

# What happens if CMC is added to ACTH?

## **CROOKES ACTH/CMC**

ACTH/CMC is ACTH with a difference. The difference is convenience. ACTH/CMC is a clear, mobile liquid, even under storage conditions. It is highly purified, has a prolonged storage life and is virtually painless on injection.

Which all adds up to easier therapy in bronchial asthma, Bell's palsy and rheumatoid arthritis. Even with long courses there are no dangers of withdrawal symptoms. ACTH/CMC stimulates natural corticosteroid production. And so it removes the risk of adrenal atrophy so common with synthetic corticosteroid treatment.

### Data Handling in Epidemiology

Co-ordinating Editor **W. W. HOLLAND**

This book contains a selection of papers presented at the 5th International Scientific Meeting in Yugoslavia of the International Epidemiological Association and many additional chapters, by nineteen authors from different parts of the world. It is concerned with the uses of statistics in large-scale epidemiological studies, and with the wealth of information which these can give on the social context of disease and medical care.

It is not intended to be a textbook on statistics or epidemiology. Its outstanding feature is that it brings together in a comprehensible form a wide range of studies on the ways in which methods of handling data promise to revolutionize the study of disease. Beginning with an introductory chapter outlining the tremendous effect that computers have on the collection and analysing of information about diseases, the various steps taken in the acquiring of information are described and analysed in logical sequence, from the choice of questions to be asked in a survey to the analysis of information, and finally the implications which this holds for health policy. Throughout, there is a constant interplay between the three specialized disciplines of computer science and technology, epidemiology, and statistics, which, the authors stress, permits the introduction of new forms of analysis, and sets a new standard in the reliability of health service activities.

### Psychiatric Epidemiology

Proceedings of the International Symposium held at Aberdeen University 22-25 July 1969  
Edited by **E. H. HARE** and **J. K. WING**

All too little is known about the cause of most psychiatric illness, but a vast amount of epidemiological research in psychiatry is now being carried out and is gradually leading to a fuller understanding of its complex problems. In this volume some of the foremost workers in the field report their recent studies and map out the directions in which the most rapid progress is being made.

A source of bias in psychiatric judgement is the psychiatrist himself, and this aspect is considered here by two international teams who have investigated the extent to which psychiatrists trained in different countries may give a different diagnosis to the same case.

# As a doctor, you'd be better off abroad. Or would you?

Obviously, the decision's a difficult one. Especially if you're only just about to register.

So may we suggest something?

Rather than taking up a normal practice here or leaving the country, try the Royal Army Medical Corps. And you'll get the chance to do both.

Because, for some of the time, in the RAMC you're likely to see something of the world: in Germany, Cyprus, or maybe on exercises in countries from Canada to the Far East.

You can join for 3 or 5 years. And in that time you'll not only travel, you'll also gain valuable medical experience.

You'll hold the rank of Captain. And at say 24 years of age you earn around £3395 gross p.a. On top of that, there are all sorts of allowances.

Your surgery is well equipped by the Army. And you won't just be dealing with soldiers. There are wives and children to care for, too.

What's more, you get 6 weeks' paid leave every year.

At any time during your service, you can apply to stay on for a Regular Commission. And have the opportunity of specialising. In fact, around 70% of all Regular Officers do take up post-graduate studies.

Alternatively, you can leave at the end of your Short Service Commission.

All the better for the experience and for a tax-free gratuity. You get £1500 after 3 years. £3000 after 5.

So think about it. And before you decide on anything, find out more about the RAMC.

If you want full details, or want to meet an RAMC Officer, write to **Colonel T. S. Hart, MB, DPH, DTM & H, RAMC, Ministry of Defence (AMD<sub>2</sub>), Dept. 708 Lansdowne House, Berkeley Square, London, W1X 6AA.**

# Obesity

*Is diet and suppressing appetite the answer?*

There are many lean people who overeat and there are many obese patients who are not gluttons. The often heard plea - 'I eat very little but get very fat' - is frequently true. This has been proved by some patients who have failed to lose weight even on total fasting.

