Betnovate-N and C Creams

classic answers to moist infected dermatoses

A simple case for low-cost Betnovate-C Cream

Left : eczema of thumb with recent secondary infection

Right : after a week's treatment with Betnovate-C Cream under gauze dressing

Presentation

Betnovate-N Cream (0.1% betamethasone as 17-valerate plus 0.5% neomycin sulphate) in 15, 30 and 100 gram tubes

Betnovate-C Cream (0.1% betamethasone as 17-valerate plus 3% clioquinol) in 15, 30 and 100 gram tubes

Also available Betnovate-A Ointment (0.1% betamethasone as 17-valerate plus 3% aureomycin BP)

Indications

All steroid-responsive dermatoses including psoriasis.

Betnovate-N or -A preparations should be used if bacterial infection is present or suspected. As an alternative or when there is fungal infection, Betnovate-C preparations may be used.

Application

Apply a small quantity once or twice daily

Adverse reactions

Betnovate preparations are usually tolerated well but if signs of hypersensitivity appear, application should be stopped immediately. When used with occlusive dressings on extensive areas, or for prolonged periods, as with all topical steroids, there is a possibility of systemic absorption.

Absorption is more likely in infants and children, and may occur even in the absence of occlusion.

When using Betnovate-C or -A preparations, cover lesions with a dressing to protect clothing.

effective once a day

A week ago her problem was her skin

She didn't know when it started. All she knew was the more she scratched the worse it got – and then it started to spread. She complained of the irritation and was too embarrassed to meet her friends. It was only then that she realised that something must be done; and done quickly. Her doctor told her it was eczema and prescribed Propaderm cream.

Propaderm relieves skin problems

Propaderm can be used for all conditions responsive to topical steroid therapy. Propaderm is beclomethasone dipropionate – a powerful topical steroid. So powerful that in a recent trial 94% of 252 patients with eczema or psoriasis showed good results when treated with Propaderm (cream, ointment and ointment with 3% aureomycin BP). Propaderm is fast acting. In the same trial the majority of patients who responded to Propaderm did so in the first week of treatment.

"All three preparations of the drug which were tested were found to be superior to previous treatments. No side effects were reported."

DISEASES OF THE CHEST

(Third Edition)

By: H. Corwin HINSHAW, M.D., Ph.D.

799 pages. 691 illustrations. £10 12s. 6d.

Published September 1969.

The relentless march of medical progress constitutes the reason for the revision of this major text. While only a few brand new topics are covered there are new approaches to the diagnosis and therapy of many different disease entities.

Dr. Hinshaw is a practising chest physician who is able to draw on nearly 40 years of clinical experience in compiling this new edition.

ATLAS OF NUCLEAR MEDICINE

Volume 1: Brain

By: Frank H. DELAND, M.D.; and Henry N. WAGNER, Jr. M.D.

217 pages. 383 illustrations. £7 13s. 0d.

Published August 1969

The first volume in this planned series of 3 atlases graphically portrays the images obtained from a radiopharmaceutical. Using actual case histories, the authors first present the diagnostic impression prior to the scan; they then describe the scan and follow with its interpretation.

TEXTBOOK OF PEDIATRICS

(Ninth Edition)

By: Waldo E. NELSON, M.D.; R. James McKAY, M.D.; and Victor C. VAUGHAN III.

1,590 pages. 527 illustrations. £9 3s. 0d.

Published September 1969.

The continuing popularity and wide acceptance of this classic text is directly attributable to the extensive, accurate coverage afforded every topic. In this ninth edition, two eminently qualified new co-editors and a host of new contributing authors join Dr. Nelson in revising and updating this established pediatric guidebook.

It happens every autumn...

Royal Highland Gathering, Braemar September 6th. The great annual sporting event in which Scotsmen compete at traditional games and contests.

St. Leger, Doncaster September 10th. One of the five racing 'classics' and a highlight of the Autumn flat-racing calendar.

National Chrysanthemum Show, RHS Halls September 16th and 17th. The yearly Mecca of chrysanthemum enthusiasts: a lively and colourful display.

Autumn Antiques Fair, Town Hall, Chelsea September 17th-27th. A rare opportunity to admire the latest fashions on King's Road *and* some rather older fashions in furniture and bric-à-brac.

Coughs and respiratory congestion. A less welcome feature every Autumn, happens everywhere, throughout the season.

To many of your patients an attack of respiratory congestion and cough is one of Autumn's 'annual events'.

