

for a small diuresis

Excretion
ΔmEq/24 hours

Semilogarithmic dose-response curve showing the excretion of sodium and potassium after oral administration of Lasix in human subjects with normal renal function.

The small amount of fluid removed by small doses of Lasix in a short time provides adequate control of oedema in a way acceptable to the patient. Instead of micturating throughout the day and night he can time the dose to suit his daily routine.

The low potassium loss following Lasix administration means that routine potassium supplementation is not required. At a dose of one tablet a day an adequate diet will usually provide all the potassium necessary.

"Predictability of response enabled us to tailor the diuresis to the individual patient's life circumstances"

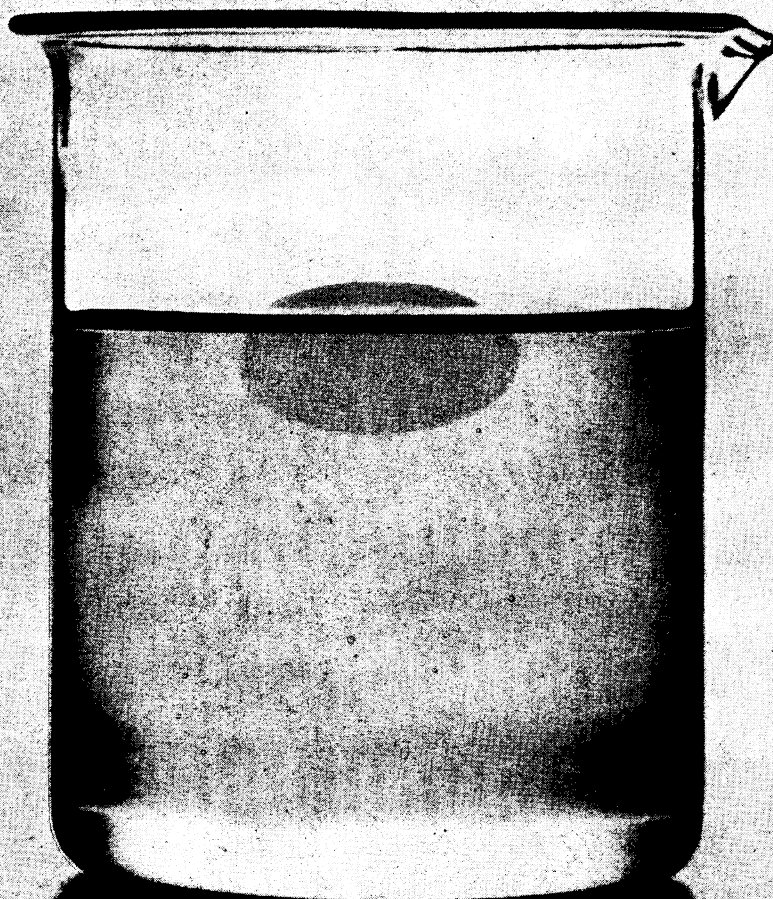

"Potassium excretion is less during Lasix therapy than with the thiazides in low and comparable dosage"

"Few patients require supplementary potassium when taking Lasix"

It happens every autumn...

Royal Highland Gathering, Braemar
September 6th. The great annual sporting event in which Scotsmen compete at traditional games and contests.

St. Leger, Doncaster September 10th.
One of the five racing 'classics' and a highlight of the Autumn flat-racing calendar.

National Chrysanthemum Show, RHS Halls September 16th and 17th. The yearly Mecca of chrysanthemum enthusiasts: a lively and colourful display.

Autumn Antiques Fair, Town Hall, Chelsea September 17th-27th.
A rare opportunity to admire the latest fashions on King's Road and some rather older fashions in furniture and bric-à-brac.

Coughs and respiratory congestion.
A less welcome feature every Autumn, happens everywhere, throughout the season.

To many of your patients an attack of respiratory congestion and cough is one of Autumn's 'annual events'.

Benylin® Expectorant helps to relieve this respiratory discomfort while being pleasant to take and acceptable to children as well as adults. With a basic NHS cost of 2/6d. for 200 ml. small wonder that Benylin Expectorant is the most widely prescribed ethical linctus.

Bisolvon disrupts the feltwork of AMPS (acid mucopolysaccharide) fibres responsible for the viscosity of *mucoïd* sputum, but takes about ten days of continuous treatment to reach its full effect. The patient should then be producing thinner and less sputum than originally. This beneficial effect of Bisolvon is maintained for as long as treatment continues.

During an infective exacerbation bacterial action causes the breakdown of cells and cell nuclei, producing DNA (desoxyribonucleic acid) fibres and fragmentation of existing AMPS fibres. DNA fibres therefore predominate in *purulent* sputum.

At this stage it is very important to maintain Bisolvon therapy, together with an effective antibacterial. This ensures that once the infection is brought under control (therefore eliminating DNA fibres) AMPS fibres do not re-form to raise sputum viscosity.

Bisolvomycin capsules, containing Bisolvon with oxytetracycline, have been developed to enable Bisolvon therapy to be conveniently maintained during the bronchitic's infective exacerbations.

Turquoise blue/grey capsules printed with the Company symbol.
Each capsule contains:
Bisolvon (bromhexine hydrochloride) 8mg.
oxytetracycline hydrochloride B.P. 250mg.

