

Bronchitis is Penbritin Territory

The case for prescribing Penbritin in bronchitis is strong. It is backed by more than 8 years' clinical experience.

Penbritin offers broad-spectrum activity against the bacteria involved in bronchitis, including *Strep. pneumoniae* and the particularly troublesome *H. influenzae*. Tetracyclines cannot be relied on to eradicate these, for some strains of both organisms are now tetracycline-resistant.

Organisms are merely inhibited by tetracyclines. Even at routine dosage, Penbritin kills bacteria in the lung tissue. At high dosage, bactericidal action in the sputum is often achieved. Penbritin swiftly resolves acute bronchitis, and makes possible longer periods of remission for the chronic bronchitic.

For all its broad-spectrum power, Penbritin has the safety of a penicillin. More than 1,600 published references have shown its lack of toxicity. Penbritin's safety record means that it can be confidently prescribed whatever dosage or length of treatment your patient requires. The full range of presentations—capsules, pleasant syrup, tablets and injections—allows you to select the ideal form of treatment for each patient.

comes to a point**

You make your decision — it's not always easy — whether to advise, refer or prescribe. If it's a simple infection, otitis media or tonsillitis for example, you look for a treatment that is reliable, effective and acceptable to the patient.

Very often, it all points to Broxil.

Broxil works. In practice, patients do seem to get better quicker with Broxil. Broxil has an excellent safety record. All you ever need do is take the normal penicillin precautions.

For ENT, upper respiratory tract, skin and soft tissue infections, Broxil has an outstanding record for effectiveness over ten years of practice.

Presentation

Betnovate-N (0.1% betamethasone as 17-valerate plus 0.5% neomycin sulphate)

Cream and Ointment : 15, 30 and 100 gram tubes

Lotion : 20 ml bottle

Tulle : tin of 10 pieces (4 in x 4 in)

Indications

All steroid responsive dermatoses including psoriasis.

Betnovate-N preparations should be used if bacterial infection is present or suspected.

Application

Apply a small quantity once or twice daily

Adverse reactions

Betnovate preparations are usually tolerated well, but if signs of hypersensitivity appear, application should be stopped immediately. When used with occlusive dressings on extensive areas, or for prolonged periods, as with all topical steroids, there is a possibility of systemic absorption. Absorption is more likely in infants and children, and may occur even in the absence of occlusion.

Protect the new patient from her own forgetfulness.

Lyndiol 2-5 provides contraception from the very first tablet without any reliance upon other contraceptive methods. It has by far the lowest failure rate (0.003 per Hundred Women Years)¹, due in part to the prolonged activity of lynestrenol²: if a patient forgets a tablet she takes it the following day and is still protected. The easily-remembered same-day dosage regimen fortifies the medical advantages of Lyndiol 2-5 and further protects the patient from her own forgetfulness. An extremely low incidence of side-effects³ reinforces the logic of protecting the new patient with Lyndiol 2-5.

A new flu vaccine from Wellcome

Before influenza strikes your older patients and those with chronic and debilitating diseases (particularly those with cardiac and pulmonary conditions) consider vaccination.

Remember also that post-influenzal depression and other aspects of the post-viral state have been observed to be often more serious than is usually imagined.*

WELLCOME* Influenza Virus Vaccine (inactivated extract antigen) Bivalent will provide protection against A2 Hong Kong 68 and the current B strains of influenza virus. As a result of deoxycholate treatment, the viruses are rendered less reactogenic but their antibody-inducing properties remain unimpaired.

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity – contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg
Testosterone Phenylpropionate B.P. 40mg
Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity – contains 250mg testosterone per ml:

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

Packs: Boxes of 3 ampoules of 1 ml in either strength.

BRUFEN

(ibuprofen)

The incident recreated here is taken from an actual report of the results achieved with Brufen. Many such reports about Brufen have been received, and provide convincing evidence of the very real benefits which this highly effective antirheumatic agent can bring to the arthritic. To those restricted by an arthritic condition, Brufen means the freedom of reduced stiffness,

improved joint flexion and an extended range of pain-free movement. There is also a remarkable freedom from adverse effects, and Brufen is so well tolerated by the gastro-intestinal tract that the first dose of each day can be taken on an empty stomach, as soon as the patient is awake.