Benylin* Expectorant helps to relieve this respiratory discomfort while being pleasant to take and acceptable to children as well as adults. With a basic NHS cost of 2/6d. for 200 ml. small wonder that Benylin Expectorant is the most widely prescribed ethical linctus.

Protect the new patient from her own forgetfulness.

Lyndiol 2·5 provides contraception from the very first tablet without any reliance upon other contraceptive methods. It has by far the lowest failure rate (0·003 per Hundred Women Years)¹, due in part to the prolonged activity of lynestrenol²: if a patient forgets a tablet she takes it the following day and is still protected. The easily-remembered same-day dosage regimen fortifies the medical advantages of Lyndiol 2·5 and further protects the patient from her own forgetfulness. An extremely low incidence of side-effects³ reinforces the logic of protecting the new patient with Lyndiol 2·5.

Wherever gout strikes— **Zyloric®** protects

With ZYLORIC, serum uric acid levels are reduced and kept within normal limits, urate deposition in the joints regress and acute attacks of gout become less frequent or disappear.

ZYLORIC acts by limiting the formation of uric acid from its metabolic precursors. Uricosuric agents, in contrast, do not limit the production of uric acid, they increase the flow of urates through the kidney.

With ZYLORIC less uric acid passes through the kidney which is protected from the effects of urate deposition and urate nephropathy (kidney damage is a cause of death in 25 per cent of patients with chronic gout).†

MUSCULAR RHEUMATISM, FIBROSITIS, LUMBAGO OR LOW BACK PAIN

For each of them the problem is pain

For all of them the answer is Paynocil^{regd.}

Lumbago or low back pain, fibrositis, muscular rheumatism—however you describe these rheumatic disorders, they mean the same thing to the patient. Pain. And the text-book therapy is the same, too—aspirin.

Then why prescribe Paynocil?

First, because Paynocil *is* aspirin. So it stops pain and relieves inflammation. **Second, because Paynocil is aspirin with all these additional benefits:**

Well tolerated: Paynocil also contains 300 mg. of glycine, which helps to distribute the aspirin rapidly into the stomach in the finest particles, thus minimising the risk of gastric irritation. Patients with rheumatic disorders who experience nausea, heartburn or epigastric pain after plain aspirin have found Paynocil acceptable.

Quick acting: Paynocil, at 600 mg. aspirin per tablet, has twice the strength of aspirin tablets B.P., and in equivalent dosage, is twice as rapidly absorbed. A property which could be of particular value—in combating the rheumatic's morning stiffness for example.

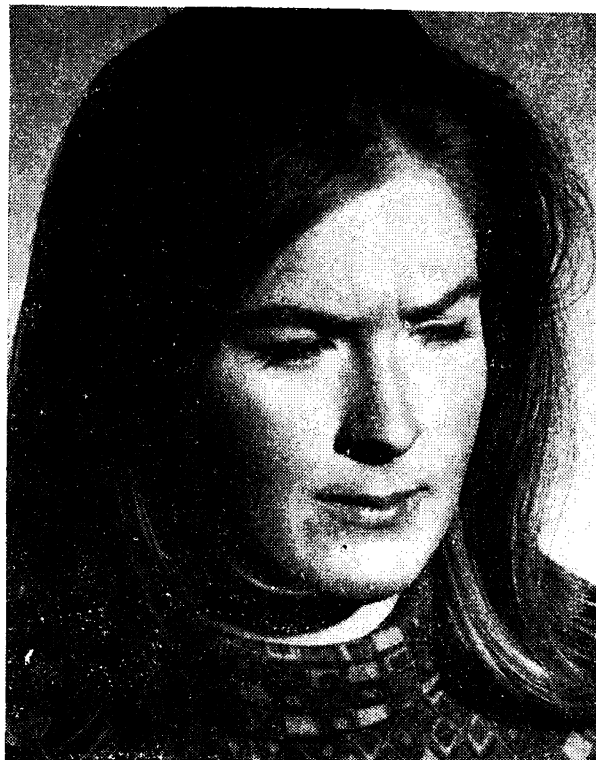

Convenient: Paynocil can be taken without water, for glycine masks the unpleasant taste of aspirin and allows the tablet to disperse instantly on the tongue in a burst of lemon flavour. The tablets come in protective foil strips which slip easily into handbag or pocket. All of which makes Paynocil a most practical form of aspirin for active people.

Junior Paynocil is available, for children, at 150 mg. aspirin per tablet.