When patients do not lose weight on diet recourse is often made to appetite depressant drugs. However it does not appear logical to expect such drugs to produce weight loss if the patient is still taking the same calorie intake.

An answer would be to give the obese patient the metabolism of the lean subject. Fortunately such a treatment is now available in glycoliptic therapy. Already many refractory obese patients have, without diet, lost substantial amounts of weight with glycoliptic therapy. Have you thought of the benefits of glycoliptic therapy for your refractory and other obese patients?

# Obesity

- produces substantial weight loss with or without diet, up to 44lb. loss recorded in 8 weeks on free food intake
- gives a 'lean' metabolism to the obese by increasing muscle glucose uptake and mobilising fat
- does not cause cerebral stimulation
- is not metabolised to stimulant products
- has a mild hypotensive effect
- reduces anxiety tension
- benefits the obese diabetic
- does not produce tolerance
- is heavily supported by authoritative reports in leading medical journals
- is prescribed more than any other anti-obesity product

### **also**

*"Obesity is associated with a decreased peripheral glucose and oxygen uptake, both of which are inversely correlated with skinfold thickness. Weight reduction results in an improvement of the uptake of both. Fenfluramine induces weight loss not directly related to changes in blood flow, and increases the glucose uptake,*

*"Fenfluramine induced a significant increase in free glycerol, free fatty acids, and 'ketone' levels in the plasma and produced a decrease in triglyceride levels. Total cholesterol levels were unaffected. It is concluded that fenfluramine produced a fat-mobilising-effect at these dose levels in the volunteers investigated."*

## Book reviews

Psychological Medicine is a journal for the publication of original research in clinical psychiatry and the basic sciences related to it. These will comprise not only the several fields of biological inquiry traditionally associated with medicine, but also the various psychological and social sciences whose relevance to medicine has become increasingly apparent. Editorials and commissioned review articles will also be published from time to time.

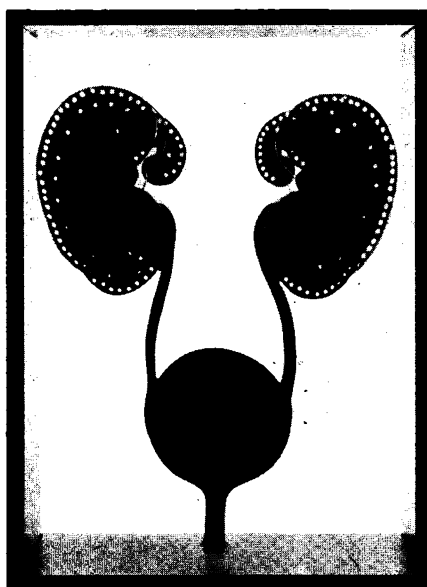

The first issue, November 1970, is published today. Subsequent issues will appear quarterly in February, May and August. Each issue will contain approximately 80 pages. The title page, contents list and volume index for the first five issues will be contained in the November (1971) issue.

## Clear reasons for using Septrin

Abstracted from a Leading Article in the *British Medical Journal*<sup>2</sup>.

- ☐ Trimethoprim not only attains therapeutic tissue levels, but is excreted unchanged in high concentration in the urine.
- ☐ All Gram-negative bacilli occurring in the urine, except *Pseudomonas aeruginosa*, are usually highly sensitive to it.
- ☐ Its minimum inhibitory concentration is extremely low.
- ☐ Trimethoprim and a sulphonamide, by blocking successive stages in the same bacterial metabolic process, exert a strong synergic effect, and this action is bactericidal.

# Who is the World's biggest producer of analgesics?

It's probably not widely known that Winthrop and its associated companies are the biggest producers of analgesics in the world.

We don't normally make a lot of noise about it for, like you, we believe that quality is much more important than quantity.

That's why our analgesics like Panadol, Panadeine Co., Solpadeine and Fortral are subjected to a whole host of quality-control tests before they are allowed to get into the hands of your patients.

