

three faces of Valium* Roche

1 Valium Roche in simple anxiety

Anxiety may be a physical, as well as an emotional state. Often, it presents as a rather bizarre pattern of largely physical symptoms, things like headache, 'dyspepsia', insomnia, muscular pains and disturbances of appetite.

Hundreds of clinical trials, involving tens of thousands of patients in almost every country in the world have shown that Valium Roche affords remarkable symptomatic relief in such cases, 'curing' a long list of apparently intractable physical symptoms.

2 Valium Roche in psychosomatic illness

Sometimes, anxiety disturbs physiological or bio-chemical function to the point of producing functional or structural disorders. Such conditions take on a life of their own and demand – in addition to the relief of anxiety – active, specific treatment.

In such cases Valium Roche curbs anxiety and – coupled with specific treatment – helps to ease or eradicate a long list of conditions involving the skin, gastro-intestinal tract, the heart and circulation, the muscles and the organs of reproduction and excretion.

3 Valium Roche in organic disease

Even patients whose clinical condition is clearly organic can become excessively anxious. When they do, the anxiety and its physical effects may hinder recovery or – in conditions like myocardial infarction – amount to a major complication.

Valium Roche has been used in many such cases. Invariably, it produces a sharp improvement in the patient's emotional outlook and attitude. Where anxiety has produced an increase in sensations of pain or discomfort Valium Roche can afford dramatic relief from organic symptoms.

 wheezing patient

The woman thought she could have stopped her mother dying

The part-time nurse first started looking after people when her mother first had heart trouble thirty years ago. She took on her two brothers, and later added a husband and two children. But she coped happily—until her mother died from a myocardial infarction. Ten days later she became depressed and agitated, with a marked tremor, and the delusion that if she had given her mother more help she would not have died. It was impossible for her to work. Limbitrol was prescribed—and there was a gradual distinct improvement. The tremor went first and has completely gone now. She is in much brighter spirits and is back at work.

LIMBITROL

treats anxiety in a matter of hours and depression in a matter of days

Anxiety symptoms are often relieved in 1 to 2 hours, and depressive symptoms usually respond within 7 to 14 days. Limbitrol is the trade mark for pharmaceutical preparations containing chlordiazepoxide and amitriptyline.

When diag Otitis Media, Penbritin Territory

The right-first-time antibiotic for infections in children

Penbritin is right because it is active against the causative organisms in Otitis Media. Its broad spectrum includes *H. influenzae* which commonly causes this infection in the under fives. This pathogen is insensitive to oral Penicillin V and G and only partially sensitive to the erythromycins. Penbritin destroys it.

Penbritin is right because its safety is well proven. This contrasts with recent publicity drawing attention to the problems of tooth staining and bone deposition which may follow tetracycline therapy.

Two palatable syrups, capsules, tablets and the new paediatric suspension enable you to prescribe Penbritin in the right form for any patient. Injectable Penbritin is also available if required. Following the recent price reduction the average daily cost of treating Otitis Media with Penbritin is just 8½p.

Penbritin is right because it is well proven. Published references involving more than 600 patients with Otitis Media show an overall success rate of 84%. This figure confirms Penbritin as the right-first-time antibiotic.

Dosage:

Children under 10 years — 125 mg q.i.d. $\frac{1}{2}$ — 1 hour a.c.
Older children and adults — 250 mg q.i.d. $\frac{1}{2}$ — 1 hour a.c.
In severe infections these dosages may be increased.

Contra-indication: Penicillin hypersensitivity.

Side-effects: as with other penicillins.

Further information is available on request.

As a doctor, you'd be better off abroad. Or would you?

Obviously, the decision's a difficult one. Especially if you're only just about to register.

So may we suggest something?

Rather than taking up a normal practice here or leaving the country, try the Royal Army Medical Corps. And you'll get the chance to do both.

Because, for some of the time, in the RAMC you're likely to see something of the world: in Germany, Cyprus, or maybe on exercises in countries from Canada to the Far East.

You can join for 3 or 5 years. And in that time you'll not only travel, you'll also gain valuable medical experience.