'Saluric' can help in the premenstrual syndrome

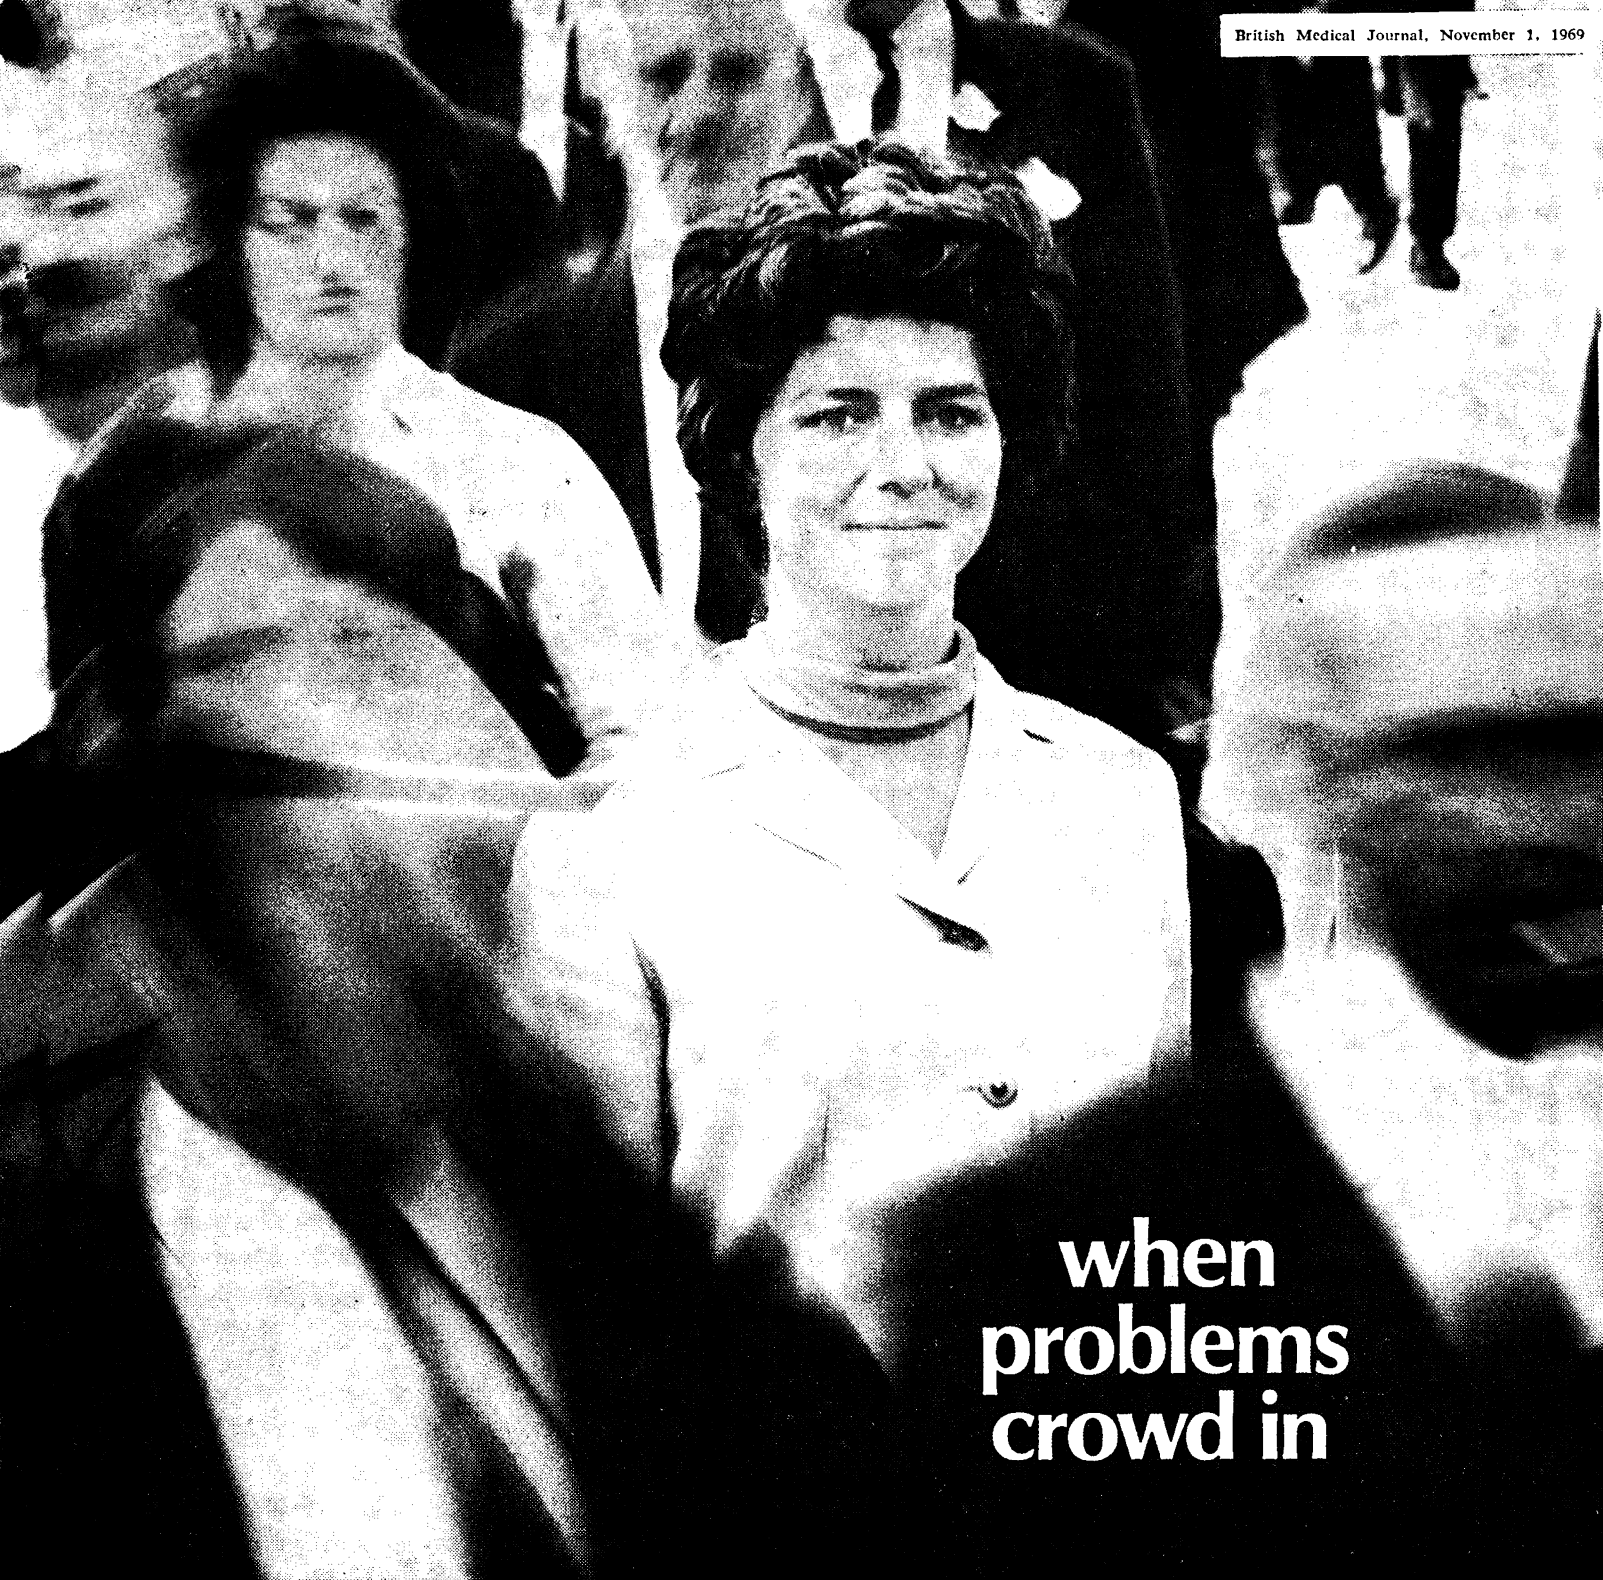

Far too many women have to suffer the tiresome symptoms of premenstrual tension with oedema. Every month this may last for 7 to 10 days before the menses. Because many of the distressing symptoms may be directly related to fluid retention, effective diuresis usually brings prompt relief. 'Saluric' has been proved by 10 years' clinical use to be a dependable diuretic.

- 'Saluric' can relieve breast tenderness, and leg and abdominal swelling
- 'Saluric' may well help to alleviate the concomitant irritability and nervousness
- 'Saluric' is an established treatment for many other types of oedema

Supplied as tablets containing 500 mg chlorothiazide. Detailed information is available to physicians on request. 'Saluric' is a registered trademark.