In other words, we concern ourselves purely with quality and leave you to decide on matters of quantity.

We've found it a happy arrangement up till now!

# is it gout?

Gout does not always present in the classical manner, with an inflamed big toe. It can present as pain in almost any joint. Colicky pain due to urate stones is sometimes a precursor of gout.

In circumstances like these it is worth remembering gout and having the serum uric acid level checked.

If the diagnosis is gout, ZYLORIC\* is there to provide effective prophylactic treatment. ZYLORIC provides the rational way of treating gout by controlling uric acid formation and so preventing the acute attacks and the degenerative changes associated with the history of the disease.

# HAPPILY EVER AFTER

'Keflex' offers a combination of effectiveness and safety which is unsurpassed by any other antibiotic.

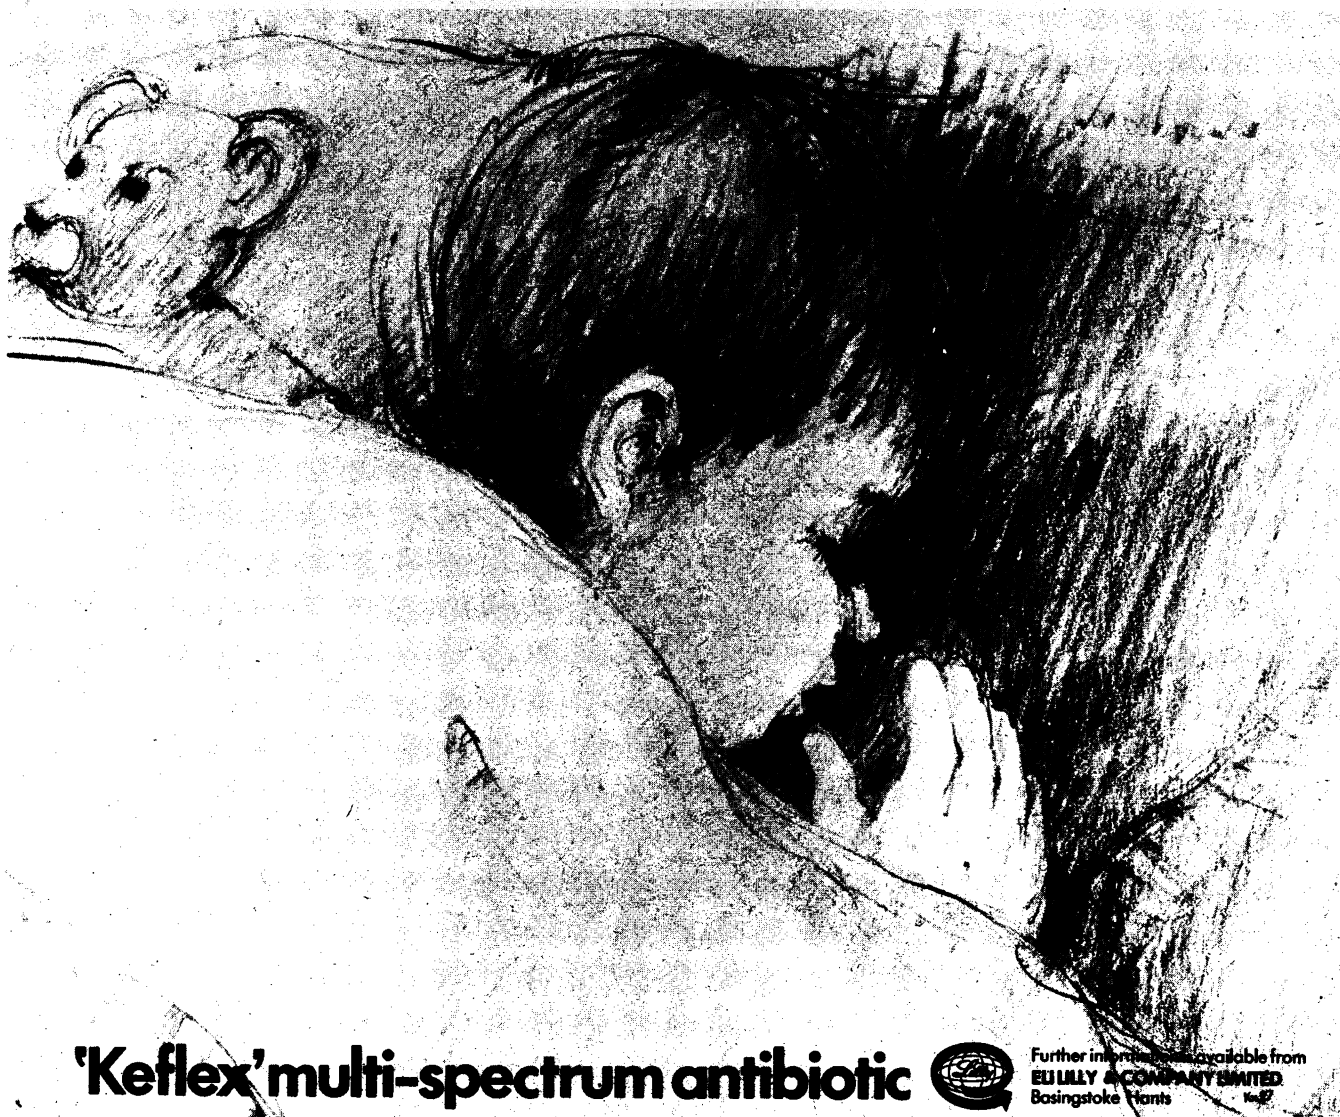

No reports of teeth staining or renal damage, a very low incidence of rash and gastrointestinal disturbance make it particularly suitable for the treatment of bacterial infections in children. Add broad-spectrum, bactericidal action and resistance to penicillinase and it's easy to see why so many children recover so quickly with so few complications after 'Keflex' therapy.

'Keflex' Suspension is supplied in 100 ml bottles containing 125 mg cephalixin (as the monohydrate) per 5 ml. 'Keflex' is also available for older children and adults as capsules each containing 250 mg cephalixin (as the monohydrate).

... that there are no recommended prices for **CARPETS**. They realise that offers of 30% or 33½% discount mean absolutely nothing.

Many claim to give large discounts—we just say that our prices will stand comparison with anyone's. Couple this with the vast choice available in all our showrooms (the London Carpet Department is believed to contain the largest selection in the country with over 4,000 different carpets beautifully displayed) and you really can't go wrong.