Contra-indications

Bisolvon: There are no absolute contra-indications, but observe caution in patients with gastric ulcer.

Oxytetracycline: Known tetracycline allergy; should not be given in pregnancy or in presence of renal or hepatic dysfunction. The concurrent administration of antacids should be avoided.

Precaution

Bisolvon: When patients under treatment for tuberculosis are also receiving Bisolvon, continue sputum cultures for tubercle bacilli for at least 3 months before assuming a negative result.

Oxytetracycline: Teeth staining may occur in children.

Side-effects

Bisolvon: Mild gastro-intestinal side-effects may occasionally be caused. A transient rise in serum transaminase levels may be observed in a few patients. These should fall again with continuation of Bisolvon treatment.

Oxytetracycline: May cause nausea, diarrhoea and symptoms resulting from the overgrowth of resistant organisms; in particular, overgrowth of *Candida albicans* may cause irritation of mouth, anus or vagina. Drug fever or rashes rarely occur.

SYMPOSIUM REPORT ON SEPTRIN*

Since the introduction of SEPTRIN this major advance in antibacterial therapy has had wide clinical success. Experience gained with SEPTRIN in many areas of medicine was discussed at a Symposium held at the Royal College of Physicians, London, in May, 1969†. Here are brief summaries of three comparative trials reported: fuller details are available on request.

†*Postgrad. med. J.* (1969) in press.

in bronchitis (compared with ampicillin)

SEPTRIN produced objectively determined improvement in patients suffering exacerbations of chronic bronchitis. SEPTRIN was shown to be more effective than ampicillin in its effect in reducing sputum volume and purulence.

in bronchitis (compared with tetracycline)

SEPTRIN was compared with tetracycline in another trial and was shown to provide a more beneficial effect on exacerbations of chronic bronchitis. Again significantly greater reductions in sputum volume and reduction in purulence were observed.

*Trade mark.

in U.T.I. (compared with ampicillin & sulphadimidine)

SEPTRIN was found superior to ampicillin and sulphadimidine in treating hospitalised patients with U.T.I. Cure rates achieved were 85% with SEPTRIN, 70% with ampicillin and 40% with sulphadimidine. (Cure criterion—eradication of original organism from the urine 1 week after the end of treatment.)

SEPTRIN Tablets, Paediatric Suspension and Paediatric Tablets contain trimethoprim and sulphamethoxazole.

Dorbanex

avoids the
problems
of
conventional
laxative
treatment

With a faecal softener to prepare the way, and just a small dose of peristaltic stimulant completing evacuation, *Dorbanex* avoids the problems of conventional laxative treatment. What difference does the faecal softener make to treatment?

A soft but formed stool; the restoration of faecal bulk to normal; non-oily lubrication of the gut contents. By this comprehensive approach, *Dorbanex* provides easier and more predictable evacuation than conventional laxatives, reduces the need for enemas and suppositories, minimises the risk of straining at stool or faecal impaction, lessens apprehension about answering the call to stool, helps to break the laxative habit, gently restores neuromuscular sensitivity, and simplifies patient management.

Available in three forms to treat constipation in any patient of any age, *Dorbanex* provides the prospect of successful treatment that avoids the problems of conventional laxative therapy.

Dorbanex Capsules: each capsule contains 1:8-dihydroxyanthraquinone 25 mg., poloxalkol 200 mg. **Dosage:** Adults, one or two capsules. Children, one capsule. Before or after surgery: two to four capsules. Treatment should be taken at bedtime.

Dorbanex Forte: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone, 75 mg., poloxalkol 1000 mg. **Dosage:** One teaspoonful or as directed by the physician. Treatment should be taken at bedtime.

Dorbanex Liquid: each 5 ml. teaspoonful contains 1:8-dihydroxyanthraquinone 25 mg. poloxalkol 200 mg. **Dosage:** Adults, one or two teaspoonfuls. Children, half to one teaspoonful, as required. Before or after surgery two to four teaspoonfuls. Treatment should be taken at bedtime.

Contra-indications In common with other gastro-intestinal evacuants, *Dorbanex* should not be given when acute, painful conditions of the abdomen are present, or the cause of constipation is suspected to be obstruction of the small or large intestine. **Side-effects** Dihydroxyanthraquinone may cause a temporary harmless, pink or red colouring of the urine and, in prolonged use or high dosage, of the mucosa of the large intestine. Doses larger than two teaspoonfuls may cause slight gastro-intestinal discomfort in a few patients. **Basic NHS Prices** *Dorbanex* Capsules: bottles of 30 capsules 8/8; bottles of 300 capsules 78/-; *Dorbanex* Liquid: bottles of 60 ml. 4/-; bottles of 500 ml. 30/-; *Dorbanex* Forte: bottles of 60 ml. 6/-; bottles of 500 ml. 45/-.

MUSCULAR RHEUMATISM, FIBROSITIS, LUMBAGO OR LOW BACK PAIN

For each of them the problem is pain

For all of them the answer is Paynocil

regd.

Lumbago or low back pain, fibrositis, muscular rheumatism—however you describe these rheumatic disorders, they mean the same thing to the patient. Pain. And the text-book therapy is the same, too—aspirin.

Then why prescribe Paynocil?