You'll hold the rank of Captain. And at say 24 years of age you earn around £3395 gross p.a. On top of that, there are all sorts of allowances.

Your surgery is well equipped by the Army. And you won't just be dealing with soldiers. There are wives and children to care for, too.

What's more, you get 6 weeks' paid leave every year.

At any time during your service, you can apply to stay on for a Regular Commission. And have the opportunity of specialising. In fact, around 70% of all Regular Officers do take up post-graduate studies.

Alternatively, you can leave at the end of your Short Service Commission. All the better for the experience and for a tax-free gratuity. You get £1500 after 3 years. £3000 after 5.

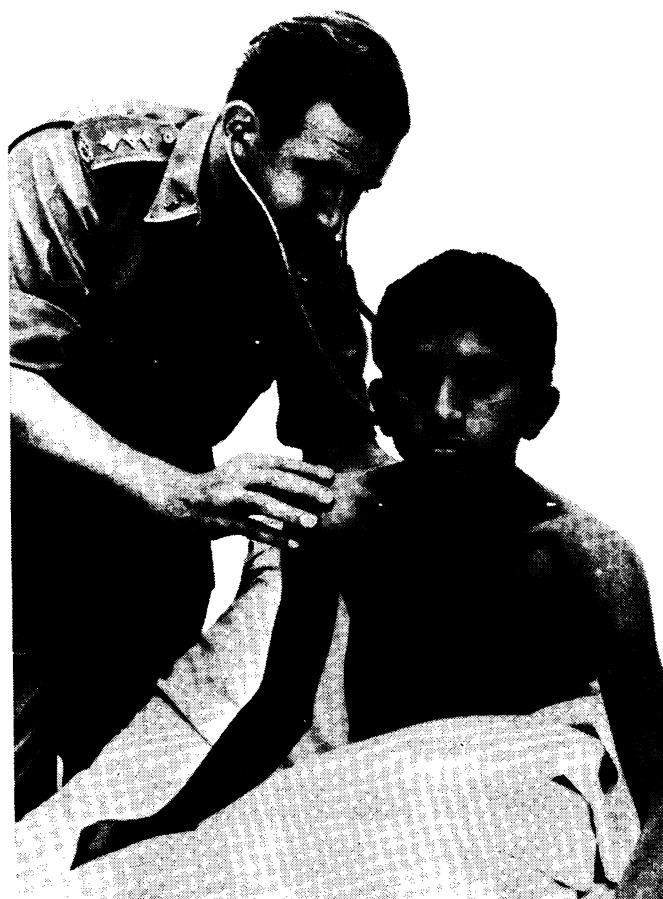

So think about it. And before you

decide on anything, find out more about the RAMC.

Why not visit one of our military medical establishments and see for yourself how you'd get on?

If you want full details of the career, or would like to pay us a visit and meet an RAMC Officer, telephone 01-499 8040 extension 332 or write to:

Diseases of the Urinary Tract

One of the most rapidly growing specialties over the last few years has been that of urology. Many doctors now in practice could not have been taught much of the present-day management of many urinary tract diseases. Last year the *B.M.J.* published a series of "Current Practice" articles on diseases in the urinary tract, and these have now been collected together in a booklet. Beside articles on the newer aspects of the specialty, the booklet contains articles on established methods of managing renal disorders. Any doctor who wishes to bring himself up to date on modern practice in this field will find this a readable account of the important aspects of the specialty.

For children such as Johnny who, every year, seem to be more often in the surgery than out of it, Keflex has a lot to offer.

Rapidly absorbed and reaching high serum levels, Keflex has a broad spectrum of antibacterial activity that even includes penicillinase-producing pathogens, and so increases the chances of first-time success in treating infective episodes.

All these properties, plus an extremely low incidence of rash and gastro-intestinal disturbance, make the pleasant-tasting Keflex suspensions a treatment which ensures that most patients like Johnny can overcome infection quickly and with the minimum of complications.

Emotional distress.

The facade of vague symptoms presented by the depressed, anxious patient makes diagnosis and choice of therapy a particular challenge. For first line treatment, three factors are invaluable:

- Effectiveness against both anxiety and depression.
- Minimal side effects and no dietary restrictions.
- Patient acceptance.