We also have a huge, constantly-changing range of **FURNITURE**. Most makes have a recommended retail price and our discount varies from 15%–20%\*

# When you are ill we can foot the bills.

When you are ill your earnings soon stop. Your outgoings won't.

Rent, mortgages, family housekeeping, staff wages and school fees still have to be paid.

Medical Sickness can take this worry off your shoulders with a sickness and accident insurance policy. Then when you can't work because of illness or accident we can start paying you an agreed sum each month during your incapacity. And we'll go on paying either until you're fit enough to get back to work or until normal retirement age, whichever is earlier. And we can't cancel the policy because of long or frequent claims.

If you have not yet got around to ensuring that we can foot the bills when you're ill write to us today quoting reference number 5012. You will be surprised how little this essential cover will cost.

# Glaxo brief

## Introducing new Golden Ostermilk

Golden Ostermilk is a complete milk food for babies. It is homogenised, spray-dried and instantised so it mixes more conveniently, more hygienically. It is made from full-cream milk, and contains vitamins A, D, C and extra iron, in recommended daily quantities, which babies need to grow healthy and strong. From the very beginning baby finds Golden Ostermilk easy to digest. And as Golden Ostermilk is homogenised there is no separation of fat which might cause vomiting, and no separation of the fat soluble vitamins A and D. Golden Ostermilk needs to be mixed in a new way. It's called the warm-mix method and it means mother can mix baby's feed in a few moments in a wide-neck feeding bottle. It's safer for baby because there's less risk of carrying infection from mixing utensils to the bottle, and it's simpler for mother, too. And there's a free Golden Ostermilk Presentation Box for mothers of new babies in your area – ask your local Glaxo representative for details.