First, because Paynocil *is* aspirin. So it stops pain and relieves inflammation. **Second, because Paynocil is aspirin with all these additional benefits:**

Well tolerated: Paynocil also contains 300 mg. of glycine, which helps to distribute the aspirin rapidly into the stomach in the finest particles, thus minimising the risk of gastric irritation. Patients with rheumatic disorders who experience nausea, heartburn or epigastric pain after plain aspirin have found Paynocil acceptable.

Quick acting: Paynocil, at 600 mg. aspirin per tablet, has twice the strength of aspirin tablets B.P., and in equivalent dosage, is twice as rapidly absorbed. A property which could be of particular value—in combating the rheumatic's morning stiffness for example.

Convenient: Paynocil can be taken without water, for glycine masks the unpleasant taste of aspirin and allows the tablet to disperse instantly on the tongue in a burst of lemon flavour. The tablets come in protective foil strips which slip easily into handbag or pocket. All of which makes Paynocil a most practical form of aspirin for active people.

Junior Paynocil is available, for children, at 150 mg. aspirin per tablet.

Johnny went into hiding q.i.d. until the doctor prescribed 'Ilosone' Suspension

'Ilosone' excels in paediatric infections. But the flavour of the suspension (although important to Johnny) is only one of the reasons why it works so well. Against gram-positive cocci 'Ilosone' is much more active than, for example, the tetracyclines – and it will not discolour teeth or deposit in bone. Thus for infections such as tonsillitis, pharyngitis, pneumonia, otitis media and acute bronchitis – 'Ilosone' Suspension is a first-line treatment.

Wherever gout strikes— **Zyloric*** protects

With ZYLORIC, serum uric acid levels are reduced and kept within normal limits, urate deposition in the joints regress and acute attacks of gout become less frequent or disappear.

ZYLORIC acts by limiting the formation of uric acid from its metabolic precursors. Uricosuric agents, in contrast, do not limit the production of uric acid, they increase the flow of urates through the kidney.

With ZYLORIC less uric acid passes through the kidney which is protected from the effects of urate deposition and urate nephropathy (kidney damage is a cause of death in 25 per cent of patients with chronic gout).†

NEW FROM THE BUTTERWORTH GROUP**APPLIED RESPIRATORY PHYSIOLOGY
WITH SPECIAL REFERENCE TO ANAESTHESIA**

By J. F. Nunn, M.B., Ch.B., Ph.D., F.F.A.R.C.S.(Eng.)

The purpose of this outstanding volume is to show how a basic understanding of respiratory physiology ties up with the use of anaesthetics in the treatment of patients. The work approaches the subject from an anaesthetist's viewpoint, but the wide coverage of the text will make it of interest to many other clinicians. The author has concentrated on studies in man, and the aspects he reviews are particularly relevant to clinical work.

**CLINICAL DISORDERS OF HEMOGLOBIN
STRUCTURE AND SYNTHESIS***

By T. F. Necheles, M.D., Ph.D., D. M. Allen, M.D., and H. E. Finkel, M.D., F.A.C.P.

This monograph grew out of a series of lectures covering the field of the haemoglobinopathies and thalassaemias. Since some background knowledge is helpful for an understanding of disorders of haemoglobin structure and synthesis, about a third of the volume is devoted to the basic biochemical and genetic pathogenesis of these diseases. The remaining chapters concentrate on the clinical aspects of diagnosis, management and prognosis. An important book for all physicians dealing with these anaemias, many of which are newly recognized, and from which many thousands of people now suffer.

1969 220 pages Illustrated 90s.

**ADOLESCENT NUTRITION AND
GROWTH***

Edited by Felix P. Heald, M.D.

Twenty-three nutritional authorities have contributed ideas on a variety of conditions which affect adolescents. Among the subjects discussed are: obesity in adolescents and adults, the effects of stress on nutrition, atherosclerosis during growth, and the effects of hormones on growth and metabolism. Due consideration is given to both socio-economic factors and heredity to give a comprehensive picture of adolescent development, and to provoke thought on the means of helping young people whose diets are either inadequate or excessively high in calories.

1969 258 pages Illustrated 110s.

**PRIMER OF HISTOPATHOLOGIC
TECHNIQUE**

By Geoffrey G. Brown, A.I.M.L.T.

This is an invaluable little book for the student of histology. It gives a clear introduction to the techniques of tissue preparation and staining, and describes microtomes and section cutting techniques. There are many excellent books on histology available, but this particular volume can be wholeheartedly recommended to the physiology or biological science student approaching the subject for the first time.

**EXFOLIATIVE CYTOLOGY IN GYNAE-
COLOGICAL PRACTICE**

2nd Edition

By Erica G. Wachtel, M.D.(Vienna)

Dr. Wachtel has extensively revised this book for its second edition. All aspects of vaginal cytology are covered and in addition to the more common gynaecological conditions some extremely rare disorders are included. There are chapters on the collecting of specimens and their histological preparation, and the interpretation of smears is aided by a wealth of photographs and illustrations.

Are doctors immortal?

Some patients seem to think that doctors never die. Or become ill. Or have accidents.

But as a doctor you know that your chances of falling sick, or breaking a leg tomorrow are the same as everyone else's. And the effect on your life and family is much graver.

Your practice, for instance, must be kept going. So your income plunges overnight. And your life becomes stifled by financial worries: how to keep your family, meet school fees, pay the mortgage. To a sick man worry is a poisonous enemy.