SYMPOSIUM REPORT ON SEPTRIN*

Since the introduction of SEPTRIN this major advance in antibacterial therapy has had wide clinical success. Experience gained with SEPTRIN in many areas of medicine was discussed at a Symposium held at the Royal College of Physicians, London, in May, 1969†. Here are brief summaries of three comparative trials reported: fuller details are available on request.

†*Postgrad. med. J.* (1969) in press.

in bronchitis (compared with ampicillin)

SEPTRIN produced objectively determined improvement in patients suffering exacerbations of chronic bronchitis. SEPTRIN was shown to be more effective than ampicillin in its effect in reducing sputum volume and purulence.

in bronchitis (compared with tetracycline)

SEPTRIN was compared with tetracycline in another trial and was shown to provide a more beneficial effect on exacerbations of chronic bronchitis. Again significantly greater reductions in sputum volume and reduction in purulence were observed.

in U.T.I. (compared with ampicillin & sulphadimidine)

SEPTRIN was found superior to ampicillin and sulphadimidine in treating hospitalised patients with U.T.I. Cure rates achieved were 85% with SEPTRIN, 70% with ampicillin and 40% with sulphadimidine. (Cure criterion=eradication of original organism from the urine 1 week after the end of treatment.)

SEPTRIN an advance on the antibiotics

SEPTRIN Tablets, Paediatric Suspension and Paediatric Tablets contain trimethoprim and sulphamethoxazole.