## Bronchopneumonia – a case for Ceporex

Mrs. Murray is seventy. Her doctor has just diagnosed bronchopneumonia, possibly due to mixed infection. That's why Ceporex is being prescribed. Ceporex kills both the gram-positive and gram-negative organisms which are commonly responsible for respiratory infections. Ceporex absorption is rapid and virtually complete giving high serum levels within an hour of administration. Ceporex is well tolerated, has low toxicity and can be considered in patients hypersensitive to the penicillins.

## Tricloryl Syrup – the safe and reliable hypnotic

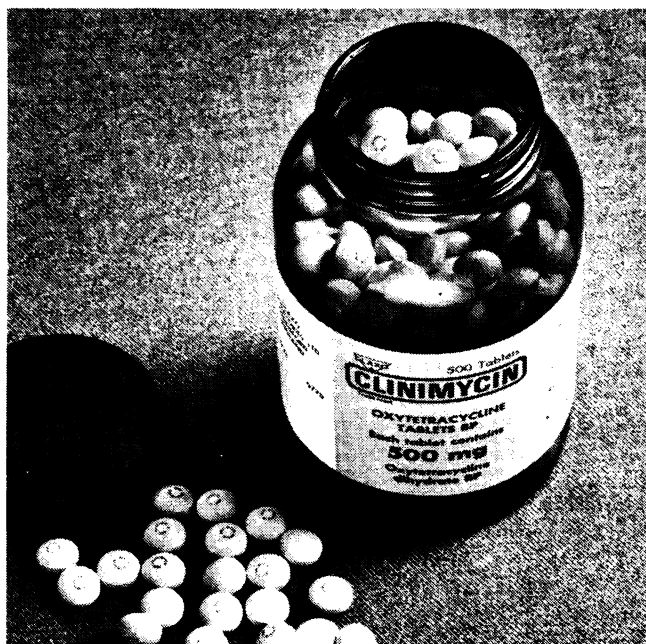

Tricloryl Syrup provides a safe and reliable hypnotic for the elderly and young patient. Tricloryl is unlikely to cause 'hangover' and is generally well tolerated. The pharmacology of Tricloryl is essentially that of chloral hydrate, but Tricloryl is palatable, making it suitable for children. Whenever a mild hypnotic is required, Tricloryl is the safe answer.

## Clinimycin Tablets – new 500 mg strength, same high quality

Now there's a wider choice in oxytetracycline therapy – Clinimycin Tablets are available in a new 500 mg strength for the treatment of 'acute or chronic' bronchitis. Each tablet has the name Clinimycin printed on it, so it's easy to identify.

Clinimycin 250 mg tablets are the smallest oxytetracycline tablets available and are easy to swallow.

Clinimycin Syrup (125 mg/5 ml) has a pleasant fruit flavour and a uniform suspension which helps achieve accurate dosage every time.

Good reasons for prescribing Clinimycin.