That's why it's so wise to insure against sickness or early death. Wiser still to insure with the company run exclusively for doctors and dentists: the Medical Sickness Society.

You know that one day you may need this insurance. So write today. Together we'll find the policy which will work hardest for you.

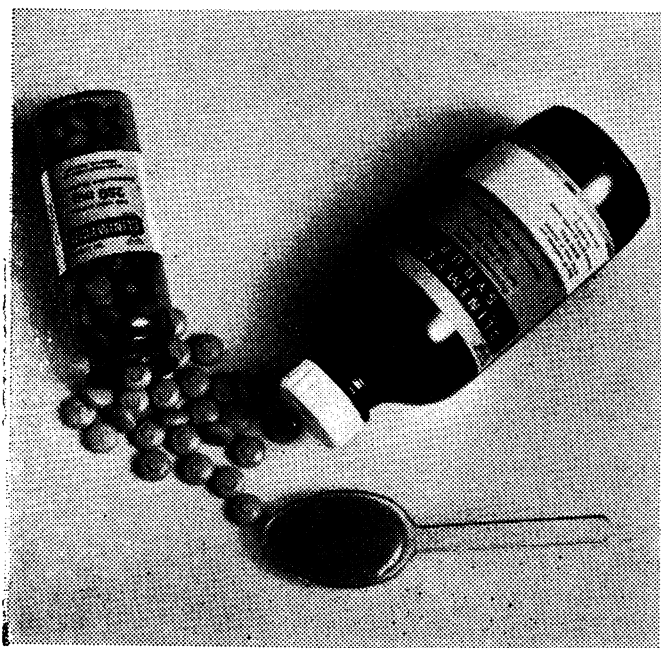

Do it now.

Who says you can drink Clinimycin?

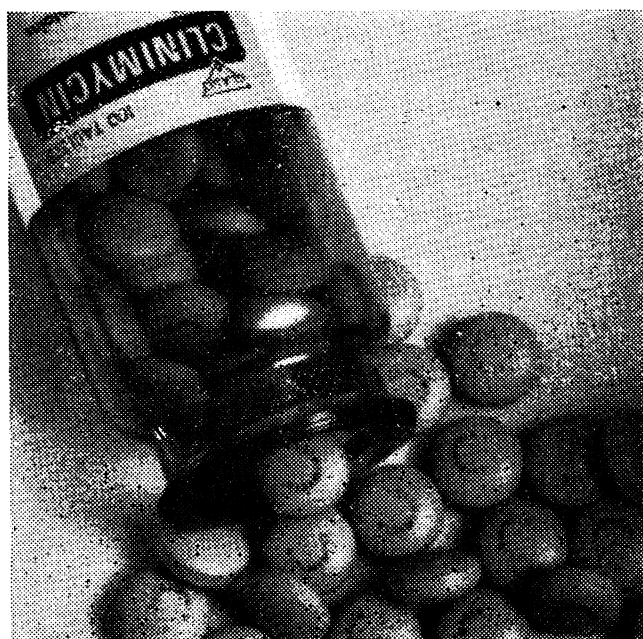

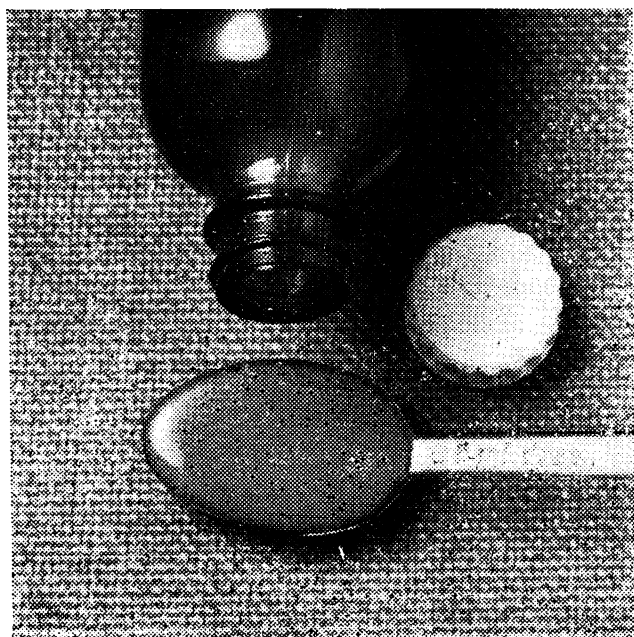

Glaxo do—with their new 125 mg/5 ml oxytetracycline syrup. Clinimycin Syrup is the ideal way of giving oxytetracycline to the very young and the elderly patient. The syrup has a pleasant fruit flavour and provides a uniform suspension which ensures accurate dosage every time. Clinimycin is one of the least expensive oxytetracycline syrups and its orange colour makes it readily identifiable. Quite a few good reasons for remembering Clinimycin Syrup when prescribing for your very young and elderly patients.

Clinimycin Tablets — still the smallest 250 mg oxytetracycline tablets

Clinimycin Tablets are the smallest 250 mg oxytetracycline tablets and as they're also film-coated, they slip down easily. And Clinimycin Tablets are easily recognisable — each tablet has the brand name printed on it, so patients can't confuse Clinimycin with any other tablets taken simultaneously. Whenever 250 mg oxytetracycline is needed, simply write Clinimycin.

