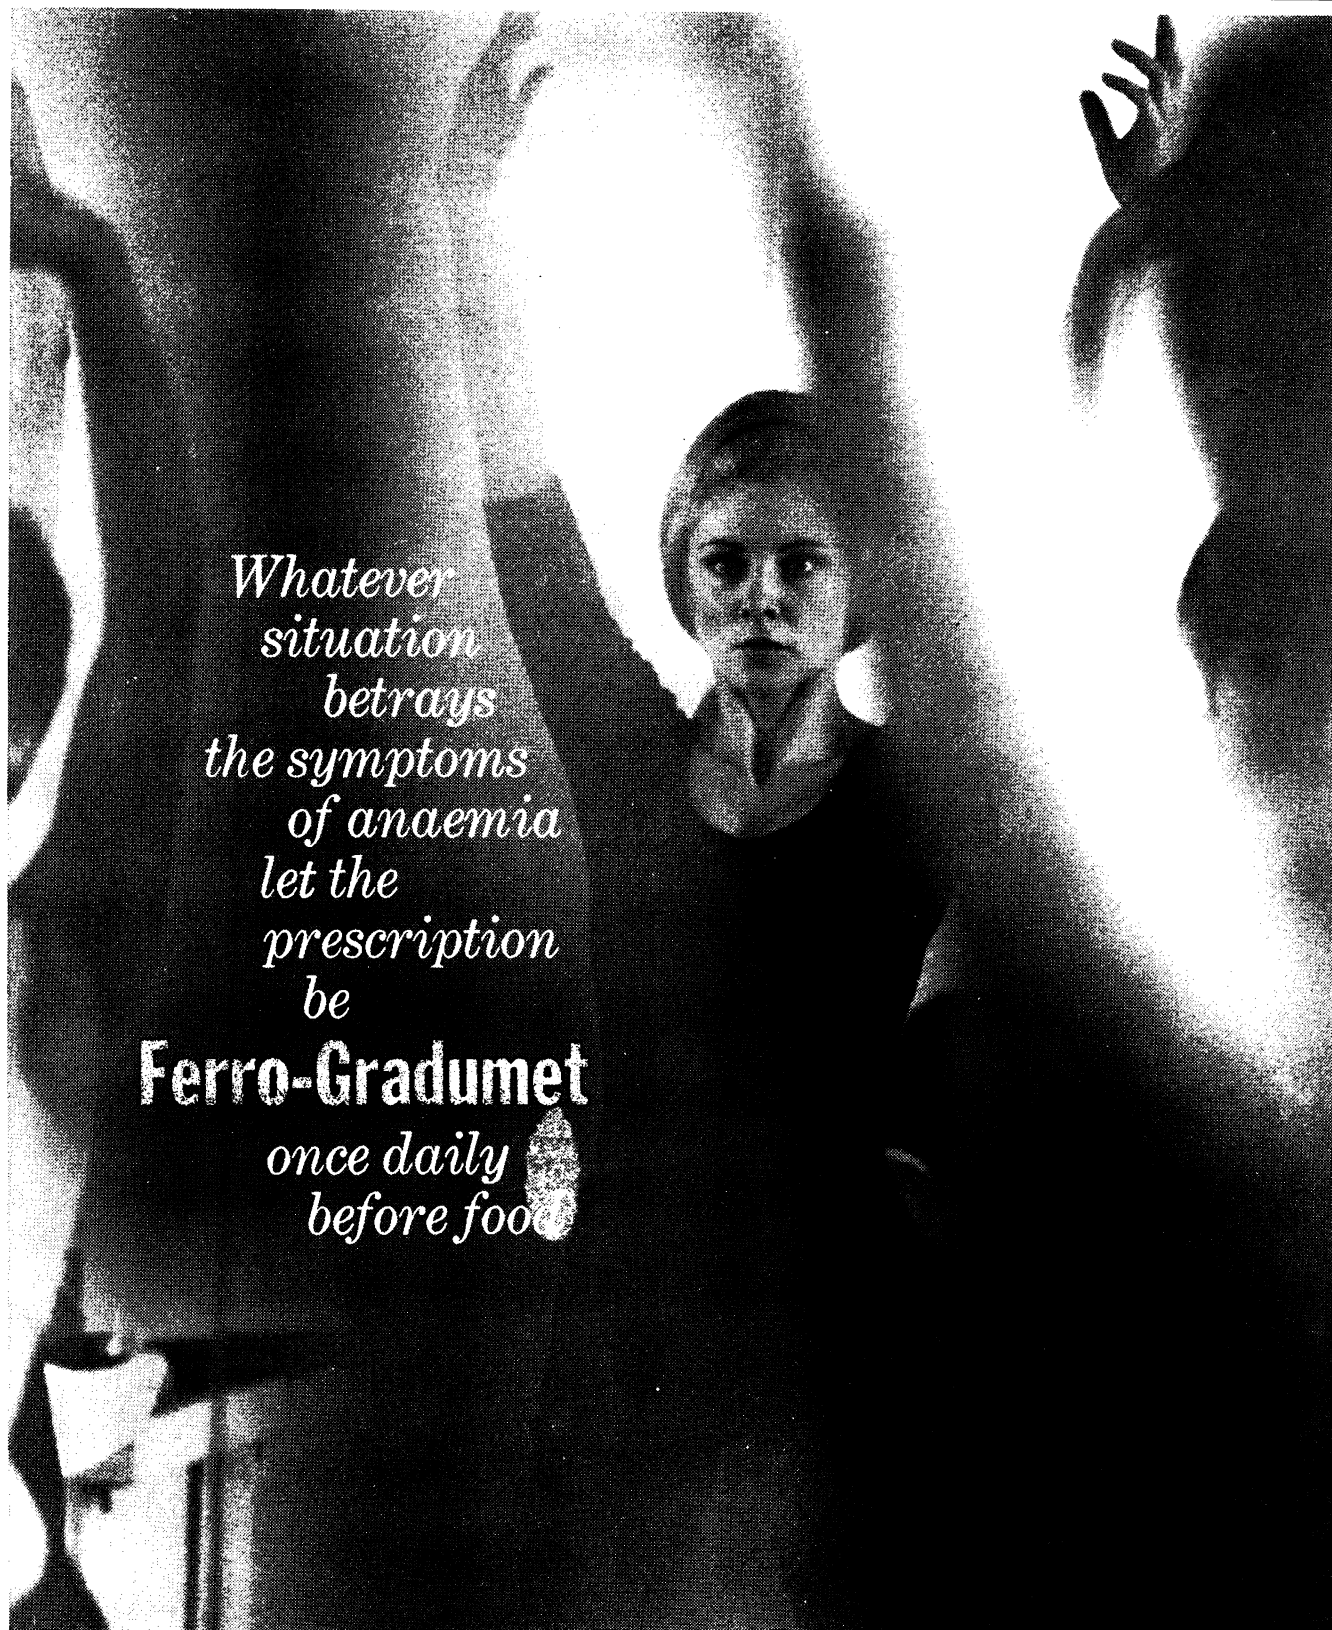

The unique dual action of Bactrim Roche gives it an ultra-wide antibacterial spectrum and the emergence of resistant strains of bacteria is likely to be delayed.

In infections responsive to Bactrim Roche, its unique mode of action, wide range of activity, reduced side-effects and simple dosage offer a new potency, a new simplicity and a new success in treatment.

Bactrim Roche: Effective in many other conditions, just as it is in chronic bronchitis, because of its unique bactericidal action against many organisms.

Pharmitalia, new to Great Britain, introduces itself

Doctors rightly insist on knowing something of the activities and outlook of the manufacturers whose products they may decide to put at the service of their patients. As Pharmitalia is a comparative newcomer to Great Britain it may be helpful to offer the following information about itself.