## Tinaderm Powder guards against athlete's foot

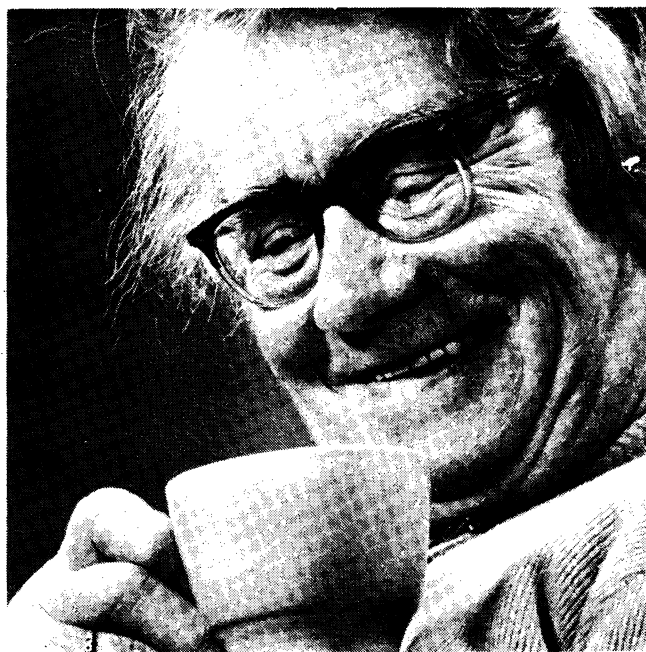

Recommend Tinaderm Powder this winter to all your patients who are exposed to tinea infection – school children, athletes and sportsmen. Tinaderm Powder (containing tolnaftate the most effective topical fungicide) improves foot hygiene as well as guarding against athlete's foot.

For best results, the powder (in an easy-to-use sprinkler tin) should be dusted regularly into footwear, socks and stockings.

## Complan – when nutrition is a problem

Complan greatly simplifies nutritional problems in hospitals and the home. Complan contains the protein, carbohydrates, fats, vitamins and minerals necessary to maintain a nutritional state in the patient as near the normal as possible. Patients who are unable or unwilling to swallow solid food may be completely nourished by Complan alone – administered as a drink or as a tube feed.

## Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

## The New General Practice 2

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

PRICE 25s. (U.S.A. \$3.50), *including postage*

## Today's Drugs

New 1970 Edition

The problem facing the prescribing doctor today is choice. Catalogues of drugs—no matter how detailed—are of little help unless accompanied by advice on which drug to give for what condition. So this new edition of "Today's Drugs" not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy.

The new edition differs from the earlier one in other ways. It deals with only three subjects—infections, vitamin deficiencies and anaemias, and disorders of the nervous system. Further volumes will be published at intervals of about a year, and by the time the whole field of therapeutics has been covered this first volume will have become obsolete and due for replacement. In order to further emphasize the ephemeral nature of books on therapeutics—and to cut costs—the book is a paperback.

**UNIVERSITY OF EXETER  
Postgraduate Medical Institute**

A full-time postgraduate course lasting 10 weeks will begin on January 13, 1971. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialise in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the retraining for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (12746) 2

**PRACTICES  
(Executive Council)****WEST RIDING EXECUTIVE COUNCIL  
Horsforth, near Leeds**

Applications are invited for a small practice vacancy at Horsforth. "Open" Area. List at present 680 patients. Surgery accommodation available for rental. Hospital facilities available at Leeds.

Further information and application Form EC16A obtainable from B. England, Clerk, West Riding Executive Council, 5 St. John's North Wakefield. Closing date for receipt of application is Friday, December 12, 1970. (H6929) 3

**HERTFORDSHIRE  
EXECUTIVE COUNCIL  
VACANCY—OXHEY  
(GREATER LONDON COUNCIL ESTATE)  
WATFORD**

Applications are invited for a Vacancy in a "Designated" area, due to retirement of a single-handed doctor. The list of the retiring doctor is approximately 3,000. Residential and practice premises in a house leased from the Greater London Council are available to the appointed successor—lease to be negotiated.

The area attracts a Designated Area Allowance.

Application Forms E.C.16A, which must be returned by first post on December 14, 1970, and further particulars obtainable from The Clerk, Hertfordshire Executive Council, Crown Court, Pegs Lane, Hertford, Herts. Telephone Hertford 3195. (H6886) 3

**MEDICAL PRACTICE VACANCY****PENICUIK—MIDLOTHIAN**

Applications are invited from registered medical practitioners willing to form a new medical practice in Penicuik Midlothian (10 miles south of Edinburgh) to meet the rapid population growth. An Initial Practice Allowance will be made available and every encouragement and assistance will be given by the existing group practice although it will not be possible because of limitation of practice accommodation for the new practitioner to become a member of the group. It is possible that surgery accommodation may be made available initially at one of the local authority clinics and modern residential accommodation is available within the Burgh. There is a considerable programme of new housing, both private and local authority, with an estimated increase of population of at least 3,000 within the next 2-3 years.