Unique tablet for the safer management of hypertension — **Neo-NaClex-K**

Neo-NaClex-K is a unique two-layered tablet for use in all grades of hypertension. The white layer contains 2.5 mg bendroflumazide which lowers the blood pressure in mild hypertension by an average of 10 to 15 mm Hg and maintains this fall on a low dosage. In severe hypertension, the addition of a more potent drug will produce an adequate fall with a dosage up to 50% less than that required without the thiazide treatment. This leads to a corresponding reduction of side effects from the more potent drug. The coloured layer of each Neo-NaClex-K tablet contains 630 mg potassium chloride in a slow release base which minimises the danger of gastric irritation or small bowel ulceration.

Neobacrin Ointment — the logical choice in impetigo

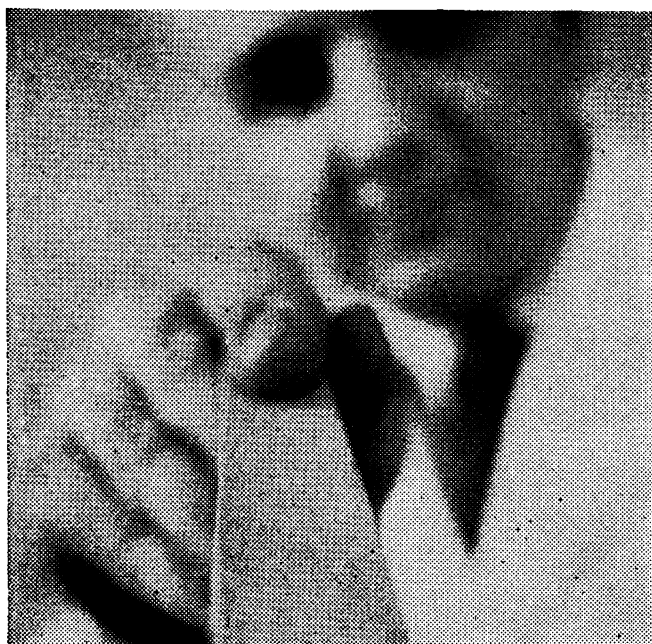

Neobacrin Ointment contains neomycin and bacitracin — the antibiotics of choice for topical application in the BNF 1968. It is highly active against a wide range of Gram-positive and Gram-negative organisms and ensures virtual eradication of superficial bacterial infections such as impetigo. Because Neobacrin contains two antibiotics, there is much less chance of bacterial resistance developing. And there is very little risk of sensitisation, toxic effects or irritation of the tissue. And Neobacrin Ointment is one of the least expensive antibiotic ointments available. That's why Neobacrin Ointment is the logical choice in impetigo. Safe. Effective. Economical.

Here's the evidence for **Crystapen G** in strep. throats

"Streptococci are often resistant to tetracycline and sulphonamides, while ampicillin is less active than penicillin against streptococci, far more expensive, and much more likely to produce hypersensitivity rashes."¹ Penicillin is still the treatment of choice in strep. throats. If used for ten days, there should be no complications such as bacteriological relapse, rheumatic fever or acute nephritis.¹ And penicillin G is as effective clinically as penicillin V. "... the trial demonstrated equal effects from the two penicillins."²

Betnovate anti-infective preparations are the answer to infected dermatoses

When dermatoses are complicated by infection there are now three Betnovate preparations containing anti-infectives. The most successful topical corticosteroid is now available with neomycin, aureomycin or clioquinol.

For most infected dermatoses, the effective answer is Betnovate-N with 0.5% neomycin sulphate or new Betnovate-A with 3% aureomycin BP. As an alternative, or when fungal infection is present, there is Betnovate-C with 3% clioquinol.

A week ago her problem was her skin

She didn't know when it started. All she knew was the more she scratched the worse it got – and then it started to spread. She complained of the irritation and was too embarrassed to meet her friends. It was only then that she realised that something must be done; and done quickly. Her doctor told her it was eczema and prescribed Propaderm cream.

Propaderm relieves skin problems

Propaderm can be used for all conditions responsive to topical steroid therapy. Propaderm is beclomethasone dipropionate – a powerful topical steroid. So powerful that in a recent trial 94% of 252 patients with eczema or psoriasis showed good results when treated with Propaderm (cream, ointment and ointment with 3% aureomycin BP). Propaderm is fast acting. In the same trial the majority of patients who responded to Propaderm did so in the first week of treatment.

"All three preparations of the drug which were tested were found to be superior to previous treatments. No side effects were reported."

Practitioner, (1968) 201, 362.

All your fees paid, plus over £1000 a year, while a Medical student.

As a Medical Cadet in the Royal Army Medical Corps, all your tuition fees are paid by the Army. In addition, you are paid £1,027 a year (£1,567 if you are married) in pay and allowances.

You can apply for a Medical Cadetship if you have passed your second MB or its equivalent, are under 25, and have a place at a medical school in the United Kingdom or Eire. If you are about to take your second MB, you may still apply; but your acceptance will be conditional on your passing the examination.

If accepted as a Medical Cadet, you are given the probationary rank of 2nd Lieutenant. On qualification, you are promoted Lieutenant, and are paid as such while you fulfil your pre-registration appointment – either at a civilian hospital of your own choice, or at certain Military hospitals. After being fully registered, you are pro-

moted Captain, and take up your duties in the RAMC.