Ceporex Syrup

Glaxo brief

When a child has a chest infection **Ceporex Syrup** reduces the risks and improves the results

Chest infections treated with ampicillin can result in rashes or diarrhoea — risks that are particularly to be avoided when the patient is a child. Penicillin-hypersensitivity and resistant staphylococci are other problems which can complicate treatment. Ceporex (cephalexin) is ideally suited for the treatment of chest infections. It is as effective as the penicillins against the pathogens responsible for the majority of common respiratory conditions, but produces a low incidence of side effects. In addition, Ceporex is effective against penicillin-resistant staphylococci and can normally be used in penicillin-hypersensitive patients. It is well tolerated by children of all ages, including neonates. And Ceporex achieves rapid results, producing high blood and tissue levels quickly; it is not metabolised in the body so it remains fully active to fight infection. Ceporex Syrup has a pleasant blackcurrant flavour which encourages children to finish the course.

Infected eczema: all the better for **Betnovate-N**

Infected eczema means embarrassment, even for the toughest player. Betnovate saves embarrassment. Eczema patients respond better to Betnovate than to other topical steroids. This was demonstrated in two clinical trials,^{1,2} involving 916 patients and comparing Betnovate with five other topical steroids. Their findings included:

"Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate subdivisions of the trial; in no instance was it inferior."

When you add the broad-spectrum antibiotic neomycin to the most effective steroid you can prescribe, the result is Betnovate-N. In infected eczema it controls the infection and gives rapid relief from itching and inflammation, thus achieving the best response.

The one thing to remember is Betnovate. Add an N to fight the infection.

Golden Ostermilk mixes at feeding temperature directly in a wide-neck bottle. The secret is to cool the boiled water to feeding temperature *before* adding the Golden Ostermilk powder. Then all mother has to do is shake the bottle to mix the feed. It's safer for baby because there's less risk of carrying infection from mixing utensils to the bottle and, of course, it's simple and convenient for mother.

Have confidence in Golden Ostermilk.

Minadex

The restorative syrup that children find so easy to take

Thanks to its pleasant orange flavour, sick and convalescent children are always quite ready to take their Minadex.

It's the ideal restorative syrup for you to recommend, because Minadex contains vitamins A and D as well as iron, calcium and phosphorus. It does not contain any alkaloids.

Minadex isn't expensive either and this is important to mothers.

Complan—
when nutrition is
a problem

Complan greatly simplifies nutritional problems in hospitals and the home. Complan contains the protein, carbohydrates, fats, vitamins and minerals necessary to maintain health. Patients who are unable or unwilling to swallow solid food may be completely nourished by Complan alone — administered as a drink or as a tube feed. Recommend Complan in the home, as a supplement to ordinary food when patients need extra nourishment. It is quick and simple to prepare and digests easily — even when the stomach is upset.

If the patient who has started on new therapy is to co-operate fully, maintain his composure and increase his confidence, early effective control of blood pressure must also be accompanied by the lowest possible risk of distressing side-effects. Because ESBATAL* meets these criteria it is of special value for the new hypertensive patient

and also for those patients who are uncomfortable or uncontrolled on other therapy. Individual dosage is rapidly and reliably achieved, and dose response is soon predictable in a particular patient. In a report† of clinical experience with ESBATAL, the authors stated: 'There would now seem to be no case for

beginning treatment with guanethidine or methyl dopa in any new patient. . .'

Full information about ESBATAL (bethanidine sulphate) is available on request.

Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.*, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

THE LOUISE BUCHANAN MEMORIAL FUND PRIZE ESSAY

A prize of £250 will be awarded for an
approved essay on a subject related to the
aetiology, investigation or treatment of
Hodgkin's disease. Two awards of £50 may be
made to essays not receiving the first prize, if
thought to be of sufficient merit. At the time
of submitting the entry, the applicant must be
40 years of age or under, and the essay should
describe work carried out by him, the
significance of which is related to work by
others in the field. The essay must give some
account of original, unpublished work. This
work must have been done within the five
years preceding the date of application. A
length of some 4,000 words would be
appropriate.