Further information and application forms from The Clerk, Lothians and Peebles Executive Council, Elliott House, Hillside Crescent, Edinburgh, EH7 5BL with whom applications should be lodged by December 7, 1970. (H6871) 3

**GENERAL PRACTICE****HOSPITAL-GENERAL PRACTICE  
LINKED TRAINING SCHEME**

A new scheme is to be introduced in February 1971 at Cirencester—one year in Hospital (S.H.O. grade) and one year in General Practice (Trainee Assistant Grade). During the Hospital year some training will be given in all the main specialties.

Preference will be given to candidates who have done an Obstetric post. Applications on forms obtainable from The Acting Group Secretary, Princess Margaret Hospital, Swindon, Wilts. Closing date: December 19, 1970. (39499) 4

**UNIVERSITY AND RESEARCH APPOINTMENTS**

(see also OVERSEA)

**MEDICAL RESEARCH COUNCIL (BRAIN RESEARCH)**

Applications are invited for two posts to work on the investigation of cerebral evoked potentials in man, and the application of this technique in clinical neurology and psychiatry. The work provides the opportunity to gain familiarity with the use of on-line computing facilities, and an interest in programming would be an advantage for one of these posts. Those with experience in electroencephalography, neurophysiology or neuropsychology, or in the field of medical computing, would have an advantage, but previous experience is not essential. Candidates need not necessarily be medically qualified. The posts offer considerable scope for those interested in furthering fundamental and applied research in this field. Terms and conditions on M.R.C. scales in accordance with age, qualifications and previous experience.

**PATHOLOGIST**

With a view to filling an impending vacancy in the position of Clinical Pathologist, suitably qualified medical graduates who may be objectively interested are invited to communicate with the Chief Pathologist (Dr. J. M. Moyes) and/or to make written applications with all customary personal and professional details, by December 20, 1970.

Owing to limitation of space, the present full-time medical staff establishment of the Department of Pathology is restricted to the posts of Chief Pathologist and Clinical Pathologist. Essentially therefore, applicants will be prepared to maintain active interest in various sections and, from time-to-time, to deputise for the Chief Pathologist in the work and administration of the Department as a whole.

At the same time it will be appropriate for the appointee to have and/or develop a special interest, including research, with a high degree of section independence, either in Biochemistry, Haematology or Bacteriology.

New accommodation for a self-contained section will be available in a few weeks; another such improvement will be completed in 1971, and entire re-accommodation of the Department is foreseeable.

The appointee will be qualified, or in line for qualification, as a "Specialist" as defined by the Medical Officers' Hospital Specialists (State) Award, the current salary range being \$10,032-\$12,566 according to years of service with such qualification, plus an administrative allowance, currently \$360 per annum.

Enquiries should please be addressed to the Chief Pathologist; Applications to the Chief Executive Officer; Postal Address—The Women's Hospital (Crown Street), Darlinghurst, N.S.W. 2010, Australia. (13070) 61-1

# Hazard Ahead...

**but with care, one that is readily overcome.**

The 'Hazards' facing you and your family are not so easily tackled, but with the same care you can provide for yourself and your dependants with the right type of insurance.

Understandably, you may not know where to start, but the Medical Insurance Agency, with its knowledge of the insurance market and of the needs of the medical and dental professions, will help you to find the policy that is exactly right for you.

## Not just a pretty face.

Now, in an entirely new format, comes the Heinz booklet, "From Milk to Mixed Diet." The new edition covers feeding and development from birth right up to the toddler stage. Written under the supervision of a leading paediatrician, it follows the concept of feeding by weight rather than age. It will prove a useful reference to mothers, helping them to

cope with their day-to-day feeding problems. We'll be pleased to send you copies (without charge) for your own use and for mothers under your care.