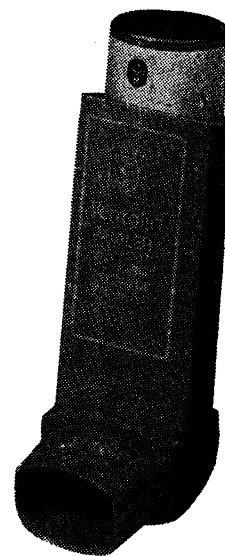

Your obligation is then for five years of service on a Short Service Commission. During those five years, you will have a good chance of travel, make many friends, have ample leave (six weeks' paid leave a year, with a locum provided by the Army). During that period you can, if you like, apply for a Regular Commission. Or you can leave the Army for civilian practice, the richer for some valuable experience of General Practice – and for a tax-free gratuity of up to £2,600 according to period of cadetship.

For further information about Medical Cadetships, or to arrange a meeting with an RAMC Officer to answer any questions you may have, write to:

Editorial Assistant (woman) wanted for department publishing world-famous specialist journals of medicine. Sub-editorial experience essential. Interest in scientific developments of modern medicine an advantage. Applicants, preferably aged 30-35, should hold University Arts degree or other qualifications. Good salary; contributory pension scheme. Please send curriculum vitae to Editor, British Medical Journal, B.M.A. House, Tavistock Square, London W.C.1.

ABSTRACTS OF WORLD MEDICINE

ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of Medical Assistant Editor of Abstracts of World Medicine at a salary of £3,800 a year, rising by annual increments of £200 to £4,600 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's superannuation scheme will apply on substantive appointment. Preference will be given to candidates whose medical experience and interests cover a wide field and who can present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is highly desirable. Suitably qualified candidates who are approaching the age of retirement will not necessarily be excluded from consideration for that reason.

Applications, giving details of qualifications and experience, and accompanied by the names of three persons to whom reference may be made, should be addressed to the Editor of Abstracts of World Medicine, B.M.A. House, Tavistock Square, London W.C.1, and must be received before December 21, 1969.

UNIVERSITY OF EXETER
Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on January 14, 1970. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act, 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom). Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire.

THE UNIVERSITY OF MANCHESTER

Applications are invited for appointment to

**Four CHAIRS in
Anaesthesia
Geriatric Medicine
Medicine
Surgery**

Together with the Manchester Regional Hospital Board, the University is working to establish the hospitals of the South Manchester Group as teaching hospitals. It is expected that they will be designated as University Hospitals by the Department of Health and Social Security in April 1970. These four full-time appointments are the first of a series which will introduce members of the University staff into these hospitals. Appointments of more junior supporting staff will follow. The University and the Board envisage that all four Chairs will be filled by persons of clinical experience; those appointed will have honorary consultant status, and will have clinical responsibilities as well as responsibility for the teaching services in the hospitals.

Research facilities are being developed and a research and teaching block is at an advanced planning stage. It is expected that the successful applicants will be involved in the final development of this building as in the other considerable building developments which are taking place. The University sees these posts as being of key importance in developing relationships between the existing Medical School which is being doubled in size and the new Teaching Hospital Group.

Further particulars may be obtained from the Registrar, University of Manchester, Manchester M13 9PL. Quote ref.: 231/69/JMB. (12471)

UNIVERSITY OF BELFAST

LECTURESHIP IN VIROLOGY

The Senate of The Queen's University of Belfast invites applications for a Lectureship in Virology (non-medical) in the department of microbiology from February 1, 1970, or such other date as may be arranged. All applicants should have experience of general virology and senior applicants should have experience of general microbiology in addition. Salary range is £1,585 to £2,850, plus contributory pension rights under the F.S.S.U. Initial placing on the salary scale will depend on qualifications and experience. Applications should be received by December 31, 1969. Further particulars may be obtained from the Secretary, The Queen's University of Belfast, Belfast: BT7 1NN, Northern Ireland. (13195)

UNIVERSITY OF OXFORD

Applications are invited for the following university appointments within the teaching hospital (the United Oxford Hospitals):

- (1) LECTURESHIP IN BACTERIOLOGY
- (2) LECTURESHIP IN HAEMATOLOGY
- (3) LECTURESHIP IN MORBID ANATOMY
- (4) TUTORSHIP IN PATHOLOGY

These appointments, which will be supported by a special grant, are related particularly to a newly designed introductory course for clinical students, for which a new teaching laboratory is being built, and will be made for the period of the grant, viz. five years; there is no assurance at present of continuation beyond this period, though efforts will be made to secure funds for that purpose.

The duties of posts (1)-(3) will be primarily to assist in teaching in the undergraduate school, under the Director of the new teaching laboratory, with particular emphasis on the new introductory course, and also to assist in postgraduate teaching; there will be opportunity to engage in research and to take part in the service work of the appropriate department. The duties of post (4) will be similar, except that they will include the co-ordination of the teaching of laboratory medicine in the undergraduate school. Successful candidates may receive an honorary appointment (below consultant level) with the hospital board.

Candidates for posts (1)-(3) should hold a higher degree and desirably have an interest in teaching; they should have had a broad training in the main branches of pathology, and have a special interest in one of them. Candidates for post (4) should be similarly qualified, except that a special interest in morbid anatomy and histology would be preferable (but candidates with a special experience in any of the other branches would not be excluded) and teaching experience would be an advantage.