The Company registered in Italy as Società Farmaceutici Italia Anonima per Azioni (Gruppo Montecatini Edison) is generally referred to in Italy as 'Farmitalia'. Its several associated companies in other countries also bear this description 'Farmitalia', usually as part of their registered name. In the United Kingdom, the Farmitalia associate is registered as 'Pharmitalia (U.K.) Ltd', the spelling having been modified to conform to English usage.

Farmitalia of Italy is part of the Montecatini Edison Group, one of the world's largest chemical manufacturers. Among the interests of the Group are dyestuffs, the mining and extraction of ores and the manufacture of a wide range of chemicals. An outstanding characteristic of Farmitalia is its active

pursuit of fundamental research and its application in pharmacology and related subjects. This research is carried out in its own institutes and laboratories, and in association with independent workers in universities and elsewhere.

Pharmitalia intends to make available to British physicians all those products of Farmitalia research which show evidence of being useful in medicine as practised in this country. Pharmitalia is aware of its responsibilities in this direction: to maintain innovation and quality, an efficient distribution, and to provide that service of technical information without which it is imprudent to prescribe potent pharmaceutical substances. In providing this service several forms of communication will be brought into use, if and when we consider them legitimate, and acceptable to physicians. But we have no intention of using methods which, effective in much of normal commerce, are inappropriate between a science based industrial organisation and the profession it serves.

The simplest,
safest and most
effective treatment
for intestinal
amoebiasis...

FURAMIDE

Furamide relieves the symptoms of amoebic-dysentery and other forms of intestinal amoebiasis within a few days, effecting a complete cure in ten days.

Furamide is particularly useful in the treatment of cyst-passers and is without doubt the drug of choice for mass treatment because of the absence of side-effects.

Furamide offers several distinct advantages over other forms of treatment:

- A cure rate of 80% or more in the acute condition and 90% to 100% in the chronic condition may be expected.
- The specific amoebicidal effect does not upset normal bacterial flora of the gut.
- Bed-rest is unnecessary unless the clinical condition of the patient warrants it.
- Hospitalisation is not normally necessary.
- No special dietary restrictions or enemas are necessary.
- The only side-effects which may occur are occasionally flatulence, which may normally be disregarded, and less frequently an urticarial rash may be observed.

How do General Practitioners spend their time?

Do Appointment Systems Work—and How do Patients use them?

What Type of Work Can a General Practice Nurse do?

THE NEW GENERAL PRACTICE,

published on 24 June, answers these and many other questions. The book contains 22 articles published in the *B.M.J.* in the last two years, many of them describing pioneering work in the field of general practice. In his Introduction to the book Lord Platt says "Those who have already reorganized and reformed their practices will read this book with interest as they will be able to compare their own ideas with those of others, sometimes learning, sometimes having the satisfaction of knowing better."

why so many hypertensive patients do well on Aldomet.

Methyldopa BP

- 'Aldomet' offers smooth and even control of blood pressure when the dosage has been established.
- 'Aldomet' usually reduces lying as well as standing blood pressure.
- 'Aldomet' causes much less postural hypotension than other powerful antihypertensive agents.
- 'Aldomet' rarely causes exertional hypotension.
- The dosage of 'Aldomet' is simple, flexible and easily established.

Supplied as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and, for emergency use, as an injection. Detailed information is available to physicians on request.

In a trial comparing three antihypertensive agents, it was shown that, '... in the patients who could take adequate doses methyldopa provided the best control of blood pressure, with the lowest levels of blood pressure when the patient was supine.'

PAVACOL

for the symptomatic relief of
productive and
non-productive cough

PAVACOL - with its combined suppressant, expectorant and relaxant properties - provides rapid relief of cough due to upper respiratory infection, bronchitis or influenza, often aggravated by fog and air pollution.

A main ingredient of Pavacol is papaverine hydrochloride, a very effective myotropic spasmolytic which relaxes the bronchi and facilitates expectoration. Other ingredients are pholcodine which exerts an inhibitory action on the cough centre and volatile oils which reduce sputum viscosity.