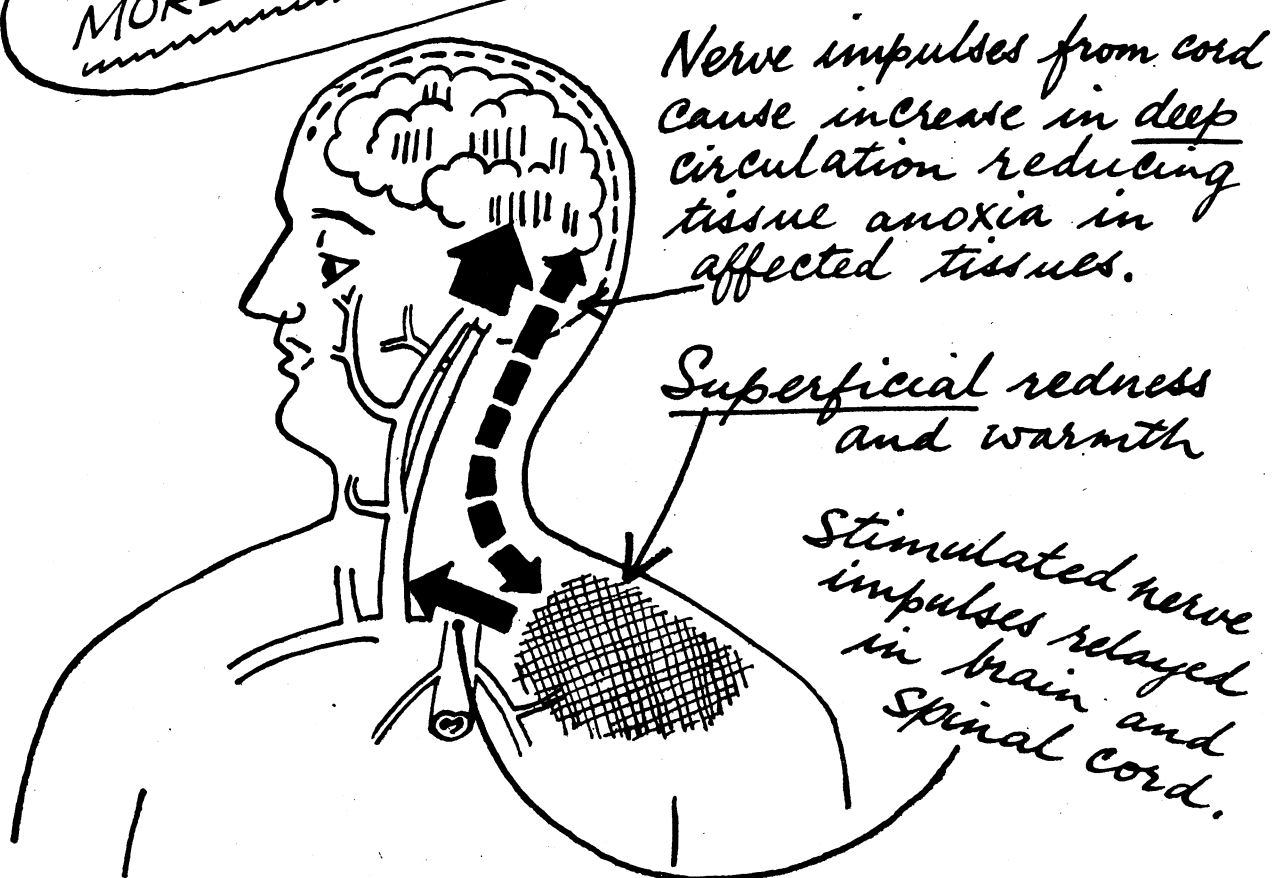

Brufen is ibuprofen, the first non-steroidal antirheumatic agent evolved entirely by British research.

For full information

Verton

Rationale

Verton is a new kind of oral contraceptive containing a progestogen (chlormadinone acetate).

It provides contraception primarily by thickening the cervical mucus and thus preventing the entry of spermatazoa into the cervical canal. Contraception is enhanced because minor alterations in the endometrium make nidation of any fertilised ovum more difficult, and because ovulation is occasionally inhibited.

Indications

Verton is an oral contraceptive particularly suited to those women who experience side-effects with the conventional oestrogen-progestogen combinations, e.g. nausea, weight-gain, oedema, headaches and depression.

Since it does not inhibit lactation, it is particularly suitable for use during the post-partum period, for those who wish to breast-feed their babies.

It is useful for all those who are unreliable at taking their tablets because of the simplicity of everyday medication.

Side-effects

Apart from some irregularity of cycles, other side-effects with Verton are uncommon. Nausea, abdominal discomfort, headache and weight changes are seldom recorded. Laboratory studies suggest there is no effect on blood-clotting as there is with other oral contraceptives, but it is too early to suggest that this kind of oral contraceptive is completely safe in this regard. There appears to be no long term effect on the endometrium even after three years administration. Further, normal pregnancies occur after discontinuing Verton.

Contra-indications

Although so far it does not appear to have any effect on blood-clotting factors, Verton should not be used in women with a history of thrombosis. It is inadvisable to give Verton to women with liver dysfunction, although it has no effect on liver function in normal women.

Directions for use

Please see comprehensive literature.