Salaries on appropriate scale, according to qualifications and experience: Lecturers, Scale II (£1,885-£2,725) or Scale III (£2,860-£3,235); Tutor, £2,175-£2,985, or Scale III. F.S.S.U. Appointments to be taken up at March 1, 1970, or as soon as convenient thereafter.

Applications (five copies), by December 31, 1969, with curriculum vitae, and the names of two referees, to the Secretary of the Medical School, Medical School Offices, 43 Woodstock Road, Oxford, from whom further particulars may be obtained. (25614)

BARROW AND FURNESS HOSPITAL
MANAGEMENT COMMITTEE
North Lonsdale Hospital

SENIOR HOUSE OFFICER

Accident, Emergency and Orthopaedic Department
Applications are invited for a resident post of Senior House Officer in the accident, emergency and orthopaedic department at the North Lonsdale Hospital, Barrow-in-Furness, for a period of about eight months from the second week in December.

This post is one of three in the department.

Postgraduate medical facilities and good medical library are available. Applications to the Group Secretary, "Priors Lea," Abbey Road, Barrow-in-Furness. (13174)

BATTLE HOSPITAL, Reading, Berks

SENIOR HOUSE OFFICER

in the Reading area accident and orthopaedic service. Post recognized for F.R.C.S. Modern flat probably available.

Accident unit serves population of 40,000, bulk of work consisting of major trauma, but there is a small amount of "cold" orthopaedics. Successful candidate will be part of team, with duties divided between wards, operating theatres and new, well equipped accident reception department, including resuscitation rooms and two operating theatres. Post offers good experience in management of acute trauma, and there are good facilities for postgraduate study. Write, giving names of two referees, to Hospital Secretary. (13036)

INDUSTRIAL APPOINTMENTS

TUBES AND PIPES DIVISION
NORTHERN TUBES GROUPIndustrial Medical Officer
CORBY WORKS

A vacancy exists for an Industrial Medical Officer at the large integrated Iron and Steel Works in the new town of Corby on the edge of the pleasant Northamptonshire countryside, where prospects for buying or renting accommodation are good.

The successful applicant will work under the general direction of the Group Medical Adviser but will be expected to undertake on his own a fair measure of clinical and administrative responsibility.

A comprehensive industrial health service is available to some 13,000 employees—there is therefore excellent opportunity to practise good clinical medicine with casualty surgery and also minor orthopaedics for anyone competent in this field.

Applicants should be interested in making a career in industry, and previous industrial or service experience though not essential would be an advantage.

The commencing salary will be within the B.M.A. Recommended Scale (Medical Officer Grade) and will depend on qualifications and experience.

Please write for an application form to:

**Manager/Personnel,
Tubes and Pipes Division,
British Steel Corporation,
Corby, Northants.**

**MICROBIOLOGICAL RESEARCH ESTABLISHMENT
Porton, Wiltshire.****Head of Immunology Section
(S.P.S.O.)**

Research in the field of immunology has been active at the Microbiological Research Establishment for some years but the emphasis, initially largely chemical, has become increasingly biological. The Head of the Immunology Section will lead a team engaged mainly on work on immunological mechanisms, an essential counterpart to other research in the Establishment on pathogenesis of infections transmitted by the airborne route or by arthropods, and on its prevention and treatment: in addition, he will be expected to initiate and carry out individual research within the general area of infectious disease.

The Establishment possesses a very well equipped animal house where pathogens can be handled safely. Facilities exist for the production of microbial products on a substantial scale and there are available a considerable number of preparative and analytical techniques in microbiology, biochemistry and biophysics including an electron microscope.

Candidates should normally have a first or second class honours degree in microbiology, biochemistry or biophysics, or have a medical or veterinary qualification. A medical qualification, though not essential, would be an advantage and appointment at Deputy Chief Scientific Officer level would be considered for a suitable candidate with high medical qualifications. Candidates must have had extensive research experience in the study of both humoral and cell-mediated immunological mechanisms, preferably in a medical context.

Starting salary could be above the minima of the following scales:

£4045-£4620 - Senior Principal Scientific Officer

£4830-£5330 - Deputy Chief Scientific Officer

Non-contributory pension.

Fuller details of this appointment may be obtained by writing to the Civil Service Commission, 23 Savile Row, London, W1X 2AA, or by telephoning 01-734 6010 ext. 229 (01-734 6464 "Ansafone" service after 5.30 p.m.). At all times please quote S/7290/AM. Closing date 22nd December, 1969.

**DOWN COUNTY HEALTH
COMMITTEE****APPOINTMENT OF DIVISIONAL
MEDICAL OFFICER**

Applications are invited from registered medical practitioners holding a Diploma in Public Health, Sanitary Science or State Medicine, for the above whole-time position in the No. 2 (Newtownards and Bangor) Division (population 76,000). Applicants must also be qualified in accordance with the Health Authorities (Qualifications and Duties of Medical Officers) Regulations (N.I.) 1966 (S.R.&O. 1966, No. 108).

The person appointed will also act as Medical Officer of Health to the District Councils in the Division, and will receive an allowance in respect of the number of appointments held—at present £340 per annum.

Salary will be within the scale (including present allowance) of £3,190 × 95(4) × 60(2)—£3,690.