Pavacol is non-narcotic and safe for children.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

In the gouty patient, 'Zyloric' controls uric acid formation. 'Zyloric' limits the formation of uric acid from its metabolic precursors, and they are excreted in much more soluble forms. Consequently the amount of uric acid passing through the kidney is not increased as with the uricosuric agents. Thus 'Zyloric' lowers serum uric acid, and at the same time prevents kidney damage—a major cause of death in 25 per cent of patients with chronic gout.

'ZYLORIC' puts gout into reverse

brand

Allopurinol

By markedly reducing the production of serum uric acid 'Zyloric' permits the gradual resorption of urates from tissues. Slowly and steadily the deposition of urates is reversed, joints become more mobile and tophi regress.

COMMERCIAL APPOINTMENTS—see also p. xvii**MEDICAL DIRECTOR**

Two years ago we advised a very large ethical company on the appointment of the Medical Director to its British subsidiary. Due to continued expansion which has been substantially based on the results of research, he is now about to assume wider international responsibilities. This leaves open a position as principal adviser, not only to the British company but also to a number of associated companies in Europe. The next years should be particularly interesting because there are important new products currently under trial. The Medical Director covers the full range of advisory activities with particular emphasis on clinical trials, and it is unlikely that anyone without industry experience will be considered. However, a younger man with only a short industry experience but with personality, ambition, and a good general career, could well be the man for whom our clients are looking. Accordingly salary is negotiable although unlikely to exceed £4,500. A car, pension arrangements, and help with moving expenses, will all be provided. The appointment is based in a pleasant part of the Home Counties.

COMMERCIAL APPOINTMENTS—see also p. xvi**A Fruitful and Important
Medical Career**

Have you as a doctor seriously considered what an interesting and worthwhile career can be had in the scientifically and medically stimulating atmosphere of a medical team in the pharmaceutical industry?

This is an opportunity to join such a team working with pharmacologically active and medically interesting new compounds in different fields of medicine.

By being positively involved in the pre-clinical aspects and personally co-ordinating the early and subsequent clinical studies the doctor gets the opportunity of intellectual satisfaction and is deeply involved in the new and exciting subject of clinical therapeutics.

Our research compounds are developed by the extensive research laboratories of the parent company and all have potential use in human therapy.

A doctor in the medical team can expect an attractive salary, together with a very generous non-contributory pension scheme and life assurance. A car is provided.

If you would like to make a career in the pharmaceutical industry, please write in confidence to:

Julian H. Shelley, Medical Director,
Boehringer Ingelheim Limited, Isleworth House,
Great West Road, Isleworth, Middlesex.

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration.
(No deductions for lodging will be made for compulsory residence.)

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years.
(Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Further details may be obtained from the Hospital Secretary, or B.M.A. members may obtain summaries of the Memoranda or explanatory handouts from the Secretary, British Medical Association. (August, 1967)

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Medical Director : James Harper, M.D., F.R.C.P.(Edin.), D.P.M.

St. Andrew's Hospital is a private psy-
chiatric hospital situated in 150 acres of
parkland in the county town of Northamp-
ton. In general, patients are admitted to
Wantage House, a reception unit in the
grounds, which is equipped for the investi-
gation and treatment of all forms of mental
and nervous illness. In addition, there is
accommodation mainly in private rooms,
both in the main hospital and in various
villas, for longer stay patients and geriatric
patients.

The hospital's amenities include Gloucester
House, which comprises an occupational
therapy department, swimming-pool, a
squash court and library, while in the
grounds there are tennis courts, a nine hole
golf course, etc.

Fees range from 25 guineas per week,
and charges for treatment at St. Andrew's
Hospital are allowable for benefit to British
United Provident Association and Private
Patients Plan subscribers.

Further particulars can be obtained from
the Medical Director, St. Andrew's Hospital,
Northampton (Tel. : Northampton 34354),
who can be seen in consultation by appoint-
ment, either at the hospital or at 55 Harley
Street, London W.1.

SAFE SIMPLE EFFECTIVE NULACIN

EFFECTIVE, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

SIMPLE, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

SAFE, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrins, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