When the anti-convulsant regimen fails

-add Benuride for better control

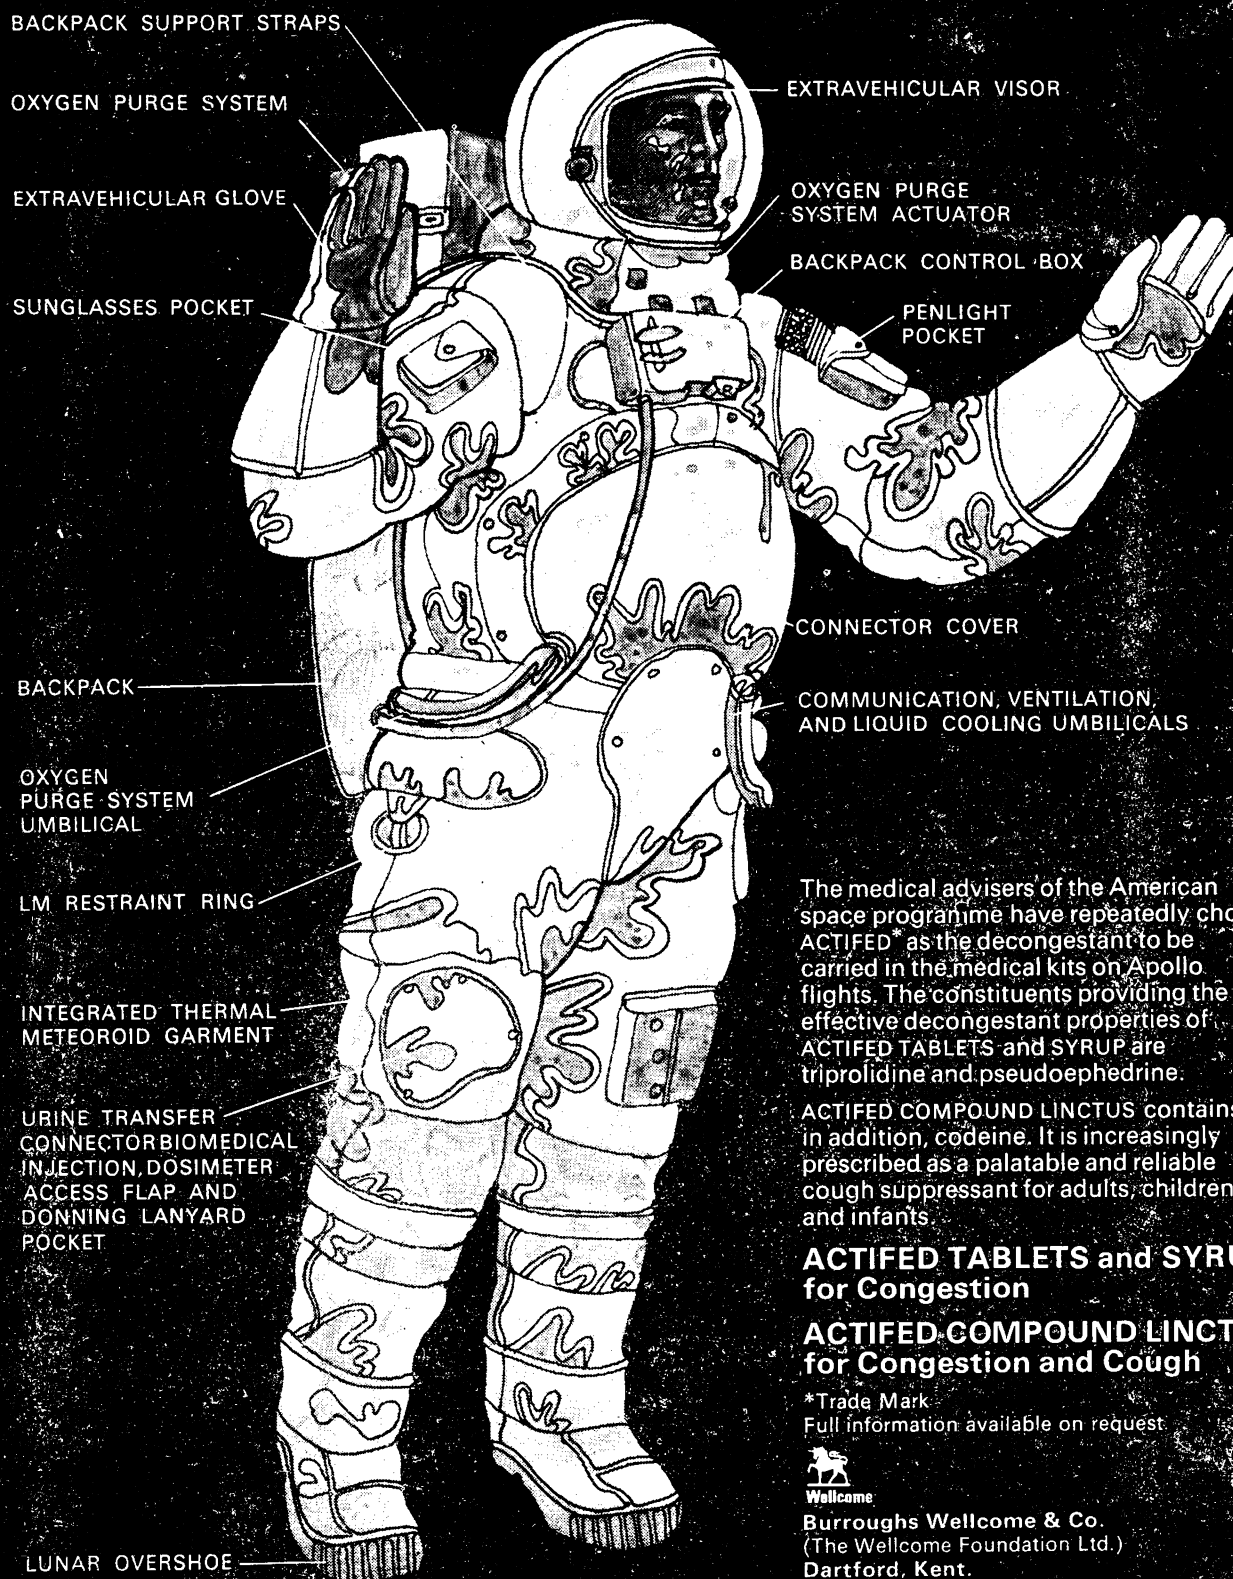

For firm control of grand mal or temporal lobe epilepsy few anti-convulsant drugs are as effective as Benuride (pheneturide). Yet treatment with Benuride is remarkably trouble-free. Twelve years of clinical experience, as reported in over 30 published papers, has confirmed its wide margin of safety and comparative freedom from toxic effects. A change to Benuride means better control—and a brighter, more alert life for your epileptic patient.

Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else's. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That's why it's so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. So write today. Together we'll find the policy which will work hardest for you.

Do it now.

DOCTOR, WILL PROBABLY SUFFER FROM URINARY FREQUENCY...

It is a statistical fact that urinary frequency, the bane of old age, awaits the majority of us.