SYMPOSIUM REPORT ON SEPTRIN*

Since the introduction of SEPTRIN this major advance in antibacterial therapy has had wide clinical success. Experience gained with SEPTRIN in many areas of medicine was discussed at a Symposium held at the Royal College of Physicians, London, in May, 1969†. Here are brief summaries of three comparative trials reported: fuller details are available on request.

†*Postgrad. med. J.* (1969) in press.

in bronchitis (compared with ampicillin)

SEPTRIN produced objectively determined improvement in patients suffering exacerbations of chronic bronchitis. SEPTRIN was shown to be more effective than ampicillin in its effect in reducing sputum volume and purulence.

in bronchitis (compared with tetracycline)

SEPTRIN was compared with tetracycline in another trial and was shown to provide a more beneficial effect on exacerbations of chronic bronchitis. Again significantly greater reductions in sputum volume and reduction in purulence were observed.

*Trade mark.

in U.T.I. (compared with ampicillin & sulphadimidine)

SEPTRIN was found superior to ampicillin and sulphadimidine in treating hospitalised patients with U.T.I. Cure rates achieved were 85% with SEPTRIN, 70% with ampicillin and 40% with sulphadimidine. (Cure criterion=eradication of original organism from the urine 1 week after the end of treatment.)

SEPTRIN an advance on the antibiotics

SEPTRIN Tablets, Paediatric Suspension and Paediatric Tablets contain trimethoprim and sulphamethoxazole.

Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, it is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From the dispensing packs, the basic NHS cost of a spoonful of granules or two tablets is about a halfpenny.

ABSTRACTS OF WORLD MEDICINE

ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of Medical Assistant Editor of *Abstracts of World Medicine* at a salary of £3,800 a year, rising by annual increments of £200 to £4,600 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's superannuation scheme will apply on substantive appointment.

Preference will be given to candidates whose medical experience and interests cover a wide field and who can present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is highly desirable. Suitably qualified candidates who are approaching the age of retirement will not necessarily be excluded from consideration for that reason.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Editor of *Abstracts of World Medicine*, B.M.A. House, Tavistock Square, London W.C.1, and must be received before December 21, 1969.

A course of two weeks' duration will be held from January 5 to 16, 1970,
in the Regional Department of Clinical Physics and Bio-engineering,
11 West Graham Street, Glasgow C.4.

This course is open to medical practitioners and is designed to make
students familiar with the scientific and technical basis of diagnostic
applications of ultrasonics and the instruments used. No prior know-
ledge of the subject matter will be assumed but notes will be issued
in advance to allow seminar-type tuition. A large part of the time will
be spent in the laboratory, where modern instruments for all established
techniques will be used by students.

The number of students will be limited to six. Further courses are
planned (probably in May and October). The course fee will be £30.
Application forms and additional information may be obtained from
the Regional Physicist. (13024)

EXECUTIVE COUNCILS

NATIONAL HEALTH SERVICE FIFE EXECUTIVE COUNCIL

Medical Practice Vacancy—Thornton, by Kirkcaldy

The resignation of a single-handed general practitioner has created an exceptional opportunity for a doctor either to continue this village practice of 2,150 patients or to build up a group practice by expansion into the adjacent new town of Glenrothes, where a health centre is expected to be available.

Rented surgery accommodation and houses for purchase or rental are now available, while the nearest practice of five doctors is prepared to co-operate in off-duty rotas.

Further particulars, including information about educational and recreational facilities, are available from the undersigned, with whom applications should be lodged by December 8, 1969.

133 Dunnikier Road,
Kirkcaldy.

J. R. ABEL,
Clerk of Council.

WEST COAST HOSPITAL BOARD

MEDICAL STAFF

Buller Hospital, Westport, New Zealand. Vacancies will shortly arise on the medical staff of this hospital and applications from suitably qualified medical practitioners, registrable in New Zealand, are hereby invited for the following posts:

Either
Two part-time Visiting Medical Officers of special scale.

Or
A full-time Medical Officer of specialist or special scale rating and a part-time Medical Officer of special scale.

Explanation
The Board would be willing to appoint two part-time Medical Officers with surgical experience sufficient between them to carry out lesser general surgery including emergencies. They would be expected to co-operate with and if need be refer to the specialist staff employed by the Board in respect of difficult and urgent cases.

The senior in years and experience would be appointed Medical Superintendent. The relative number of sessions allocated to each appointee would be a matter for negotiation, but between them the officers would share at least 10/10ths. Though desirable, a higher qualification would not be essential if the applicant has experience and competence.

If a suitable application for a whole-time post as Surgeon Superintendent is received a further appointment of a part-time Medical Officer will be made.

This officer would be required to relieve the Superintendent and attend to minor and acute surgery and casualties in the latter's absence, and also carry out some general medical duties.

NOTE: Some anaesthetic experience would be an advantage in respect of any part-time appointments.