The essay must be marked by some
distinctive emblem and bear no indication of
the applicant's identity or place of work. A
letter submitting the essay for consideration
should be sent with it, marked with the same
emblem, which will be retained by the
organizers until the assessors have reported
and made their recommendation with regard
to the award. The decision of the trustees is
final. The trustees reserve the right to publish
the winning entry.

All essays must be received by the
organizers before 1st September, 1972. They
should be sent to The Louise Buchanan
Memorial Fund, 58 Somerset Road, SW19
5JX. (13822) 2

UNIVERSITY OF EXETER POSTGRADUATE MEDICAL INSTITUTE

A full-time postgraduate course lasting 10
weeks will begin on 12th January, 1972.
These courses are held 3 times a year starting
in October, January and April. Each course
includes instruction in general medicine,
paediatrics, preventive medicine, pathology,
psychiatry, orthopaedics and general surgery.
The programme is planned so that students
wishing to specialize in a particular clinical
subject are given facilities to do so, while
other students are taught in each of the main
clinical departments. Unpaid clinical
attachments can be arranged at the end of the
course for students requiring a longer period
of training, but these are normally reserved
for students sponsored by some official body.

It is sometimes possible to accept general
practitioners for 1 or 2 weeks of a course, and
attendance for this period is recognized under
Section 63 of the Health Services and Public
Health Act 1968. These courses are also
recognized under the special scheme for the
re-training for general practice of doctors who
have been out of the Health Service for at
least 5 years. The fee for this course will be
£40 (£83 for students from outside the
United Kingdom).

Further particulars and application forms
for these courses are obtainable from the
Director, The Postgraduate Medical Institute,
The University, Exeter, Devonshire. (14213) 2

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

HOUSE OFFICER: Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

SENIOR HOUSE OFFICER: £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

REGISTRAR: £2,328 per annum x £144(3) x £126(1) — £2,886. Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRAR: £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANT: £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

CONSULTANT: £4,512 per annum x £201(8) x £210(1) — £6,330.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

COMPULSORY RESIDENCE: The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Applications are invited for two non-resident posts of

REGISTRAR

On the 1st February and 1st August in each year two posts become available in the grade of Registrar. They will be tenable for two years in this grade, followed by one year in the grade of Senior Registrar. Promotion to the Senior Registrar grade will, however, be subject to obtaining Fellowship of the Royal College of Surgeons of England and to satisfactory service. Successful applicants will be expected to complete the full three years' training programme, which will provide attachment for a period of six months to each of five of the surgical 'firms' of the Hospital, including the Professorial Unit, giving a broad training in all aspects of Otorhinolaryngology. A period will also be spent in the supporting departments and clinics of the Hospital, such as Pathology, Radiology, Audiology, General Medicine, Neurology, Allergy and Plastic Surgery. Candidates will normally be expected to have passed the Primary Examination for Fellowship of a Royal College of Surgeons but consideration will also be given to previous experience in the Specialty.

The next two posts will become available on the 1st February, 1972, and application forms, obtainable from the House Governor, should be returned by 15th November, 1971. (14202) 39-6

SERVICES

Travel with the Navy for three years before you go into practice.

Just because you've finished your training, it doesn't mean you have to settle down into practice or a routine hospital job.

Especially when you can spend three years, as a naval doctor, seeing something of the world and getting a lot of useful experience on the way.

You'll get plenty of variety and all the responsibility you can handle. And at sea, as the only doctor on board your ship, you will find yourself having to cope with medical emergencies of every kind.

But you're more than just a doctor. Above all you are a naval officer—with the ever-changing scene and the full, satisfying life that every naval officer enjoys.

How do you become a naval doctor?

If you are in your pre-registration year or are already a qualified practitioner, you simply apply to join for a 3-year or 5-year commission. Then, if selected, you enter the Navy as a Surgeon-Lieutenant at £3,395 p.a. You are then given a short course in the special problems of maritime practice (including nuclear and underwater medicine) after which you take up your first appointment.