"Nocturnal frequency of micturition is present in 64% of the total elderly population (70% of males and 61% of females of 65 years and over)."¹

The results of a recent double-blind crossover trial of Cetiprin suggest that "the drug may alter the established habit of rising at night to pass urine".² Cetiprin blocks the innervation and increases bladder capacity but as frequency of urination may have become established as a *habit* as well as a physiological weakness, it is wise to persist with treatment for at least 14 to 21 days. Improvement in the patient's condition is manifested by the enjoyment of uninterrupted sleep and a new feeling of physical and mental well-being.

Dosage:

Adults and Geriatric patients:

1. Nightly tenesmus: 100 mg at bedtime. In chronic cases it may be necessary to use 200 mg and reduce the dose when control is established.
2. Urinary frequency and severe incontinence in old people: 100-200 mg three times daily.

Contraindications:

Large residual urine retention; glaucoma; gastric retention. Rarely, dryness of the mouth is an unwanted effect.

UNIVERSITY OF BRISTOL
COURSE FOR OFFICERS IN
ACCIDENT AND EMERGENCY
DEPARTMENTS

A course in the initial management of Accidents and Emergencies will be held at Frenchay Hospital, Bristol, from Monday, January 26, 1970, until Friday, January 30, 1970, inclusive.

It will cover all aspects of an Accident Officer's work and will consist of Lectures, Demonstrations, Discussion Groups and Films, and will be aimed primarily at Accident Officers in the S.H.O. grade.

The fee for the course will be fifteen guineas, inclusive of lunch and dinner. The course fee may be reimbursed by the applicant's Regional Board or employing authority.

Intending applicants, who need not necessarily be Accident Officers (i.e., General Practitioners) will be welcome on the course, which will be recognized under Section 63), should first obtain the permission of their employing authority. Numbers will be limited and early application is advised.

Application forms and further information may be obtained from the Secretary, Department of Postgraduate Education, Frenchay Hospital, Bristol BS16 1LE. (12381)

UNIVERSITY OF EXETER
Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on January 14, 1970. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act, 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom). Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire.

UNIVERSITY OF LONDON

A lecture entitled "The Nature of the Long-acting Thyroid Stimulator" will be delivered by Professor D. S. BLACKHEATH/ELTHAM, S.E.3

Applications are invited from practitioners for appointment to a new medical practice at the Kidbrooke Estate, Greater London Council development, which is situated between the good residential districts of Blackheath and Eltham.

Residential and surgery premises will be provided in the shopping precinct by the Greater London Council, but in order that the practitioner may move in at the same time as the first residents, temporary residential and practice accommodation will be provided in March 1970, when the first residents are expected to take up occupation.

The rate of occupation from March 1970 is anticipated to be 160 persons to 180 persons per month until December 1971, the rate increasing after this date.

It is anticipated that approximately 7,000 persons will eventually reside within the development area.

The appointment will carry an Initial Practice Allowance if the practitioner selected is eligible therefor. Application forms E.C.16A, obtainable from the Clerk, Inner London Executive Council, Insurance House, Insurance Street, W.C.1. Completed applications to be received by the Council, not later than 12 noon Monday, November 10, 1969. (H.5764)

RE-ADVERTISEMENT
DURHAM COUNTY EXECUTIVE
COUNCIL
(NATIONAL HEALTH SERVICE)**PRACTICE VACANCY—JARROW, CO. DURHAM**

Applications are invited for a single-handed practice vacancy in Jarrow, Co. Durham. The practice is situated in an open area. The total number of patients involved is 1,950 but it is understood that a husband and wife partnership in the area wish to reduce their joint list sizes quite considerably during the next few months.

It is also understood that surgery accommodation will be available for purchase by the successful applicant. It should be realized by intending applicants that Jarrow, 1969, owing to extensive re-development, has a very different environment from that pertaining to the Jarrow of the 1930s. Further details and application form E.C.16A may be obtained from the undersigned. Closing date for applications will be November 17, 1969, and the successful doctor will be expected to take up the practice as soon as possible. Applications should be addressed to the Clerk, Durham County Executive Council, Green Lane, Old Elvet, Durham City. (Telephone: 2403.) (H.5741)

KING'S LYNN, NORFOLK

Applications are invited for an urban vacancy at King's Lynn, Norfolk, due to resignation of a two-doctor partnership. Combined lists total 2,090 patients. All prescribing. Open to all.