Application forms and conditions of service may be obtained on request, and completed applications must be lodged with the SECRETARY, Down County Health Committee, 65 University Street, Belfast BT7 1HN, by December 31, 1969.

Canvassing will disqualify. (H.6104)

PUBLIC HEALTH**NORTHAMPTONSHIRE COUNTY COUNCIL
HEALTH DEPARTMENT****Senior Medical
Officer**

This post should be attractive to those interested in administration, and it also provides many opportunities for research. It carries responsibility for the Adult Health Division of the Department and for the supervision of the Department of Social and Preventive Medicine at Kettering General Hospital. The implementation of family planning schemes, the rehabilitation of patients, and the development of screening programmes through general practice, will be of particular concern to the person appointed.

There will be an opportunity to participate in the planning of health centres, which are being developed throughout the County. Many links have been developed with general practitioners and with the hospital service in the area, in which the population is undergoing rapid expansion, and the person appointed will be expected to assist in the maintenance of these links and the establishment of others.

Salary within the scale £2,610-£3,165 p.a. There is a grant of 50% of the cost of removal expenses, not exceeding £50.

Further details will be sent on request.

Applications, giving details of age, qualifications and experience, and the names of three referees, should be sent by December 12, 1969, to:

Dr. W. J. McQuillan,
County Medical Officer of Health,
County Hall,
Guildhall Road,
Northampton, NN1 1DX.

O. MEURIG JONES,
Clerk of the County Council.

APPLICATIONS ARE INVITED FOR positions of Assistant or Associate Professor in the Department of Anatomy, Sir Charles Tupper Medical Building, Halifax, Nova Scotia, Canada. Owing to the revised medical curriculum, and the larger classes in medicine, it has become necessary to enlarge the staff for instruction in the areas of gross and neuroanatomy. Previous teaching experience in anatomy is essential, and preference will be given to applicants who have had both teaching and research experience. The salaries offered are in line with those offered by other Canadian schools, but take into consideration the training and qualifications of the applicant. The school of medicine is housed in one of the most modern buildings in Canada, and the department of anatomy has excellent research facilities. It is well equipped for work in the fields of light, conventional and scanning electron and x-ray microscopy. Applications should be made to the Secretary, and contain a biography, recent photograph and names of three referees.

UNIVERSITY OF TASMANIA FOUNDATION CHAIR OF OBSTETRICS AND GYNAECOLOGY

The University invites applications for appointment to the Foundation Chair of Obstetrics and Gynaecology in the Faculty of Medicine.

The decision to establish a Medical School was taken with the support of the Tasmanian State Government and the Australian Universities Commission, the body responsible for advising the Commonwealth Government on the provision of funds for universities. The first intake of 38 medical students was accepted in 1965, the first preclinical courses were offered in 1966, and teaching in clinical subjects began in 1968. The first students will therefore qualify for their degrees at the end of 1970.

The Department of Obstetrics and Gynaecology is at present under the control of a half-time Director. This position will lapse at the end of 1970 and it is proposed that the Professor take up his duties at the beginning of 1971. A full-time and permanent position of senior lecturer has also been established and has been filled on a temporary basis for a period of three years.

The current professorial salary is \$A12,000 per annum. In addition, clinical professors with medical qualifications receive a salary loading which at present is \$A1,900 per annum.

Members of clinical departments may undertake a limited amount of private consultant practice under conditions approved by the University Council.

Conditions of appointment and application forms may be obtained from the Secretary-General, Association of Commonwealth Universities (Appts.), 36 Gordon Square, London W.C.1.

Applications close on **February 2, 1970.**

The University reserves the right to fill the position by invitation at any stage, or not to make an appointment.

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Medical Director: J.
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.
St. Andrew's Hospital is a private psy-
chiatric hospital situated in 130 acres of
parkland in the county town of Northampton.
In general, patients are admitted to Wantage
House, a reception unit in the grounds,
which is equipped for the investigation and
treatment of all forms of mental and nervous
illness. In addition, there is accommodation
mainly in private rooms, both in the main
hospital and in various villas, for longer
stay patients and geriatric patients.
The hospital's amenities include Gloucester
House, which comprises an occupational
therapy department, a swimming-pool, a
squash court and library, while in the
grounds there are tennis courts, a nine-hole
golf course, etc.
Fees range from 25 guineas per week, and
subscribers to private medical insurance
schemes, such as British United Provident
Association and Private Patients Plan, may
claim benefit in respect of these charges.
Further particulars may be obtained from
the Medical Director, St. Andrew's Hospital,
Northampton (Tel.: Northampton 34354),
who can be seen in consultation by appoint-
ment, either at the hospital or at 55 Harley
Street, London W.1.

Now you can drink Clinimycin

Clinimycin Syrup— Glaxo's new 125mg/5ml oxytetracycline syrup

Clinimycin is the ideal way of giving oxytetracycline to the very young and the elderly patient. The syrup has a pleasant fruit flavour and provides a uniform suspension which ensures accurate dosage every time. Clinimycin is one of the least expensive oxytetracycline syrups and its orange colour makes it readily identifiable. Quite a few good reasons for remembering Clinimycin Syrup when prescribing for your very young and elderly patients. Of course, if you feel that tablets are the answer, Clinimycin Tablets are still among the smallest and

least-expensive of oxytetracycline available.