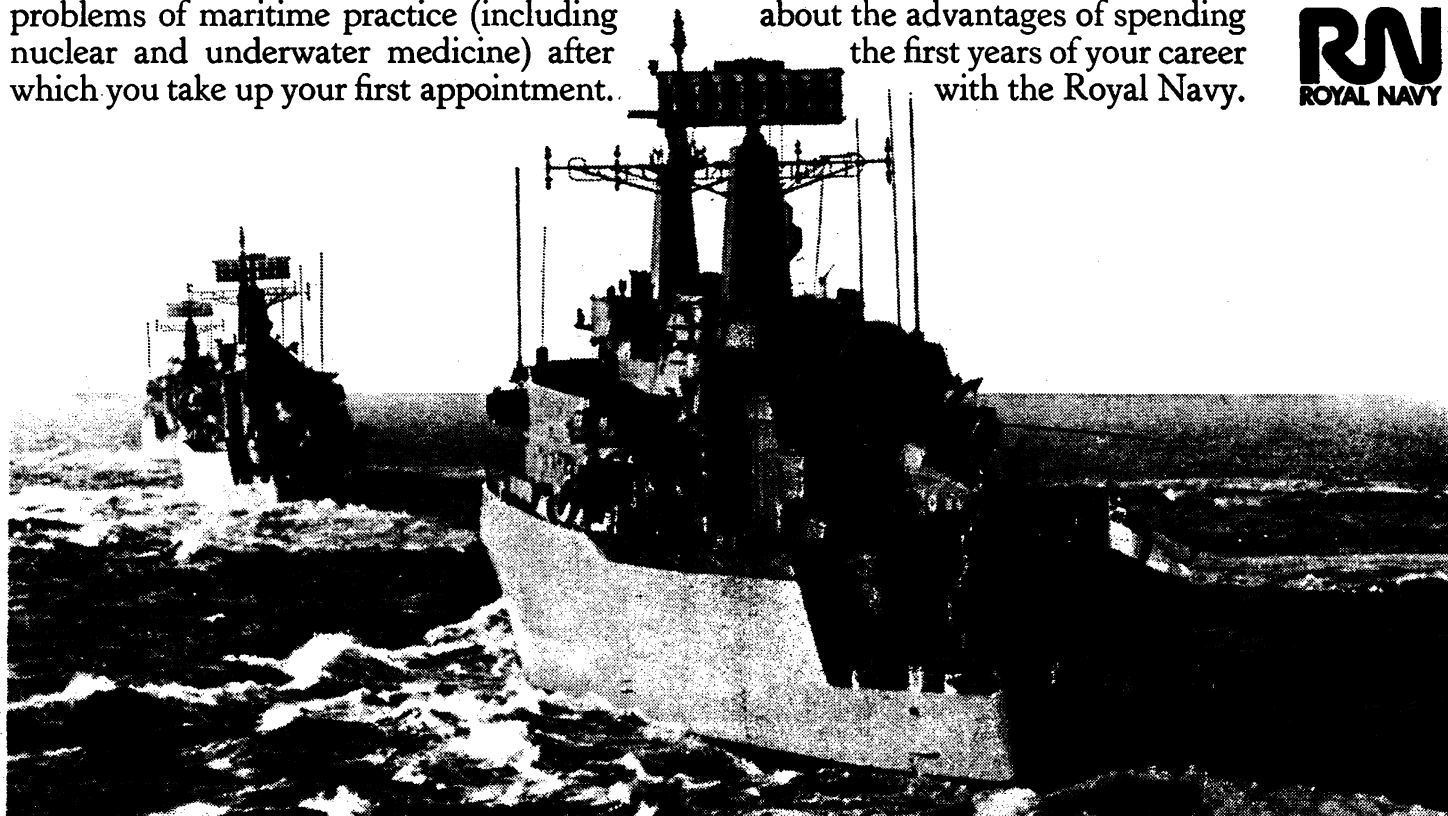

At sea, you would be looking after the health of a whole ship's company. Ashore, you may be looking after their families as well. (So we can even give you experience in obstetrics and paediatrics.)

And, at the end of your commission, you'll not only have a lot of useful experience and happy memories, but you'll also have a pretty useful tax-free gratuity. £1,500 after three years and £3,000 after five years.