Forms E.C.16A and further details from The Clerk, Norfolk Executive Council, Horse Fair House, 17 St. Faith's Lane, Norwich NOR 07S. Applications to be received not later than November 8, 1969. (H.5661)

PORTRADOC, SOUTH
CAERNARVONSHIRE

Applications invited for vacancy (restricted, semi-urban), doctor deceased. Present list approx. 2,340 mainly in Caernarvonshire; some dispensing, maternity and temporary residents. G.P. hospital. Lock-up surgery premises. Applications on Form E.C.16A before November 7, to E. Frohiser, Clerk, Caernarvonshire Executive Council, Bryn Afon, Segontium Terrace, Caernarvon, Tel.: 2451. Form E.C.16A and further information on request. (H.5690)

SHEFFIELD, YORKSHIRE

Applications are invited for a retirement vacancy in the Woodhouse (urban) area of Sheffield, occurring on March 31, 1970.

Designated Area addition is being paid. List 3,608 (including 122 in the West Riding of Yorkshire). House and surgery available for purchase by an incoming doctor. Woodhouse is a fairly compact community near the city boundary with West Riding of Yorkshire and Derbyshire. Housing development is proceeding and a further project is planned. Close working arrangement exists with the other three single-handed doctors. Possibility of health centre later. Particulars will be furnished on request (reference A.1). Applications to be sent to The Clerk, Sheffield Executive Council, Brinfild House, Osborne Road, Sheffield S11 9BD, not later than November 10, 1969. (H.5691)

EXACERBATIONS OF BRONCHITIS

offer broad spectrum
antibiotic activity

PLUS

the benefits of
uninterrupted Bisolvon
therapy during the
bronchitic's acute
infected phases

Bisolvon disrupts the feltwork of AMPS (acid mucopolysaccharide) fibres responsible for the viscosity of *mucoïd* sputum, but takes about ten days of continuous treatment to reach its full effect. The patient should then be producing thinner and less sputum than originally. This beneficial effect of Bisolvon is maintained for as long as treatment continues.

During an infective exacerbation bacterial action causes the breakdown of cells and cell nuclei, producing DNA (desoxyribonucleic acid) fibres and fragmentation of existing AMPS fibres. DNA fibres therefore predominate in *purulent* sputum.

At this stage it is very important to maintain Bisolvon therapy, together with an effective antibacterial. This ensures that once the infection is brought under control (therefore eliminating DNA fibres) AMPS fibres do not re-form to raise sputum viscosity.

Bisolvomycin capsules, containing Bisolvon with oxytetracycline, have been developed to enable Bisolvon therapy to be conveniently maintained during the bronchitic's infective exacerbations.

Turquoise blue/grey capsules printed with the Company symbol.

Each capsule contains:

Bisolvon (bromhexine hydrochloride) 8mg.
oxytetracycline hydrochloride B.P. 250mg.

Further information on Bisolvomycin can be obtained from:

Boehringer Ingelheim Limited Isleworth Middlesex

Contra-indications

Bisolvon: There are no absolute contra-indications, but observe caution in patients with gastric ulcer.

Oxytetracycline: Known tetracycline allergy; should not be given in pregnancy or in presence of renal or hepatic dysfunction. The concurrent administration of antacids should be avoided.

Precaution

Bisolvon: When patients under treatment for tuberculosis are also receiving Bisolvon, continue sputum cultures for tubercle bacilli for at least 3 months before assuming a negative result.

Oxytetracycline: Teeth staining may occur in children.

Side-effects

Bisolvon: Mild gastro-intestinal side-effects may occasionally be caused. A transient rise in serum transaminase levels may be observed in a few patients. These should fall again with continuation of Bisolvon treatment.

Oxytetracycline: May cause nausea, diarrhoea and symptoms resulting from the overgrowth of resistant organisms; in particular, overgrowth of *Candida albicans* may cause irritation of mouth, anus or vagina. Drug fever or rashes rarely occur.

**For the patient with
chronic bronchospasm**

BRINGING INSTANT PROLONGED RELIEF

Choledyl tablets rapidly produce high sustained theophylline blood levels, providing welcome relief from breathlessness and minimising the occurrence of acute attacks.

In chronic bronchitis or in bronchial asthma CHOLEDYL* is more effective than oral aminophylline. It is usually well tolerated in effective doses and remains effective. Choledyl is presented as tablets containing 100 mg or 200 mg choline theophyllinate BP, and as syrup containing 62.5 mg choline theophyllinate BP in each 5 ml dose.

ST. ANDREW'S HOSPITAL NORTHAMPTON

Medical Director James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from 25 guineas per week, and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 3435), who can be seen in consultation by appointment either at the hospital or at 55 Harley Street, London W.1.

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staphylococci and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER—DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Icthyol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that **ASERBINE** is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.