Salary and conditions will be in accordance with the Hospital Employment (Medical Officers) Regulations in the scale—

\$5,090-\$8,100 for Specialists or \$4,480-\$6,420 for Medical Officers of special scale

An additional payment of up to \$400 for a full-time appointee in the salary range \$5,130-\$7,800 and an appropriate portion thereof for a part-time appointee has been authorized for these positions.

Interested applicants are invited to contact Mr. K. Bridge, O.B.E., F.R.C.S., c/o Casualty Department, Wellington Hospital, or Mr. M. Berry, Medical Superintendent-in-Chief, Christchurch Hospital, for independent assessment of the posts offered, and Dr. C. C. Foote of Westport in regard to the opportunities for private practice.

The Department of Health has stated that there will also be available the services of a Medical Officer from a neighbouring special area on a 5/10ths basis.

Buller Hospital is a modern hospital of 73 general and 16 maternity beds. A new three block is also built.

Conditions of appointment and further information are available from the Medical Superintendent-in-Chief, West Coast Hospital Board, P.O. Box 387, Greymouth, to whom applications should be addressed. (12762)

THE UNIVERSITY OF MANCHESTER

Applications are invited for appointment to

Four CHAIRS in Anaesthesia Geriatric Medicine Medicine Surgery

Together with the Manchester Regional Hospital Board, the University is working to establish the hospitals of the South Manchester Group as teaching hospitals. It is expected that they will be designated as University Hospitals by the Department of Health and Social Security in April 1970. These four full-time appointments are the first of a series which will introduce members of the University staff into these hospitals. Appointments of more junior supporting staff will follow. The University and the Board envisage that all four Chairs will be filled by persons of clinical experience; those appointed will have honorary consultant status, and will have clinical responsibilities as well as responsibility for the teaching services in the hospitals.

Research facilities are being developed and a research and teaching block is at an advanced planning stage. It is expected that the successful applicants will be involved in the final development of this building as in the other considerable building developments which are taking place. The University sees these posts as being of key importance in developing relationships between the existing Medical School which is being doubled in size and the new Teaching Hospital Group.

Further particulars may be obtained from the Registrar, University of Manchester, Manchester M13 9PL. Quote ref.: 231/69/JMB. (12471)

new[®] Alupent[®] Expectorant

Problem: in asthma and chronic bronchitis
spasm + sputum = distress for the patient

Now, Alupent[®] = control of spasm
and Bisolvon[®] = control of sputum

∴ Alupent + Bisolvon = control of spasm + control of sputum
But Alupent + Bisolvon = New Alupent Expectorant

∴ Alupent Expectorant = dual control of spasm and sputum

Quod Erat Demonstrandum

Composition: Each tablet contains Alupent* (orciprenaline sulphate B.P.) 20 mg. and Bisolvon* (bromhexine hydrochloride) 8 mg. Each 5 ml. mixture contains Alupent 10 mg. and Bisolvon 4 mg.

Indications: Alupent Expectorant is indicated in conditions in which both bronchospasm and thick, sticky, non-infected sputum are present, e.g. asthma, non-infected phases of chronic bronchitis. During infected episodes a suitable antibiotic should be given in addition to Alupent Expectorant.

Contra-Indications: Alupent: Alupent should not be given to patients with thyrotoxicosis. In view of the known interaction between sympathomimetic amines and mono-amine oxidase inhibitors, care should be exercised if it is proposed to administer an MAO inhibitor concurrently with Alupent.

Bisolvon: No absolute contra-indications but observe caution in the use of Bisolvon in patients with gastric ulceration.

Precautions: When patients under treatment for tuberculosis are receiving Bisolvon, sputum cultures for

tubercle bacilli should be continued for at least three months before a negative result may be assumed.

Side-effects: Alupent: Transient sympathomimetic side-effects, such as tachycardia, headaches and dizziness may occur, but these are rarely severe and should respond to dosage adjustment. Abdominal discomfort and nausea may occur.

Bisolvon: Mild gastro-intestinal side effects may occur in some patients. During treatment with Bisolvon, a transient rise in serum transaminase levels may be observed in some patients but these levels should fall again as treatment continues, even in patients in whom there pre-exists some impairment in hepatic function.

Dosage: Tablets: Adults, 1 four times daily; children 5-10 years, $\frac{1}{2}$ three or four times daily; children under 5 years, mixture recommended.

Mixture: Adults, two 5 ml. spoonfuls four times daily; children 5-10 years, one 5 ml. spoonful three or four times daily; children under 5 years, one 5 ml. spoonful twice daily.

Availability: Tablets, containers of 30 and 250; Mixture, bottles of 300 ml.

Further information on Alupent Expectorant is available on request.

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER—DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Ichthyl to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that **ASERBINE** is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.