Even if you're still at medical school, it's not too early to join us. Every year, we award about twenty-five Medical Cadetships to selected 2nd M.B. students. Each award pays for tuition fees and gives a salary of £1,814 a year in the rank of Surgeon Sub-Lieutenant. When you're registered, you're promoted to Surgeon Lieutenant and you begin your five-year commission.

Write now to Surgeon-Commander F. M. Kinsman, R.N., (724AA2), Dept. of the Medical Director-General (Navy), Empress State Building, London, S.W.6, and tell him your age and qualifications. In return he'll tell you more about the advantages of spending the first years of your career with the Royal Navy.

ONLY A FEW HOURS AWAY CANADA

*with years of
growth ahead*

Since 1867, when Canada was founded, enterprising and resourceful people from many lands have built this big, young country into one of the world's fastest developing industrial nations.

With a modern technological economy, sharing in the continuing economic development of North America, Canada already has one of the highest standards of living in the world. Yet Canada has its own distinctive way of life.

Rich in resources, largest country in the Commonwealth, second largest in the world, Canada has years of even greater growth ahead. And, of course, Canada is only a few hours away by air — six days by sea.

If you would like information about working and living conditions in big, young, growing Canada, please post the coupon below.

In treating angina, what do you want: safety or effectiveness?

or both?

Which β -blocker?

TRASICOR is outstandingly effective in preventing anginal attacks.¹

Its advantages over propranolol include:

- less risk of heart failure²
- less risk of bronchospasm in asthmatics³

The safety advantages of TRASICOR over propranolol are shared by practolol but practolol's relative efficacy in angina does not appear to be comparable.^{4, 5, 6}

Only TRASICOR combines maximum efficacy with safety advantages. Whenever angina is sufficiently severe to warrant the use of a β -blocker the logical first choice is now TRASICOR.

Lentizol

a significant improvement in antidepressant therapy

Amitriptyline is one of the most widely-prescribed of all psychotropic agents. But like any drug, it works properly only when taken as prescribed. And published work¹ clearly shows that as many as 48% of outpatients default in taking tranquillisers and antidepressants. Even among inpatients, some 19% default in this way². A recent study reported in the *Practitioner*³, indicates that a once-daily dosage regimen is less likely to be abused.

Lentizol:

simplifying dosage to reduce patient default

Lentizol is a sustained-release form of amitriptyline designed to be taken once daily, at bedtime. Thus Lentizol offers a new simplicity of dosage to reduce patient default. Instead of having the trouble – and possible embarrassment – of taking three doses during each day, the patient simply takes one dose at bedtime.

Often lessens the incidence of daytime drowsiness

Lentizol has a sedative effect within a short time after the daily dose is taken. This can be very helpful to those depressed patients who have difficulty in getting off to sleep. Its sleep-enhancing effect is spread over the early

hours of the morning, too, so that Lentizol also benefits patients whose condition causes early-morning waking. By daytime, Lentizol will continue to provide symptom relief until the next daily dose is taken, with less risk of drowsiness.

No increase in treatment cost

One Lentizol 50 mg. capsule at bedtime will replace treatment by one 25 mg. amitriptyline tablet t.d.s. This means that the daily cost of Lentizol is equivalent to the daily cost of standard amitriptyline.

Clinical assessment in progress

Clinical appraisals of Lentizol are being carried out by a number of investigators throughout the United Kingdom. Early results⁴ indicate that Lentizol produces an improvement in patients who would be expected to respond to amitriptyline. Lentizol is widely preferred because of the simple, convenient dosage regimen. Also some workers have found it possible to discontinue night-time sedatives.

Lentizol is supplied as capsules of 50 mg. and 25 mg. amitriptyline in a sustained release formulation, each strength in packs of 50 and 250. Further information is available on request.

Deflamene

in dermatitis

**the potent topical
corticosteroid with minimal systemic effects.**

Deflamene has been especially formulated to provide a highly-effective **topical** action.

Unlike other corticosteroids applied topically, Deflamene has little activity on entering the systemic circulation and the risks of pituitary-adrenal suppression are minimised.

Deflamene: Formocortal 0.025%
Packs: Cream and Ointment 10g; 50g.
Lotion 20ml.

Deflamene: Registered trade mark
